

How to set Unsplash wallpaper for Google

The Daily Wallpaper Changer utility will create a background for Google from Unsplash images.

Chrome users now have a lot of options to set the browser wallpaper, including the use of their personal images. And if users want to create wallpapers for Google, you can install the utility Daily Wallpaper Changer. This utility uses images from Bing and Unsplash to set as a wallpaper for Google whenever we visit. This wallpaper will display in full screen when they are in the Google interface and display in the header when you enter the content search interface. If you want to download wallpapers for Google, users just need to click save image to be. The following article will guide you how to set the wallpaper for Google.

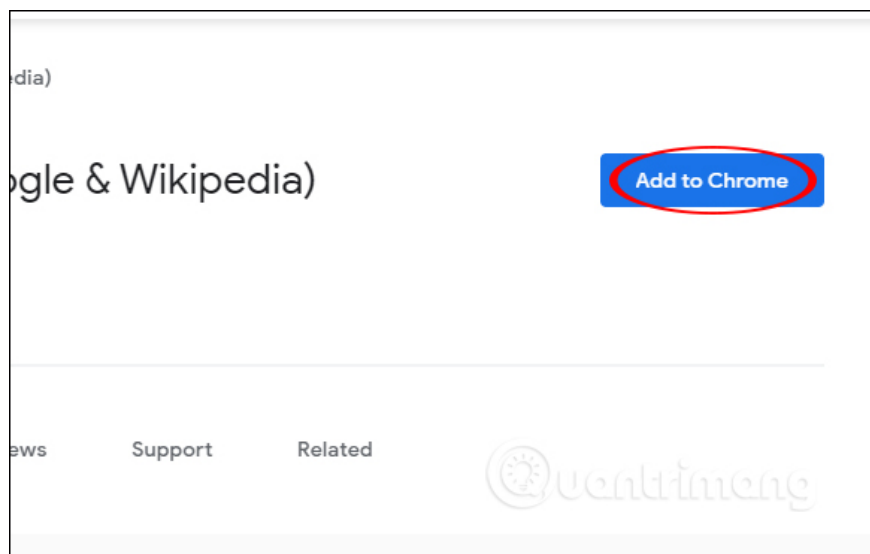

1. How to create a Chrome theme quickly
2. How to change the Chrome interface, create a very unique Chrome theme
3. How to customize the interface Facebook, Google with the Stylish utility
4. How to create a standby screen and remind you to work on Google Chrome

Instructions to set a wallpaper for Google

Step 1:

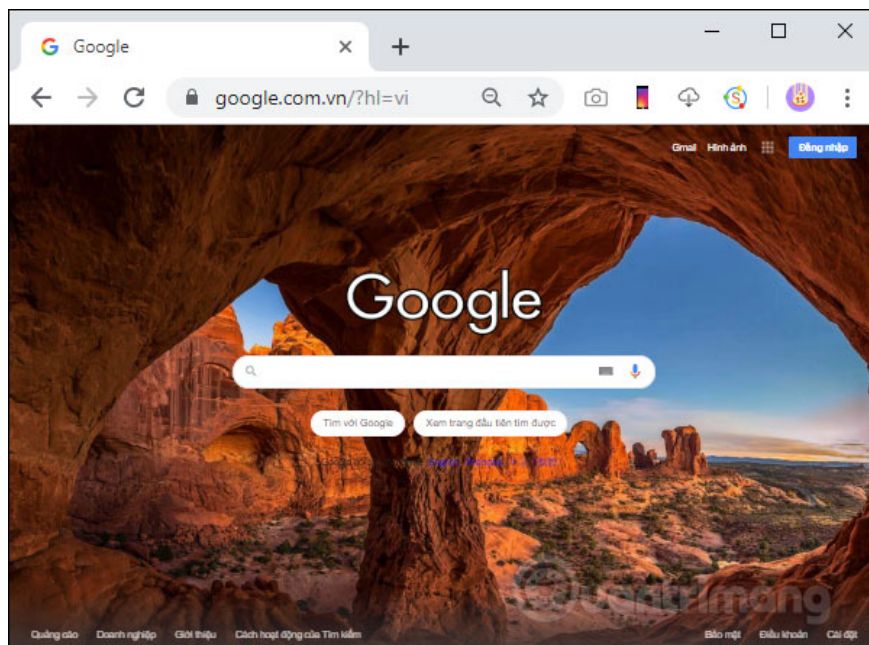

Users install the utility Daily Wallpaper Changer for Chrome browser by following the link below.

