

How to share files up to 2GB on WeTransfer

WeTransfer supports sharing large files without registering an account, the time to store files on the server is 7 days.

The online file sharing and sending services are currently selected by many people due to the fast implementation process, without registration, but can send a large amount. WeTransfer is an online file sending service, supporting sending 2GB files with a free account and with an upgrade account up to 1TB. The file will automatically cancel on the server when the default timeout. In the process of sharing we can download multiple files at the same time to save time. The method of sending files that WeTransfer uses is via email address or sharing link. The following article will guide you how to send files on WeTransfer.

Instructions to send files on WeTransfer online

Step 1:

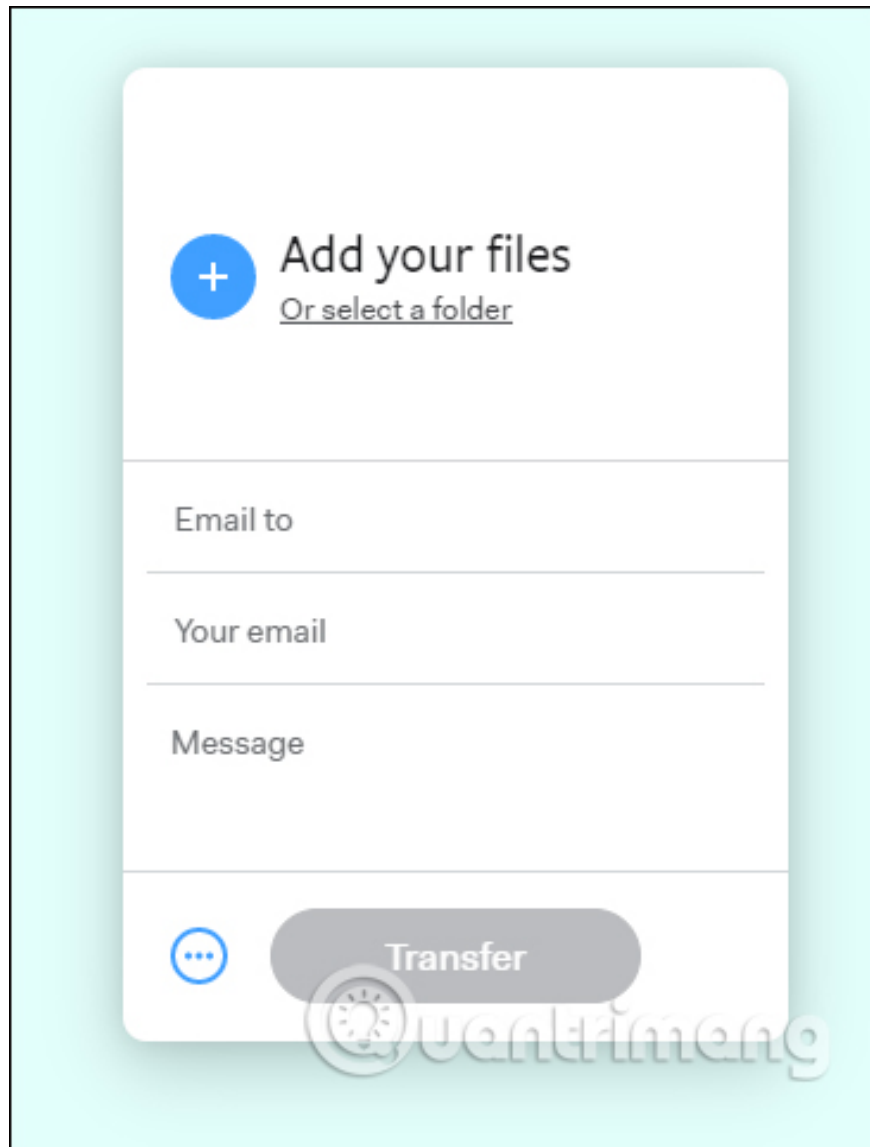

Users visit the link below to access the homepage of WeTransfer. We do not need to register an account and can use it always.

