

How to share and copy files between Nox App Player and computer

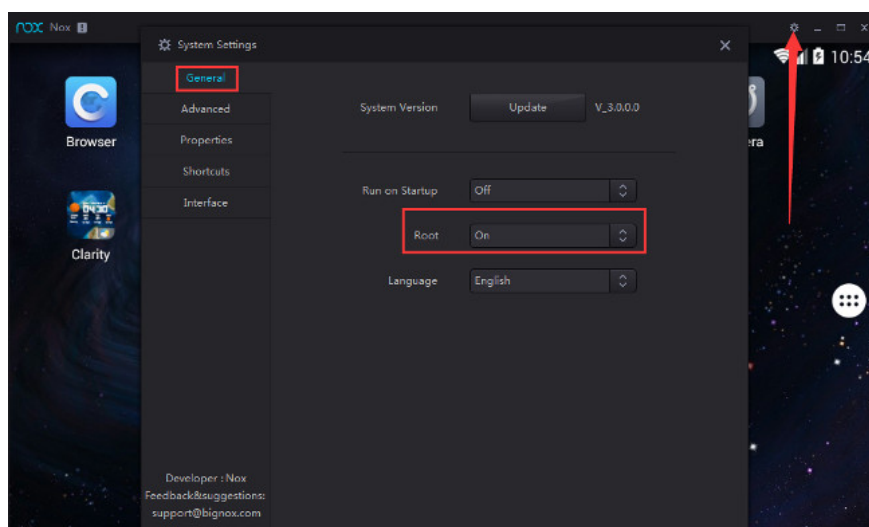

Do you know how to share files between your computer and Nox? If not, see the following article! The implementation is not as difficult as you think.

Sharing files between your computer and Nox is easy. One thing you need to do is root the Nox App Player before transferring or copying files between Nox and the computer.

1. Play Android game on PC using NoxPlayer (Nox App Player)

How to root Nox App Player

By default, Nox does not root. But you can easily switch it to root mode in **Nox System Settings > General > Select On** from the Root drop-down list > Click **Save changes** and restart Nox according to the instructions.

The root mode will give you the superuser user role in Nox.

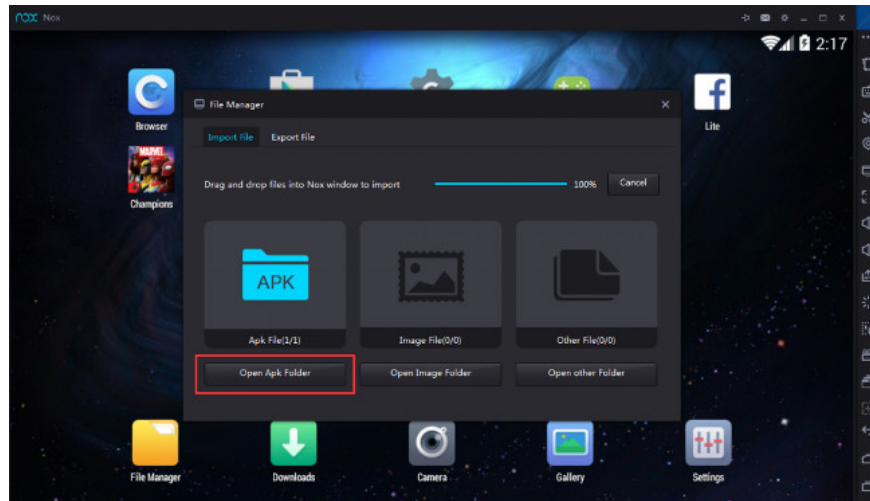

Please note that Nox is currently not compatible with mod applications. If using such applications, you can receive notifications that Nox does not root and the application does not work in Nox.

