

# How to set an alarm on Windows 10

With the alarm feature on Windows 10, we can simplify setting the alarm on the PC without having to use the phone to set the alarm. With the procedure to create alarms on Windows 10, you can take a nap at the PC without worrying about being late for classes or work.

With the alarm feature on Windows 10, we can simplify setting the alarm on the PC without having to use the phone to set the alarm. With the procedure to create alarms on Windows 10, you can take advantage of "taking a nap" on the PC without worrying about being late for class or work.

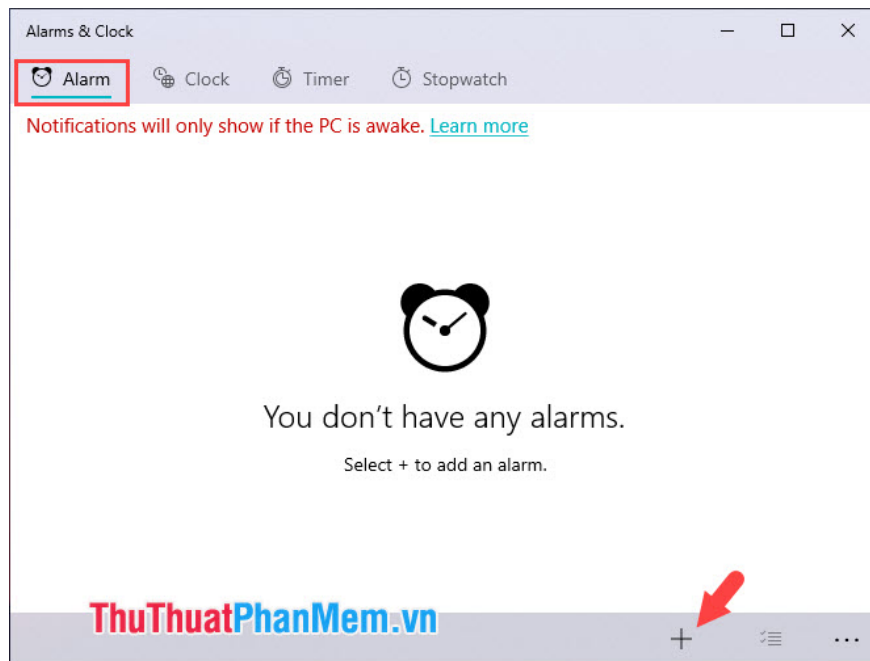

To set an alarm on Windows 10, follow these instructions:

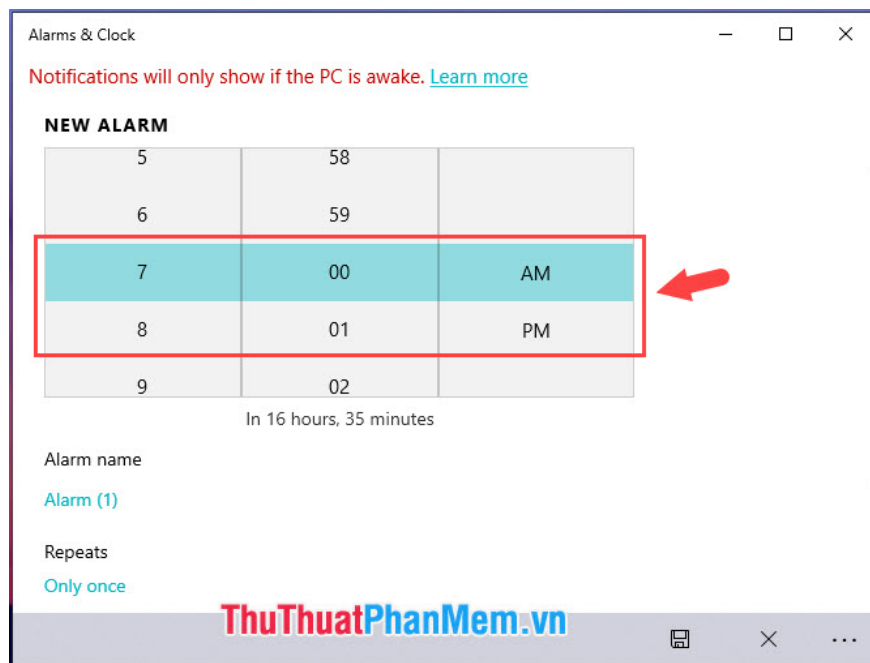

**Step 1:** Go to the **Start menu (1)** => **Alarms & Clock (2)** .

**Step 2:** At **Alarm** card , click the + sign in the bottom corner to create a new alarm.

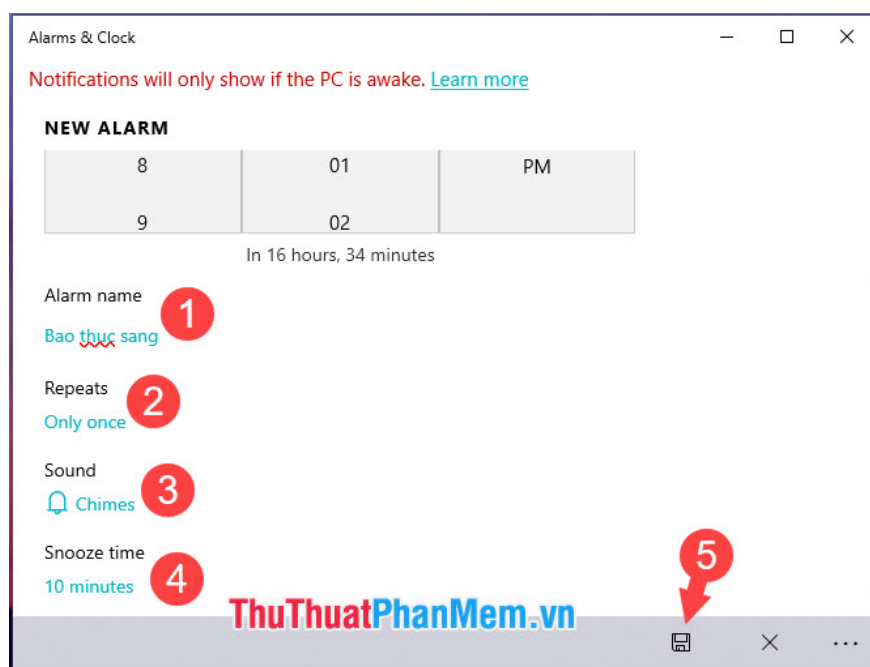

**Step 3:** You set the time to set an alarm in the **NEW ALARM section** . The first column allows us to set the alarm time, followed by minutes and seconds. The **AM** column is the morning timeline and the **PM** is the afternoon timeline.