1. Download the Daily Wallpaper Changer utility

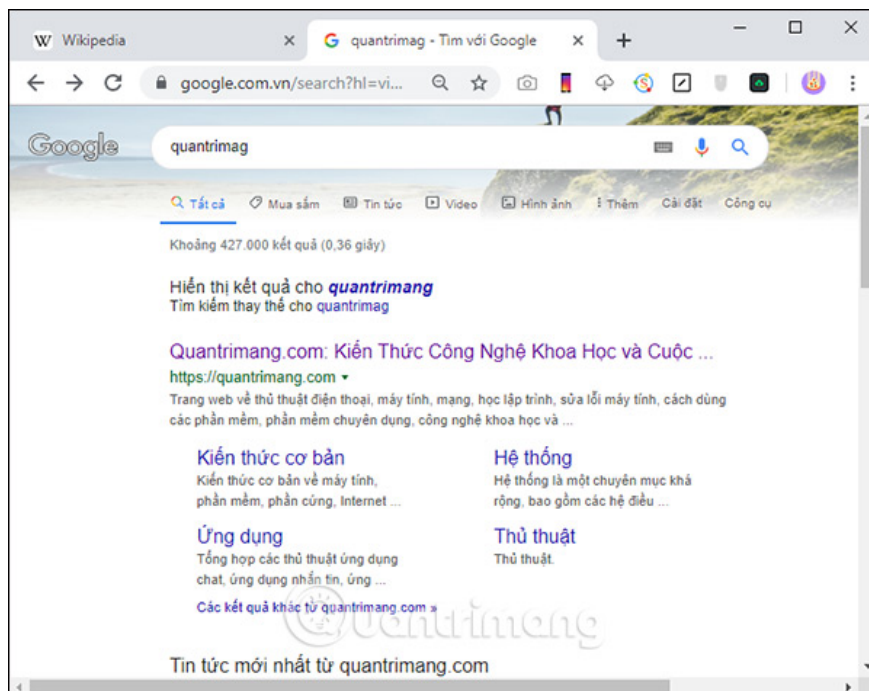

Step 2:

As soon as you install the extension and reload the browser, the interface of the Google page will be changed to a completely new wallpaper.

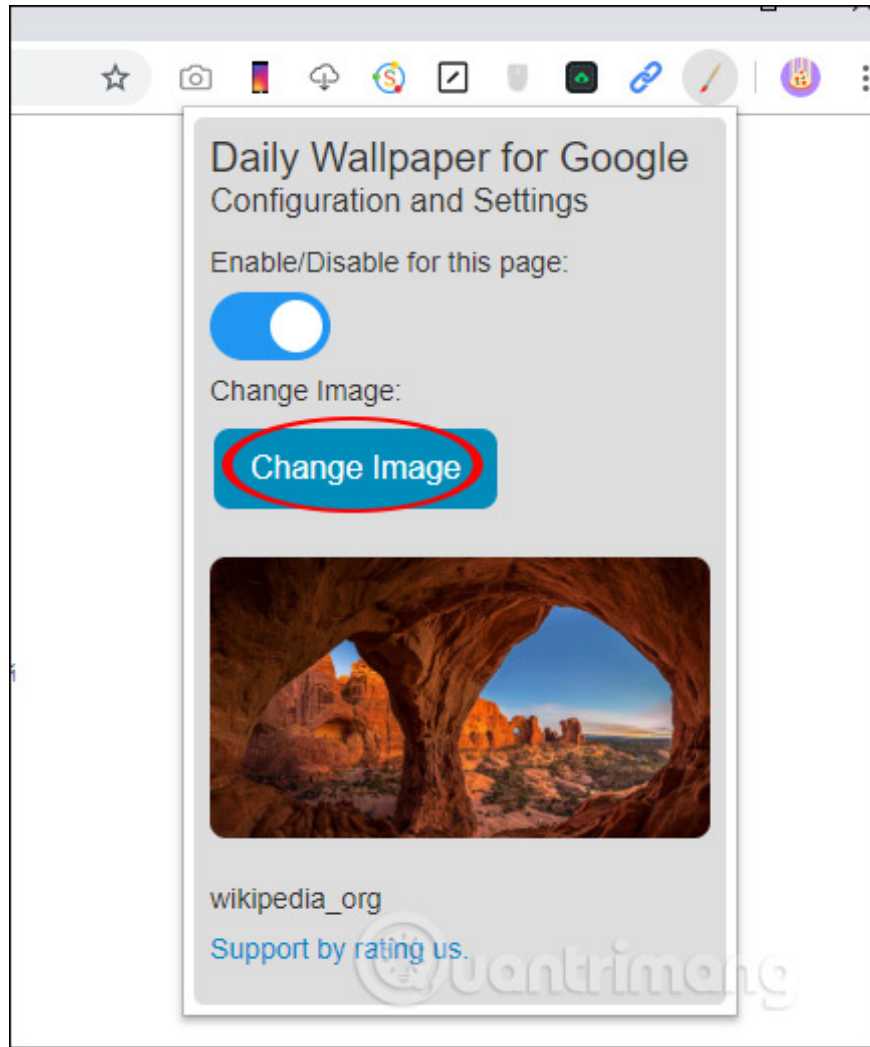

If we enter the search keyword into Google then the background image will switch to display in the top header of the page as shown.

