

How to send voice messages on Instagram

Instagram has allowed to send voice messages on Instagram, in addition to entering content.

The latest Instagram version allows you to send voice messages to friends or messages in Instagram groups. Thus, Instagram also has the same feature to send voice messages when sending voice messages on Messenger.

The sending of this audio message is not an unfamiliar feature for users, when on Zalo or Viber has the ability to send audio messages for a long time. Users can send audio up to about 1 minute long for personal Instagram accounts, or with Instagram groups. So the texting content on Instagram is much richer, in addition to just entering text messages like before. The following article will guide you how to send voice messages on Instagram.

1. How to send a self-destruct and secret message on Facebook Messenger
2. How to call Video Call on Instagram
3. How to send live video Instagram directly to friends on iPhone

Step 2:

In the Instagram chat interface, **tap and hold the microphone icon** to record the sound you want to send to your friends. Instagram will proceed to record the audio message immediately. We will see the blue sound being collected below.

In case you do not want to record the audio and want to **delete the sound** , the user **pulls the horizontal bar to the left of the screen** . Click **the red trash icon** to delete.

Step 3:

In case the user wants to **send an audio message in hands-free mode** without having to hold the microphone icon during recording, also **hold the microphone and then swipe up and unlock it** . You will then see a red lock.

Release your hand to record and then press the send button to the right to send the message, or touch the trash can icon to the left to cancel the audio track.

Step 4:

The process of sending messages will be conducted immediately afterwards. The user will see **the message Sending a message** as shown below. When finished sending the message will display in your chat frame.
