

How to send multiple photos at once on WhatsApp

By default, when you send photos on WhatsApp, the default is to send only 1 image. If you want to send other photos, continue to repeat the manual image sending operation.

However, there is a very simple way for us to send many photos at the same time on WhatsApp, without the need for any supporting application. Here are detailed instructions for sending multiple photos at once on WhatsApp.

Instructions for sending multiple photos at once on WhatsApp

Step 1:

First, you open the conversation on WhatsApp to which you want to send the photo. Next, **click on the plus icon** in the lower left corner of the screen. Next display a list of file sending options, click on **the Photo and video library item** .