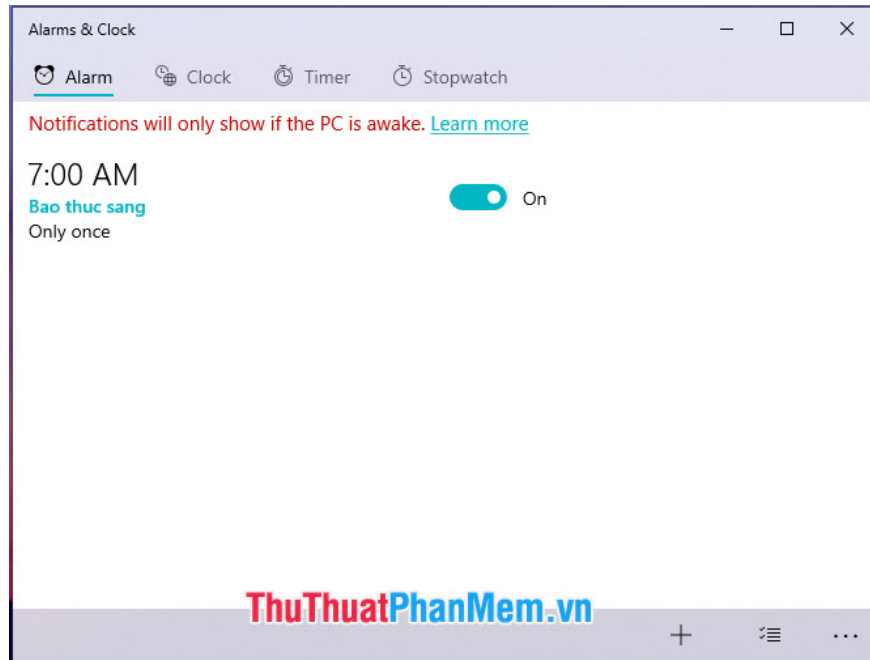

**Step 4:** After setting the alarm time, you scroll down to set some additional settings.

- (1) **Alarm name:** set a name for the alarm.
- (2) **Repeats:** the number of times to repeat the alarm.
- (3) **Sound:** set the alarm signal.
- (4) **Snooze time:** set the time to wait for the alarm to go back.

After setting the alarm, click on the floppy disk icon (5) to save it.

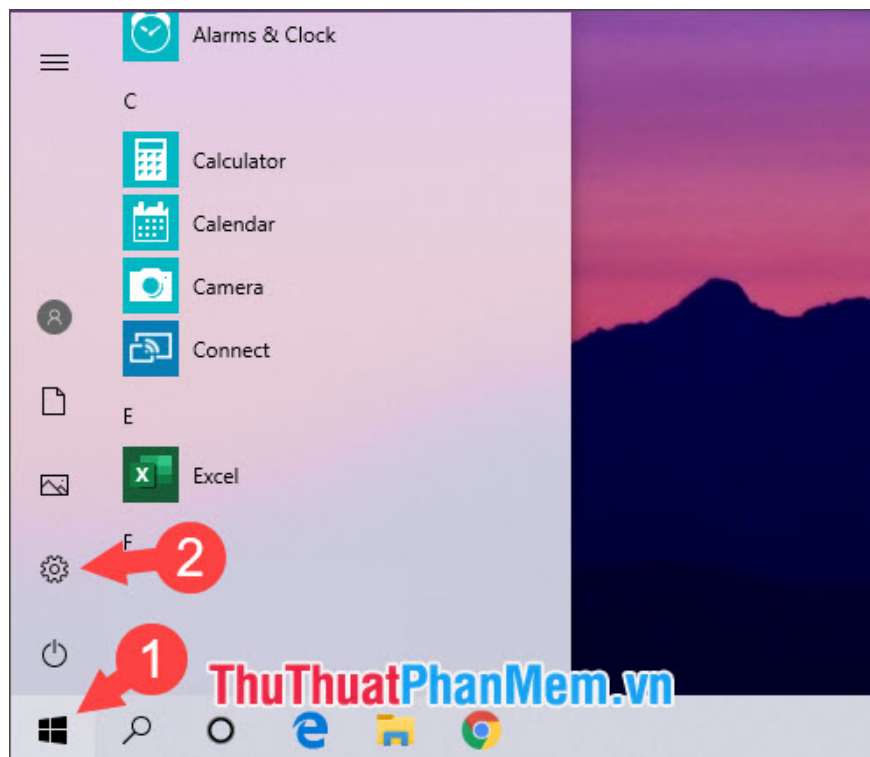

After we save the alarm, the main interface on Alarms & Clock will display as shown below.

