

# How to share files online on LicketyLink

LicketyLink is a P2P peer-to-peer file sharing service, with unlimited storage, upload and download file formats.

One of the advantages of sharing P2P file networks is to download the file immediately without waiting for the file upload to complete. Currently there are many online services that support peer-to-peer file sharing for free, unlimited file size and file upload format. LicketyLink is one such service. The following article will guide you how to use LicketyLink, share files online via P2P protocol.

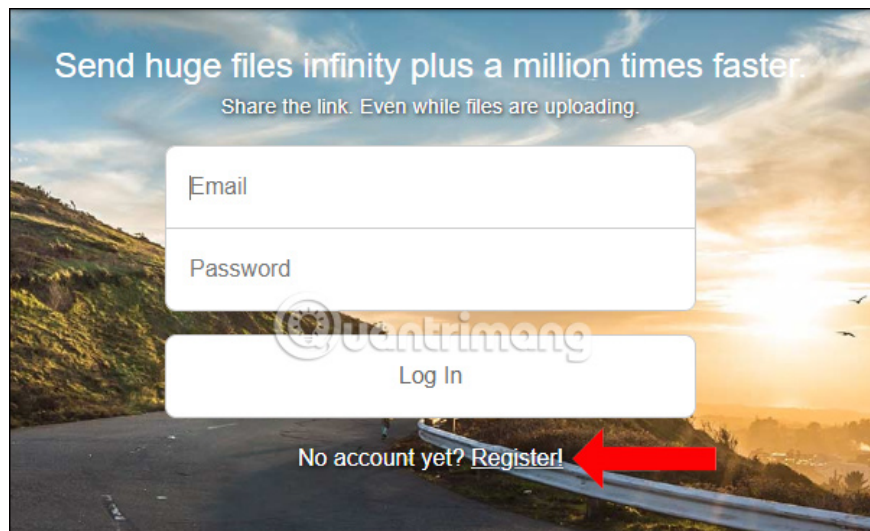

1. How to use TransferXL to share files online
2. How to share data between devices without installing software
3. How to share your self-destruct file with Degoo

## Instructions for sharing files on LicketyLink online

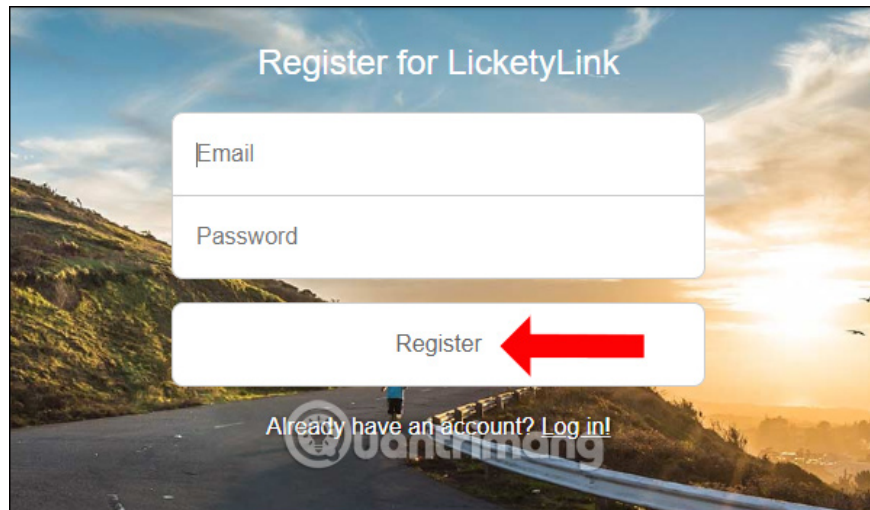

### Step 1:

You access the link below to enter the homepage of LicketyLink homepage. To use LicketyLink users need to create a personal account. Click on the **Registry** to register.

1. <https://lickety.link/>

Then you **enter the email information and password** then press the Registry to register. Return to the account login page interface.

## Step 2:

Users will receive a link to link to the download file sharing page. To download the file, you can drag and drop the file into the interface or click **Click / Drop** to select the file.

We can upload many types of files at the same time, regardless of file format. During upload file if you want to delete any file, hover over the trash icon.

