

# How to send files from Google Drive, Dropbox on Zalo PC

On the new version Zalo PC has allowed users to send data from Google Drive or Dropbox, when you just need to login your personal account is done.

Sending data on computer Zalo has now become extremely simple and easy. Especially in the new version update Zalo on the computer, users can send data from Google Drive and Dropbox services.

Accordingly, this new feature will allow you to log in Google Drive or Dropbox account right on Zalo on PC , then select data to send to friends or in the chat group Zalo . The feature of sending data has been applied on most chat services such as Messenger, Viber, Zalo, . on both the computer version and the phone application. But integrating more cloud storage services like Google Drive or Dropbox right in the chat interface is currently only available on Zalo PC.

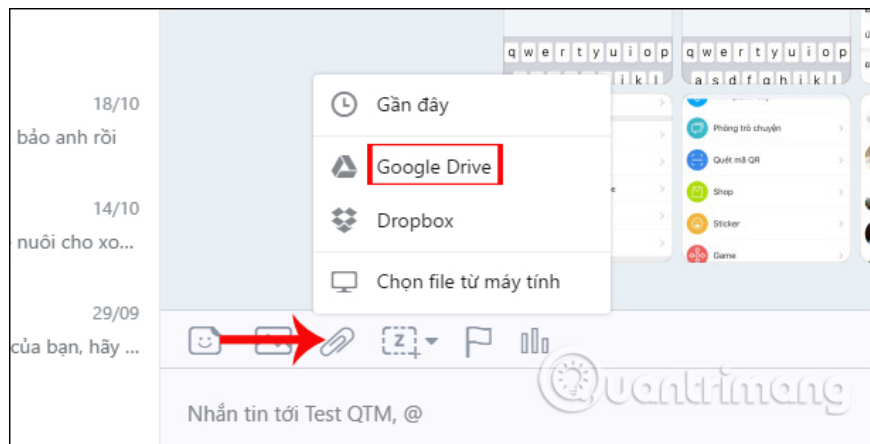

This makes it very convenient for users, when we can send data from a good computer on Google Drive and Dropbox. The following article will guide you how to send files on PC Zalo from Google Drive, Dropbox.

1. Download the latest version **Zalo PC**

## 1. Send data from Google Drive on Zalo PC:

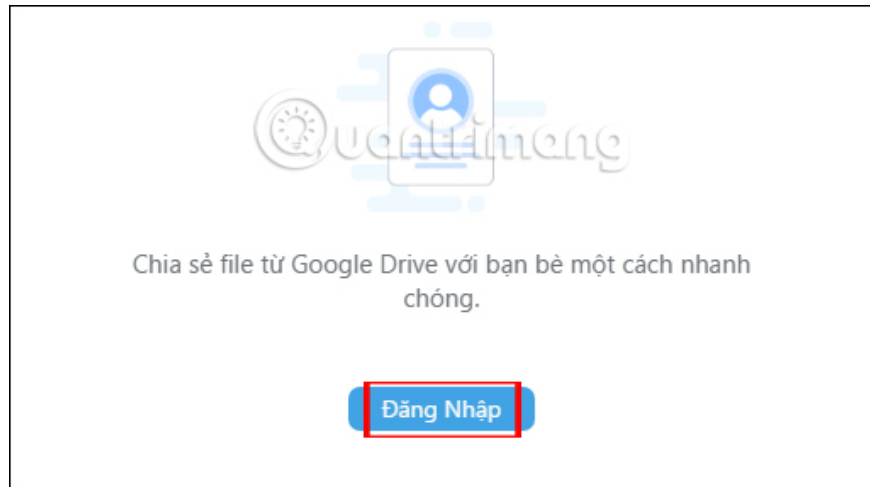

### Step 1:

At the chat interface with friends or in the chat group Zalo, click select and **pin clip icon** as shown below. Then click on **the Google Drive icon** in the list.

