

How to send handwritten messages on iPhone - New feature updated on iMessage

Handwritten iPhone messages can be sent via the Messages app to other Apple users without the need for any supporting apps.

Handwritten iPhone messages can be sent via the Messages app to other Apple users without the need for any supporting apps. Users can choose from the available handwritten message templates in the Messages app, or you can handwrite the content you want to send yourself. The article below will guide you through sending handwritten messages on iPhone.

How to send handwritten messages on iPhone

Step 1:

You open the messaging app on your iPhone, then **tap on the messaging box** and turn your phone horizontally.

When **the messaging interface turns horizontal** , click on the chat box below.

Step 2:

In the keyboard section, click on **the drawing pen icon** located in the bottom right corner as shown below.

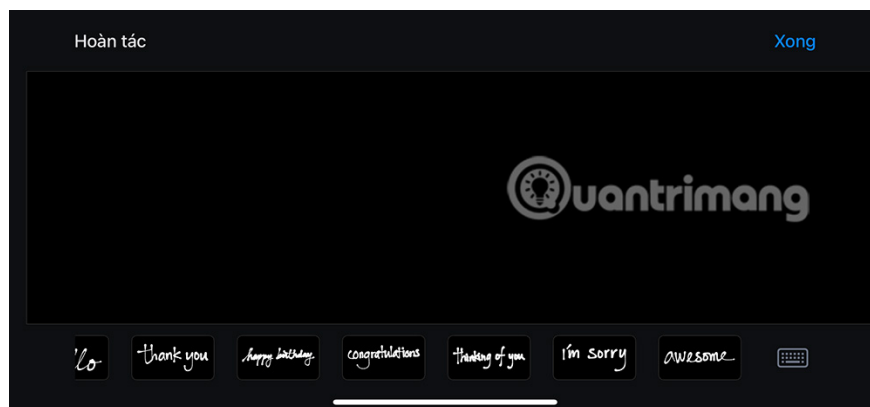

Step 3:

Then the message interface on the iPhone switches to handwritten messages. Below you will see **handwritten message templates** for us to choose from.

You drag to the left to expand the messaging templates to use. If you want to switch to normal message input mode, click on the keyboard icon in the bottom right corner.

Step 4:

Now the user **writes directly on the message screen on the iPhone**. If you are not satisfied with this handwriting, tap Undo to delete it. If you are satisfied, tap Done to send the message.

Step 5:

Then we will see the handwritten message displayed in the interface to press send as usual. Or you press the x to delete the message if you are not satisfied.
