

# How to send voice messages in WhatsApp on iPhone

With the Locked recording feature, WhatsApp allows you to record and send voice messages on conversations. Recording voice messages is quite easy, just follow these steps.

As a popular messaging, chat, video calling application, WhatsApp is becoming more and more popular with its new updates. Most recently, the Locked recording feature made it easier to record and send voice messages on conversations.

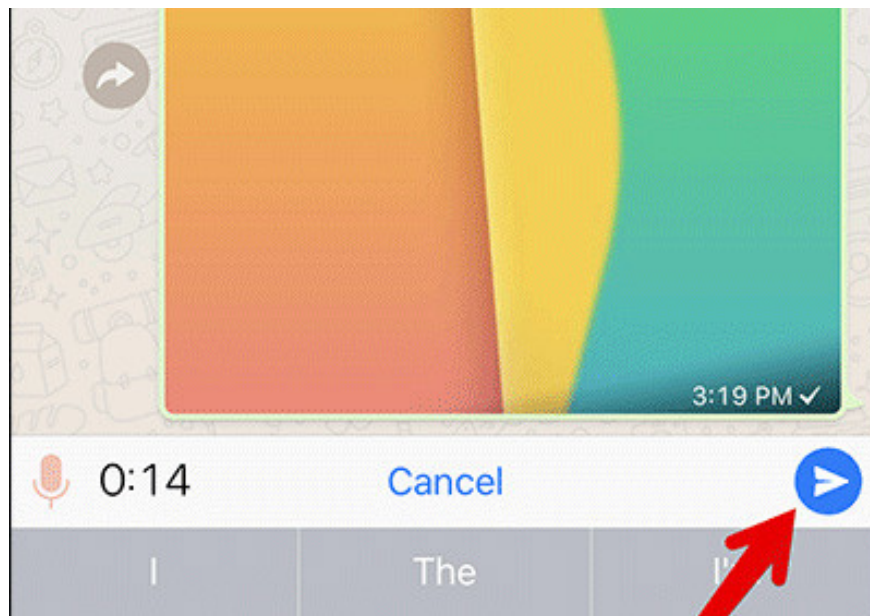

This feature allows you hands-free, no need to keep the mic during recording. However, in this process you will not be able to switch to another conversation. Please follow how to send voice messages on WhatsApp details below.

## How to send voice messages in WhatsApp on iPhone

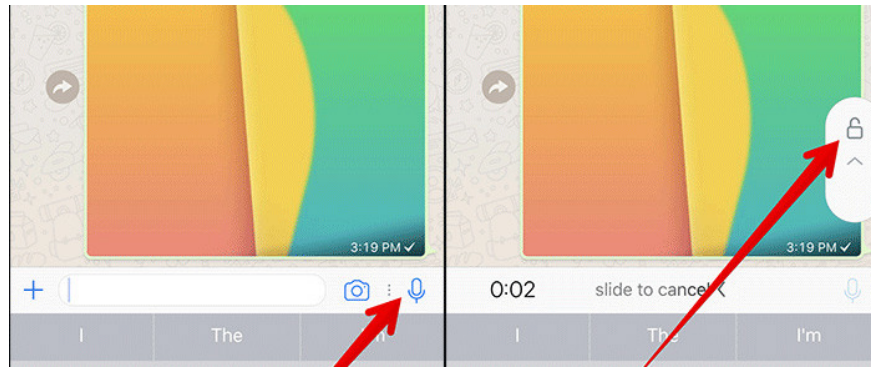

Before starting, make sure WhatsApp is updated to the latest version on the iPhone. Open the **App Store** ? touch the **Updates** tab, then tap the **Update** button.

**Step 1.** Open the WhatsApp app ? touch the **Chats** tab.

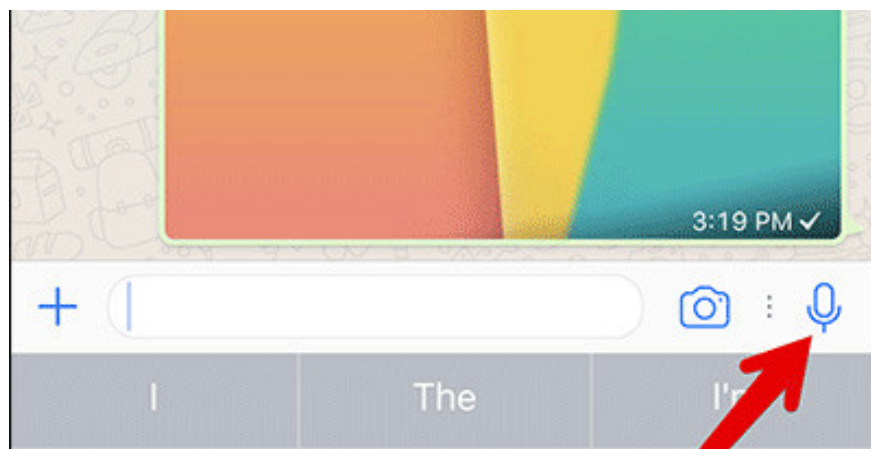

**Step 2.** Next, open the conversation that you want to send a voice message to ? touch and hold the microphone button.

**Step 3.** Swipe up the microphone icon, swipe along the right side of the screen to lock the recording.

**Step 4.** When finished recording the voice message, press the Send button to send the message.

So you have finished recording and sending voice messages on WhatsApp. This feature is quite user-friendly, please use it to improve the efficiency of your conversation. You can even sing to your friends or say difficult words directly without feeling shy. Especially with the ability to record but do not need to hold the microphone button, you can both record WhatsApp messages, while having free time to do other things.