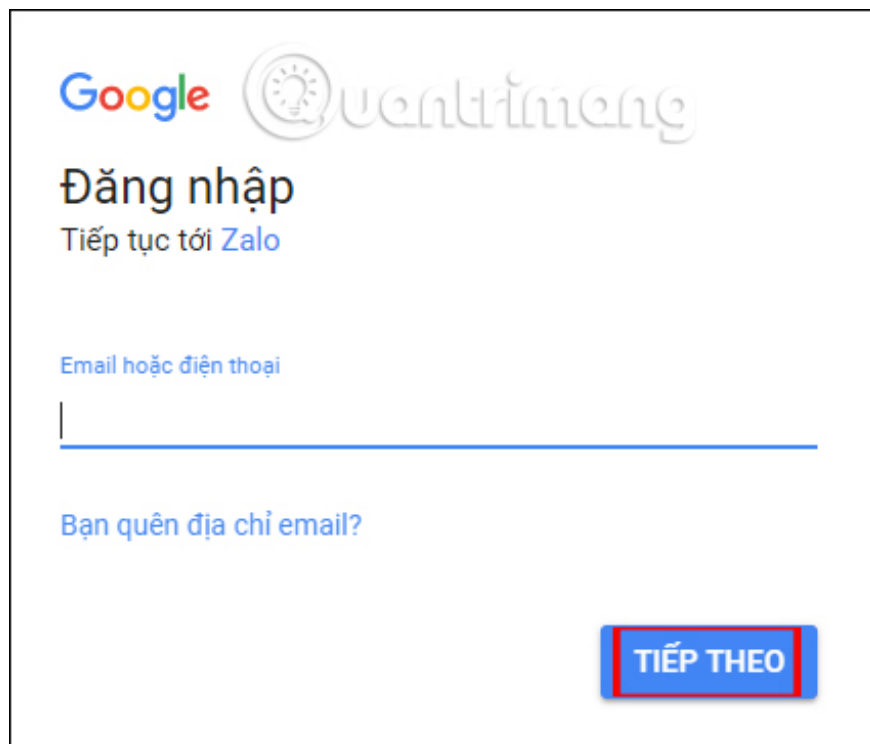

### Step 2:

Next, appear the login interface of Zalo account, click on **Login** button to open personal Google Drive account.

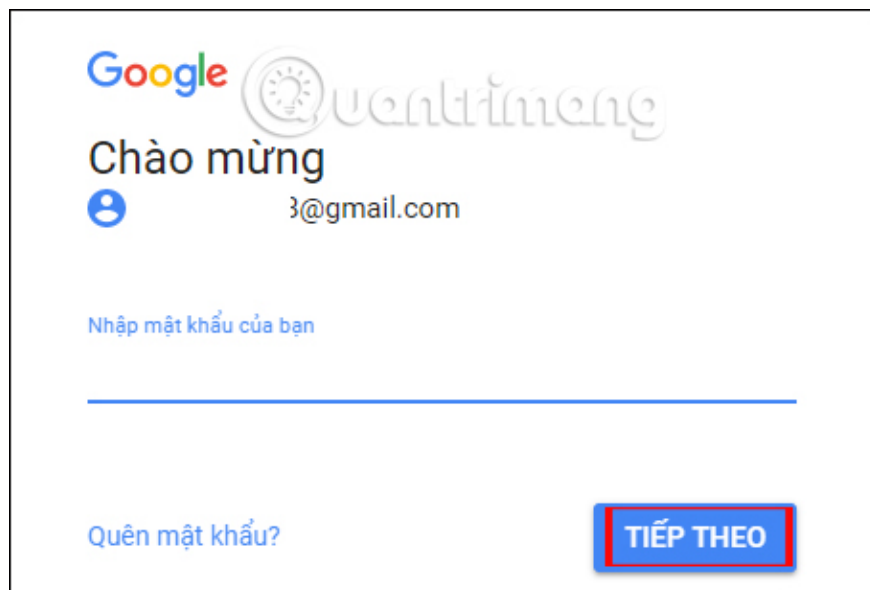

### Step 3:

Next enter the **Google Drive account email address** and then click **Next** below.

