## Instructions for saving battery with AutoPowerOptionsOK

### Step 1:

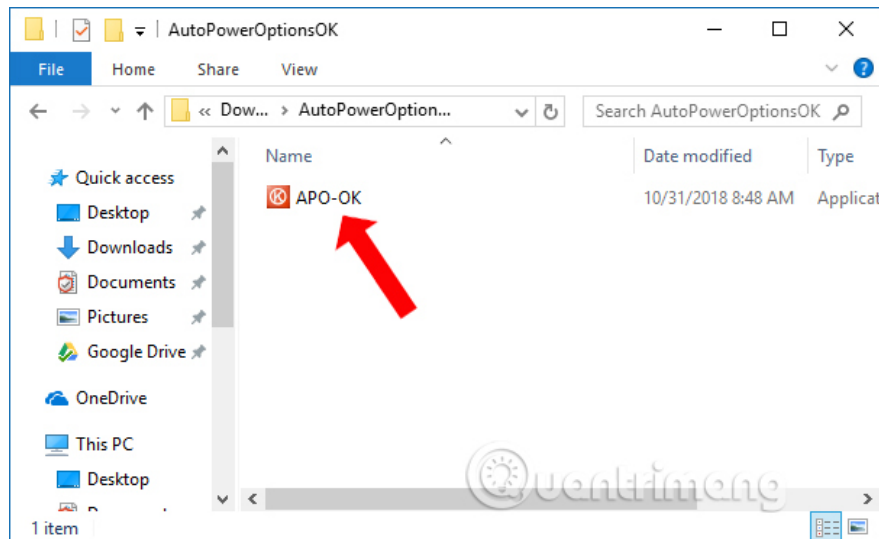

You access the link below to download the AutoPowerOptionsOK tool. There will be a protable for the download.

1. <https://www.softwareok.com/?seite=Microsoft/AutoPowerOptionsOK>

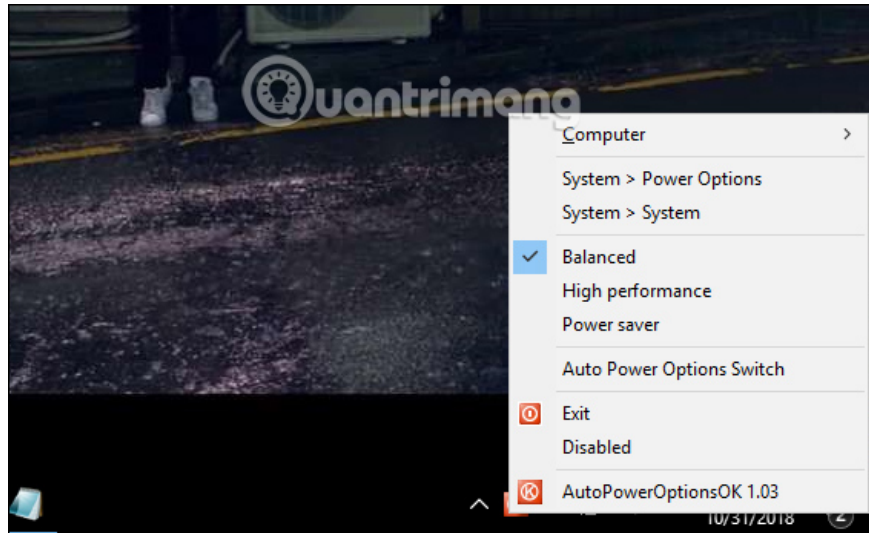

## Step 2:

Then you **unzip the downloaded file** and click on the executable file. AutoPowerOptionsOK does not need to be installed as usual.

When installing, right-click on the tool icon in the tray, the system will see the tool menu.

