2. How to check Internet speed with cmd command
3. Speed ??up Internet connection by VPN virtual private network solution

Instructions for testing strong or weak Wi-Fi waves on Android

Step 1:

To be able to check how strong or weak Wi-Fi waves are on Android, you first need to download and install the Wifi Analyzer application to your device.

1. Download Wifi Analyzer for Android

Step 2:

Opening the application will immediately see the network quality analysis chart, with nearby Wi-Fi points. Specifically, the tool will measure the stability of the Wi-Fi line around your area with two bands of 5GHz and 2.4 Ghz.

The yellow wave column is your Wi-Fi wave. As shown in the image below, the wave that the Network Administrator is using on the Android phone has a low level of wave as other Wi-Fi waves.
