

How to share location directly on Messenger

Messenger now allows direct location sharing in real time. Accordingly, we can share our current location with our friends in the conversation and they can open the Google Maps application to find that location.

The Messenger application today is not simply an application that helps us send messages, or call phones like before the manufacturer has integrated many other features into the application. For example, you can play games on Messenger, download files directly to your personal Dropbox account right on Messenger, . This helps us to experience interesting spaces, as well as serve many room needs. Rich of Messenger users.

And in this article, the Network Administrator wants to introduce you to the feature that allows you to share Live Location real-time location, directly in Messenger chat. Accordingly, you can send your location to your friends and they can find it via the submitted map. So how to send the current location on the Messenger application?

Step 1:

First of all, you need to enable location positioning on the device. At the interface on the device, we click on **Settings> Privacy> Location Services** . Here, we will **push the horizontal bar to the right** at the Location Services section to update the current position.
