

How to set a ringtone on Android

Android phones already have a built-in ringtone cutter, allowing you to trim your favorite ringtone without having to cut it on a computer and then transfer it to your phone.

Android phones already have a built-in ringtone cutter, allowing you to cut your favorite ringtones without having to cut them on a computer and then transfer them to your phone. Additionally, you can choose ringtones for individual phone numbers in your contacts to create unique and recognizable ringtones. All operations are performed directly on your phone with simple steps. This article will guide you on how to cut ringtones on Android.

1. Instructions on how to cut ringtones on Android

Step 1:

On your Android phone's music album, tap **the song you want to use as a ringtone** . Then, in the music player interface, tap **the scissors icon** at the bottom. This will take you to **the interface for cutting a section to use as a ringtone** . Depending on your Android phone and the version of Android you are using, this interface may vary.

If your phone doesn't have a built-in ringtone trimming feature, you'll have to trim the ringtone from an external source, transfer it to your phone, and then select a ringtone from the Settings.

To cut ringtones online, you can refer to the article below.

1. How to cut music online quickly and easily.
2. How to cut audio files using MP3DirectCut

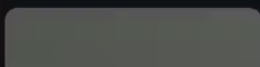

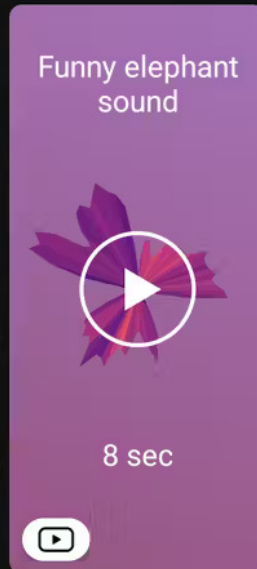

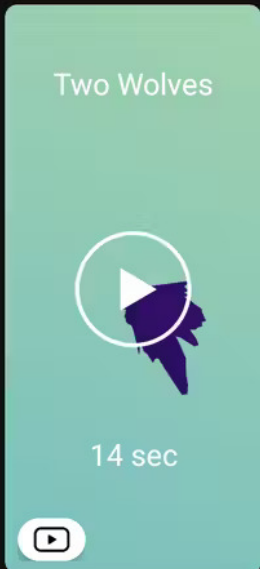

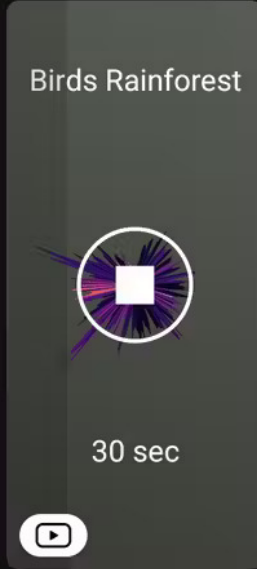

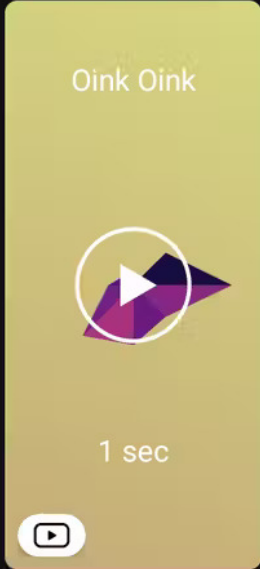

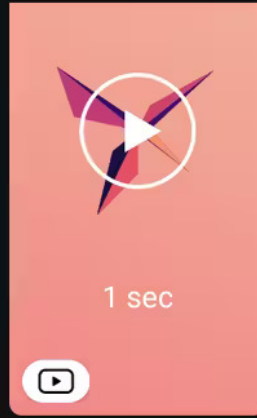

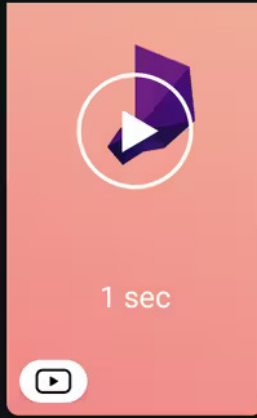

2. How to create custom ringtones on Android using third-party apps

You can download thousands of ringtones and notification sounds from movies, video games, memes, etc. using an app like Zedge. The app can set any available sound as a custom ringtone, notification sound, or alert sound.

1. Download Zedge (Free, subscription available)

If you don't want to use the app, you can visit the Zedge website and download the file directly, or check out one of the other top ringtone download websites .

To make changes to your ringtone before use, consider Ringtone Maker. This app can create ringtones, alarms, and notification sounds from various audio files. You can use it to edit audio on your phone, perhaps to boost the volume of a track, trim silences, or something similar.

3. How to change your ringtone on Android

Now that you have the melodies and ringtones, you're ready to actually change your ringtone. The steps may vary slightly depending on your Android phone model.

On Xiaomi phones

Step 1:

Go to **Settings** and select **Sound & Vibration** . Then tap **Ringtone** to choose a ringtone.

On Google Pixel phones

If you own a Google Pixel, follow these steps:

1. Go to **Settings** and tap **Sound & vibration** .
2. Tap on **Phone Ringtone** , **Default notification sound** , or **Default alarm sound** , depending on what you want to change. This will take you to a page containing a list of pre-installed sounds as well as those you have added.
3. Select a category and then tap ringtone to listen. Select **My Sounds** to see the files your phone has scanned in the folders labeled "ringtones". To manually add files from other locations, tap the + icon in the bottom right corner.
4. After selecting your preferred ringtone, tap **Save** in the upper right corner.

On Samsung Galaxy phones

Samsung's version of Android is slightly different due to the One UI interface. Here's what you need to do to change the ringtone on your Samsung Galaxy phone:

1. Go to **Settings > Sounds and vibration** .
2. Choose **Ringtone** or **Notification sound** .
3. Choose from the available options or tap the + icon in the upper right corner to add downloaded ringtones or sounds. The phone will display any audio files it detects in internal storage, so use the search option and enter the file name.

Note : Don't ignore app notifications. Most apps allow you to choose ringtones or notification sounds for different types of alerts. You can change the notification sound for each app on your phone.

4. How to set a ringtone for a contact on Android

Some Android devices allow you to choose a separate ringtone for each contact, making it easier to distinguish them.

On Xiaomi phones

Step 1:

Open your phone's contacts, then tap on the contact you want to set a custom ringtone for, and then tap on **Default Ringtone** .

Now, simply choose the ringtone you want and you're done!

On Samsung Galaxy phones

The steps for Samsung phones are almost the same. Specifically, they are as follows:

1. **Open the Contacts** app and select the contact you want to change the ringtone for.
2. Tap the three dots in the bottom right corner and select **Change ringtone/vibration** .
3. Now, choose whether you want to set a custom ringtone or vibration mode.

Now, simply select your desired sound from the list and exit the menu.

Before smartphones, changing ringtones was one of the first steps in personalizing your phone. Now, with so many options, much better speakers, and customizable sounds for each app and contact, the experience is even better than before.

Whether you change your ringtone for fun or to distinguish between calls, Android devices will make the whole process easy.