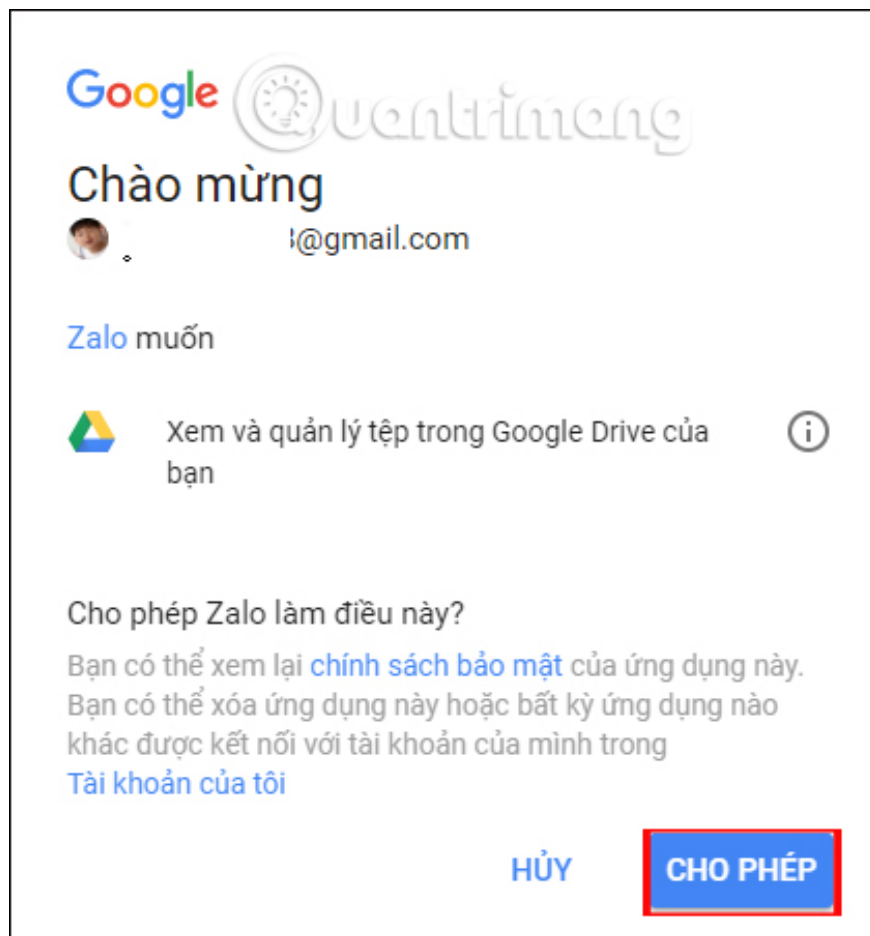

Enter the **password for the Google Drive account** and then click **Next** below.

**Step 4:**

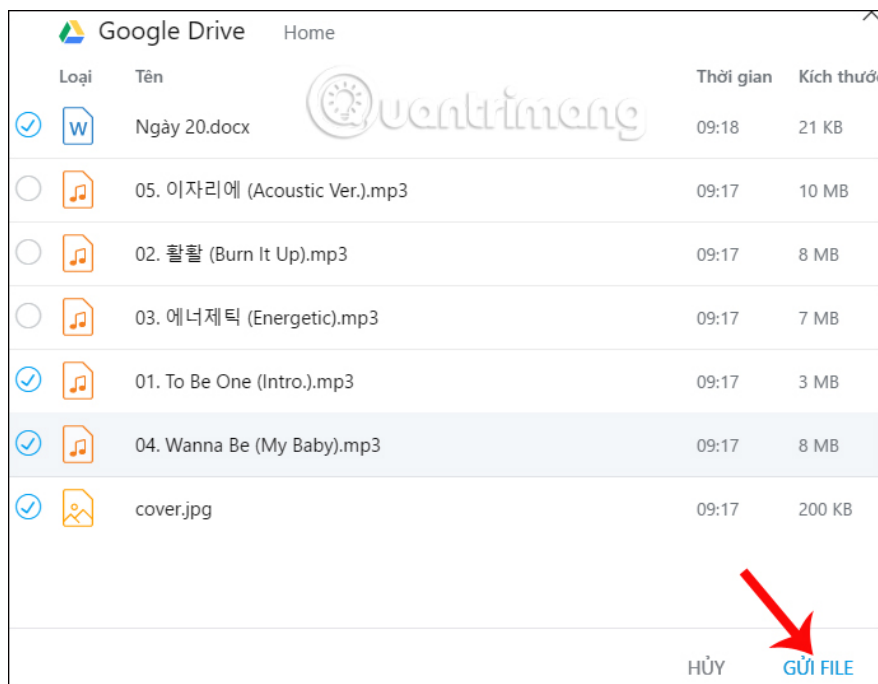

Then, Zalo will ask users to allow access to Google Drive account to view and manage data files in their account, click **Allow** .

