

How to search Spotify playlists on Copilot

Copilot has updated the Spotify plug-in so users can immediately experience the playlist search feature from Copilot.

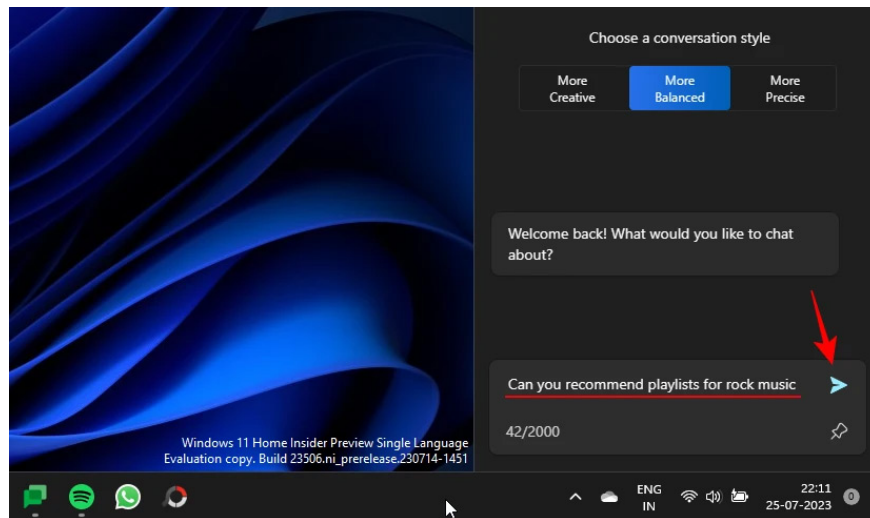

Copilot has updated the Spotify plug-in so that users can immediately experience the Spotify playlist search feature on Copilot. When users enter a playlist search request, Copilot can provide up to 4 playlist suggestions for each user request entry of any music type. The article below will guide you to search for Spotify playlists on Copilot

Instructions for searching Spotify playlists on Copilot

Step 1:

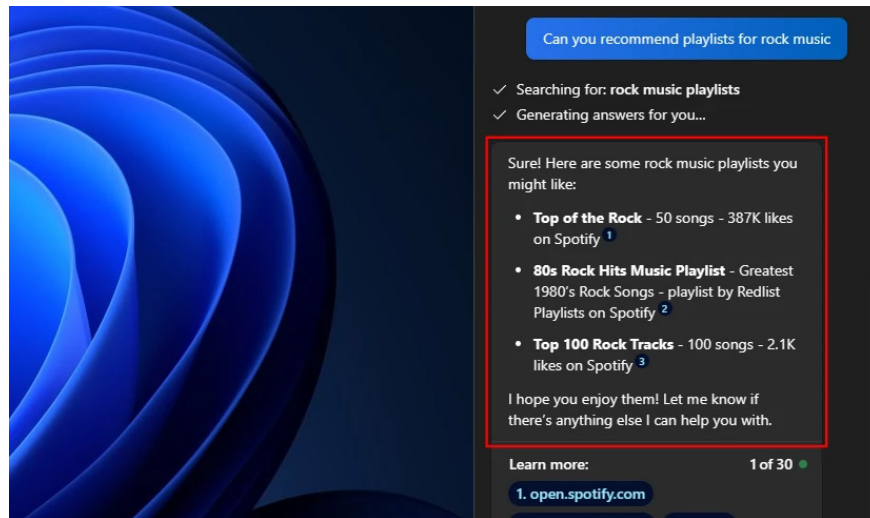

First, at the Windows interface, click **the Copilot icon on the Taskbar** or press Win+C to open.

Next display the Copilot interface on the computer. Here the user **enters a request to search playlists on Spotify** for a certain music genre that they want on Copilot.