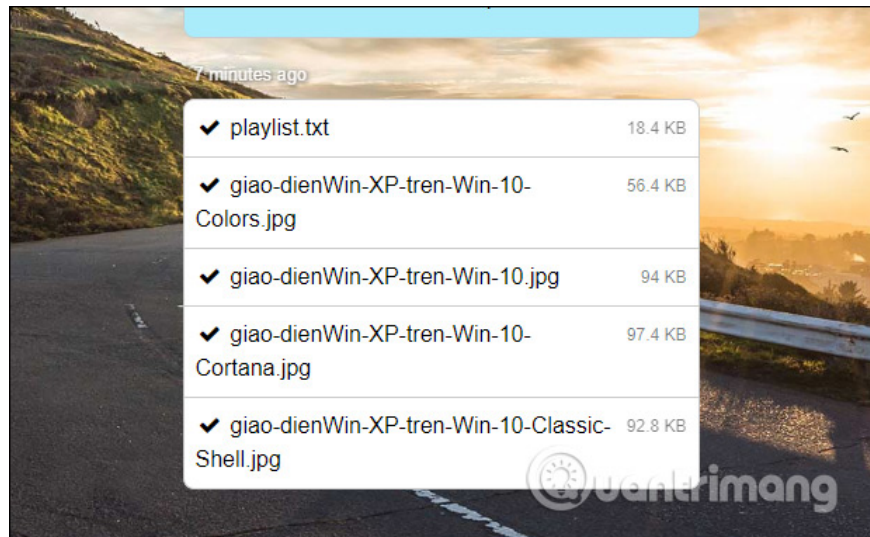

### Step 3:

Now send the link above to the file recipient. The file recipient can download immediately without you uploading the file, but to successfully download the file upload process must be completed. Click **the Copy icon** to copy the download link.

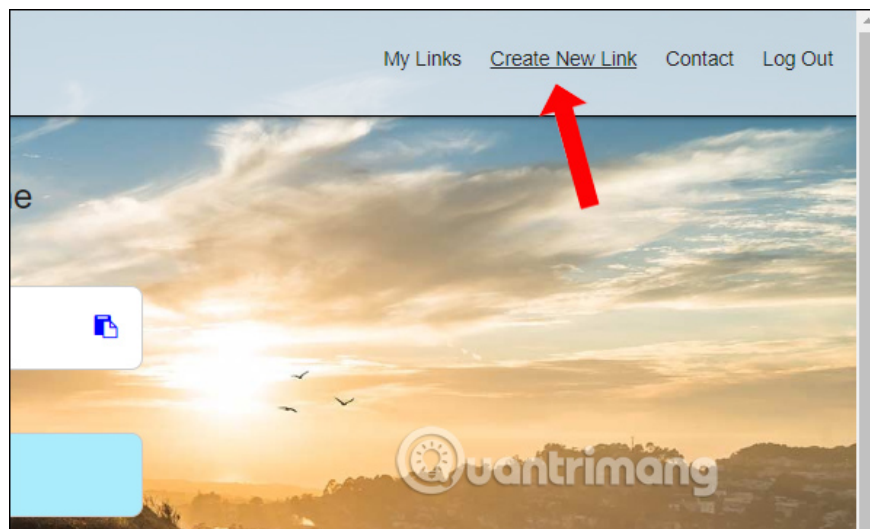

The link recipient will click on the file name to download the file.

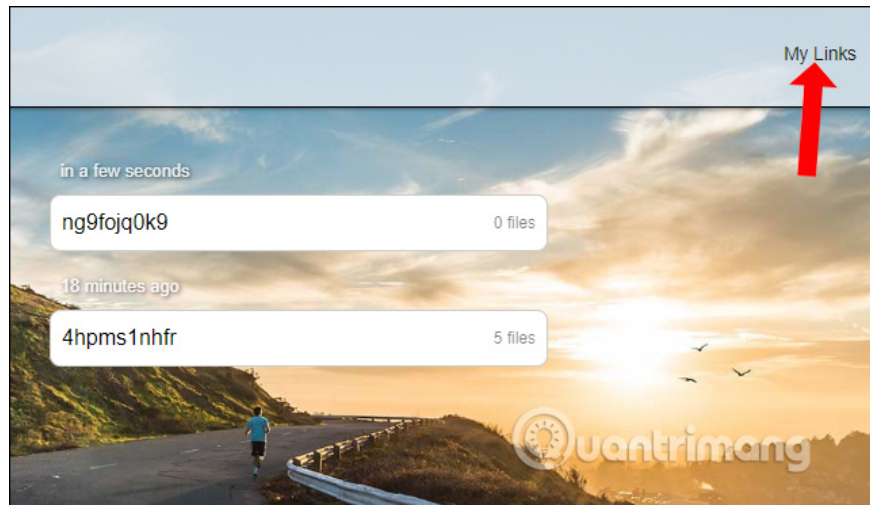

#### Step 4:

For each account users can create multiple upload and download files. Click **Create New Link** to create the upload link and download the new file.

Click **My Links** to manage the pages created to share files on LicketyLink.

With the use of LicketyLink, file sharing is much faster and simpler. Users can now upload files and recipients can still download files at the same time. We can create multiple file sharing links at the same time.
