

How to set up Exchange Email, calendar and contacts on iPhone and iPad

Exchange is Microsoft's email, calendar and contacts service, built on the fast ActiveSync protocol. Many companies use Exchange for their email services. If you have this account and own an iPhone or iPad, follow this guide to sync it on the device.

Exchange is Microsoft's email, calendar and contacts service, built on the fast ActiveSync protocol. Many companies use Exchange for their email services. If you have this account and own an iPhone or iPad, follow this guide to sync it on the device.

Whether using Exchange via Microsoft, Google, a company or a third party service, all are set up in the same way. All you need to know is login information.

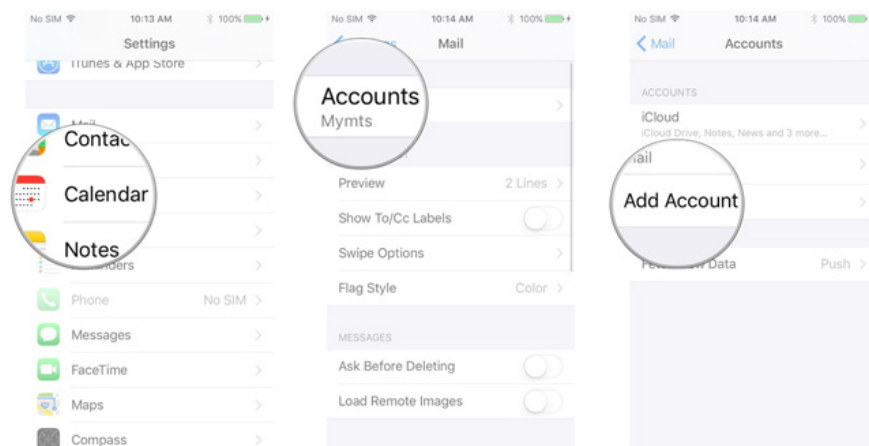

1. Instructions for setting up an Exchange account on Android phones

Step 1: Launch the **Settings** app from the main screen.

Step 2: Touch **Mail** , **Contacts** or **Calendar** .

Step 3: Select **Accounts** .

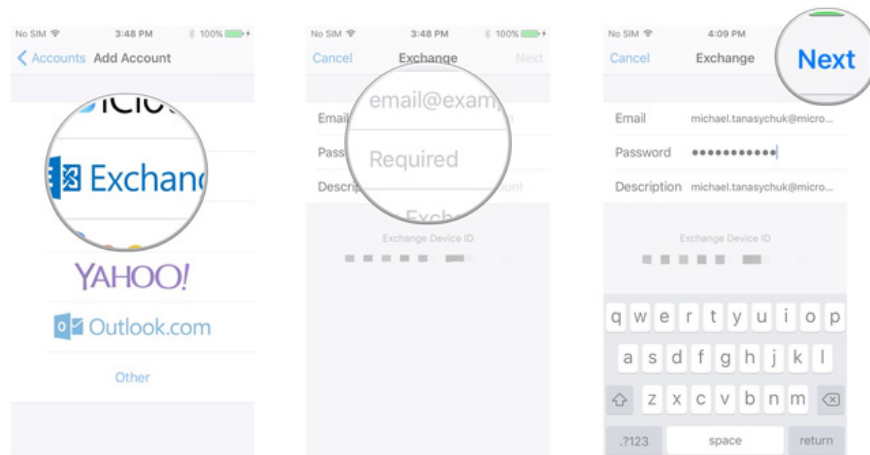

Step 4: Touch **Add Account** .

Step 5: Touch **Exchange** .

Step 6: Enter the username and password for the account you want to synchronize.

Step 7: Touch **Next** .

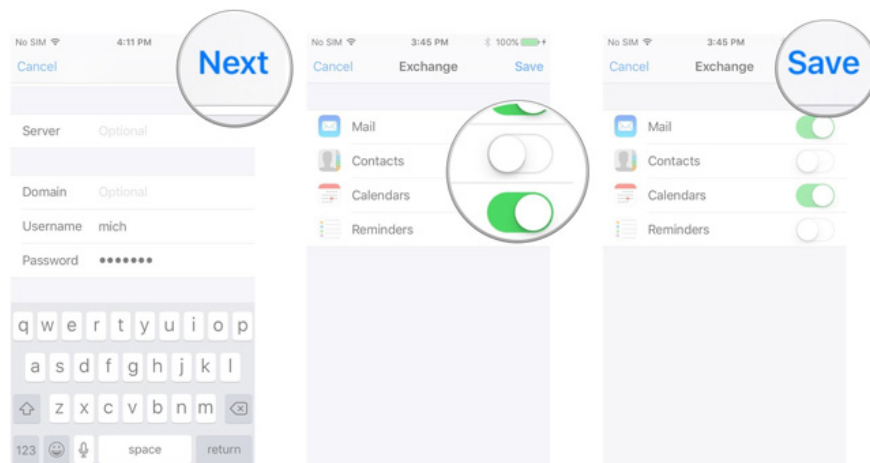

Step 8: Enter Exchange ActiveSync account settings.

Step 9 : Touch **Next** .

Step 10: Touch the conversion bar next to the Exchange services you want to synchronize. If there are calendar, mail or contacts available on iPhone, a message will appear asking you to confirm keeping or deleting them. Touch the option you want.

Step 11: Click the **Save** button in the top right corner.

You can return to **Settings** and configure the sync time and advanced settings like SSL and S / MIME.