Copy files from your computer to Nox

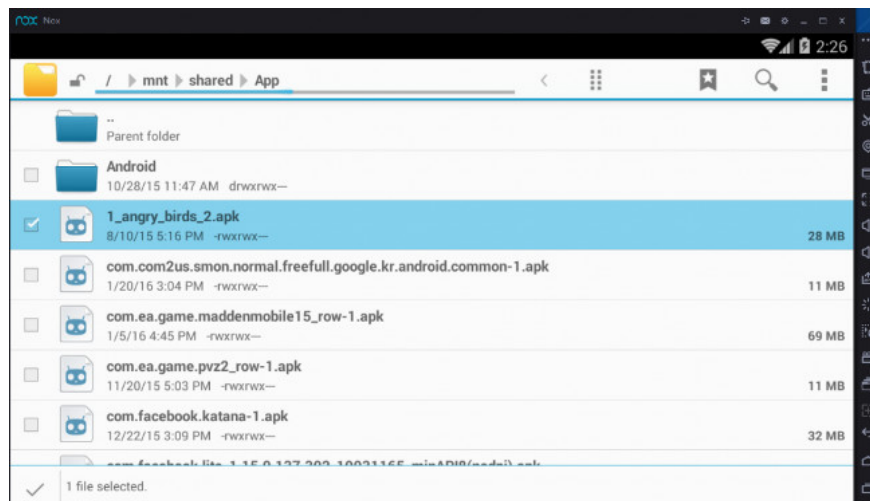

Note: The instructions below are based on Nox version 3.1.0.

Option 1:

1. Drag the file from your computer to the Nox and drop it. File Manager will appear, then click the **Open XXX Folder** button below the blue file.

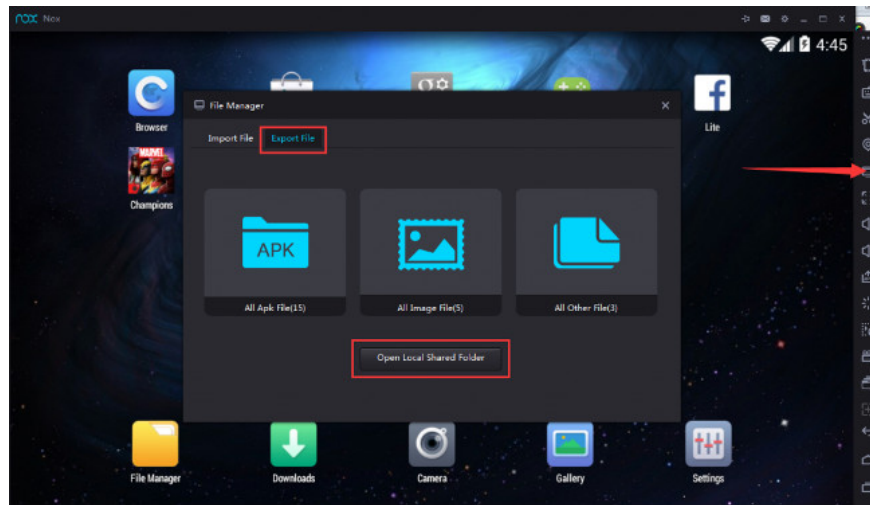

2. Then, you can install the apk files just copied from the computer to Nox transfer or copy the files to other locations in Nox.

