

# How to set different ringtones for each SIM on iPhone

On the iOS 17 version, there is an additional feature to set different ringtones for each SIM on the iPhone to make it easier for users to receive calls from incoming callers.

On the iOS 17 version, there is an additional feature to set different ringtones for each SIM on the iPhone to make it easier for users to receive calls from incoming callers. Accordingly, the operation of selecting different ringtones for the main SIM and secondary SIM on iPhone is similar to when you set a ringtone on iPhone for 1 SIM in use. The article below will guide you to set different ringtones for each SIM on iPhone.

## Instructions for setting different ringtones for each iPhone SIM

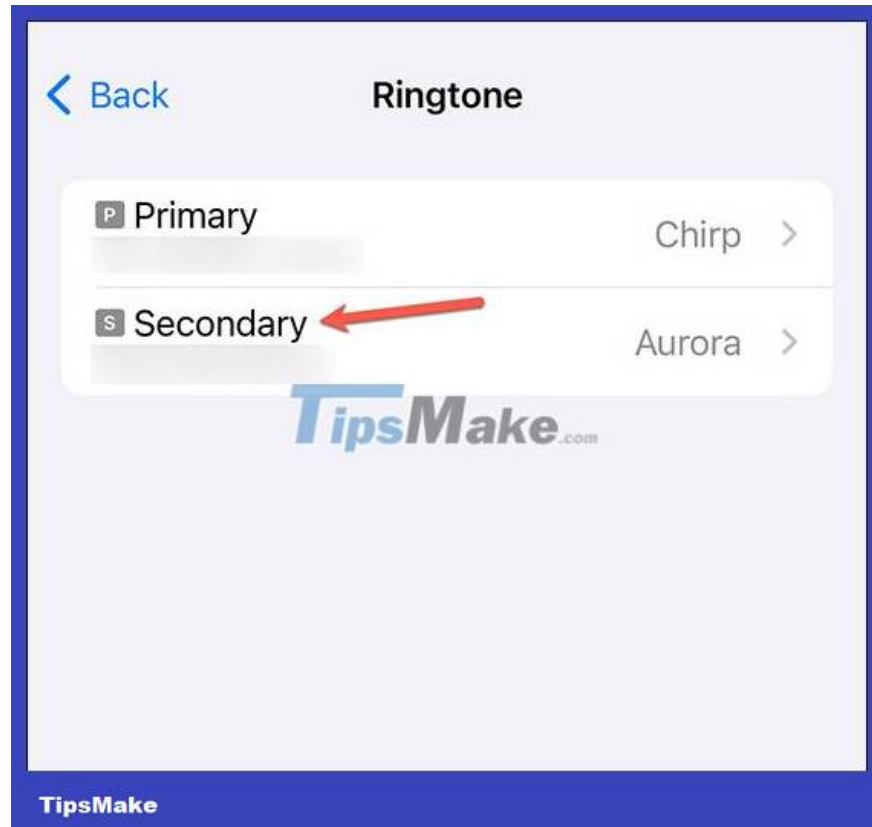

### Step 1:

At the iPhone interface, click on **Settings** and select **Sounds and Haptics** in the list.

## Step 2:

Switching to the new interface, users click on **Ringtone** to set the ringtone for the phone. Now **display the 2 existing SIMs on the phone**, click on each SIM to change the ringtone.

## Step 3:

Displays a list of ringtones for you to choose the ringtone for this SIM on iPhone.

Continue to choose another ringtone for the remaining SIM on the iPhone.

So different ringtones have been set for each SIM on the iPhone. When someone else calls a phone number belonging to two different SIMs on the iPhone, the ringtone set for each SIM will alert you.
