

# How to share data, drives, folders in Windows 10

With LAN system, computers can easily share data easily with fast speed. The following article of TipsMake.com will guide in detail how to share / share drives and folders in Windows 10. This article is very useful.

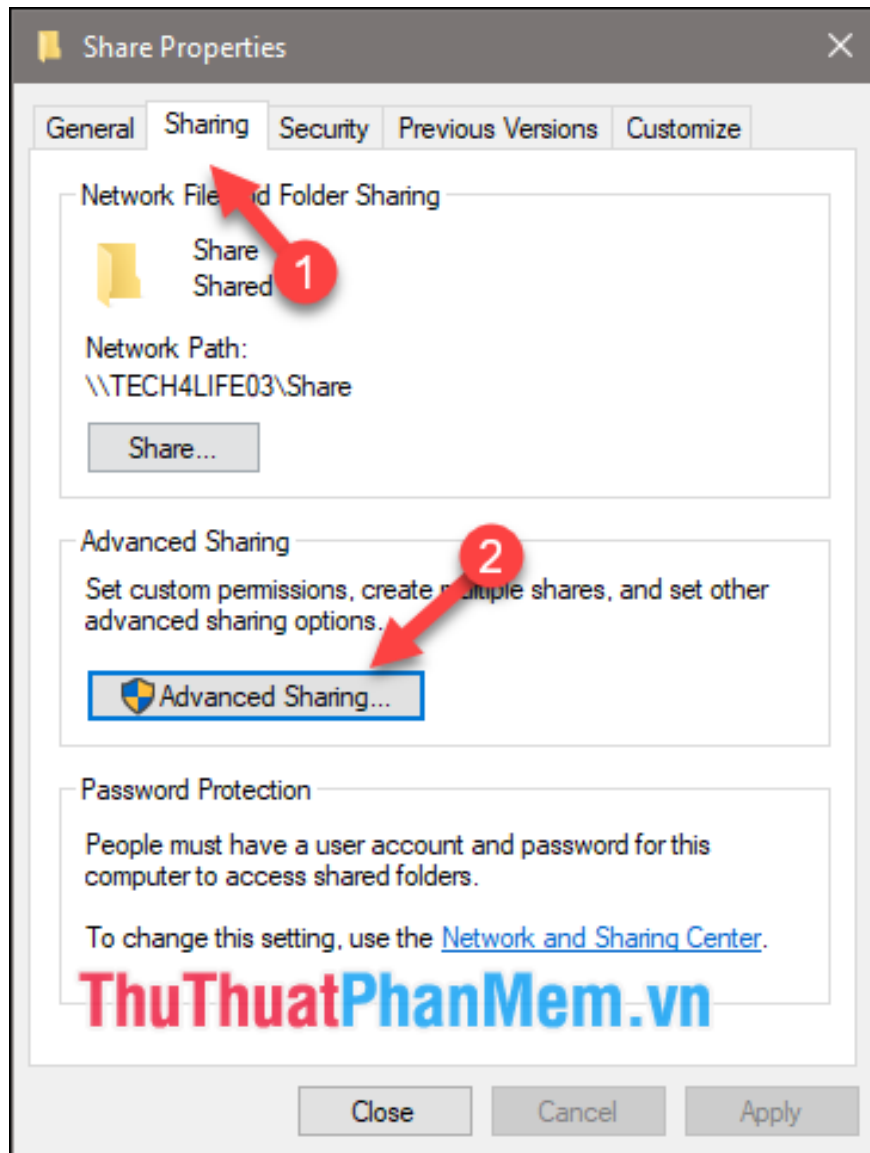

With LAN system, computers can easily share data easily with fast speed. The following article of TipsMake.com will guide in detail how to share / share drives and folders in Windows 10. This article is very useful for those who work in LAN using shared data.

