

# How to share folders in Notes app on iOS

In iOS 13, Apple added a feature set to the Notes app, while enhancing viewing and searching in an easier way than ever to create, find and organize notes.

In iOS 13, Apple added a feature set to the Notes app, while enhancing viewing and searching in an easier way than ever to create, find and organize notes.

In particular, there are new options for sharing entire notes folders with friends or colleagues, including the ability to share read-only notes.

In iOS 12, users were limited to sharing individual notes in Apple's native apps. Fortunately, there are 2 ways you can share a note folder in iOS 13?.

## Method 1

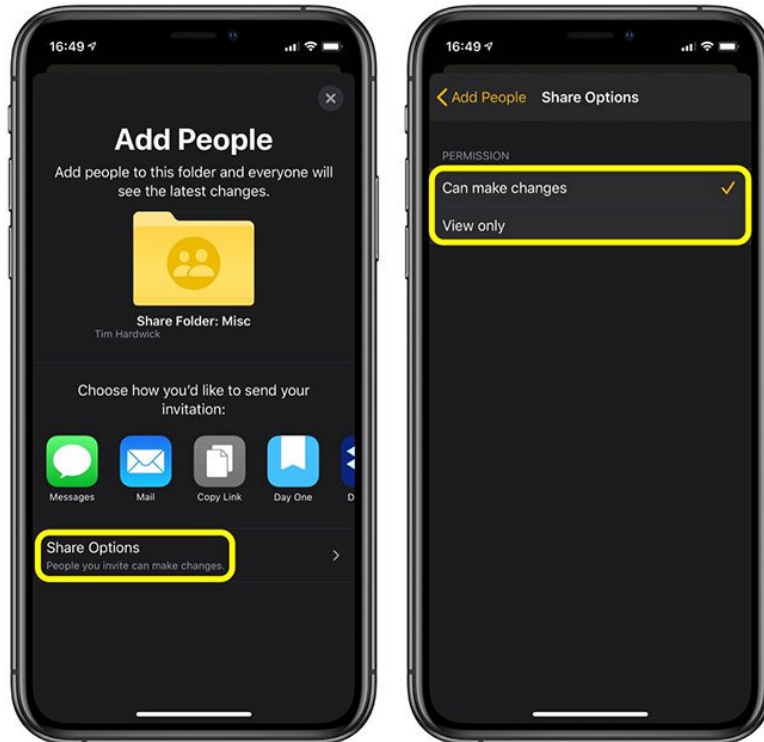

1. Launch **Notes** application on iPhone or iPad.
2. In the **Folders view** , swipe from right to left on the folder you want to share.

In the Folders view, swipe from right to left on the folder you want to share

3. Click the leftmost **Share** button (green icon).

4. Check that the **Share Options** rights at the bottom of the screen are set the way you want (invited people can **Can make changes** - or **View only** - view only).

Select Can make changes or View only

5. Choose how you want to share the folder. The default sharing options include **iMessage**, **Mail** and the **Copy Link** option , if you want to share the invitation link in a different way, not provided in the additional third-party sharing buttons displayed. .

## Method 2

1. Launch the **Notes** application on ?iPhone? or ?iPad?.

2. Click the note folder that you want to share.

Click the note folder that you want to share

3. Touch the circular ellipse button in the top right corner of the screen.
4. Select **Add People** in the pop-up menu.
5. Check that the **Share Options** rights at the bottom of the screen are set the way you want ( **Can make changes** or **View only** ).

Check whether the Share Options rights

6. Choose how you want to share the folder. As above, the default sharing options include **iMessage**, **Mail** and **Copy Link**.

If you use a Mac running macOS Catalina and sign in to the same iCloud account, the status of sharing the folders and permissions you've selected will be automatically synchronized with the Apple Notes application on the desktop.
