

# How to save offline viewing content on iPhone

Keep Everything application saves all content on iPhone website and view it offline whenever you want.

The bookmark feature on the browser will save the site for users to view when needed, but requires an Internet connection or WiFi. But with Keep Everything application, users can completely review the content saved on iPhone / iPad, without Internet connection.

Keep Everything features storing favorite content from links, images or text on Safari browser and can review anytime, even if offline device does not have network connection. The content when saved is stored on the application so users can open content in other devices via the Dropbox account synchronization function. The following article will guide you how to use Keep Everything application.

1. Sync bookmarks, extensions and other browser data between computers
2. How to use the Firefox Notes note utility
3. 6 best note apps for iOS
4. Instructions on how to set Notes notes password on iPhone

## Guide to viewing offline bookmarks on iPhone

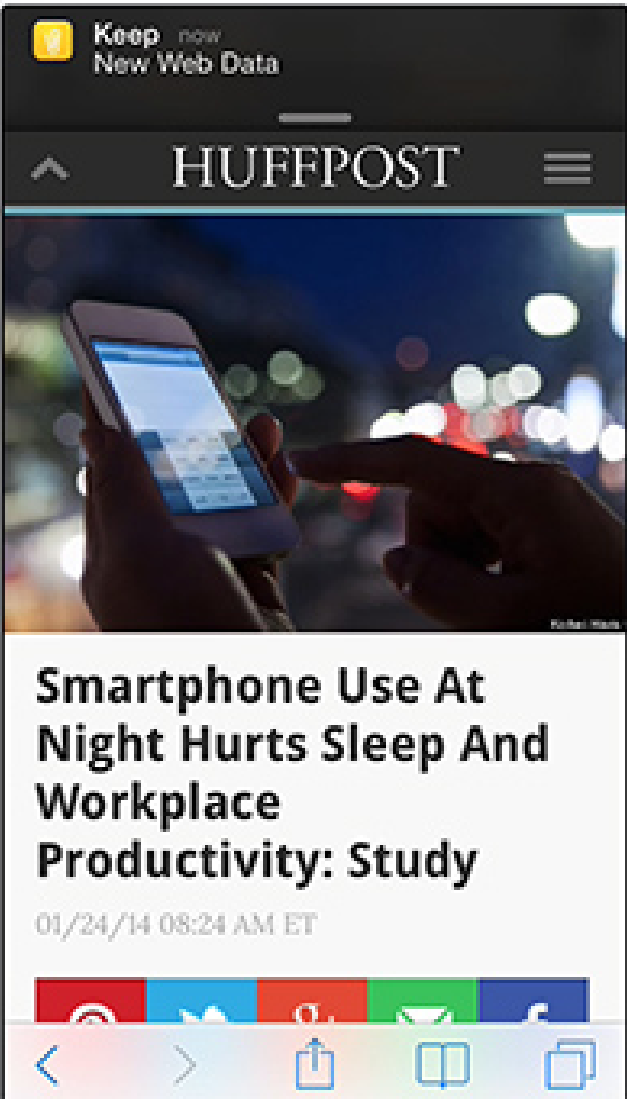

### Step 1:

Users click on the link below to download Keep Everything application for iOS or macOS.

1. Download Keep Everything iOS
2. Download Keep Everything Mac application

### Step 2:

Start the application as usual. The interface will first introduce the features of the application, click Next to skip. Then click the Dropbox Login button to save the highlighted content in the cloud service, or click Close to dismiss.

The screenshot shows a mobile browser interface. At the top, there is a notification that says "Keep now New Web Data". Below that is the "HUFFPOST" logo. The main content area features a photograph of a person's hands holding a smartphone, with a finger touching the screen. The article title is "Smartphone Use At Night Hurts Sleep And Workplace Productivity: Study", dated "01/24/14 08:24 AM ET". Below the title is a row of social media sharing icons (Twitter, Facebook, LinkedIn, Email, Print). At the bottom of the browser interface is a navigation bar with icons for back, forward, share, tabs, and home.

