No matter how good you are at using Photoshop, if you don't know how to save high-quality, professional-standard jpg and png images in Photoshop, all your effort will be zero.

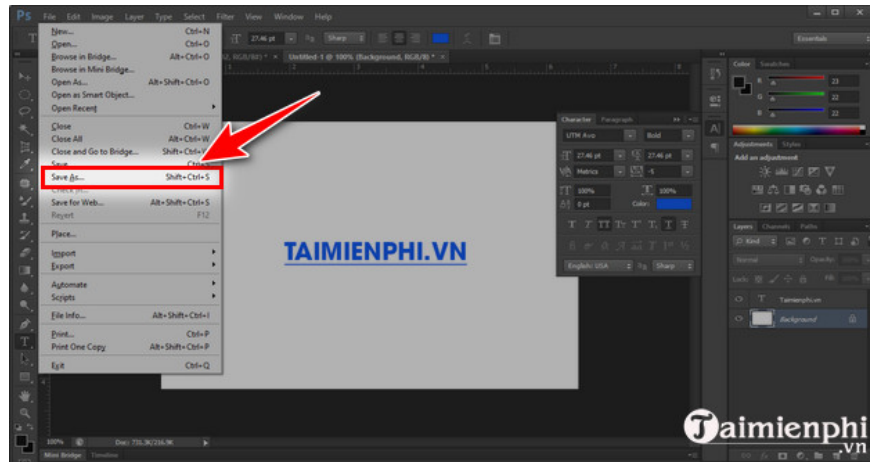

Therefore, never miss articles like the one below because it is basic but extremely important knowledge for anyone who is learning how to get the best quality when **saving photos in Photoshop** . Especially for those who need to print photos, it is really necessary. How do you usually save photos in Photoshop?

## HOW TO SAVE PHOTOS IN HIGH QUALITY PHOTOSHOP

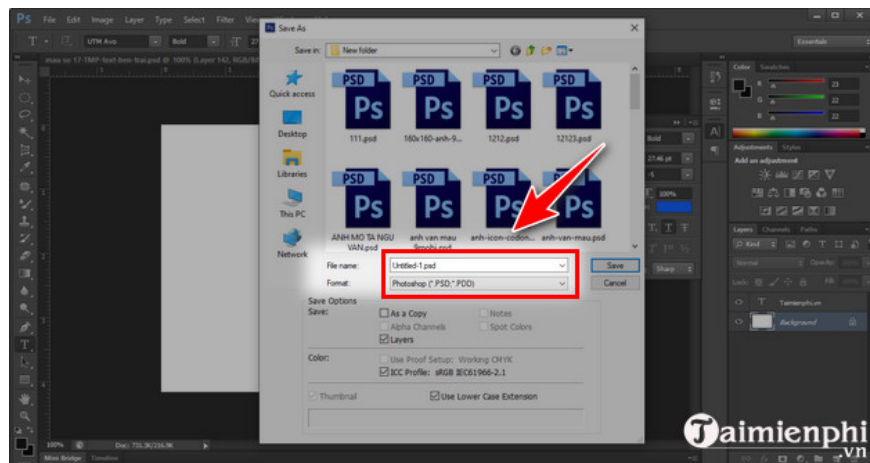

**Step 1:** To save a photo in Photoshop, click **File** in the upper left corner.

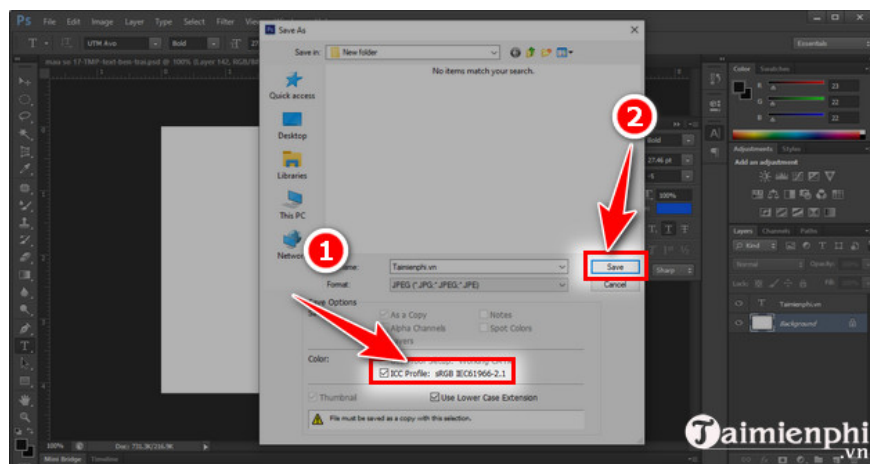

Then select **Save (Ctrl + S)** if you want the image to overwrite the old image or select **Save As (Shift + Ctrl + S)** to save another image in a certain folder. This is the case when you edit an old photo, but when creating a new photo, Save and Save As are similar.

**Step 2 :** If you choose **Save As** , Photoshop displays the following. Click on **File name** to edit the name of the image you want to save and click on **Format** to edit the format of the image.