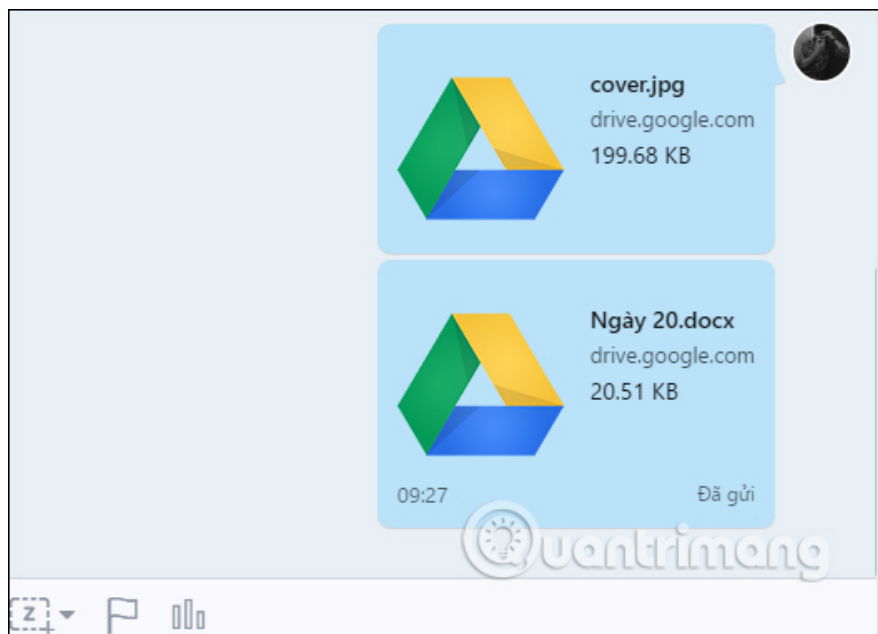

So you have completed the operation of linking Zalo account with Google Drive account. Turn off the interface on the website and return to the Zalo interface.

### Step 5:

Appeared interface of data on Google Drive. Select the **data you want to send on Zalo** , then click **Send file** below to send.

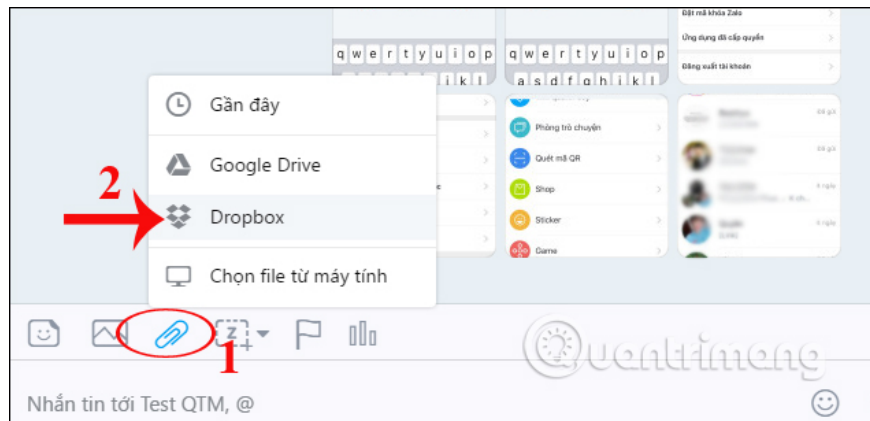

You will immediately see the selected data appear in the chat interface on Zalo as shown below. The recipient just needs to click on the file to open or download, share or other optional actions with the data.