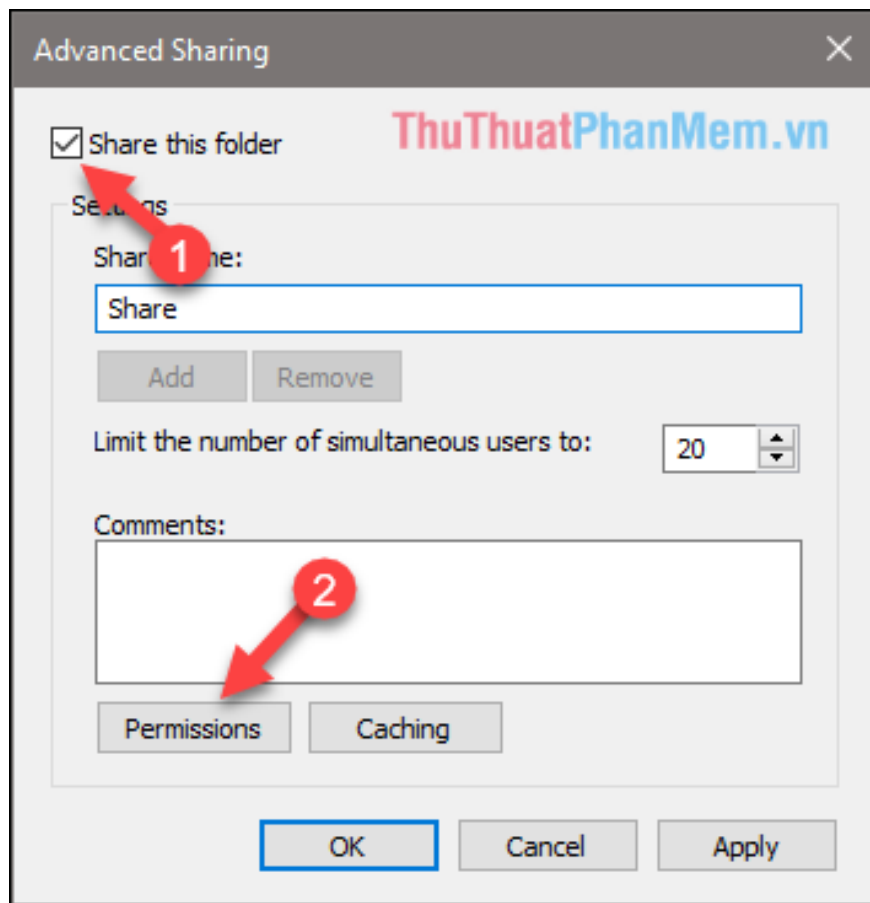

**Step 1 :** Right-click the hard drive partition or the folder you want to share and select **Properties**

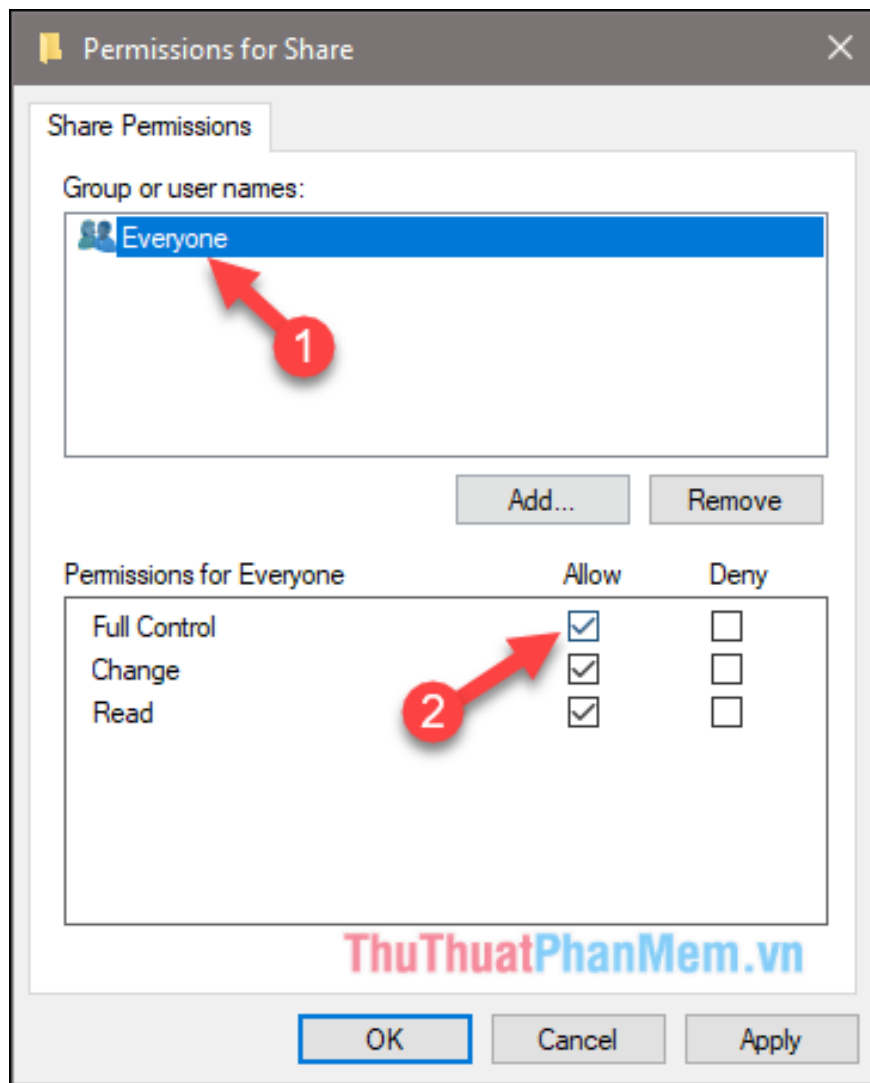

**Step 2:** In the **Properties** window select the **Sharing** tab then select **Advanced Sharing .**

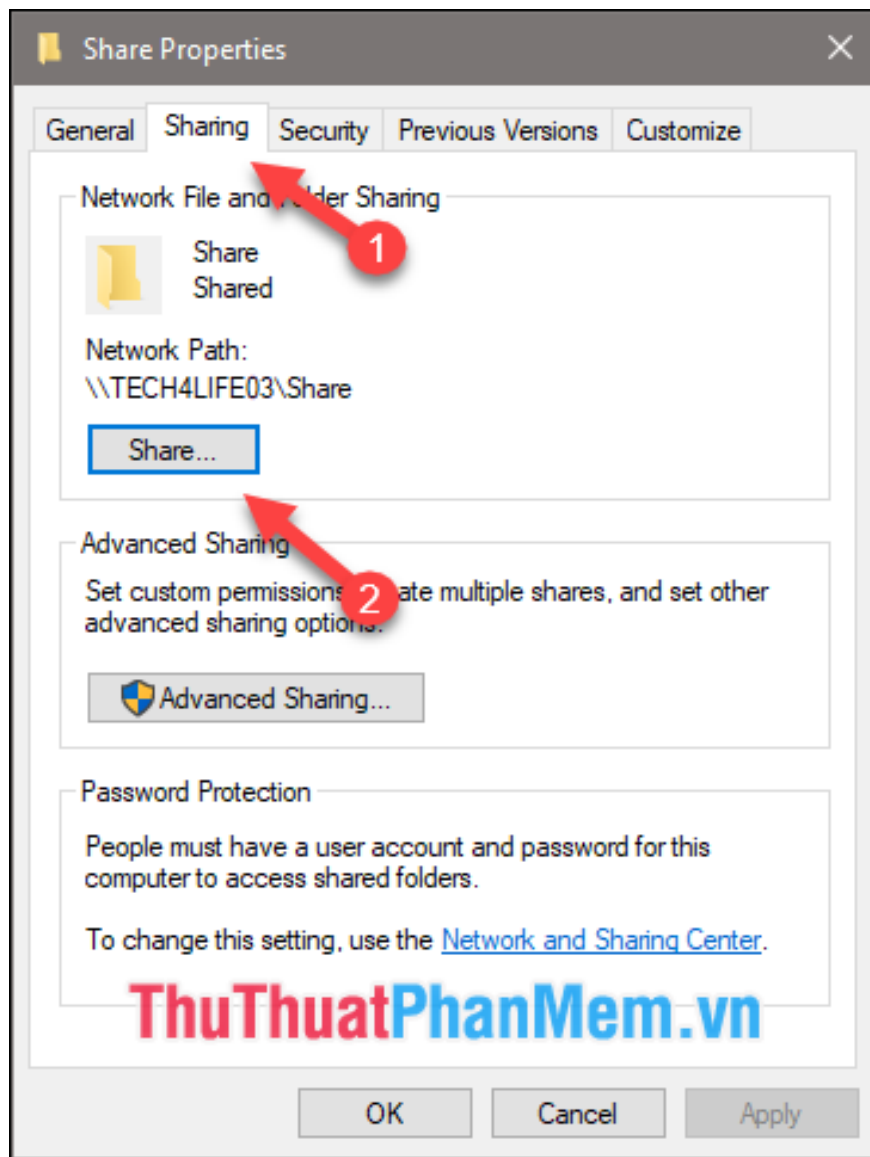

**Step 3:** Select **Share this folder** then select **Permissions**

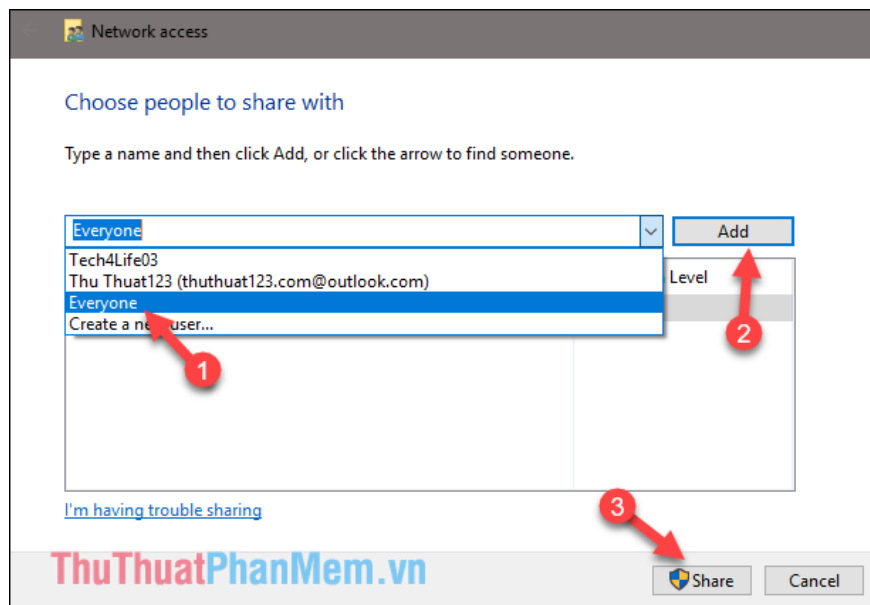

