

# How to secure bookmarks on Google Chrome

Incognito mode on Chrome browser allows you to surf the web without saving history or browsing data. However, this feature is not enough to completely protect your information. If you want to save bookmarks discreetly even in incognito mode, refer to the security tips below.

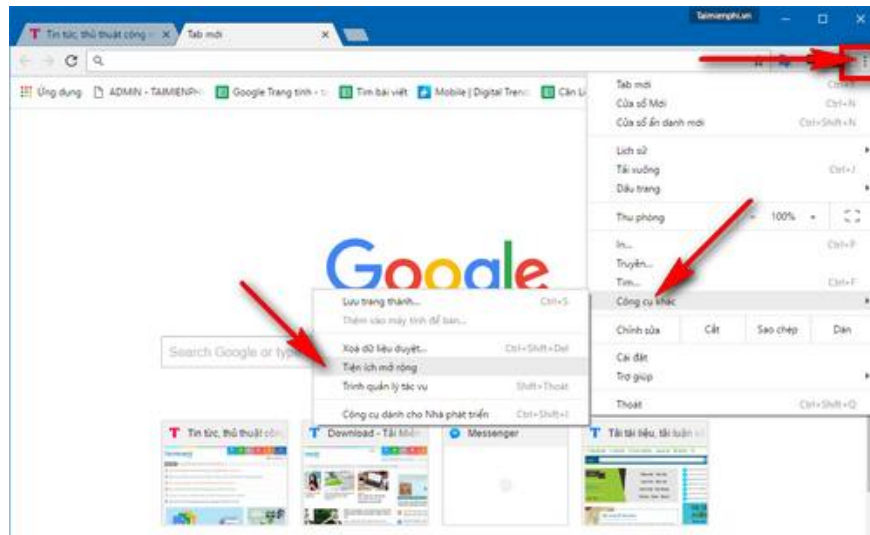

**Hush** is a Chrome browser extension that works exclusively in incognito mode. It allows you to save bookmarks securely by encrypting them and requiring a password to access them.

## How to secure bookmarks on Google Chrome

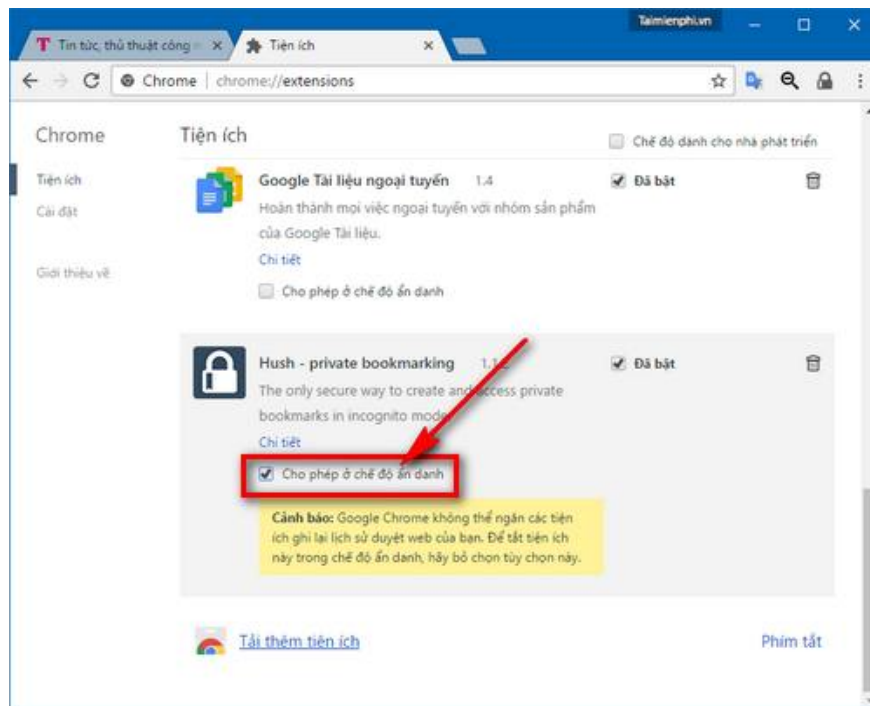

*Step 1:* Download and install the extension here: [Download Hush for Chrome](#)