## 2. Send data on Zalo PC from Dropbox:

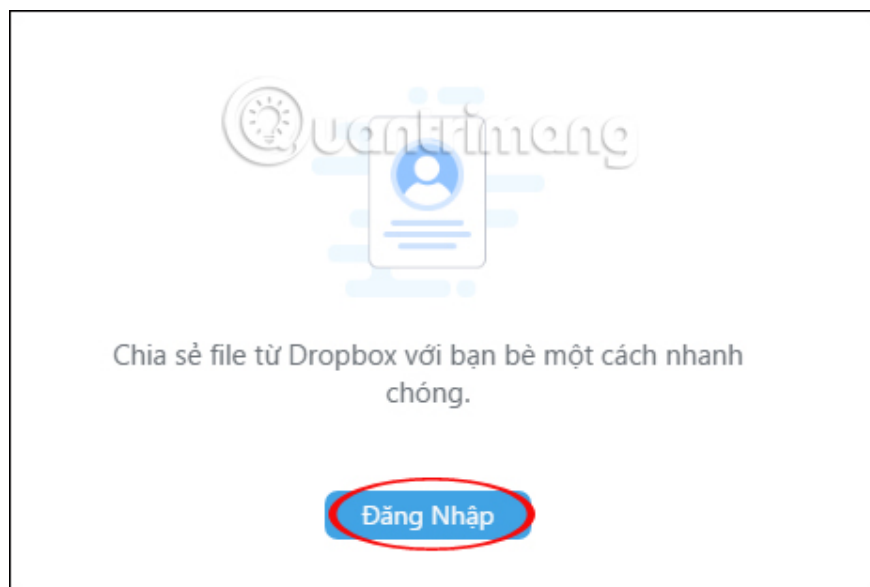

### Step 1:

Also at the chat interface you click **the pin clip icon** and then select **the Dropbox service**.

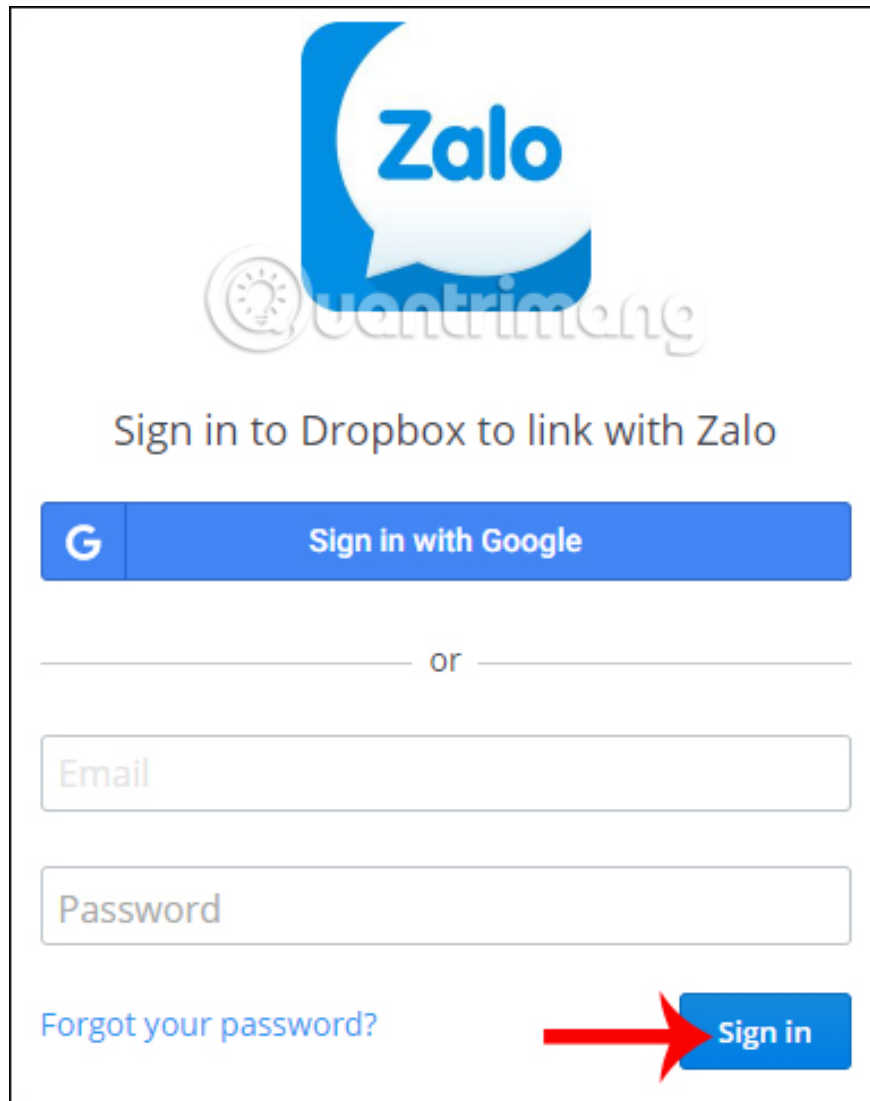

### Step 2:

The Dropbox account login interface appears, click the **Login** button below.

