

How to share files online on Datash.co

Datash.co is an online file sharing site via ID, which ensures privacy when sharing content.

In order to reduce data sharing operations, saving time, the trend of selecting online data-sharing websites is increasing. Datash.co is an online file sharing website that includes files or documents with anyone via ID address. Only those who know each other's ID address can receive and share each other's data. Thus, we only share content with a specific object, avoiding the case that the file is shared publicly, ensuring the privacy of the content. The following article will guide you how to use Datash.co to share data online.

1. 7 self-destruct file sharing sites
2. 5 fast and free web applications for transferring large files
3. Collection of the best free online data storage websites today
4. How to use TransferXL to share files online

Instructions for sharing files on Datash.co

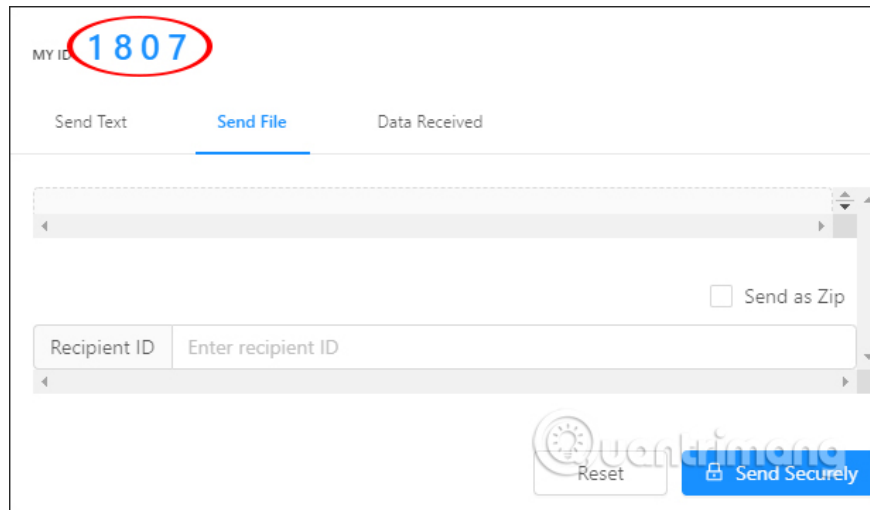

Step 1:

We visit the link page of Datash.co following the link below.

1. <https://datash.co/>

Step 2:

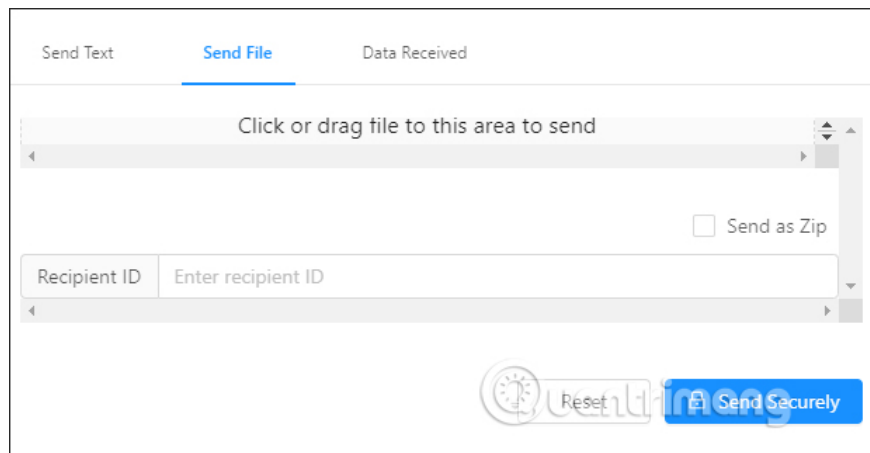

When a user visits the page, they will see the **ID in the My ID section** provided by the website to use for sharing and receiving data. This ID code will change continuously as soon as we reload the website.