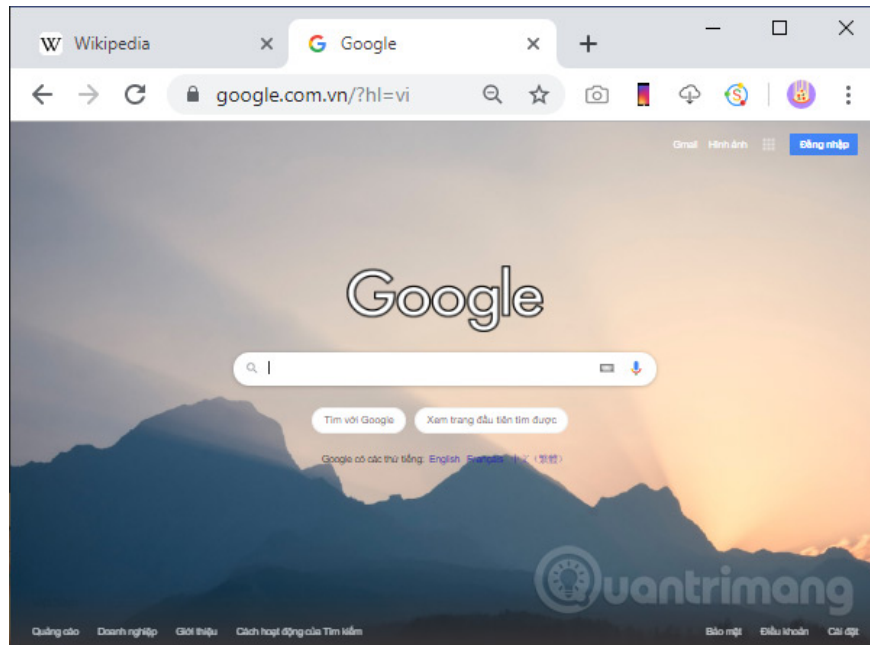

Step 3:

If you want to **change to another wallpaper** for Google, users click on **the utility icon** in the browser access bar and then click **Change Image** .

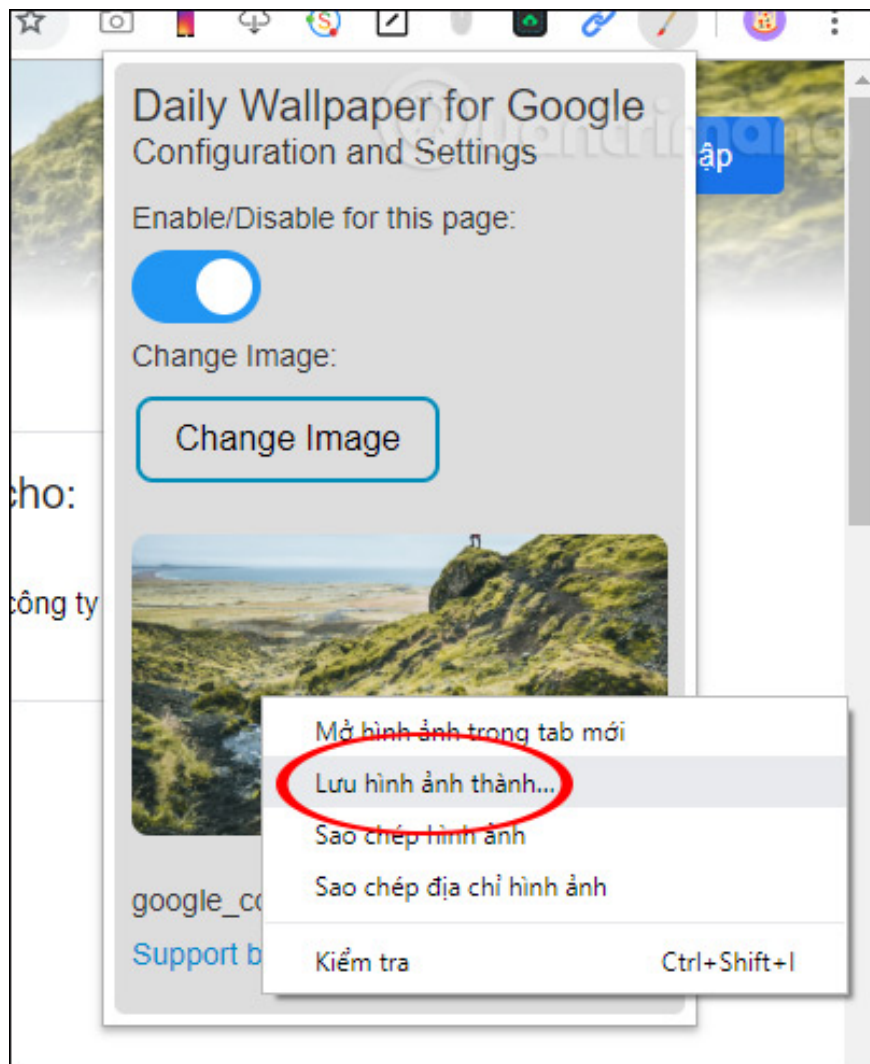

Immediately Google wallpaper is transferred to the new one.