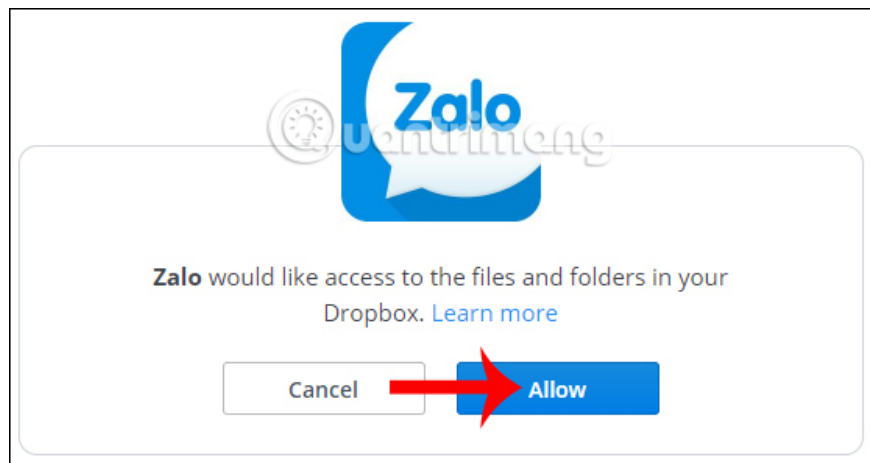

### Step 3:

Immediately after that the user will be transferred to the new website interface and need to login personal Dropbox account information, then click **Sign in** below to login.

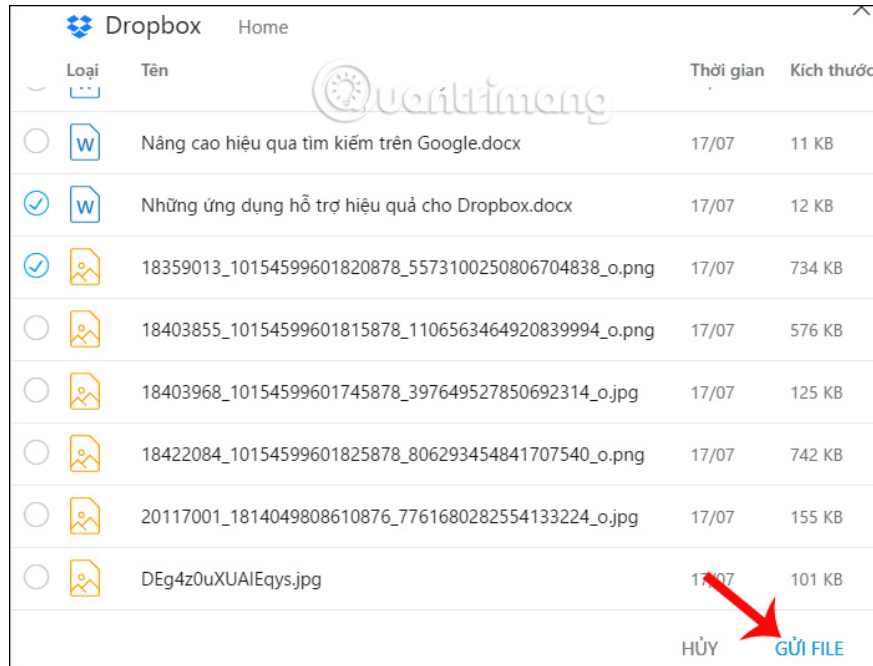

**Step 4:**

Next to Zalo will need an authorized user to link to the Dropbox account to access the archived data, click **Allow**