**Step 4** : You select **Everyone** then select **Full Control** so that the user has full rights to read and write data in the shared folder, finally click OK to finish.

Also with the folder you can also share the folder by selecting the **Share** item in the **Properties** window

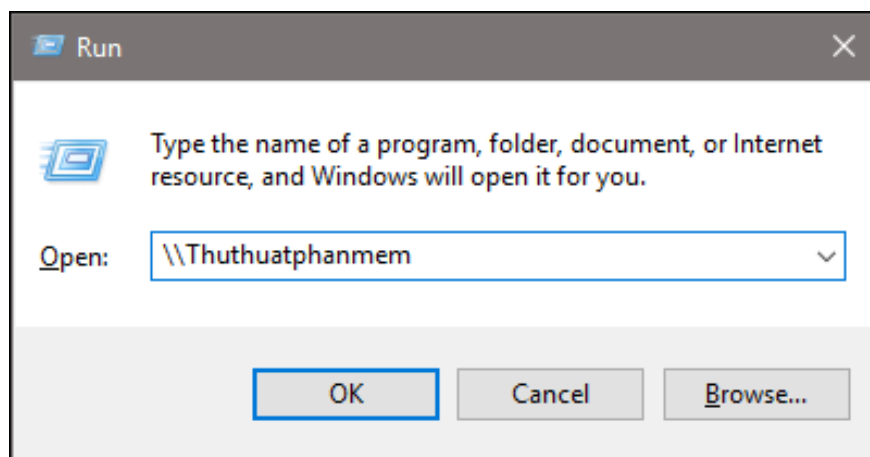

A new window appears, click the down arrow and select **Everyone**, then click **Add** to share the file to all computers on the LAN. Finally click **Share** to complete.

To access a computer on the LAN, press Windows + R to open the Run dialog box, then type the **computer's name** or IP address of **192.168.xx** and press **Enter** to access that computer.

For example, a computer named Thuthuatphanmem, we will enter **Thuthuatphanmem** and press **Enter** .

Above is an article on how to share data, drives, folders in windows 10, hope you will find the article useful. Good luck!