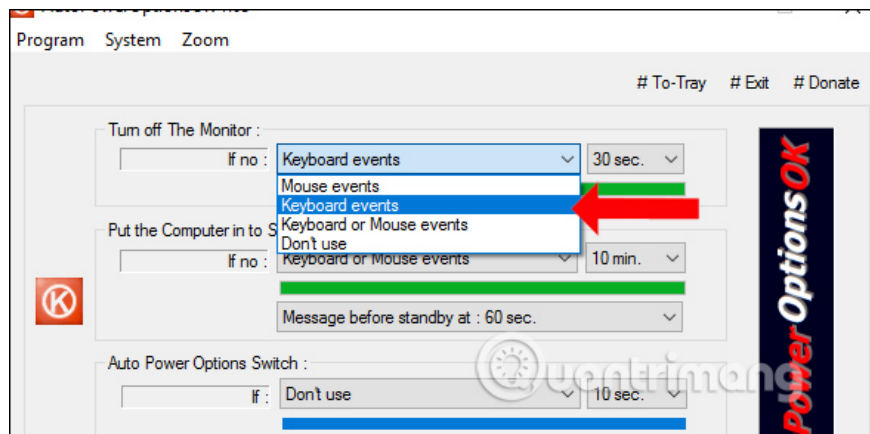

### Step 3:

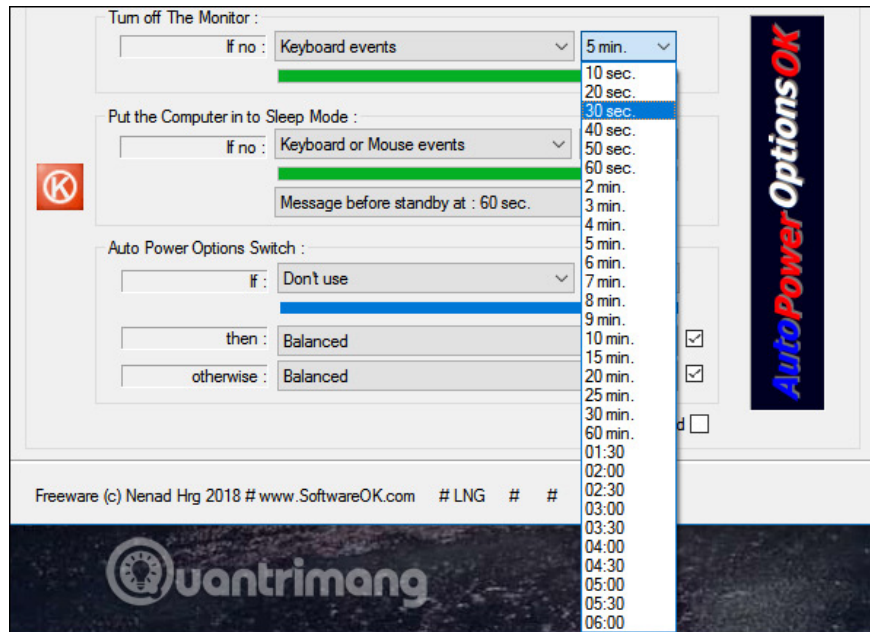

In the main interface of the tool, there are 3 main options for setting up battery saving mode for laptops.

At **Turn off The Monitor**, we will have the option to **turn off the screen** when not performing actions on the computer with time for action.

1. Mouse events: Mouse action.
2. Keyboard events: Keyboard action.
3. Keyboard or Mouse events: Action of keyboard and mouse.
4. Don't use: Do not use.