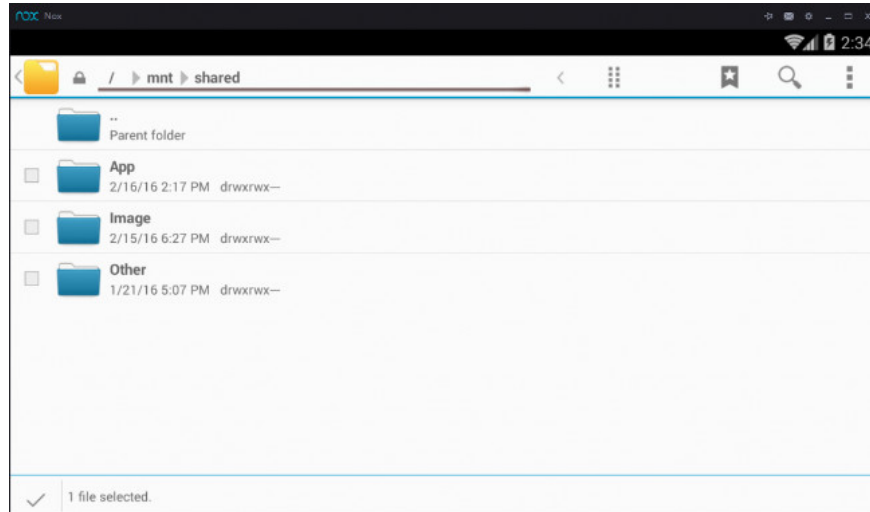

Option 2:

1. Open the shared folder on your computer **C: Users % username% DocumentsNox_share** or you can also access it via **My Computer** in the sidebar > **Export File > Open Local Shared Folder** .

