

How to share photos from the OS X Photo application to OneDrive

Apple's Photo Apps application is integrated to act as a bridge between Mac OS X and iCloud. If you are using Apple devices, you can easily sync files and images between Mac and iPhone or iPad.

Apple's Photo Apps application is integrated to act as a bridge between Mac OS X and iCloud. If you are using Apple devices, you can easily sync files and images between Mac and iPhone or iPad.

Google Drive is a cloud storage and synchronization service. This is where you can back up photos, videos, important documents to access when needed.

Google Drive allows you to store and synchronize images, videos and files between computers, tablets and mobile devices. You can access Google Drive on any computer or mobile device with an Internet connection.

1. How to share photos from the OS X Photo App application to OneDrive

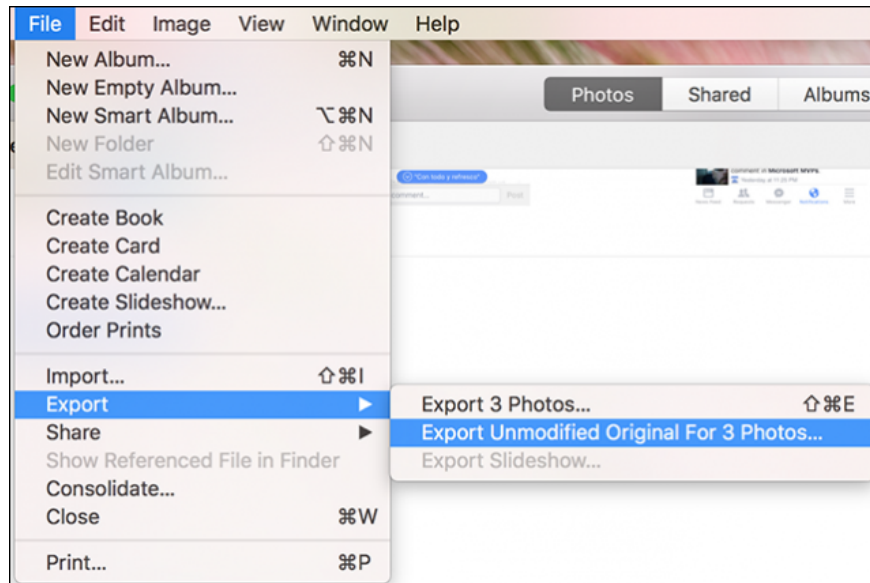

Export photos from the OS X Photos App application to OneDrive:

To export photos from OS X Photos App to OneDrive, first download the OneDrive client to Mac and install.

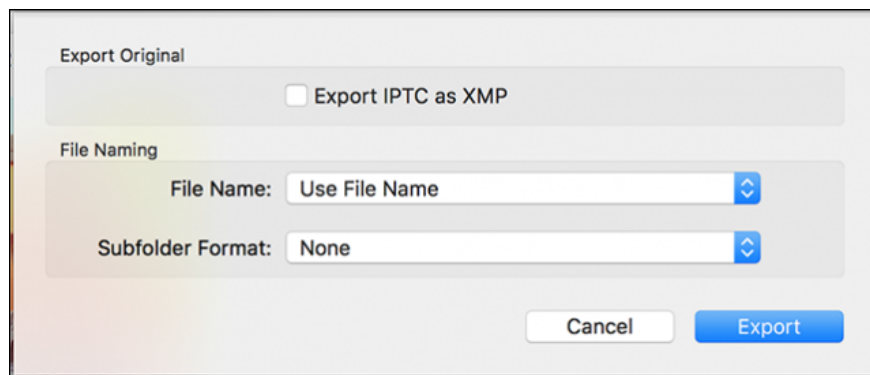

Download Onedriver to Mac and install it here.

Launch the **Photo** app from Dock or press **Command + Space** then enter **Photos** and press **Enter** .

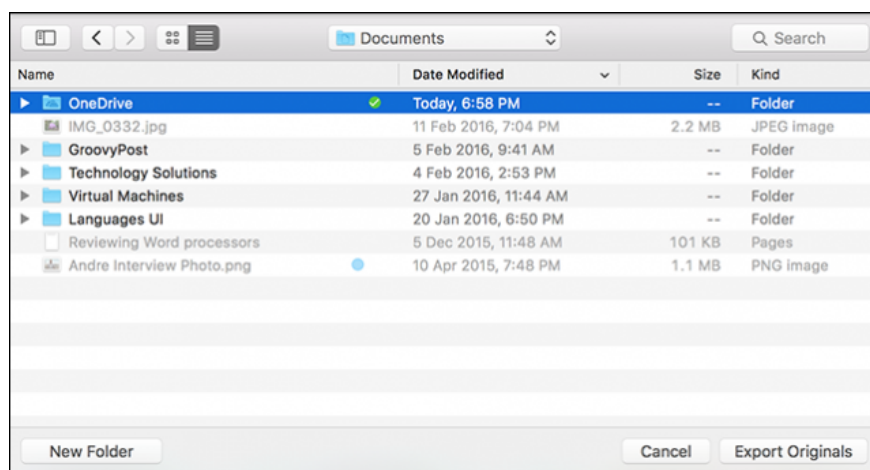

Select any image you want to move into OneDrive and then click **File> Export> Export Unmodified Original for Photos**.

Then click **Export** .

