

How to share audio on TeamViewer

TeamViewer also supports sharing audio between connected computers, in addition to sharing screens.

To connect, control and access remote computers, TeamViewer is still the first choice for individuals and businesses. With TeamViewer users can share between 2 remote computers, conduct quick live seminars.

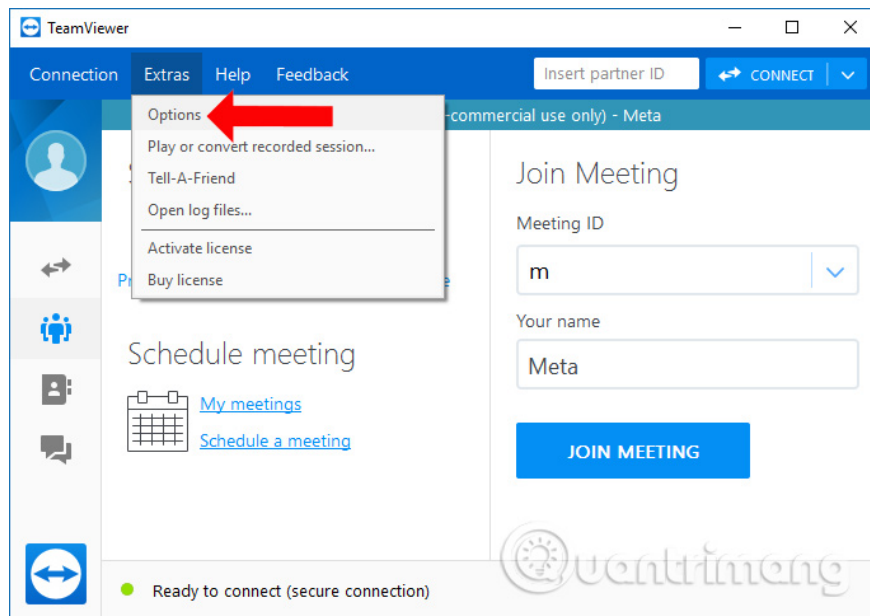

In addition to sharing screens between computers, TeamViewer also supports you to share audio with other computers. The audio sharing feature will be very helpful in case you want to ask others to fix audio errors on your computer. The following article will show you how to share audio on TeamViewer.

1. How to use Teamviewer without installation
2. Limit remote control to Teamviewer
3. How to control the remote computer with Ultraviewer

Guide to sharing audio on TeamViewer

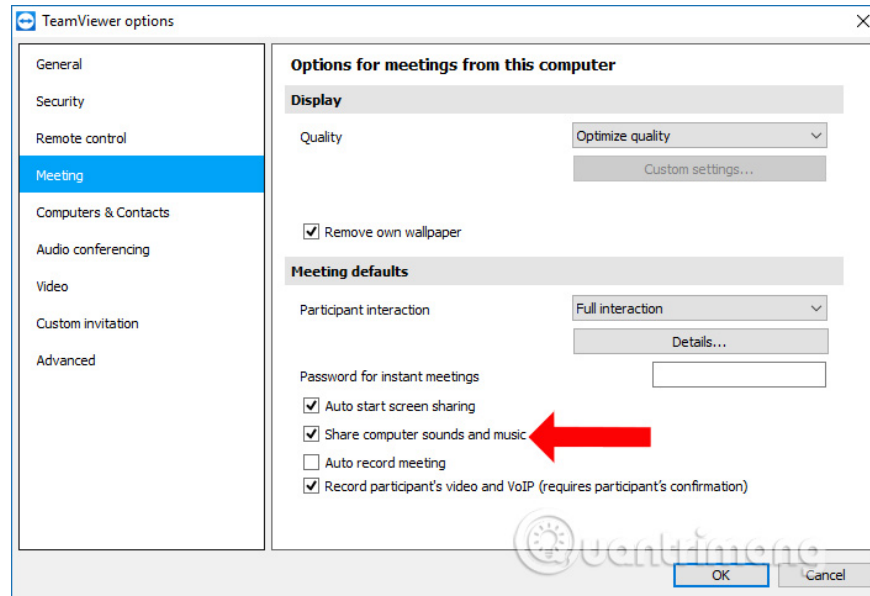

Step 1:

Open the TeamViewer interface on your computer then click on the **Extras tab** . In the menu, click on the **Options** option.

Step 2:

In the setup interface on TeamViewer, users click on the **Meeting Management** item. Continue to look to the right of **Password for instant meetings section**, select on content **Share computer sounds and sharing** . Finally **click OK** below to save the settings.

So when you connect to another computer on **TeamViewer** , in addition to being able to share the screen, the partner computer will also receive audio on your computer.
