

# How to set up Xiaomi Mi WiFi Router

Xiaomi router is so complicated, how to set up and use it? Do not worry! In today's article, TipsMake.com will show you how to set up Xiaomi Mi WiFi Router.

Xiaomi, as a mobile Internet company focuses on research and development of smart hardware and electronic products. Xiaomi Router is one of them. Xiaomi routers are quite different from traditional routers. Traditional routers perform the function of transmitting network signals in a smart and simple way, while the Xiaomi router, in addition to transmitting network signals, can also back up camera photos, download videos offline, and speed up online games. and do many other functions.

As a smart router, Xiaomi's exclusive mobile phone app can remotely control the router, support Anti-rubbing Network feature, online reminder, remote search and download, speed limit Smart, ad blocking, game acceleration, bandwidth and many other functions.

Reading this, you will definitely wonder, if the Xiaomi router is so complicated, how to set up and use it? Do not worry! In today's article, **TipsMake** will show you how to set up Xiaomi Mi WiFi Router.

## Steps to set up Xiaomi router on PC

**Step 1** : Connect the power to the Xiaomi router, connect the broadband line to the blue "Internet interface" or "WLAN" interface of the Xiaomi router, then use the network cable to connect the black LAN port of the Xiaomi router with computer network card.

**Step 2 :** Open the browser, enter "**www.miwifi.com**" or "**192.168.31.1**" to open the Xiaomi router management interface, then enter "**administrative password**" to log in. Of course, if the device is equipped with a wireless network card, you can also connect wirelessly to the Xiaomi router by connecting the hotspot to "Xiaomi".

**Step 3 :** After logging in, switch to the '**Route Settings**' tab , click on '**External Network Settings**' , then enter the account information provided by the network operator to complete the network access settings. .

**Step 4 :** After that, you can set up the Xiaomi router as you like. For example, if you go to "**Routing Settings**" > "**Shutdown & restart**" , you can turn off or restart the Xiaomi router.

## Steps to set up Xiaomi router on mobile

**Step 1 :** Turn on the switch to activate the wireless network connection on the mobile phone, search for hotspots starting with "**Xiaomi**" , this will automatically connect to the Xiaomi router.

**Step 2 :** When the connection process with the Xiaomi router is complete, the "client" download interface will appear, you just need to click directly to download and install.

**Step 3 :** After downloading and completing the client installation, you will officially enter the Xiaomi router management interface.

**Step 4 :** In the "**External Network Settings**" interface that appears, enter the account provided by the network operator to complete the network access settings.

**Step 5 :** Then reset the WiFi name and password. When network access settings are complete, click the "**Settings**" button in the upper right corner.

You can set up the Xiaomi router in the open "**Settings**" interface. The article will not go into details here. After setup, you can enjoy the convenient and fast smart home life brought by the Xiaomi router, as well as learn more about the functions of the Xiaomi router.