Step 3:

Next, **select the type of content you want to share** . At Send Text we enter the text of the content we want to share. Click Send File to download the file you want to share, by dragging and dropping the interface or clicking Click or drag the file to this area to send to select the file.

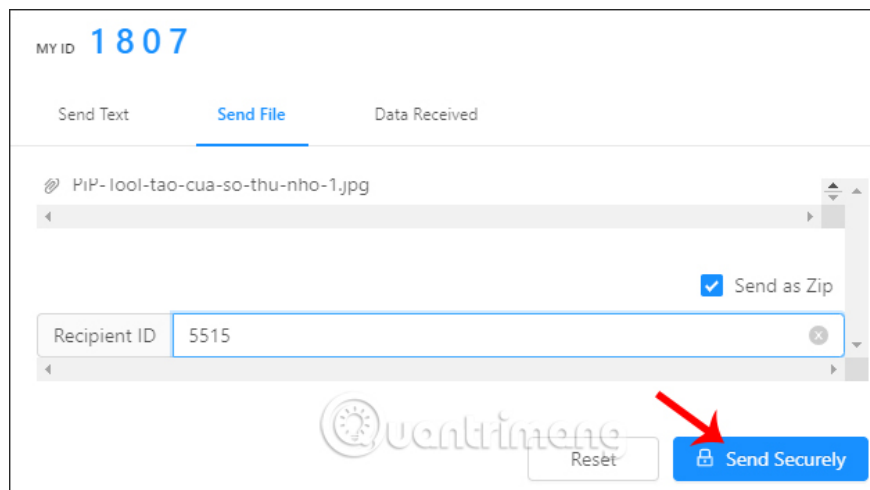

You can download multiple files at the same time and if you want to compress the file as a zip, select Send as Zip. The maximum file size for sending files is 30MB.

Step 4:

Enter the recipient's ID in **the Recipient ID box** , and then click **Send Securely** .

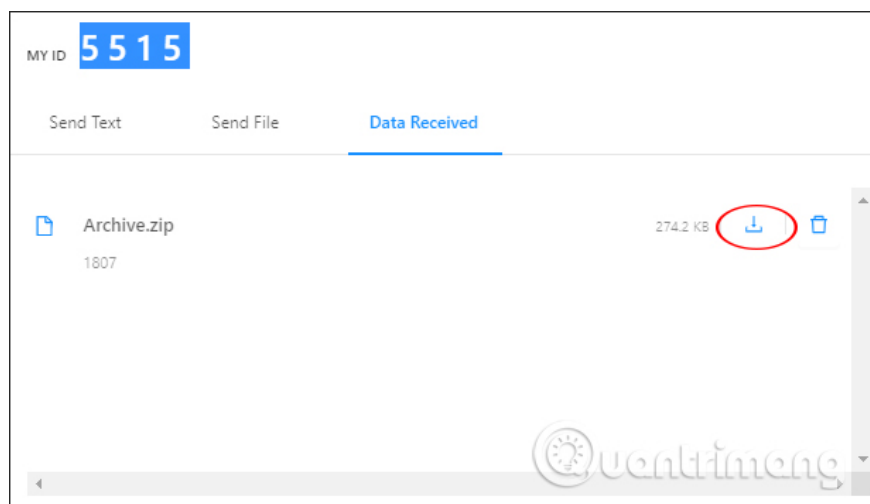

If you want to cancel the sharing, click Reset to return to the original interface of the website. All content sent on the service is conducted with 2-way encryption, ensuring file safety.

Step 5:

For the recipient you also need to access the page interface and then click on **the Data Received section** to see the file and the text sent. Click the download icon button to download the file or copy when clicking the copy icon.

After receiving the file and finished sharing, click the trash can icon to delete the file.

Add a website to share files online on Datash.co via the ID code for each visitor to the site. Just enter the ID address to share the data is okay and the recipient will receive the file immediately in the management section.

I wish you all success
