

# How to set the Viber key on the computer

Viber key helps you lock Viber screen when not using the application.

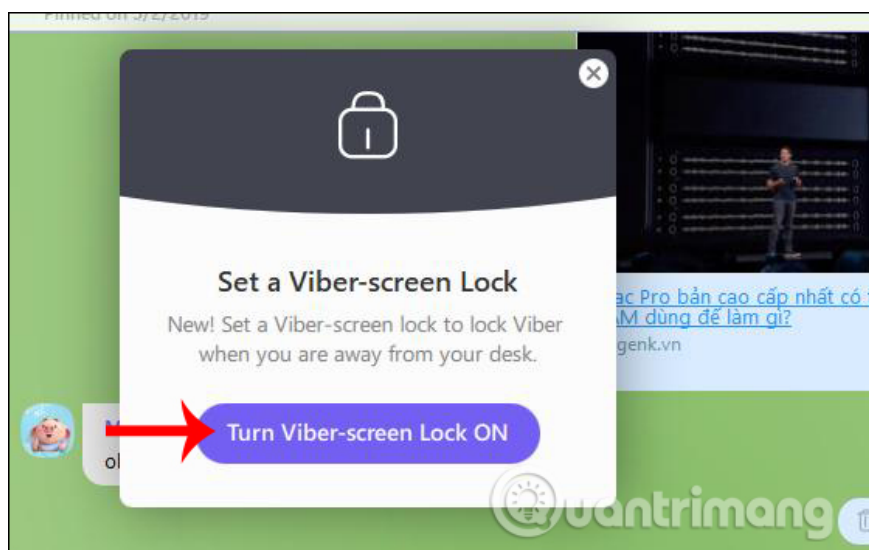

Viber version of the new computer updates the screen lock feature, similar to placing a key code on Zalo, helping to secure the chat content, but we do not need to lock the computer screen. Securing chat content on applications is something that many people care about. In addition to using a login password, the message content is more secure when it is locked, not worrying about being able to read the message in case we do not sit on the computer. And if you want to send a message, you must enter the correct key set up earlier on Viber. The following article will guide you how to use the key generation feature on Viber computers.

1. How to hide, hide the chat content, chat on Viber
2. How to chat secret groups on Viber
3. Instructions for sending automatic cancellation messages on Viber
4. How to backup and restore messages on Viber

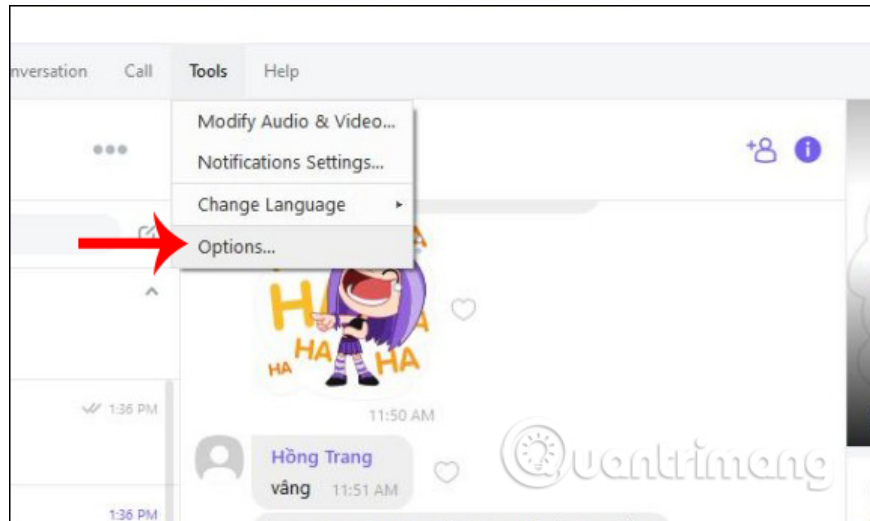

## 1. Instructions for creating Viber screen lock

### Step 1:

To use this feature, you must first **upgrade your Viber computer to the latest version** . Then the Viber interface notifies you of the new feature and recommends setting the encryption, press **Turn Viber screen lock ON** to start setting the lock code.