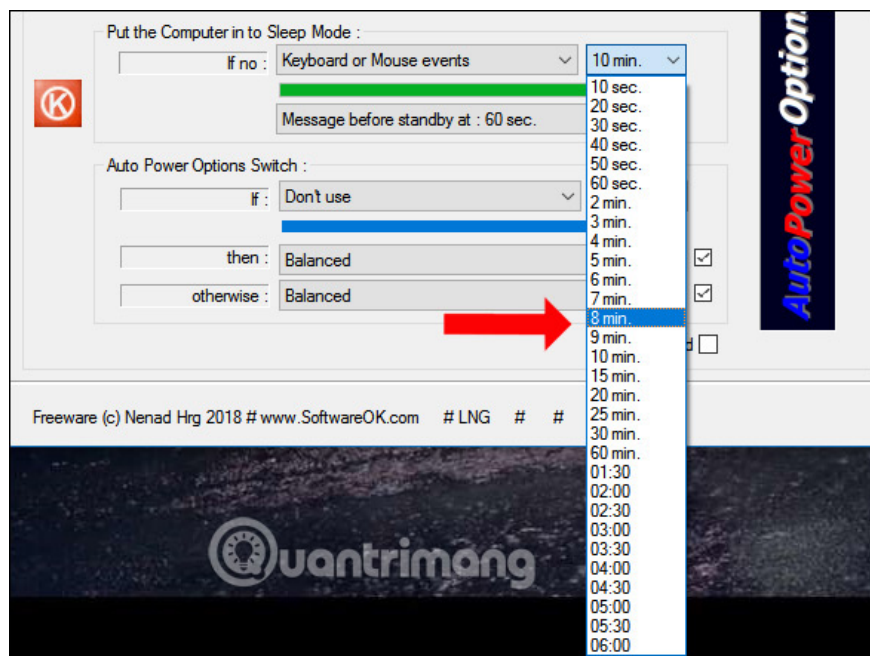

Besides the option of time with a minimum of 10 seconds and a maximum of 6 hours.

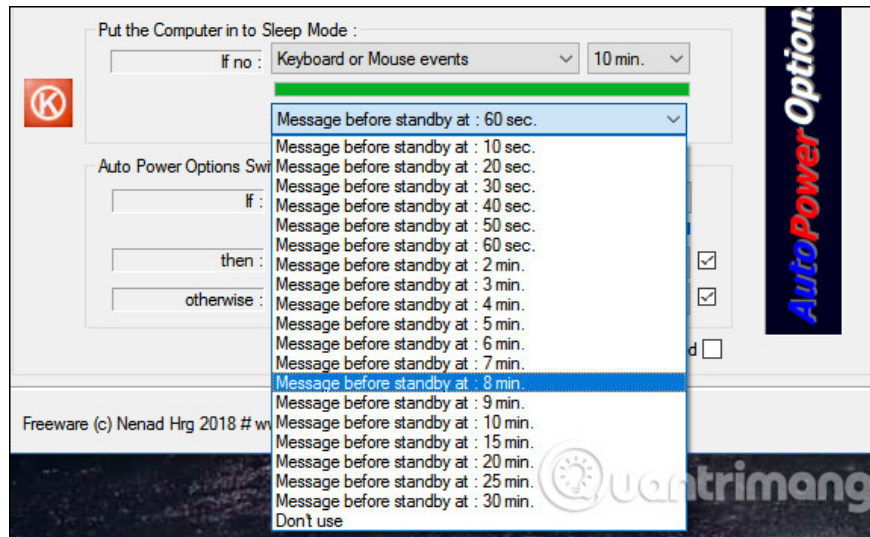

#### Step 4:

At **Put the Computer in to Sleep Mode**, users will customize it to switch the device to **Sleep state**, if there are no actions on the computer including the mouse and keyboard actions as above.

There will also be time to choose to put the device into Sleep mode.

In addition, the tool adds **notification mode** before switching to Sleep mode, waiting for some time before entering sleep mode.