**Note:** You choose the image format as jpg, check the ICC Profile sRGB IEC61966-2-1 black scaled section and then click save.

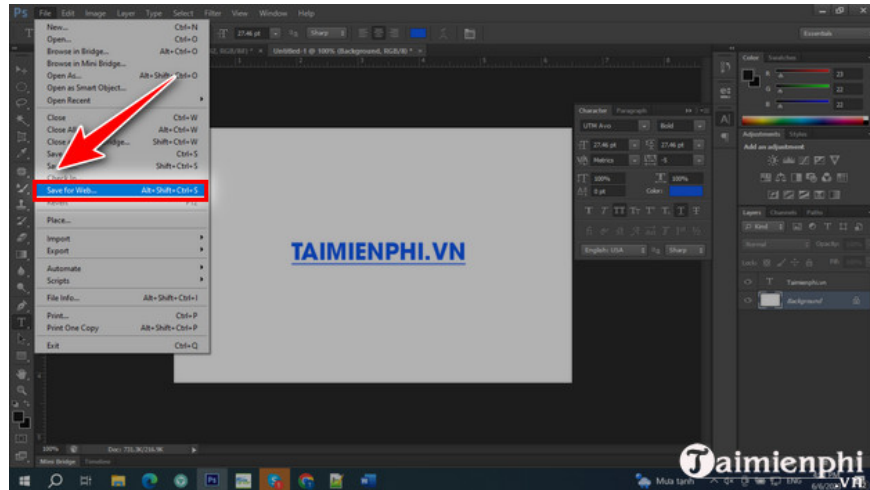

**Step 3 :** Adjust **Image Options** as desired and click **OK** to finish.

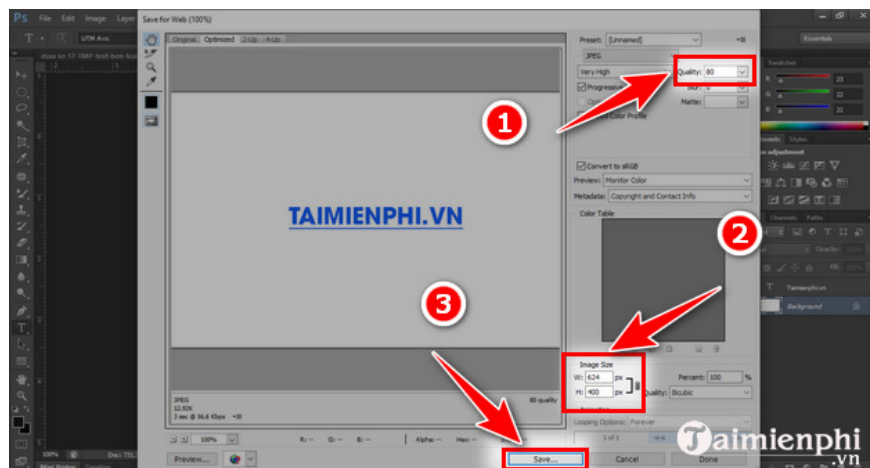

After the above operation, we can save images in Photoshop with high quality and professional for jpg and png formats.

## HOW TO SAVE PHOTOS IN PHOTOSHOP FOR THE WEB

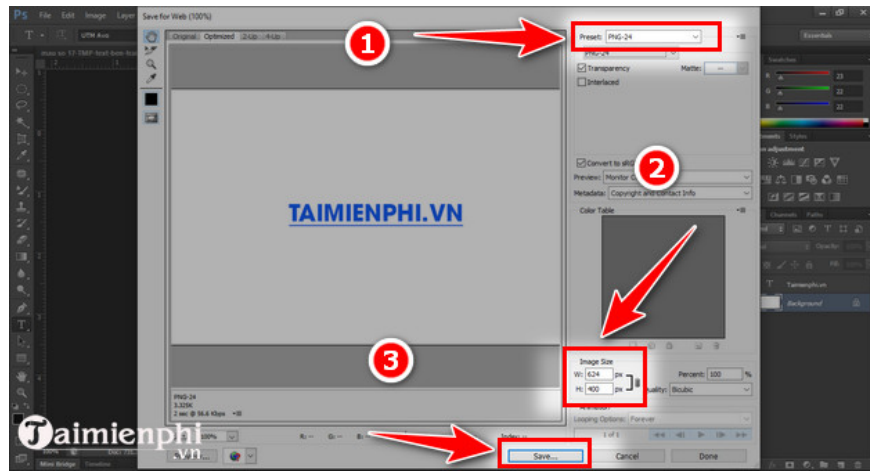

**Step 1 :** For those who want to save photos in Photoshop for the web, lightweight but with the most optimal quality, go to **File > select Save for Web. (Ctrl + Shift + Alt + S)**.

**Step 2:** If it is **JPG** format , remember to **push Quality to 100%**, adjust the size of the image and **select Save** to save.

**If it is PNG** format , you just need to **select PNG-24**, adjust the size of the image and then **Save** it.