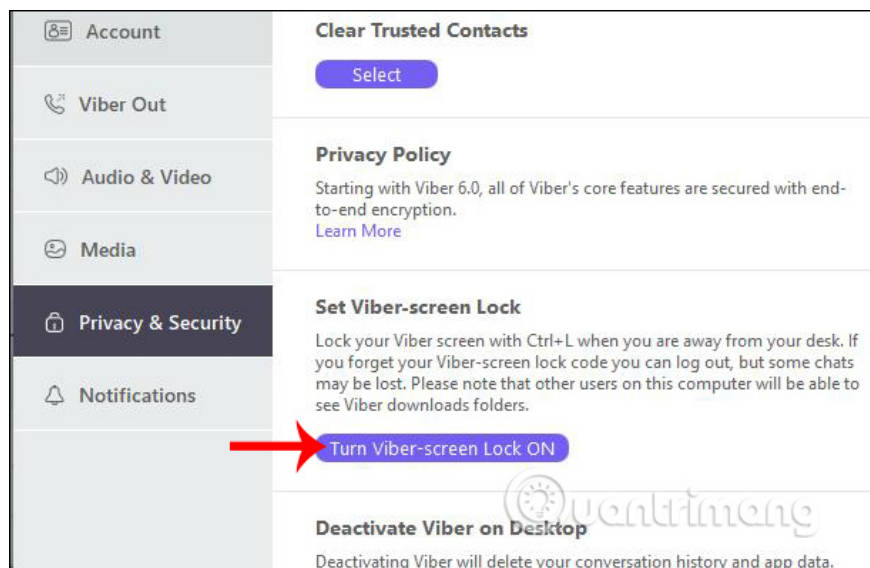

Or we can click on Tools in the Viber interface and select Options to enter the lock code interface.