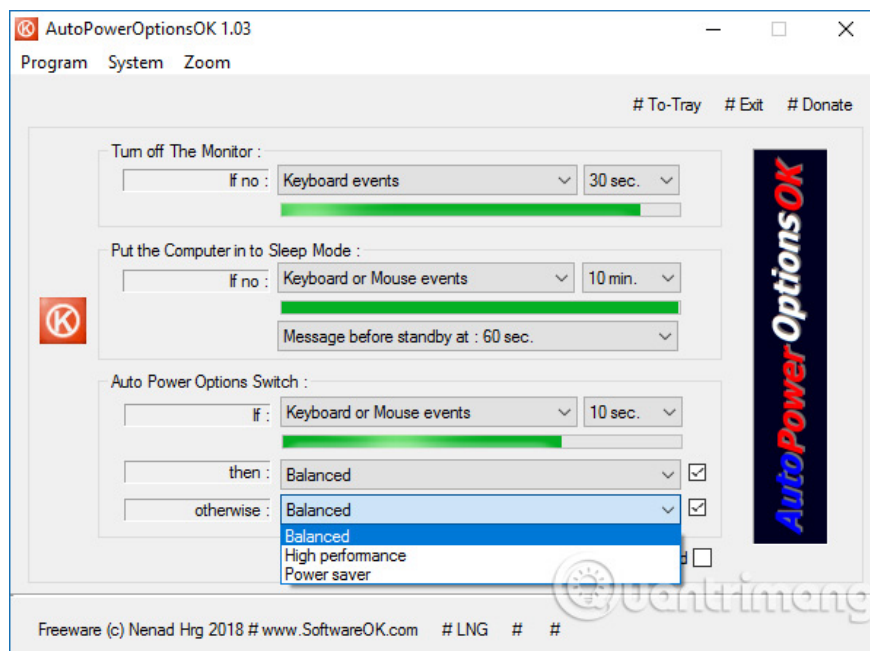

### Step 5:

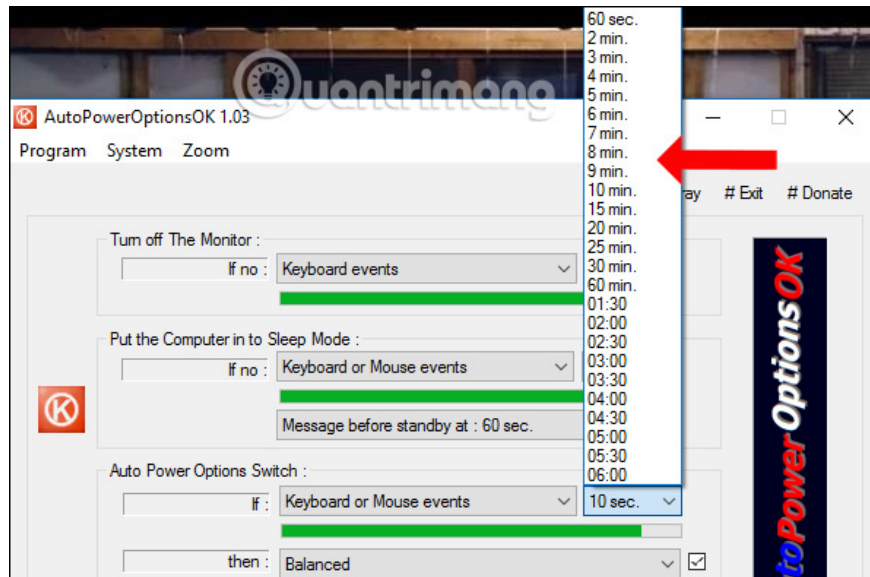

The **Auto Power Options Switch** section will **automatically switch** between battery saving modes, based on computer activities.

For example, if you use the mouse and keyboard for 10 seconds (If), the laptop will be in the default battery mode Balance (then). If there is no action, it will switch to Power Saver (otherwise) mode to save battery as much as possible.

Users can choose between actions on the computer, battery saving modes to switch automatically after the set time.

The maximum selection time is 5 minutes and a minimum of 10 seconds.

## Step 6:

In case you want to exit all settings just press Exit on the tool interface.

AutoPowerOptionsOK can be seen not only with basic battery saving modes, but also with other options. Users can set the screen to turn off automatically, switch to battery saving mode after a certain time.
