

How to set up infinity wallpaper on Galaxy S8

Unique and ultra-slim border screen of Samsung Galaxy S8 is always the focal point to attract the attention of users at first sight. In order to adapt to this infinite screen, Samsung has released a variety of wallpaper samples for the Galaxy S8. Let's see how to set up the infinity screen on Galaxy 8.

The unique ultra-thin and border screen of Samsung Galaxy S8 is always the focal point to attract the attention of users at first sight. In order to "adapt" to this infinite screen, Samsung has released a variety of wallpaper templates for the Galaxy S8. Unlike other Android wallpapers, the infinite wallpaper of Galaxy S8 works by setting the integration between the lock screen, the main screen and the always displayed screen. The following article will introduce how to operate as well as infinity wallpaper settings. Let's follow it!

Samsung Themes application with infinity wallpaper templates built into Galaxy S8. Open the application and select a set of wallpapers. You might wonder why it is 'wallpaper set', not a wallpaper? That's because a set of this wallpaper includes three different animated wallpapers - one for the always-displayed screen, one for the lock screen and the last for the main screen.

All you need to do is select an infinite set of wallpapers from the Samsung Themes app. After that, turn off the phone and touch the Galaxy S8 to appear the wallpaper that is always displayed. To switch to the lock screen, press the virtual Home button. Swipe or use fingerprints, sweep the iris to unlock the phone. After unlocking, the main screen will appear.

All 3 screens have a moving galaxy in the background but the background colors are different in each background. First wallpaper with slightly dark background while lock screen wallpaper and main screen with

brighter colors. So we know how to set up infinity wallpaper on Samsung Galaxy 8, still hesitate but don't try right on your mobile phone.