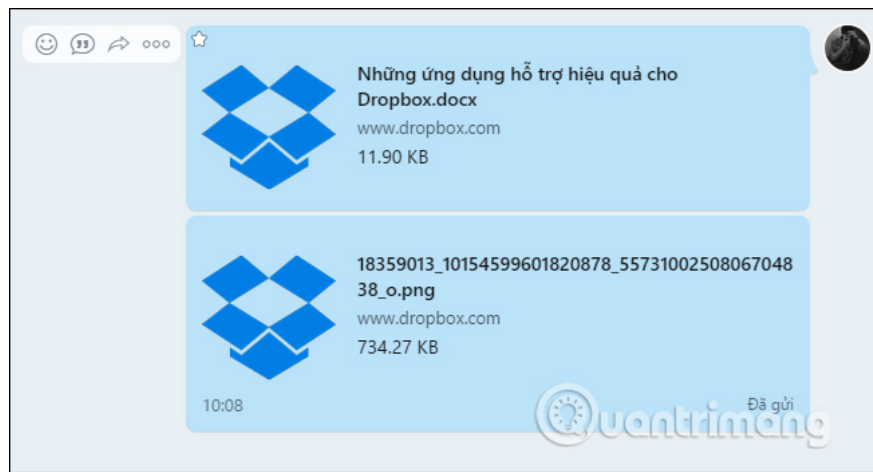

### Step 5:

Immediately Zalo interface will display all the data that you are storing on your personal Dropbox account. We also **select the data you want to send** and click **Submit File** below.

The data you choose will be sent and appear in the chat interface on Zalo as shown below. Click on the data to open it.

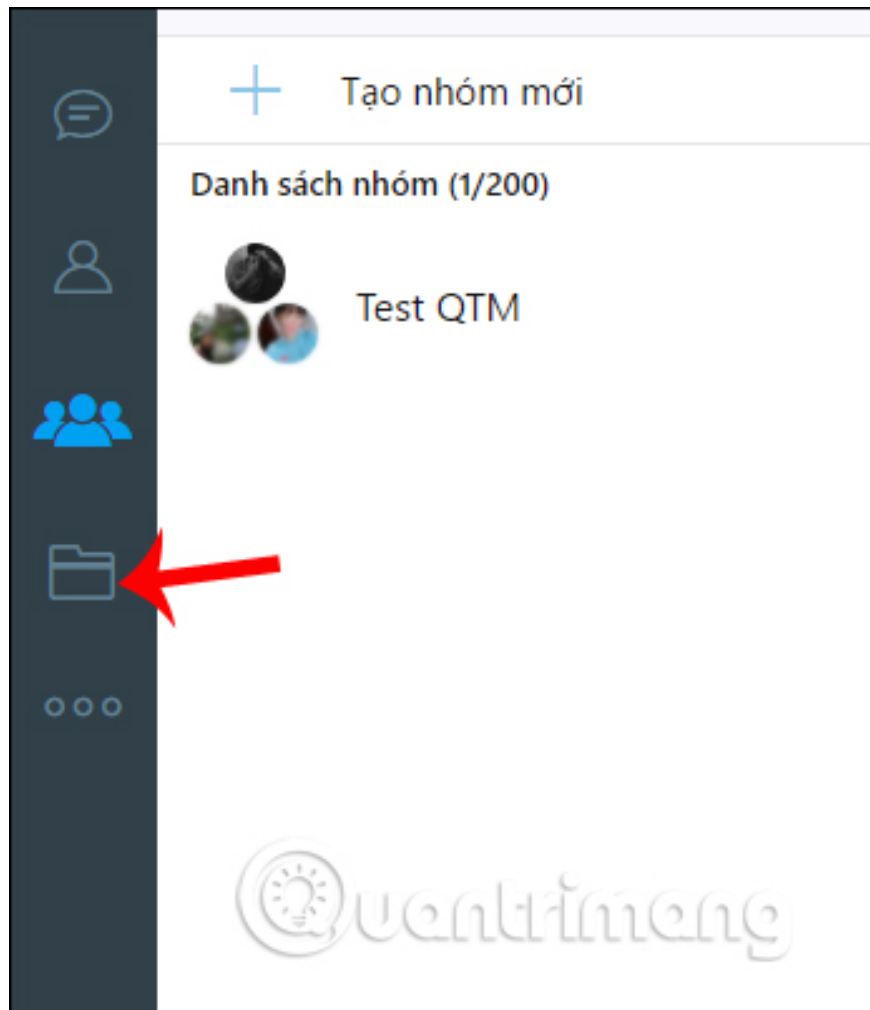

## 3. Manage files sent from Google Drive, Dropbox on Zalo PC:

To help users can manage all data sent on Zalo, File interface will gather the data sent on Zalo so you can easily search.