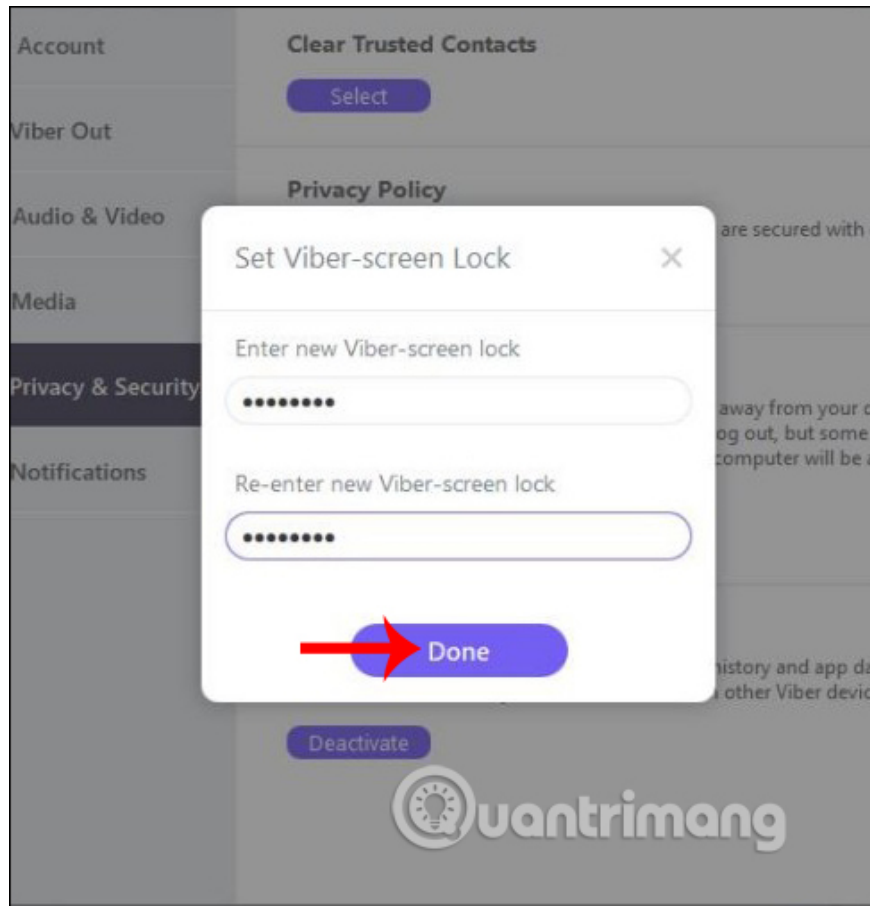

### Step 3:

Switch to the new interface we click on Privacy & Security. Look at the right content at the Set Viber screen lock feature, click on the **Turn Viber screen lock ON**.

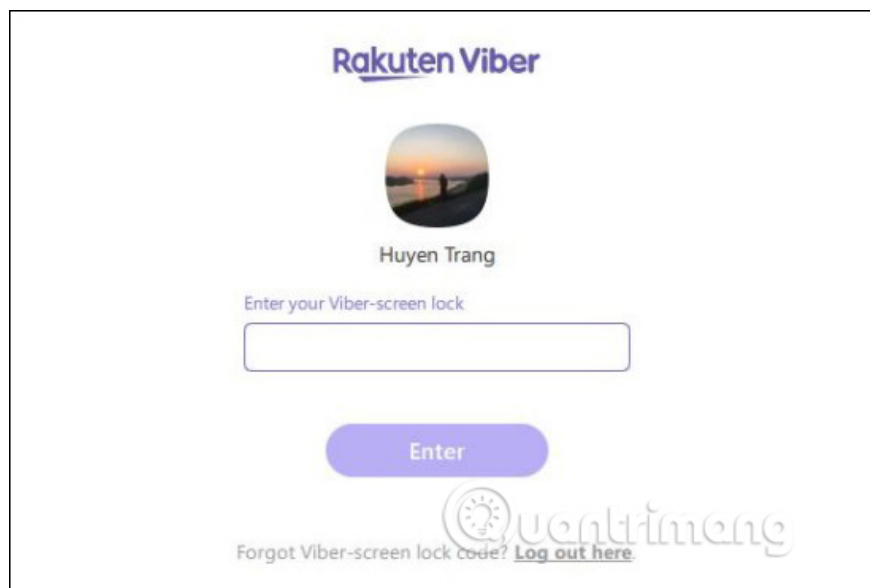

### Step 4:

Displays the interface so that we can **set a password for our Viber** account. Enter the password in the Enter new Viber screen lock box, then re-enter the password in the Re-enter new Viber screen lock. Then **click Done** to confirm the password.