You can keep webpages and images by "Copying URL" or "Select & Copy".

[Skip](#)  [Next](#)

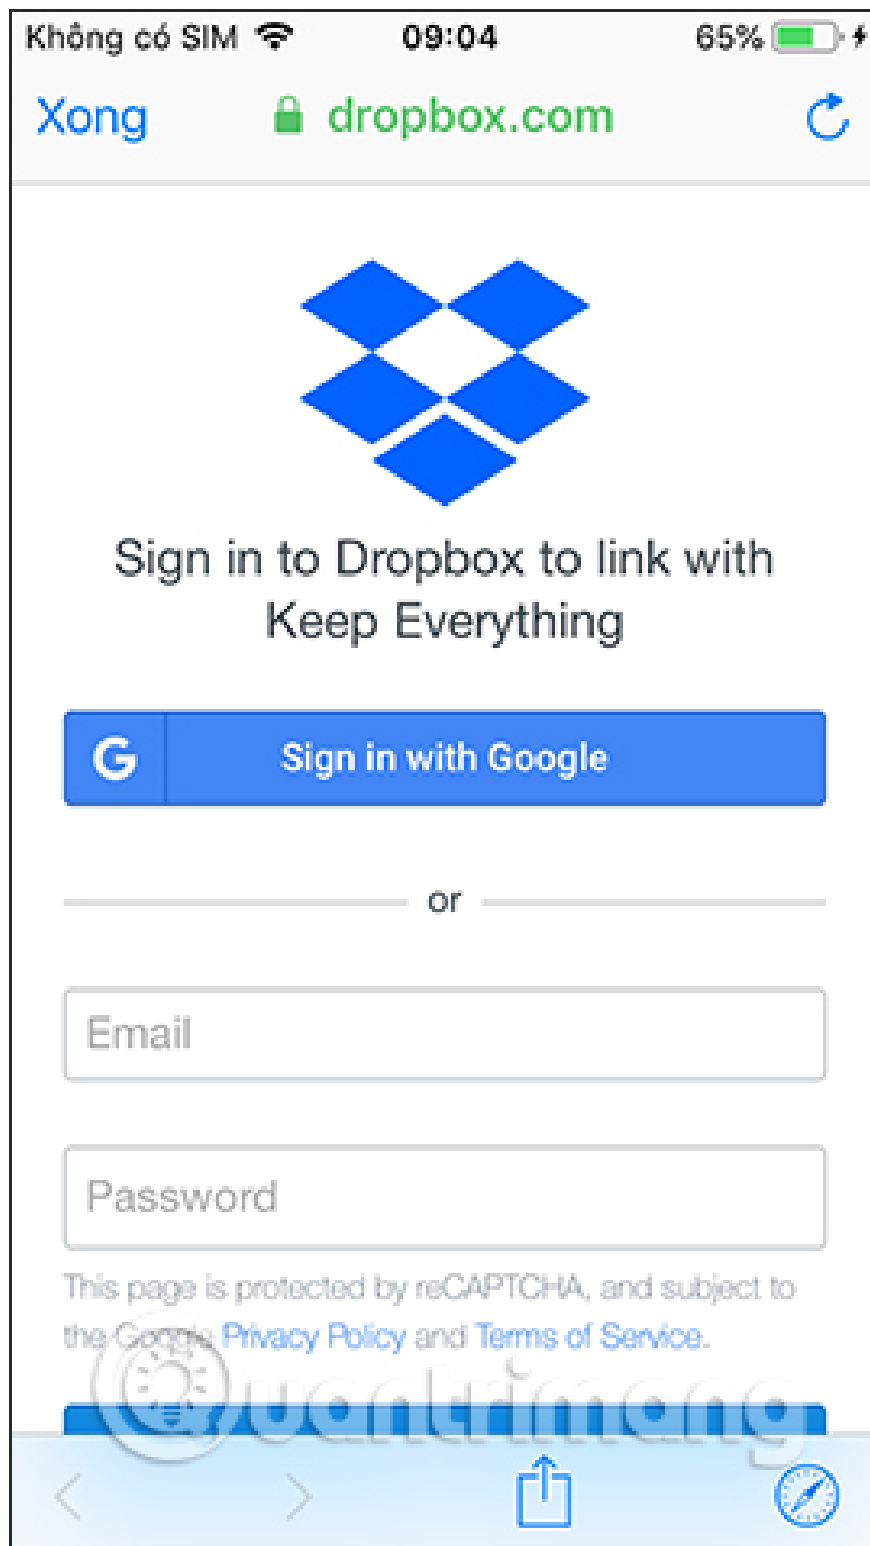

You can synchronize Keep Everything Data via "Dropbox" with your other Mac, iPhone and iPad.