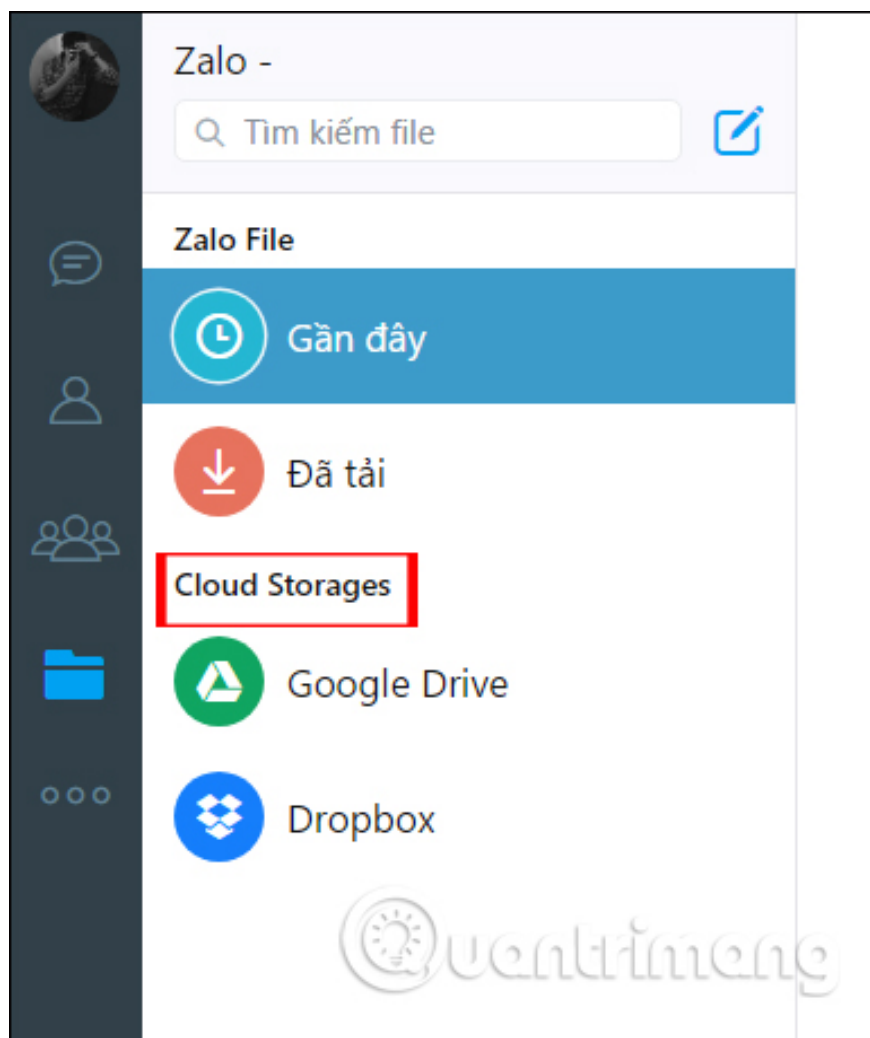

### Step 1:

At Zalo interface, we click on **the folder icon** in the menu list on the left of the interface.

**Step 2:**

Here we will see 2 management items including Zalo File with Recently sent files, Downloaded files downloaded to the computer and **Cloud Storages** with 2 services including Google Drive, Dropbox.

Click on one of the 2 cloud storage services. At this interface you will see Logout to exit Google Drive account on Zalo and Update section. When clicking on **Update button**, Zalo will proceed to download the latest data on Google Drive or Dropbox so that users can know.

The files will be separated by Type, Name, File Download Time and Size of each file.

The image shows the Google Drive interface. At the top, there is a "Home" button and a "Cập nhật" (Update) button which is highlighted with a red box. Below the "Cập nhật" button, there is a table of files. The table has four columns: "Loại" (Type), "Tên" (Name), "Thời gian" (Time), and "Kích thước" (Size). The files listed are: "Ngày 20.docx" (21 KB), "05. 이자리에 (Acoustic Ver.).mp3" (10 MB), "02. 활활 (Burn It Up).mp3" (8 MB), "03. 에너지틱 (Energetic).mp3" (7 MB), "01. To Be One (Intro).mp3" (3 MB), "04. Wanna Be (My Baby).mp3" (8 MB), and "cover.jpg" (200 KB). A watermark "Quantimeng" is visible at the bottom of the interface.

So you know the operation of sending data on Zalo PC from Google Drive and Dropbox. Users need to agree that Zalo can access the data storage service, then select the file you want to send is done. All files will be managed and updated right on Zalo.

I wish you all success!
