

How to set a Zalo PC security key

The Zalo security key feature has also been updated for the computer version when you update to the latest version. At that time, Zalo account will have more security layer.

In order to enhance the security of Zalo, the key feature is available on the Android Zalo, iPhone Zalo and now Zalo PC. At that time, Zalo account and conversations will be enhanced with security layer.

Usually when you log in to Zalo computer, you will remember to log in so that you don't have to enter Zalo password again. However, this also creates the risk of information disclosure, conversations on Zalo. If so, you can set the Zalo security key.

When creating security code and just turn off Zalo on PC, next time we have to enter the correct security range to be able to use Zalo. So your Zalo account has 2 security layers including Zalo password and Zalo security code class. How to set the class of Zalo security code will be in the article below.

1. How to create a Zalo key that secures information
2. Instructions for setting privacy mode for Zalo account
3. Instructions for sending secret messages on Zalo

Instructions for setting the Zalo computer security key

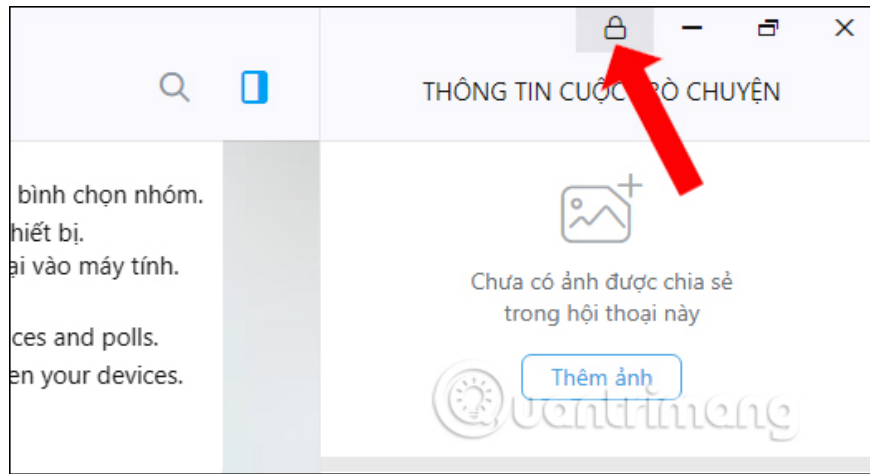

Step 1:

First of all to use this feature, users need to update the computer Zalo to the latest version v.3.4.0.

1. Download Zalo for PC
2. Download Zalo for Mac

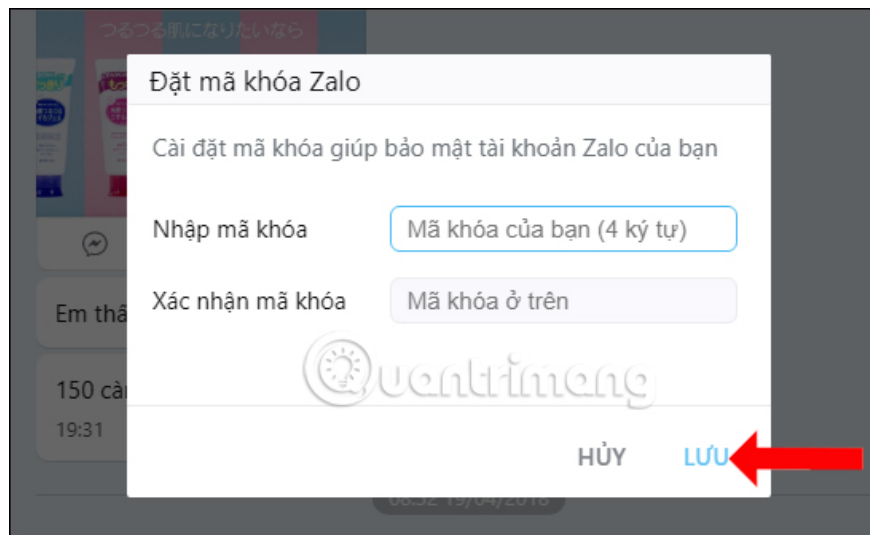

Step 2:

After upgrading, at the interface of Zalo look at the toolbar on the top right of the screen, you will see **the lock icon** to set the security code for Zalo.

