

How to set ChatGPT as default search engine on Android

If you constantly open ChatGPT to ask questions or get help with tasks, why not make it your default search engine?

Let's be honest – most of us use ChatGPT often enough to set it as our homepage. If you constantly open ChatGPT to ask questions or get help with tasks, why not make it your default search engine? Well, you can. This guide will walk you through the steps to make ChatGPT your default search engine on your Android browser.

How to set ChatGPT as default search engine on Android

Since Chrome on Android doesn't support extensions, you won't be able to set ChatGPT as your default search engine. However, you can do so in other browsers.

Firefox

On Firefox for Android, tap the three dots in the lower-right corner (or upper corner, depending on your configuration) and select **Settings** .

Microsoft Edge

On Microsoft Edge for Android, you can't add another search engine. However, you can add ChatGPT search as your homepage in Edge.

Open Edge and tap the 3-bar menu in the lower right corner.

Select **Settings** .
