

How to see total number of posts on Facebook

Facebook has just updated its app interface, changing the interface of your account information and many others, including displaying the total number of posts.

Facebook has just updated the application interface, changing the interface of your account information and many others, including displaying the total number of posts. Accordingly, when you access any Facebook account, whether it is a friend or a stranger, you will see the total number of posts currently on their account page, including public posts and posts in other modes. Let's see how the total number of posts on Facebook is displayed and how the Facebook account interface has changed in the article below.

Instructions for viewing total number of Facebook posts

First, you **need to update Facebook to the latest version** on both Android and iOS. Then you can access your friends' or your own accounts, and you will immediately see the total **number of posts on your Facebook account** .

When you access your friend's Facebook account, in addition to the total number of posts, it also **shows common groups that both people participate in**, or common friends if any.

Menu

A list of all groups that 2 people are in together is listed and displayed in full by Facebook.

Currently the total number of Facebook posts has been updated for all accounts and is currently only applicable to the mobile version.

If the total number of posts does not appear after updating Facebook, try exiting the application and restarting it.
