

How to save and share Animoji on iPhone, iPad

Animoji is one of the most loved features on the iPhone X. It is a version of the emoticon, which allows you to express expressions, facial movements with selected images.

Animoji is one of the most loved features on the iPhone X. It is a version of the emoticon, which allows you to express expressions, facial movements with selected images.

Animoji uses the camera before TrueDepth, simulating face movement with an animated character when you record audio messages. You can select characters, create an animoji and share it with friends. If you don't own an iPhone X, but still want to experience it, you can ask a friend to use iPhone X, create an Animoji and send it to you. You can then save and use it for other conversations.

Animoji way to save on iPhone or iPad

The process of saving Animoji into Photos application is like saving videos.

1. Open the **Messages** application on your iOS device.
2. Open **the conversation** with Animoji you want to save to your phone.
3. Touch **Animoji** .

Note: You can use 3D Touch to save photos to iPhone.

1. Press **the share button** in the bottom left corner.
2. Click the **Save Video** button.

How to share Animoji on social networks from iPhone and iPad

1. Open the **Messages** application, then select **the conversation** with Animoji you want to share.
2. Touch **Animoji** . Press **the share button** in the bottom left corner.
3. Select the application to share Animoji. Then press send.

Note: When you share an Animoji on a social network or standard MMS message, it will take the video format.

How to share Animoji on iPhone or iPad

With the Animoji saved in the library, you can share it like any other video. Implementation: Open the Photos app> touch the Album tab> open the video album> find Animoji want to share> touch it> touch the share button and share it as usual.