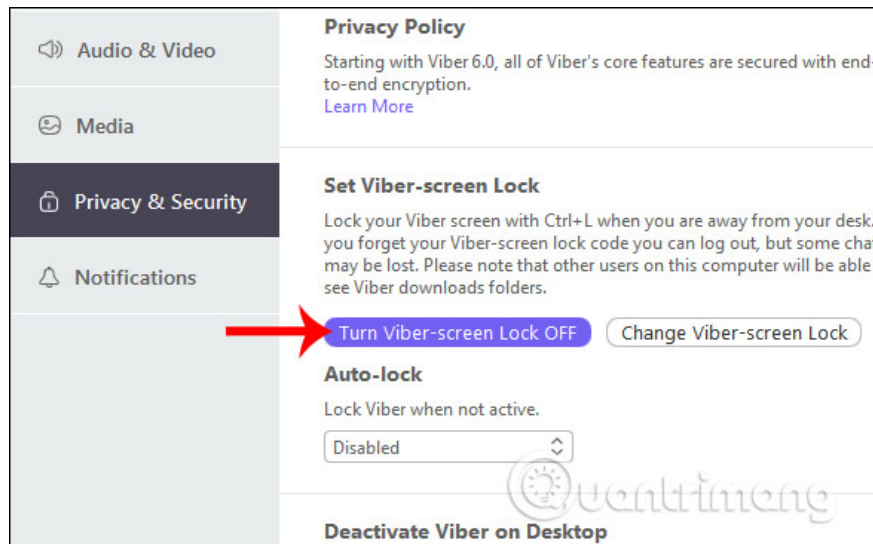

To **lock the Viber screen interface**, we just need to press **the Ctrl + L key combination** . Then the Viber interface switches to the lock screen as shown below.

To unlock, you need to enter the correct password previously set, then press Enter to access.

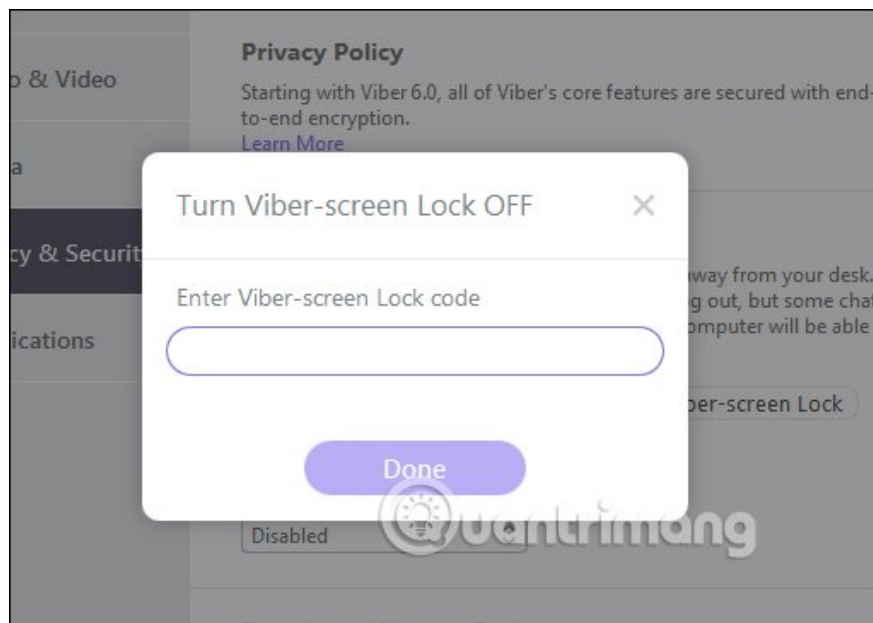

**Step 5:**

To **turn off Viber screen lock mode** , go back to Privacy & Security in the Options section, then **select Turn Viber screen lock OFF** .

### Step 6:

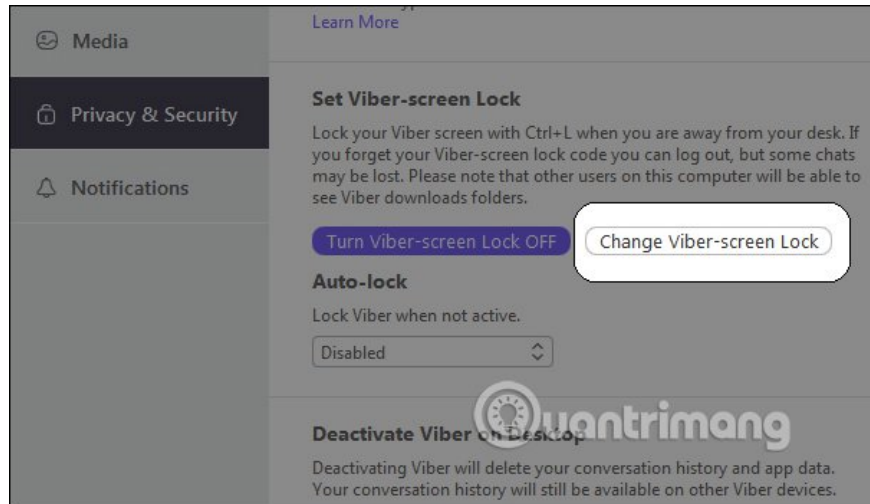

Then the new interface displays asking users **to re-enter the password of the key code** set to remove this feature. **Click Done** to finish.