<https://wetransfer.com/>

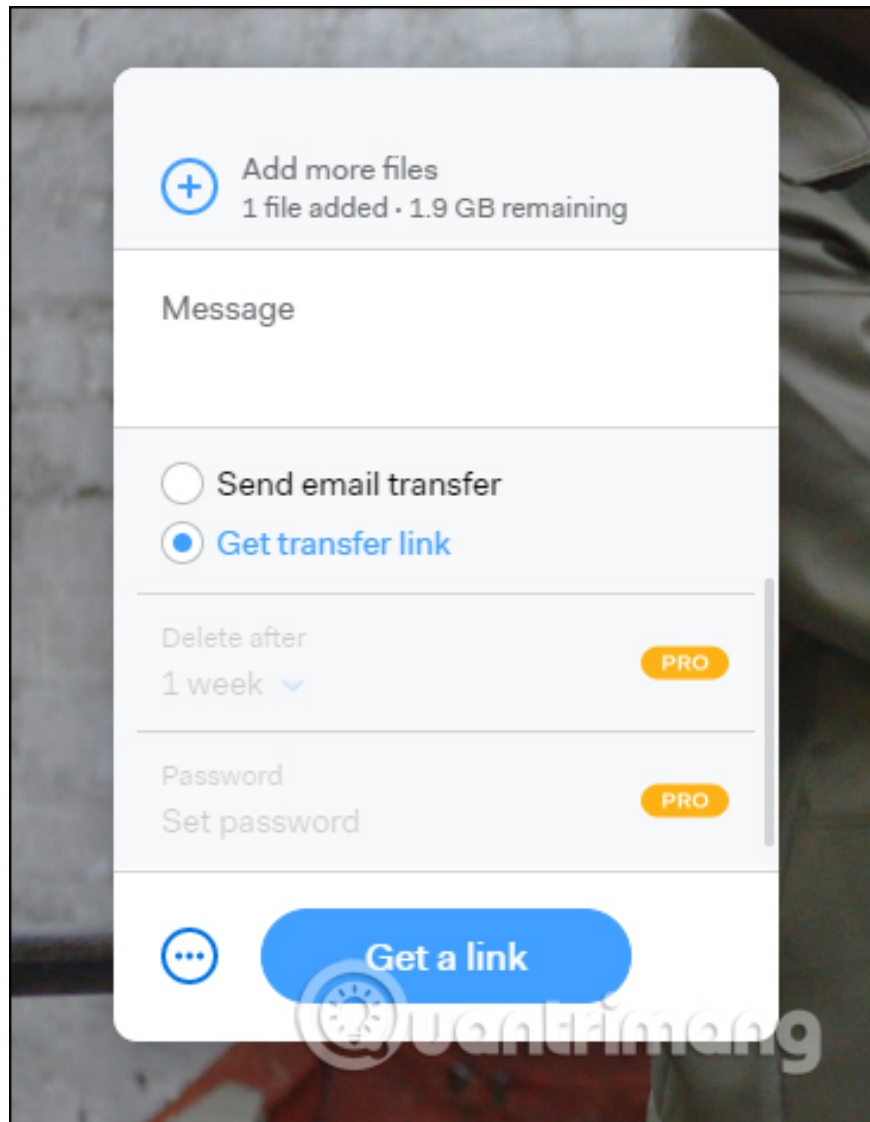

At the first page **click I agree** to **agree** to use the site.

Step 2:

Display the interface to **choose whether to send individual files or send entire folders** by clicking Or select a folder. Next we **enter the email of those who want to send** , **enter your email** , the message if needed. Finally we **press Transfer** to transfer.

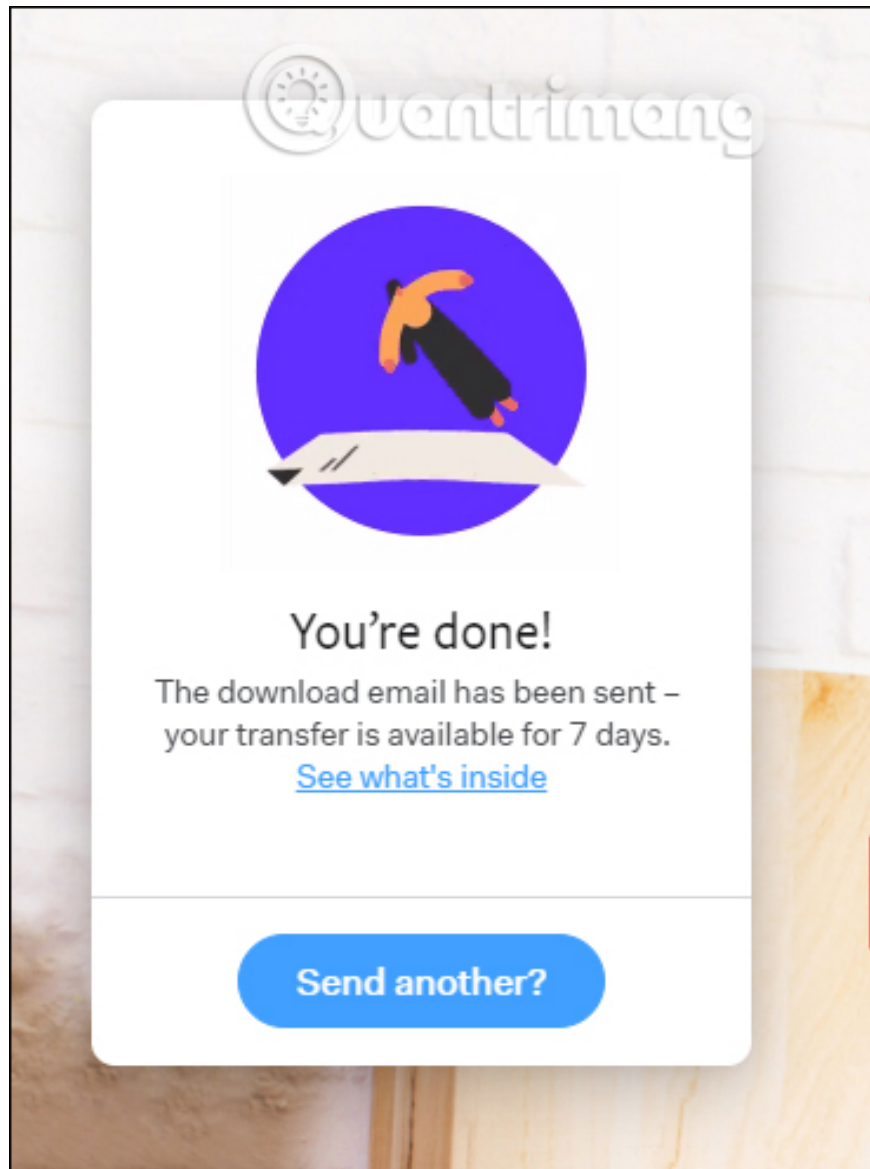

In case you want to **send faster via shared link** without email, click **the 3-dot icon** and select **Get transfer link**

Step 2:

The file transfer process takes place right after. At the end of the interface shown as below. File **exists for 7 days before deleting from the server** . With Pro account, it will be longer in 28 days.

Step 3:

The link to download the file is sent to the opponent's email. They just need to **open the mail and then click on the mail sent from WeTransfer** . If sending via the link, just send the link you have for the person you want to send is done.

At the email you will see the deadline for the file remaining in the system. Within 7 days, the email can be downloaded at any time without limitation.