Close

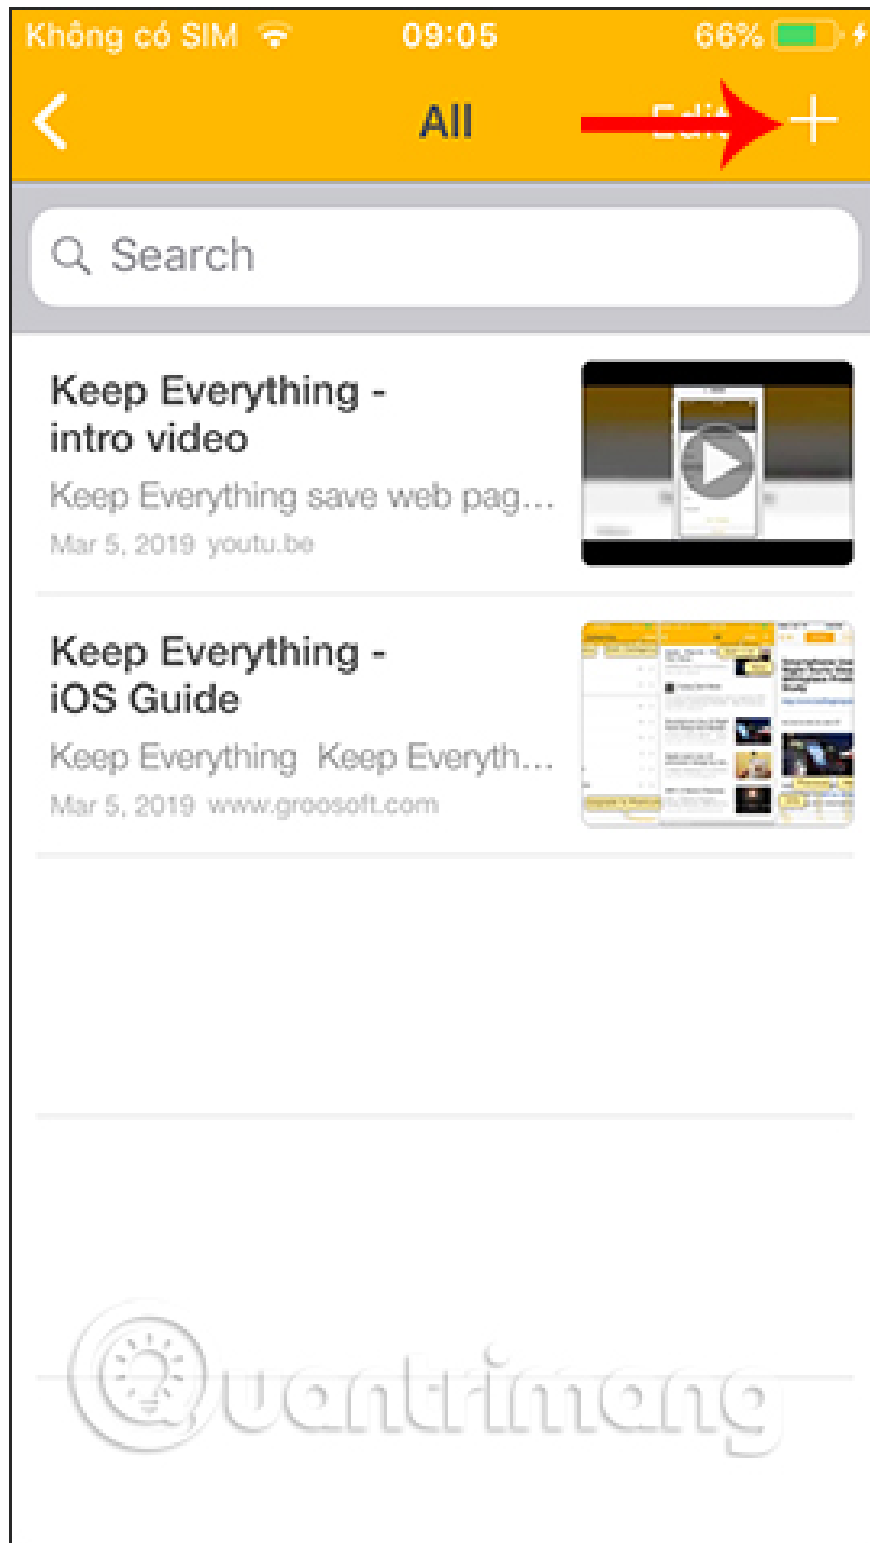

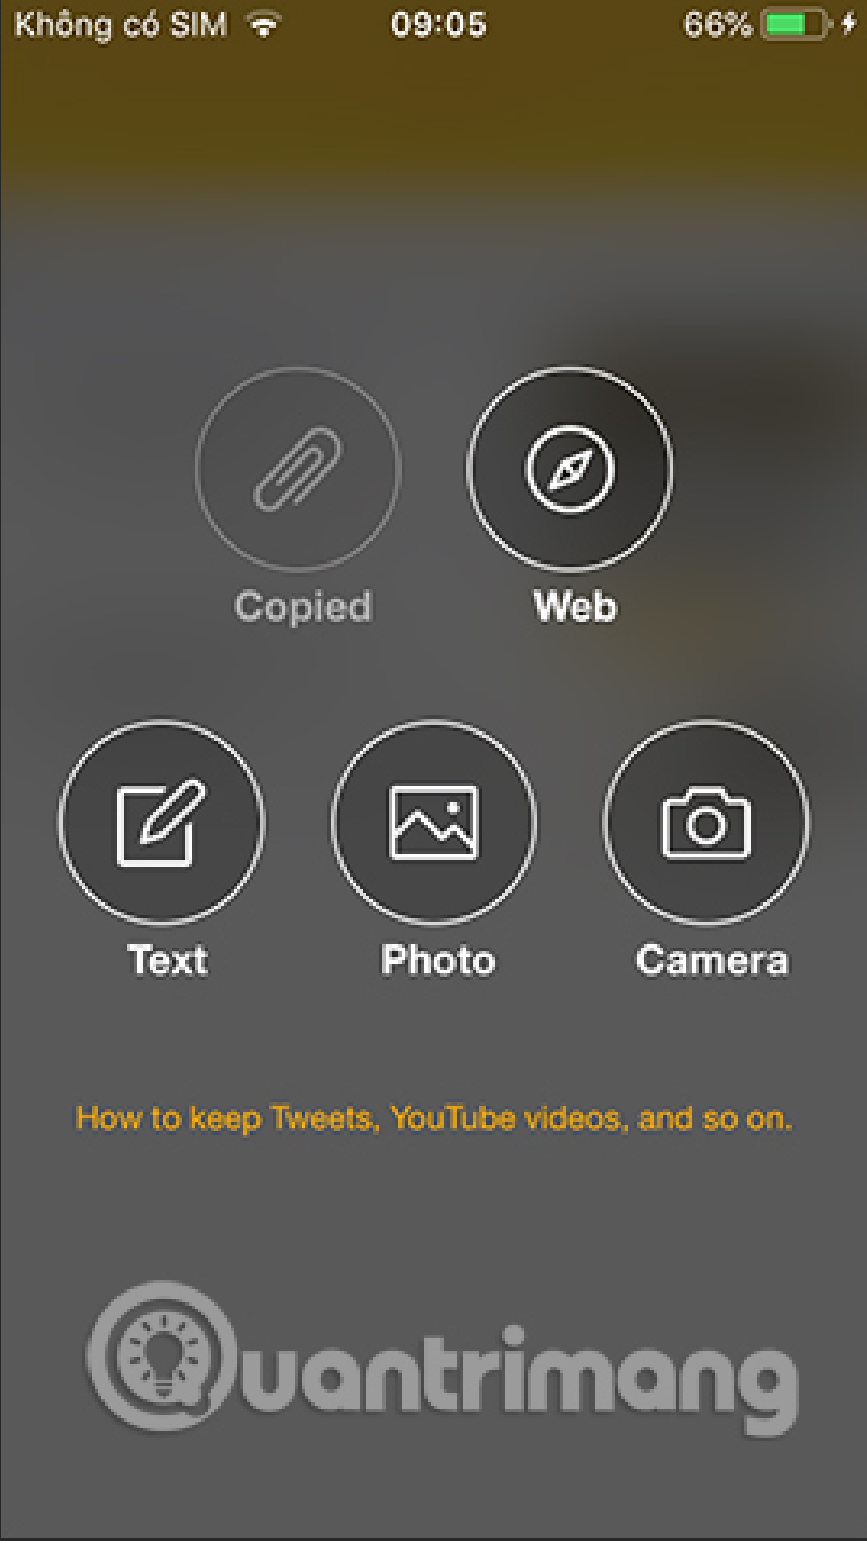

### Step 3:

Next we proceed to add content to Keep Everything via one of two different ways. At the application interface click on **the plus symbol** and select the content to save including:

1. Copied: Get the content in the cache.

2. Web: Content is the website. The application opens the Safari browser on your device to open the website you want to save and then click Keep.
3. Text: Save the new text or paste it.
4. Photo: Save images available.
5. Camera: Save the newly captured image.

The content you press save is displayed in the application's All interface.

Now to save content on Safari to Keep Everything, just **click the Keep Everything icon** in the share.

