

How to set a 360-degree photo as a cover image on Facebook

When updating Facebook apps on Android and iOS, users will be able to use the new feature to set a 360-degree photo as a cover image on Facebook.

360-degree photos have become a trend right after appearing, especially in the Facebook network community, when users can post 360-degree images, take panoramic photos on Facebook easily. Compared to the previous time, to take 360-degree photos or upload to any website, we will use the panorama feature (panorama) or through some websites to edit image parameters.

But now, things have become simpler when Facebook has built-in 360-degree photography on the app. In particular, Facebook boss also announced that you can absolutely use 360-degree photos to set as Facebook cover photo. This new feature has been widely updated by Facebook to all Android and iOS Facebook accounts worldwide. Our to-do list is to update the application to the latest version to use.