Step 3:

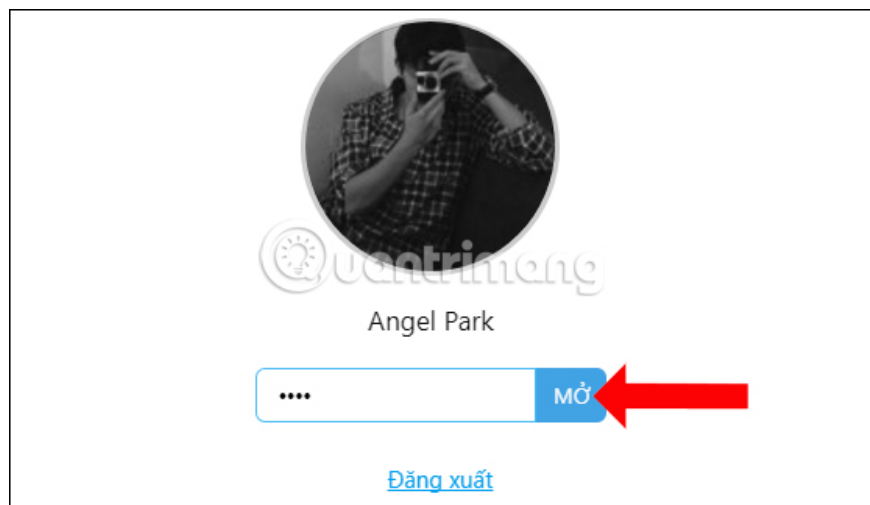

Click on the padlock icon and appear the **Set Zalo key** . Here we enter the key to secure the Zalo account and then enter it again to confirm. Finally **click Save** .

Immediately Zalo interface will be locked and the screen appears to enter the security code to access Zalo.

You need to **enter the correct security code** and press **the Open button** to access and use Zalo.

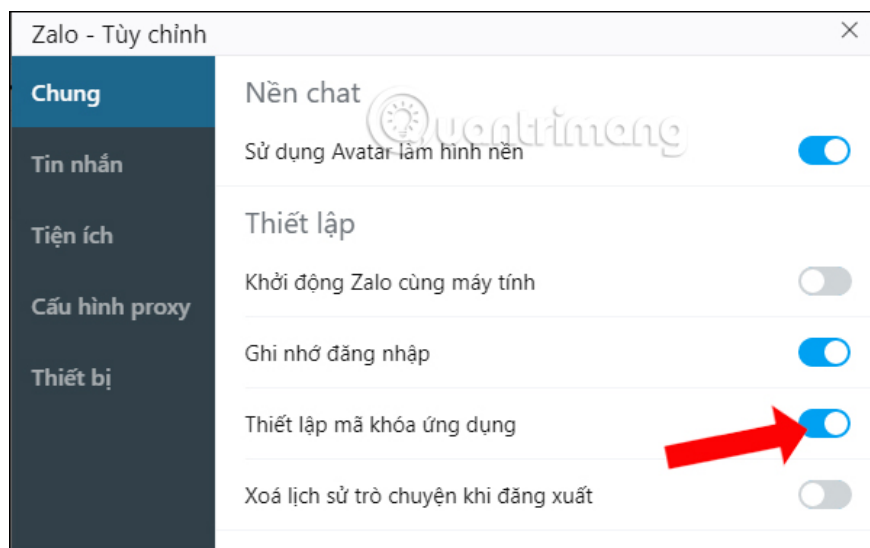

Step 4:

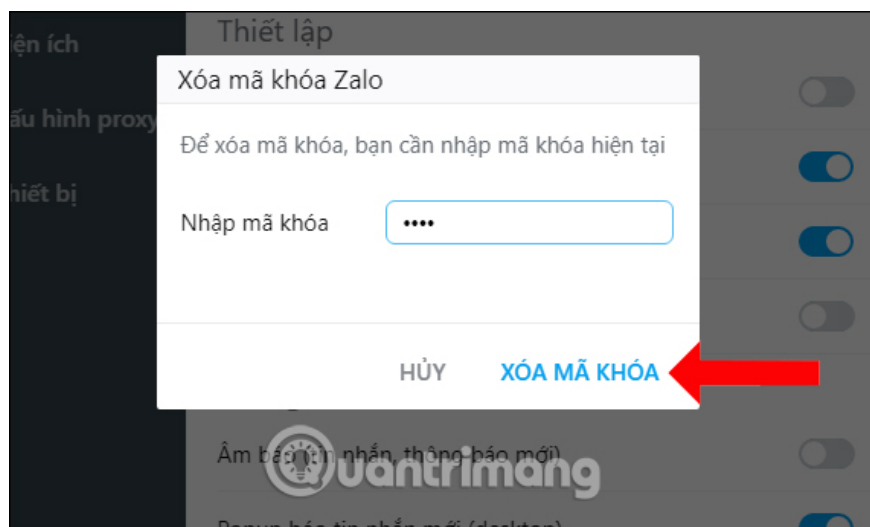

If you want to remove the lock code setting for the Zalo account, at the interface click on the gear icon and select **Custom** .

In the General setting interface, look for the option to **set the application key** and then push the horizontal bar to the left to turn off this feature.

Immediately appear the dialog box to **delete the Zalo key** and the user should enter the correct key code for the account and then click **Delete the key** below.

Thus, with the feature to set Zalo key, users do not need to press logout account as before to secure information, but just need to set the security code Zalo is. When setting the security code and closing the Zalo window, this security layer will be built and to use it, you need to enter the correct security code.