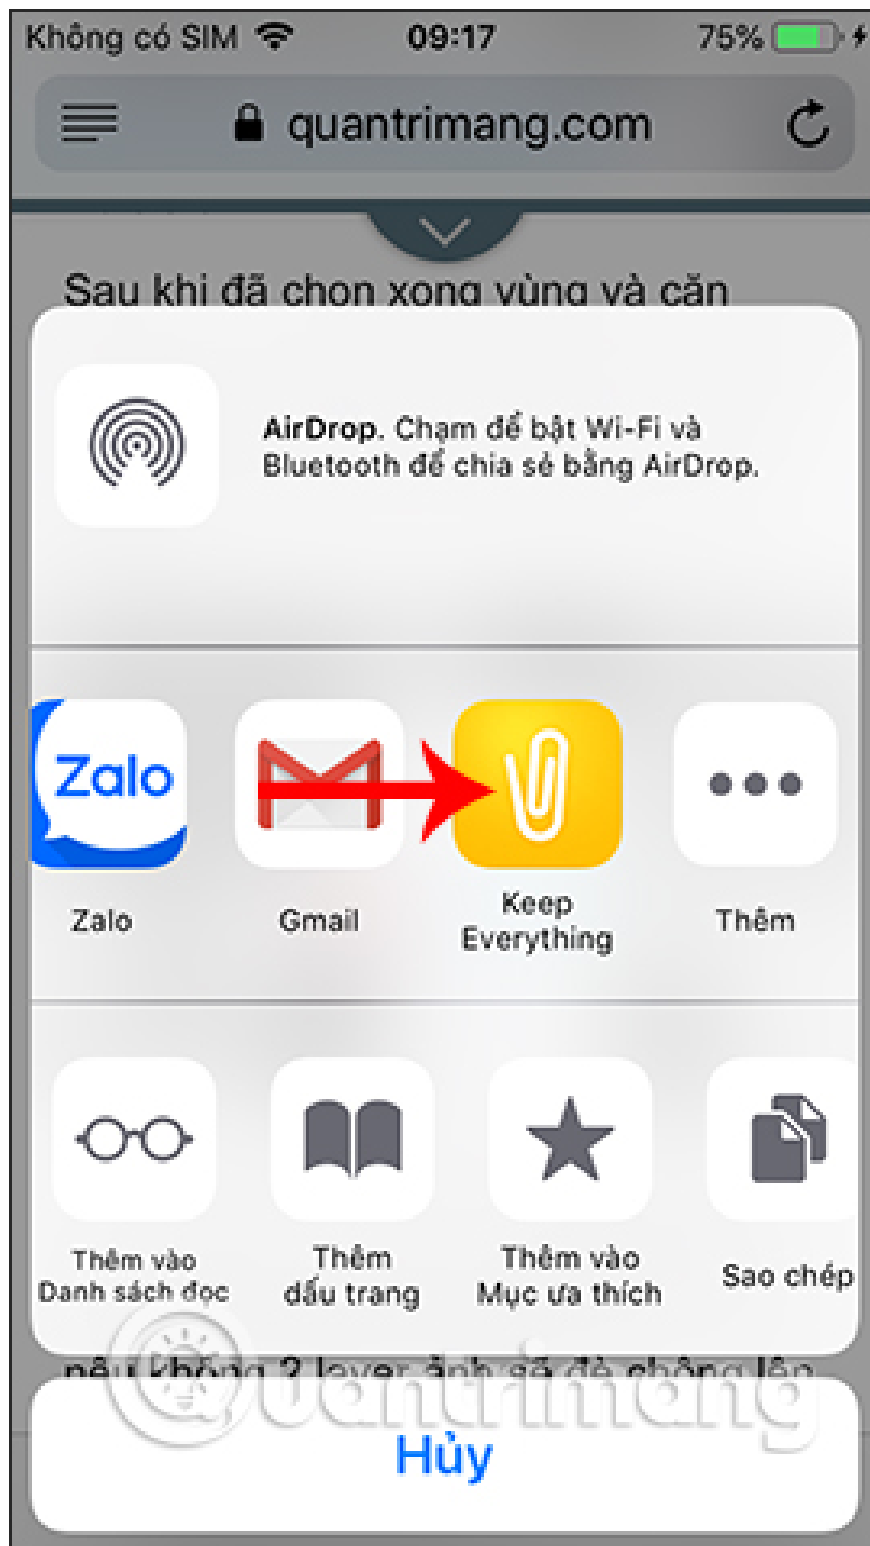

Sau khi đã chọn xong vùng và căn chỉnh, click chuột phải lên ảnh rồi chọn **Layer Via Copy** hoặc nhấn **Ctrl+J** để tạo layer mới cho hình ảnh tròn được cắt ra.

Kết quả sẽ có thêm 1 layer mới như hình dưới đây. Nhấn vào **biểu tượng con mắt ở layer ảnh gốc** để ẩn nó đi, nếu không 2 layer ảnh sẽ đè chồng lên nhau.

#### Step 4:

Return to the Keep Everything application to review the archived content. Clicking on the saved content will have two display options, Article and Web.

1. Article: Reader mode, only displays the main content and omits unnecessary components on the site.
2. Web: Display content like web version.

#### Step 5:

In the content displayed in Article mode when clicking on **the pen icon** will transfer the content to a plain text style so you can edit the content if you want. Click Save to save.

Click **the Aa letter icon** to change the screen light, font, font size, background color, . **Text i** to view article information, trash to delete saved content.

When the device does not have WiFi connection, the saved content will be converted to html style, does not support watching videos, connection links, or other content such as when viewing content with network connection.
