

How to set up Talktv to start with the computer

Setting up the Talktv social network starts with the computer, laptop will help users to log in immediately, saving access time.

TalkTV is now the most popular social network for teenagers, with live streaming features that appeal to users. Through voice chat, we can fully promote our forte right on the Talktv like singing, cooking. And in the process of using, setting up Talktv software to start with your computer will help you save a lot more time, when we can log in to your account as soon as you turn on the computer. You will not have to add software startup operations, then enter the Talktv account to access. In the article below, we will guide you how to start Talktv with your computer.

Step 1:

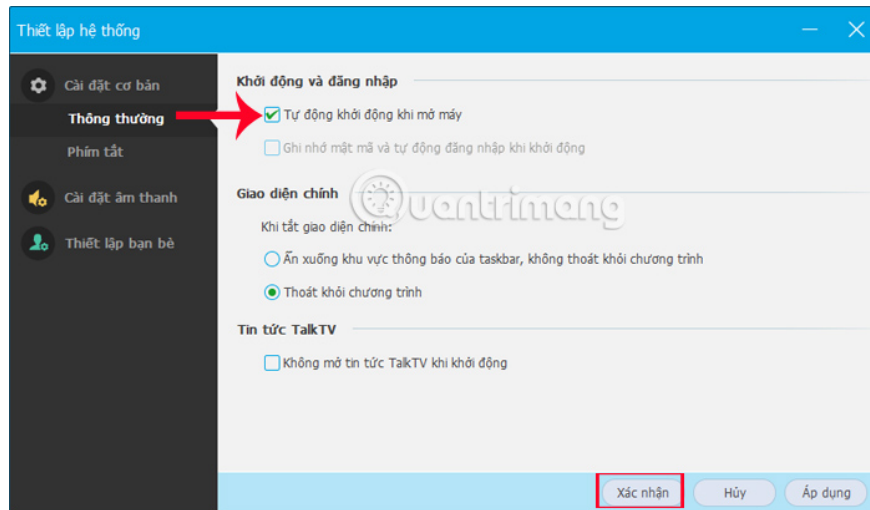

First, log into your Talktv account on your computer. At the main interface, users click on **the Setup icon and product information** at the top. Then select Next **System settings** .

Step 2:

At the System Setup interface, users click on the item Normally in the list on the left. Then look to the right and select **Automatically start when you turn on the phone** to log in to your account as soon as you turn on the phone.

If the user does not want to turn on Talktv with the computer, just leave the tick at that option. Finally click **Confirm or Apply** to save.

An extremely simple but very useful trick. As soon as the computer is turned on, we will see the Talktv software start with. However, in case the computer has a weak, low configuration, it is recommended to remove the StartTV feature with the computer, to limit the slow start-up or stalling.
