

How to send Threads posts to Instagram messages

When you use Threads and share your images and videos to your account, we also have the option to share Threads posts to other applications.

For example, you can share Threads posts to Instagram Story, or send Threads posts to Instagram messages so that other people can easily access posts on that Threads. The following article will guide you to send Threads posts to Instagram messages.

Instructions for sending Threads posts to Instagram messages

Step 1:

At the interface on the Threads application, users find the Threads post that they want to send messages on Threads to others. Next, click on **the share icon** below the post as shown. Now showing different options, we click **Send on Instagram**.
