If you regularly send, share songs, MP3 music with Facebook Messenger friends, you will find that sometimes when you send music, it will show the music bar, sometimes it appears as an attachment. How to send music via Messenger and listen to it? Please follow this guide.

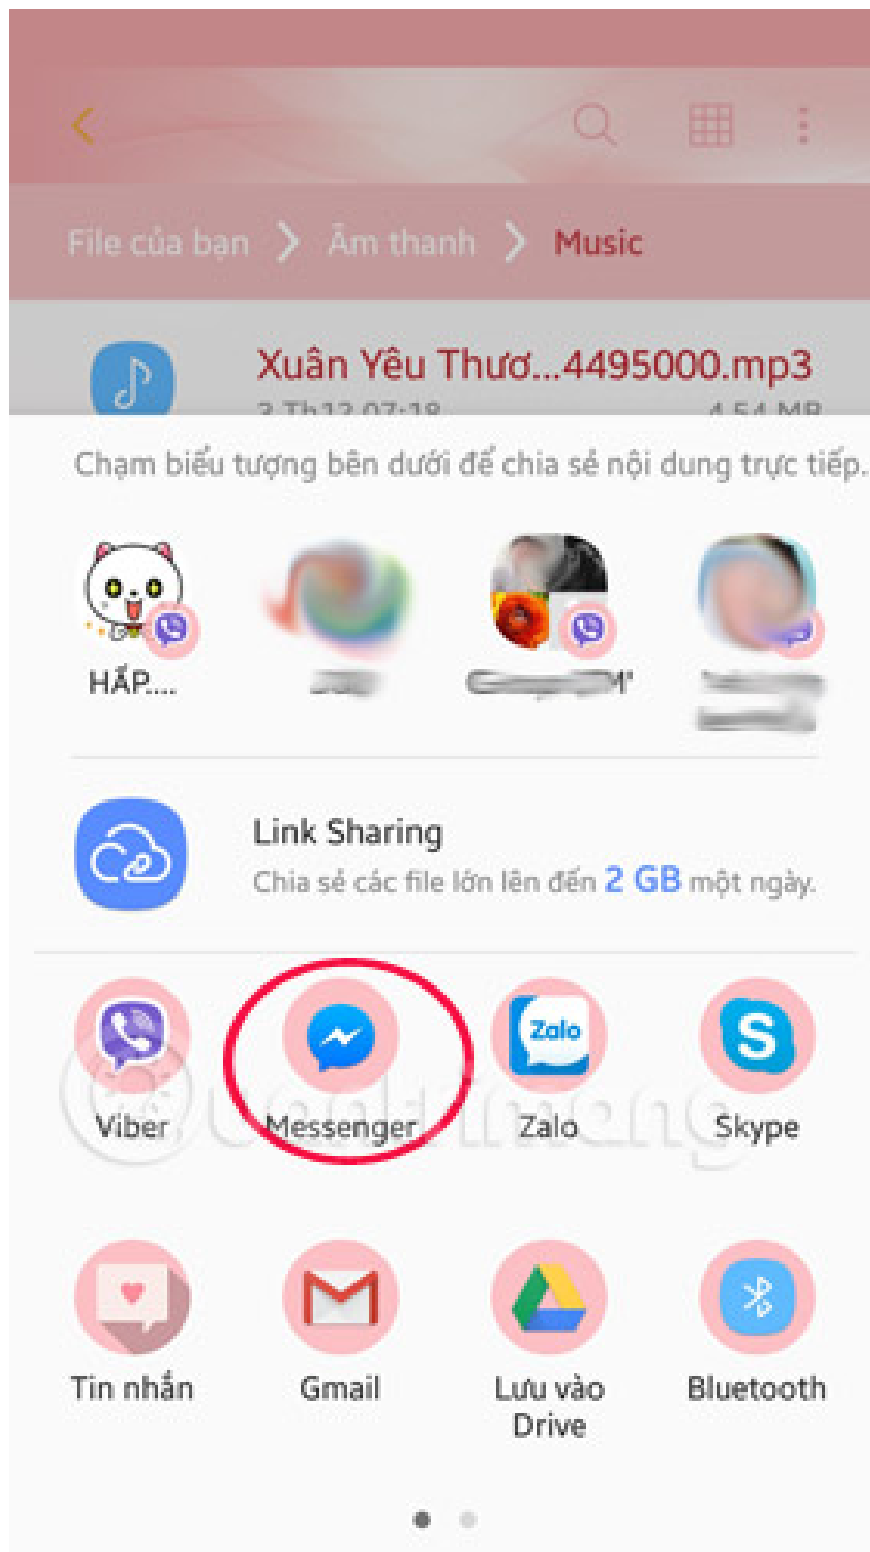

Send MP3 files via Messenger on your phone

Similar to the computer, some devices that send directly as attachments will not display the music bar so that the receiver can listen to the music as soon as the chat is available.