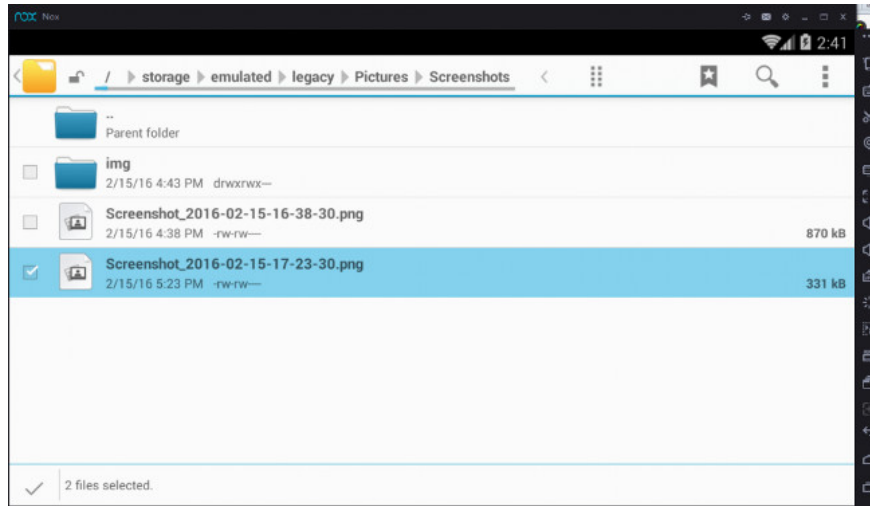

2. Copy the files you want to any shared folder in the computer, then they can also be accessed on Nox.

3. You can find these sharedfiles in the **File Manager / mnt / shared** in Nox App Player.

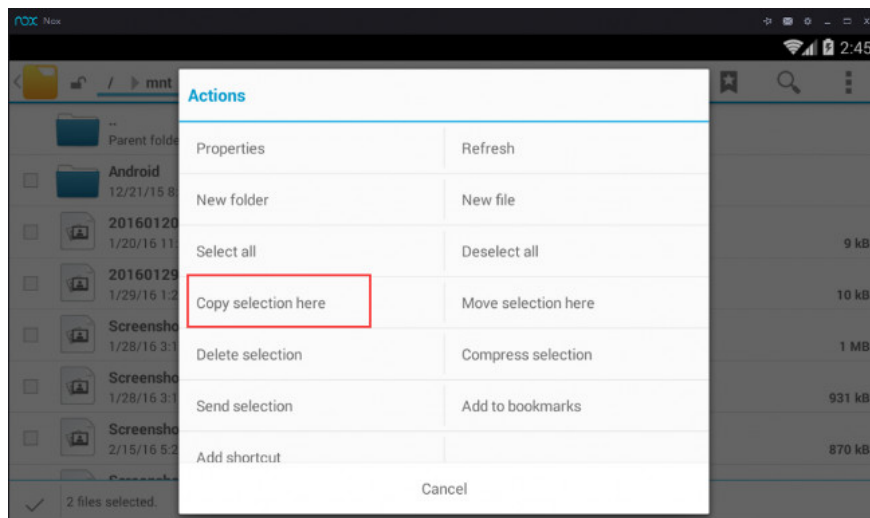

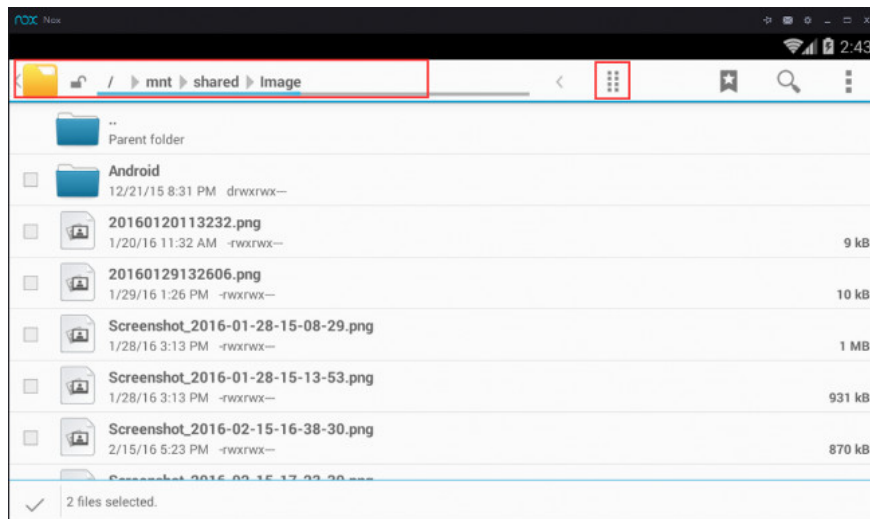

Copy files from NOx to the computer

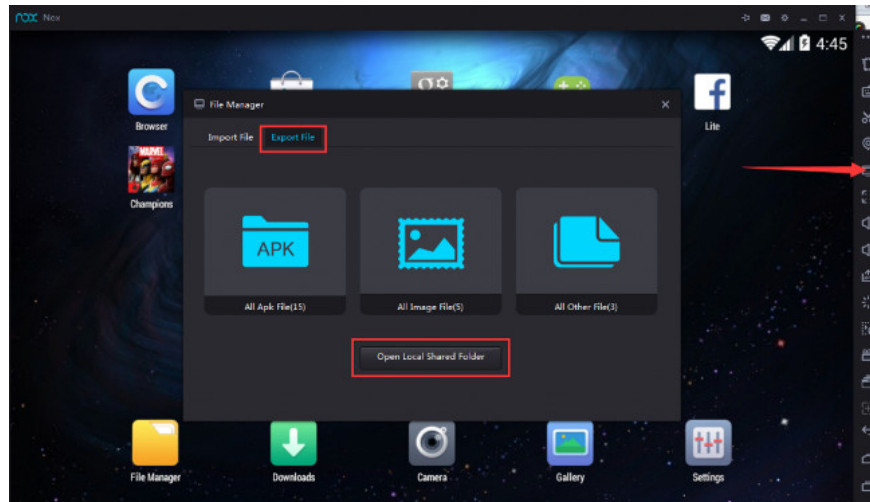

1. InFile Manager, check the box before the file to select the document you want to copy to your computer.For example, here select a screenshot in the Nox.

2. Go to **mntsharedImage** folder and click the button at the end of the file location and select **Copy selection** here .

3. You can now view these files in your computer under the path **C: Users % username% DocumentsNox_share** or you can also access it via **My Computer** in the sidebar > **Export File** > **Open Local Shared Folder** .

Also, below is a video showing how to share files between PC and Nox, you can refer to a better understanding of how to share files between your computer and the Nox App Player application.

I wish you all success!
