

How to save battery for wireless mouse?

wireless mice have become popular because of their utility for users. However, because wireless mice use batteries to provide power to operate, how to save battery power is a problem that users should know.

- 1. Turn off the wireless mouse when not needed:** Almost every wireless mouse model has a small switch on the bottom battery cover, this switch is used to turn on or off the mouse. Although the wireless mouse supports automatic sleep mode after a few minutes of inactivity, we still need to turn off the mouse manually to save battery.
- 2. Use a wireless mouse on an appropriate surface:** Wireless mice can work on a variety of different surfaces, but those like glass will make the mouse consume more power and result in images. affect battery life. It is best to use a black mouse pad to limit slippery and battery consumption.
- 3. Select the type of battery used for wireless mice:** Should use the battery of famous brands on the market, if it is possible to recharge it even though the price will be quite high.

- 4. Keep a close distance between the wireless mouse and receiver:** The farther the wireless mouse is from the receiver, the more power it will consume. Therefore, do not keep them too far apart.
- 5. Using keyboard shortcuts also saves battery life for wireless mice:** Every time you move a wireless mouse or click, its laser sensor consumes battery, so combining with keystrokes Turning off will help save more battery.
- 6. Avoid interference with other electronic devices:** Surfaces made of metal and other wireless electronic devices may use frequencies that interfere with the wireless mouse you are using, causing the battery to drain. more wear. If this is the case, keep these electronics away from wireless mice.
- 7. Choose good wireless mice, reputable brands:** Basically, wireless mice of famous brands usually consume less battery than cheaper mice, sold on the market, because branded mouse products are often manufactured with

advanced technological processes and modern techniques.
