

How to send bulk emails on Apple Mail

One of the fastest ways for you to email a group on your iPhone is to create a contact with an email group that you email regularly, such as a business exchange.

One of the fastest ways for you to email a group on your iPhone is to create a contact with an email group that you email regularly, such as a business exchange. Then we just need to select the group to send bulk emails on iPhone. So, although the Apple Mail application does not have a mass email feature, we can also use the way below to send emails to the group. The following article will guide you to email groups on Apple Mail.

Instructions for sending mass emails on Apple Mail

Step 1:

First, click on **the Contacts application** then click on **the plus icon** in the top right corner. Next in the interface to create a new contact, click on the **add email item** to enter the email for the person you want to send.