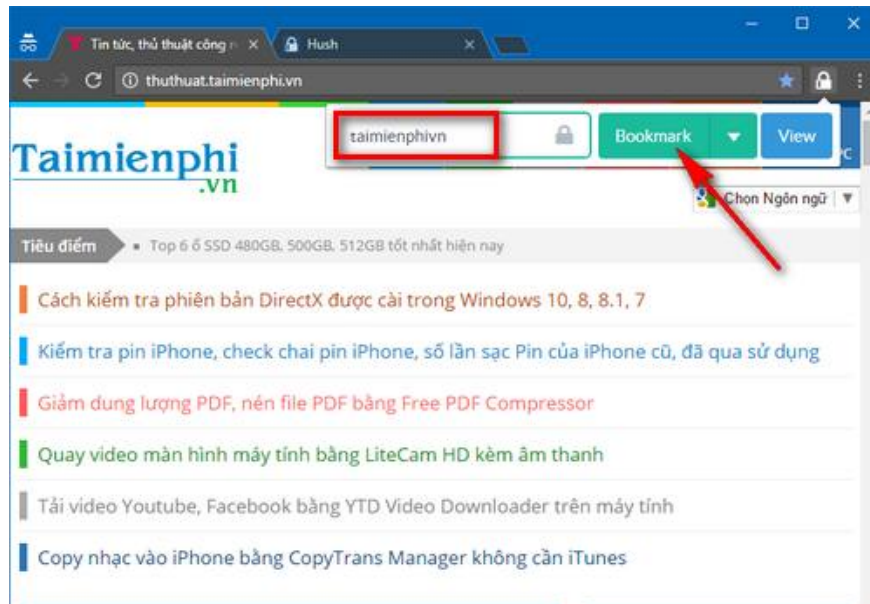

*Step 2:* On the browser, click the three-dot icon in the upper right corner. Select **More tools ? Extensions** .

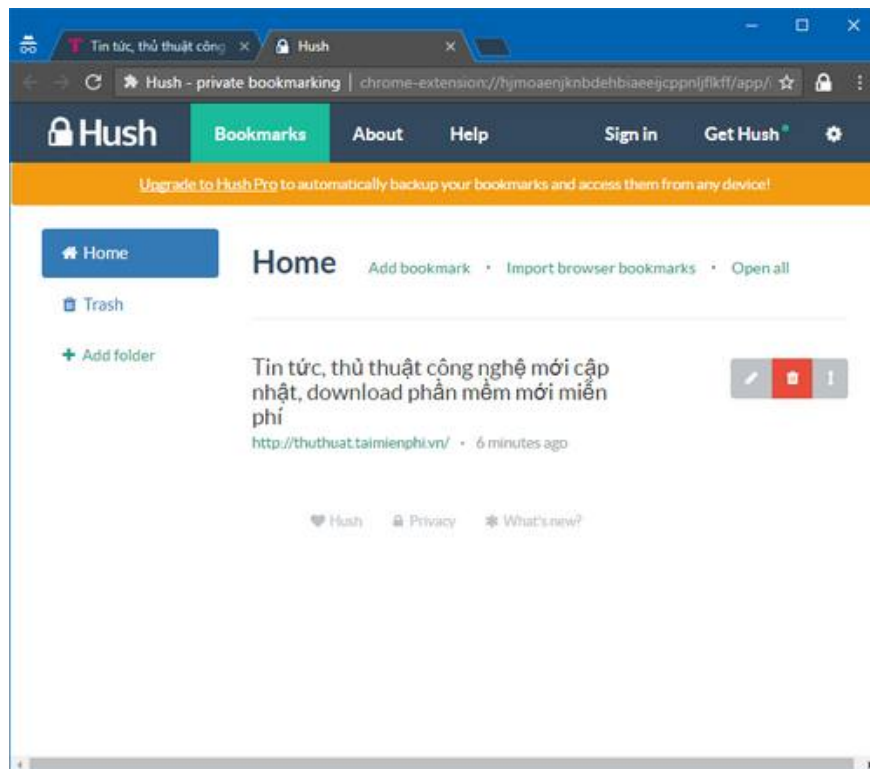

*Step 3:* In the **Add-ons** management window, find the **Hush** extension and check Allow in incognito mode to enable bookmark security in incognito mode.

*Step 4:* Press **Ctrl + Shift + N** to open a browser window in incognito mode. Here, access your favorite website, click on the Hush icon (lock icon), set a password and select **Bookmark**.

*Step 5:* You will be redirected to the bookmark list management page saved in the Hush extension, instead of saving directly on the browser as usual.

Guide to secure bookmarks on Google Chrome helps you store them with a secure password, protecting your favorite websites from being accessed by others.

In addition to using Hush to secure bookmarks, **locking your Google Chrome profile with a password** is also very important to protect your account and data when using this browser. Good luck!