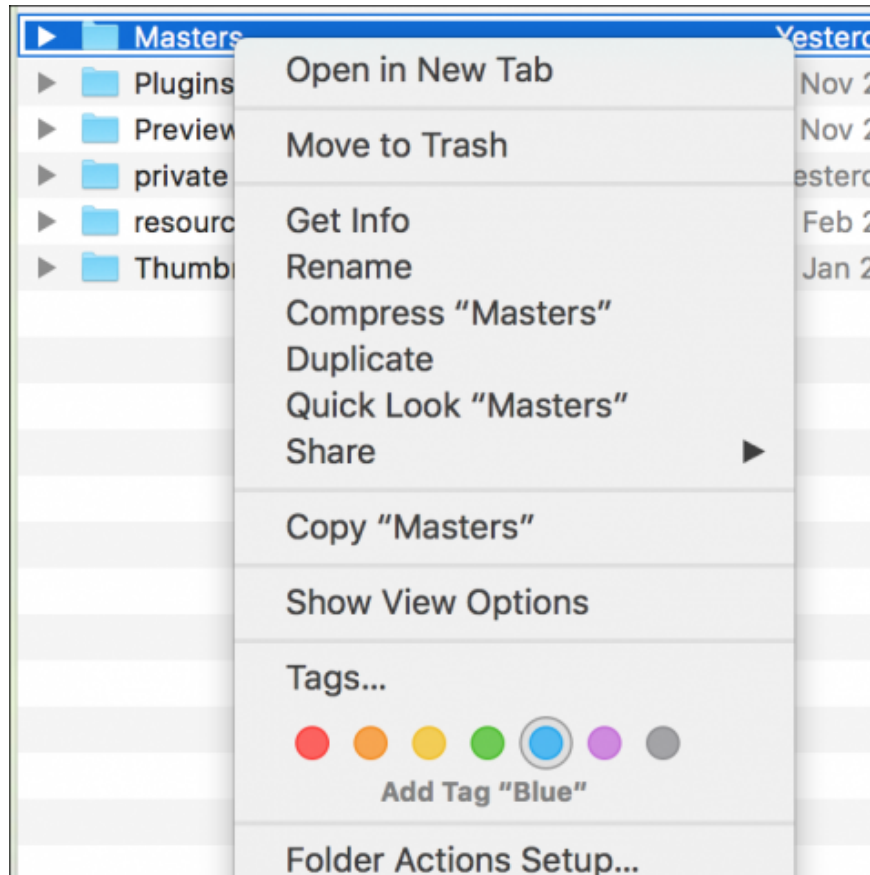

Find the **OneDrive** folder then click on **Export originals**.

2. Automatically export photos using the operating system X Automator

Start Finder, then open the Pictures Folder folder, right-click the **Photos Library** file then click **Show Package Contents** .

Right-click the **Masters** folder then select a color for the folder.

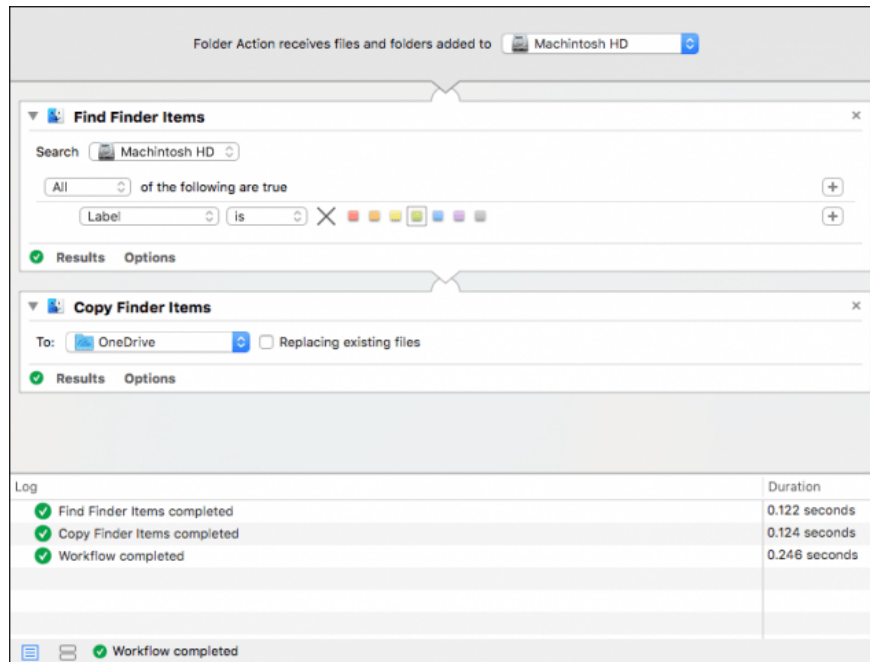

Launch Automator application:

Press the key combination **Command + Space** , then enter the keyword **Automator** and press **Enter**.

Under Library, select **File & Folders** and drag **Find Finder Items** to the Workflow window.

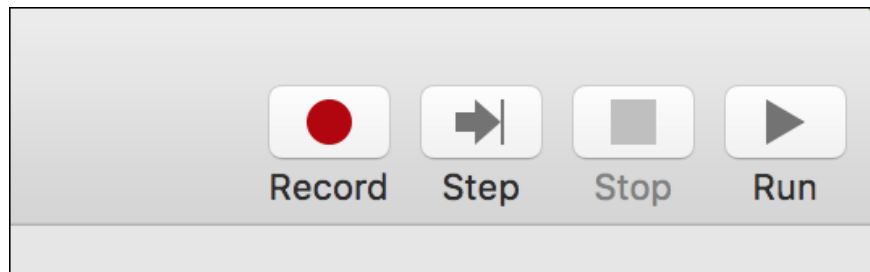

In the Search list box, select **Macintosh HD** and then follow the steps shown in the screenshot below.

Next you drag the **Copy Finder Items** into the Windows window. Click on **To:** then select **Onedrive** .

Then specify to search for any directory that you have chosen colors, in this case include the Masters folder. Then copy the files and folders to OneDrive.

Finally click **Run** to begin the process of copying the entire Masters folder to OneDrive.

Save the Workflow when you're done to make the next time.