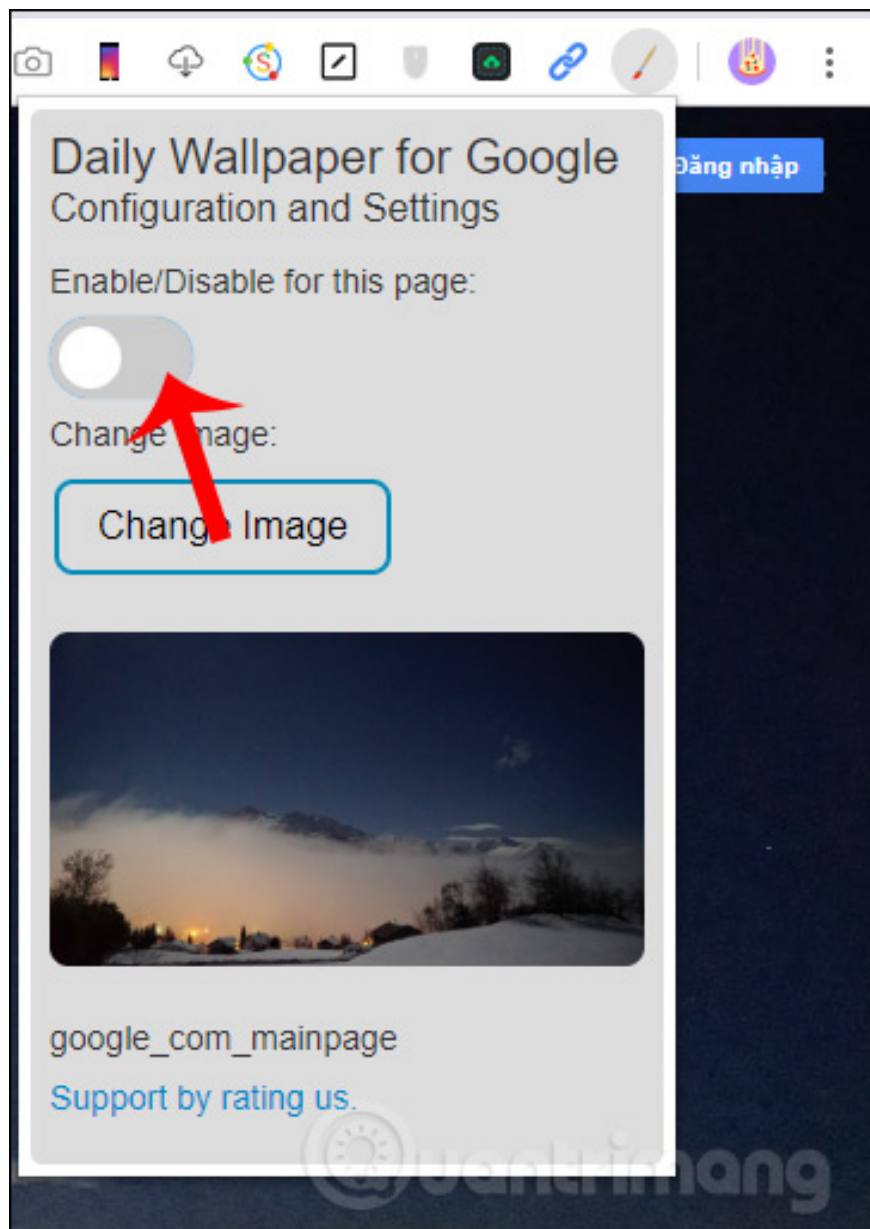

Step 4:

To save the Google wallpaper image if you need, then at the interface of the utility, we just need to **right-** click on the **thumbnail** of the wallpaper image and select **Save image as** .

If you want to **turn off wallpaper mode for Google** , in the interface of the user utility, click **Enable / Disable for this page** to turn off the wallpaper.

So not only Chrome but with the Daily Wallpaper Changer utility, the Google interface has also been changed with images of many different themes. In the upcoming versions, manufacturers will update YouTube and Amazon to the list of utilities that support wallpaper settings.

I wish you successful implementation!