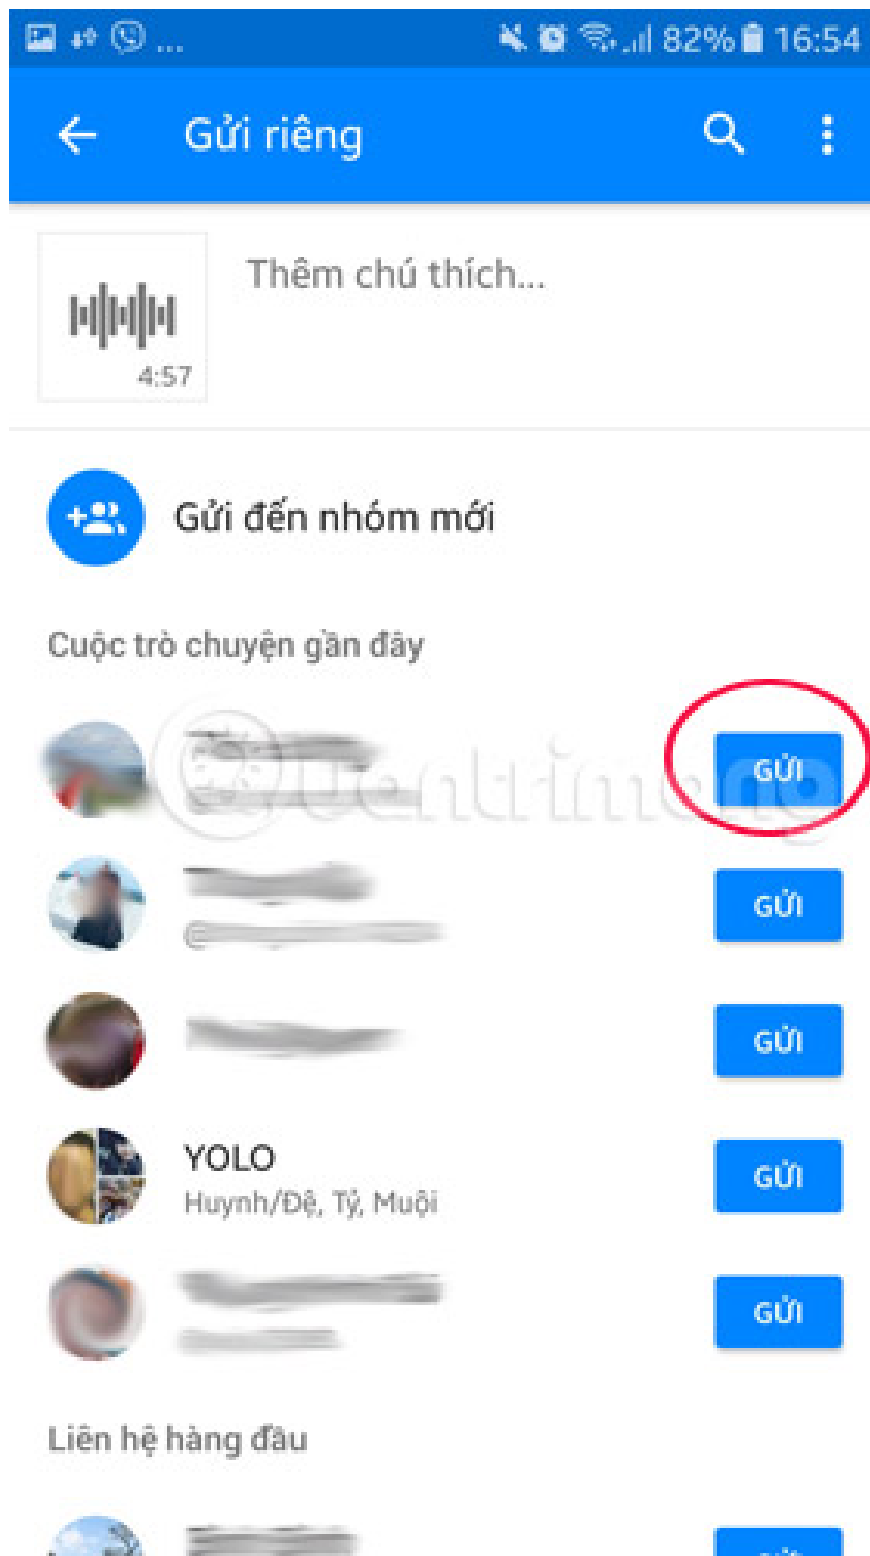

You just need to find the music file in your phone, click on the file to select > click **Share** / Share.

Find Facebook Messenger.

Select the person you want to send the music to and then click **Submit** . You can write a few more descriptions for the music you send. The song sent via Messenger in this case is counted by the application as an audio file.

Wait a moment for Messenger to send the music, and we get the result as shown below:
