

# How to scan virus files ZIP, RAR with ZipeZip

ZipeZip will scan Zip and rar files to ensure safety before users download.

When you download files from other websites to your computer, it is necessary to use virus scanning software to check the safety of the file, to avoid viruses from entering your computer. ZipeZip is an online scanning site for Zip, Rar, etc., alerting you if the file has a problem before you unzip and install it. We do not need to register for an account that can be used to scan Zip, rar, etc., the viruses below will guide you how to scan zip, rar files for viruses on ZipeZip.

## Instructions for scanning compressed files virus on ZipeZip

### Step 1:

Users access the homepage of ZipeZip by following the link below.

<https://zipezip.com/>

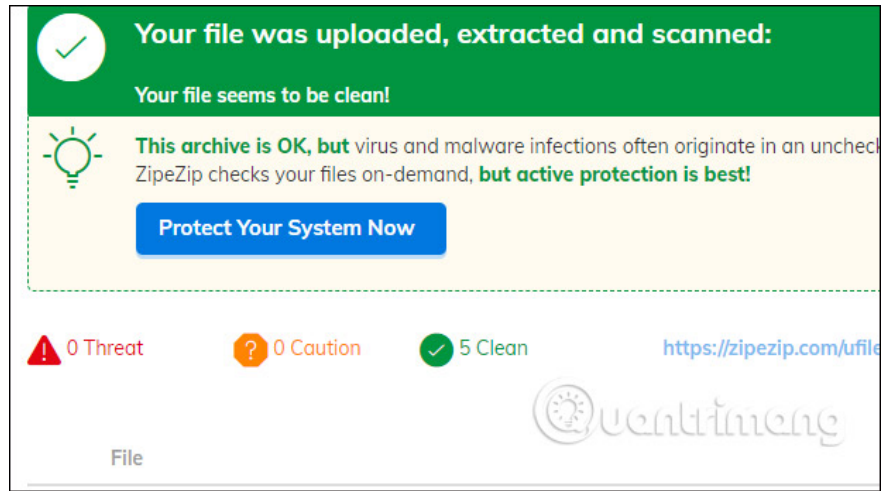

At the interface of the page click on **Select file** to download the compressed file contained in the computer. The website supports downloading compressed files up to 200MB in size. Then we click Upload to upload the file to the server.

### Step 2:

Immediately after that the file was checked and scanned for viruses. The time it takes for a file to be scanned or slow depends on the size of the file it has uploaded.

Results show with the first 3 levels of alerts. If a file has a red exclamation mark symbol (Threat) which is very dangerous and threatens the safety of your computer, there is a yellow question mark symbol (Cautions) that is suspicious, need to be careful when installing and if the file has a green tick (Clean) icon, that file is completely safe.

The screenshot displays a file scanning interface. At the top, a green banner with a white checkmark icon reads "Your file was uploaded, extracted and scanned:" followed by "Your file seems to be clean!". Below this, a yellow box contains a lightbulb icon and the text: "This archive is OK, but virus and malware infections often originate in an unchecked archive. ZipeZip checks your files on-demand, but active protection is best!". A blue button labeled "Protect Your System Now" is positioned below the yellow box. At the bottom, a summary shows "0 Threat" (red triangle), "0 Caution" (yellow question mark), and "5 Clean" (green checkmark). A URL "https://zipezip.com/ufile" is visible on the right, and a "File" label is at the bottom left. A watermark "Quantimeng" is present in the bottom right corner.

If your compressed file has many files, then the website will type each file, and then you can choose to download the file safely to your computer. The site will save files on the server for a few hours before deleting so you can reload as needed. Link to access the file above.