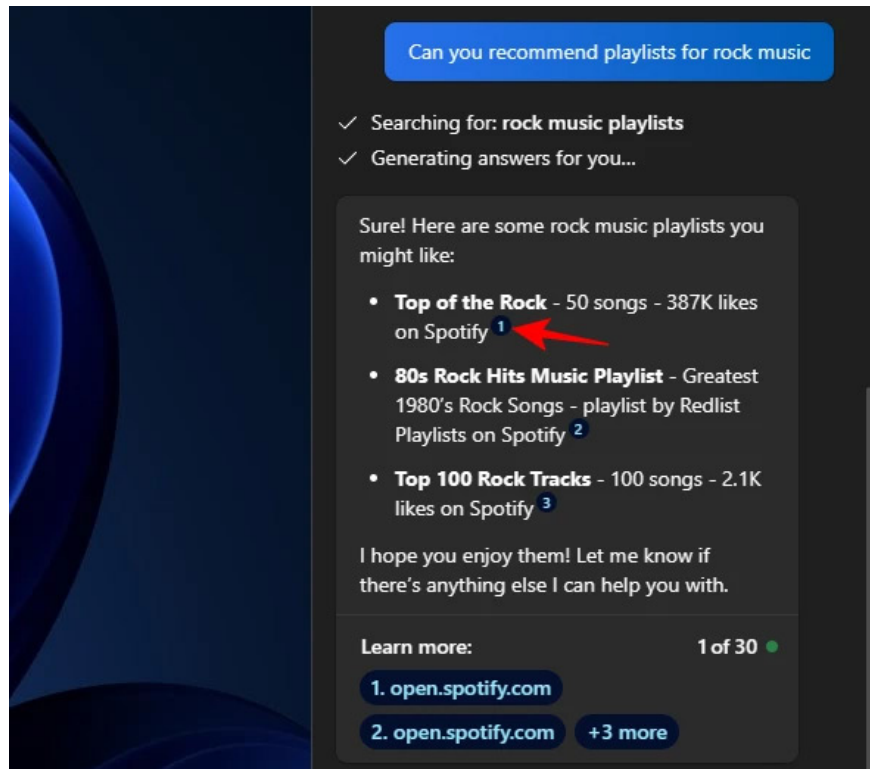

Step 2:

Soon you will see **suggestions that Copilot sends you** with the on-demand music playlists you entered.

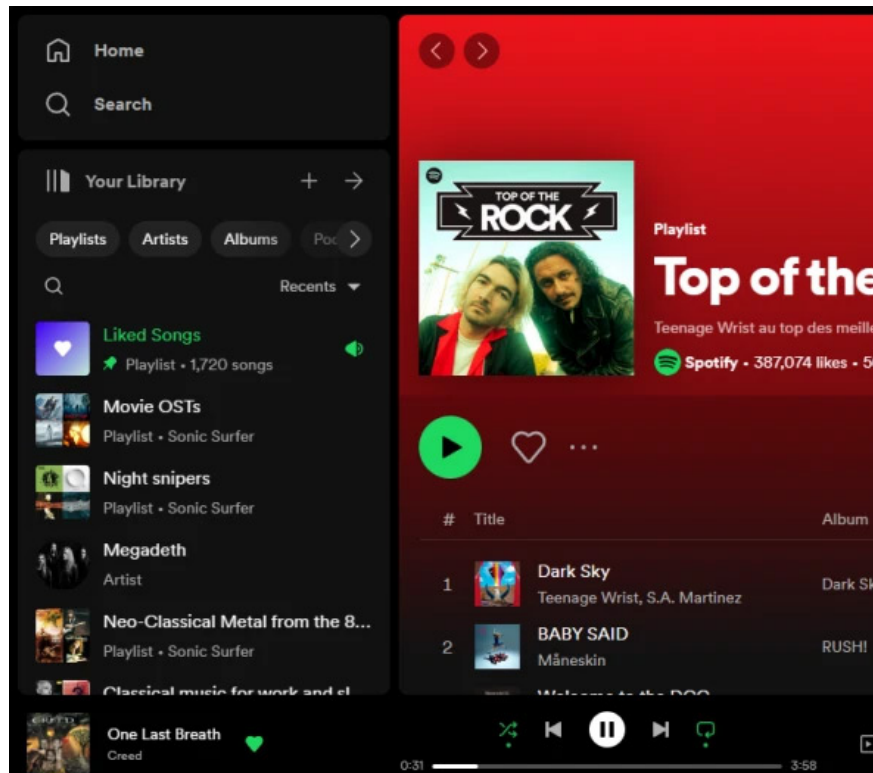

Step 3:

In this list of suggestions, **click on the link to open the playlist on Spotify** .

The Edge browser will immediately open the Spotify playlist for you to enjoy.

Note, Copilot only recommends playlists created by other users. So that Copilot can understand your question better, we need to add the keyword 'on Spotify' or 'Spotify' in the request content when entering.