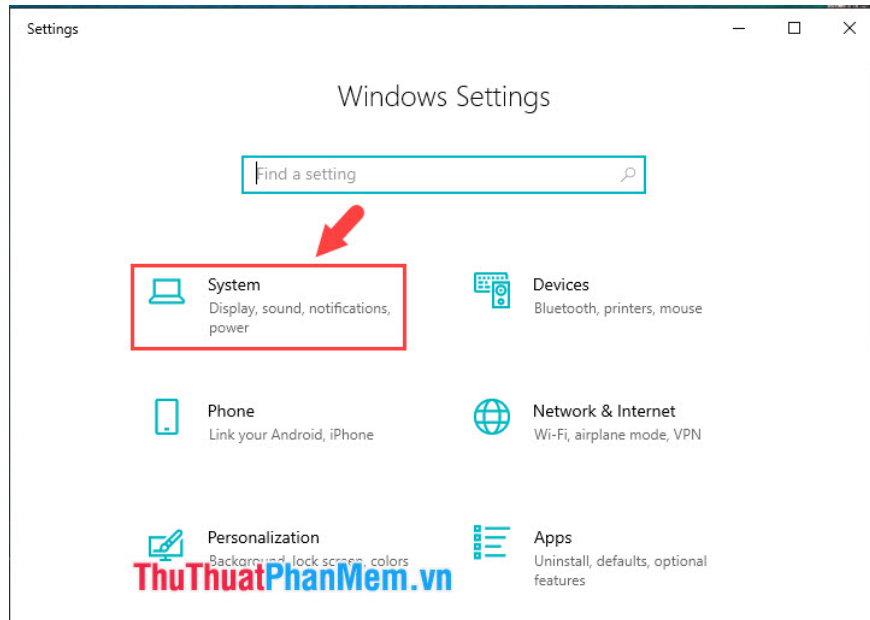

**Note:** **The** alarm notification only shows when your computer is in standby mode and does not work when the machine is in **Sleep** or **Shut down mode** .

To turn off the Auto **Sleep** feature on Windows 10, do the following:

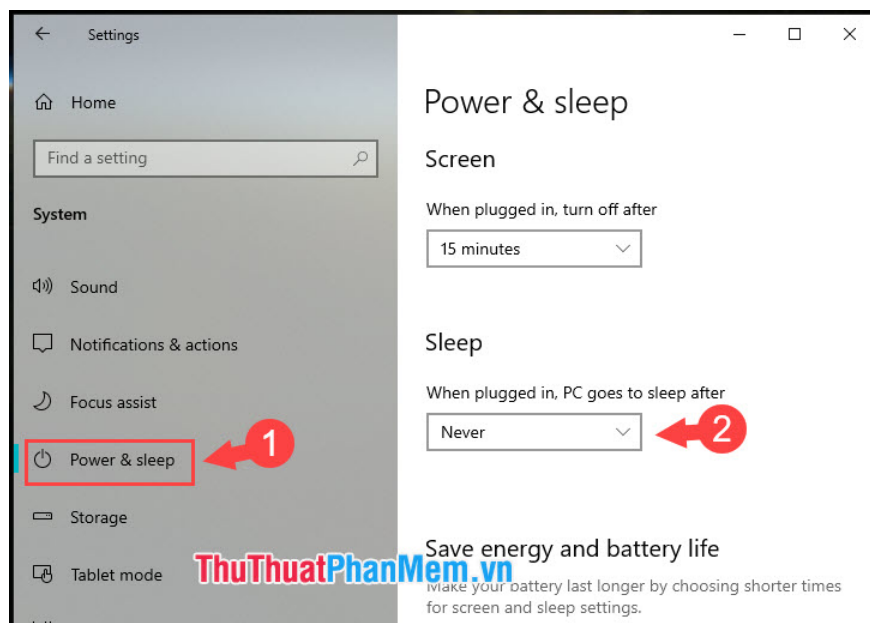

**Step 1:** Go to the **Start menu (1)** => **Settings (2)** .

**Step 2:** You continue to select **System** .

**Step 3:** Select **Power & sleep** (1) => you change the **Sleep** item to **Never** (2) .

With the guide to creating alarms in the article, we can set the alarm anywhere on any device without necessarily having an alarm clock or smartphone on the side. Good luck!