## 2. How to change the Viber key on the computer

### Step 1:

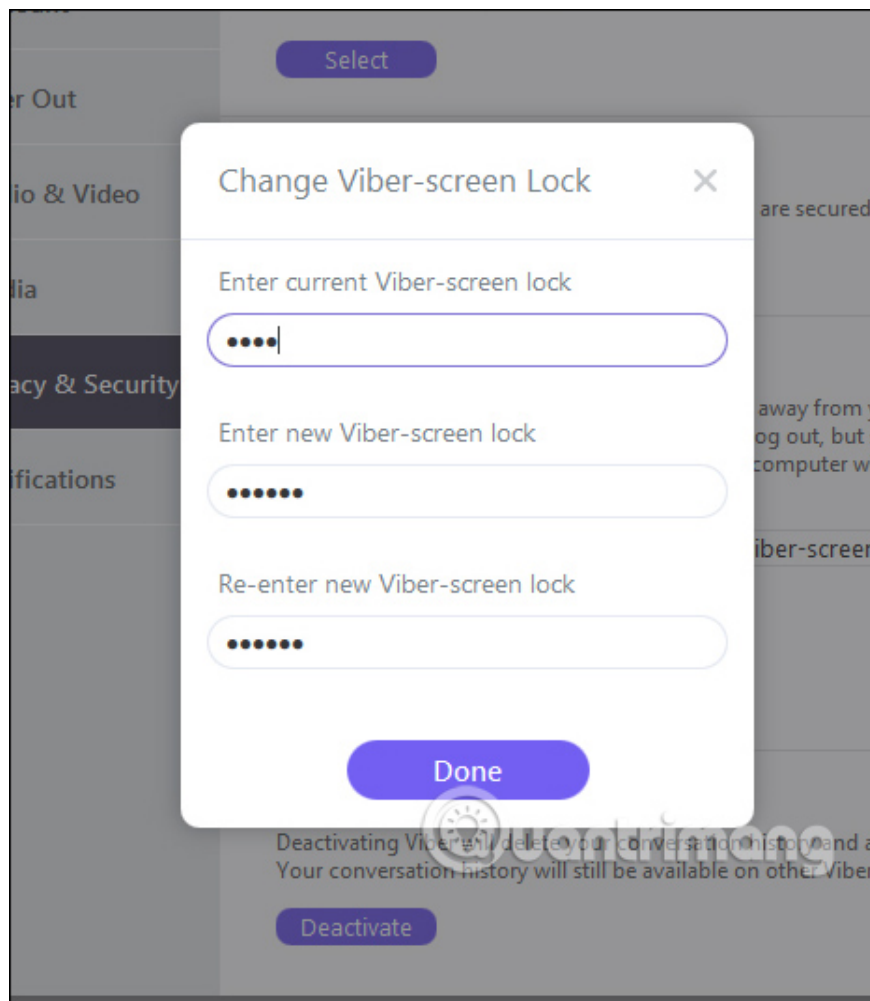

To change the Viber key, in the Privacy & Security interface, click the **Change Viber screen lock** .

## Step 2:

Display the Change Viber screen lock interface to change the new key for Viber. You enter **the Viber key currently used** in the **Enter current Viber-screen lock section** .

Enter **the new Viber key** in the **Enter new Viber-screee lock line** and also confirm the new key. Finally **click Done** below to finish.

Creating Viber keys is simple and fast, helping you secure the entire content of the message. So we don't need to lock the computer screen every time we don't use Viber anymore.

I wish you all success!
