

# How to share the current position on Zalo to a friend

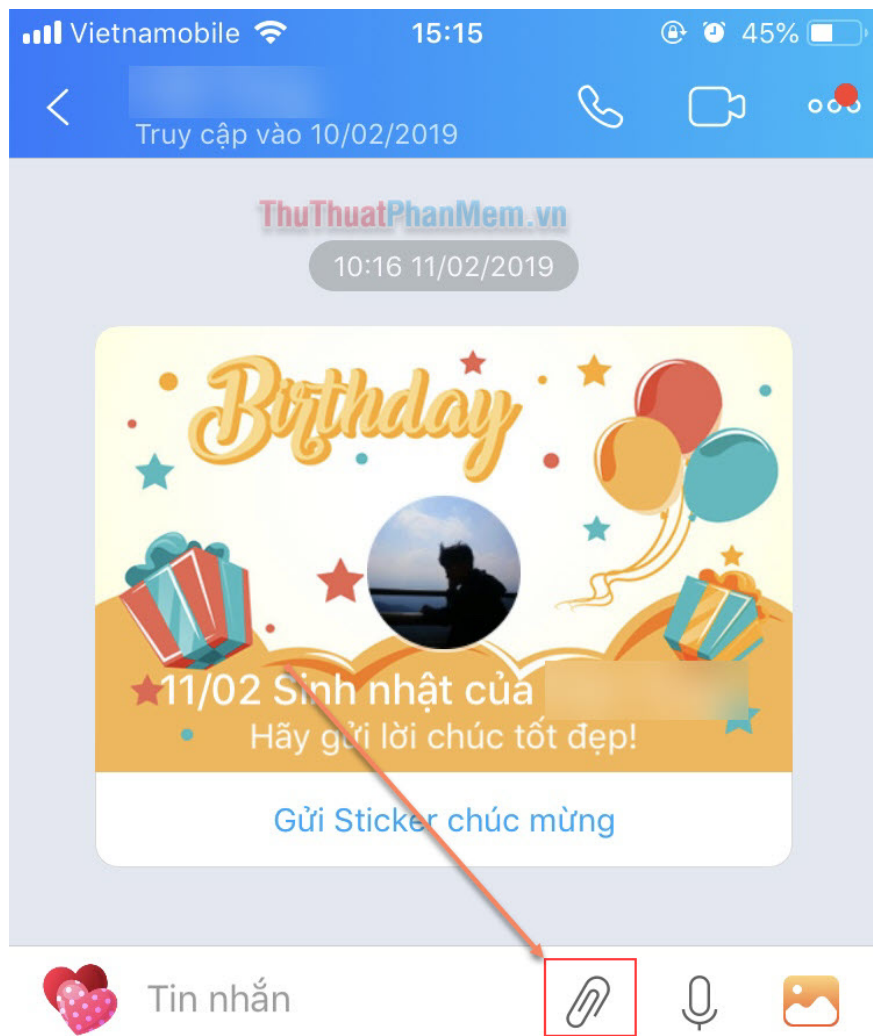

How to share the current position on Zalo to a friend. Kong must everyone know that Zalo also has a very good location sharing feature. Today, Software Tips will introduce you how to share current location on Zalo to your friends.

Zalo is a free audio / video calling and messaging software that supports most platforms like iOS, Android, Windows, MacOS. Mainly developed and programmed by Vietnamese people, Zalo aims to be mainly Vietnamese users. With good optimization features, fast speed, Zalo is becoming the leading listening and calling app in Vietnam. But not everyone knows that Zalo also has a very good location sharing feature. Today, Software Tips will introduce you how to share current location on Zalo to your friends.

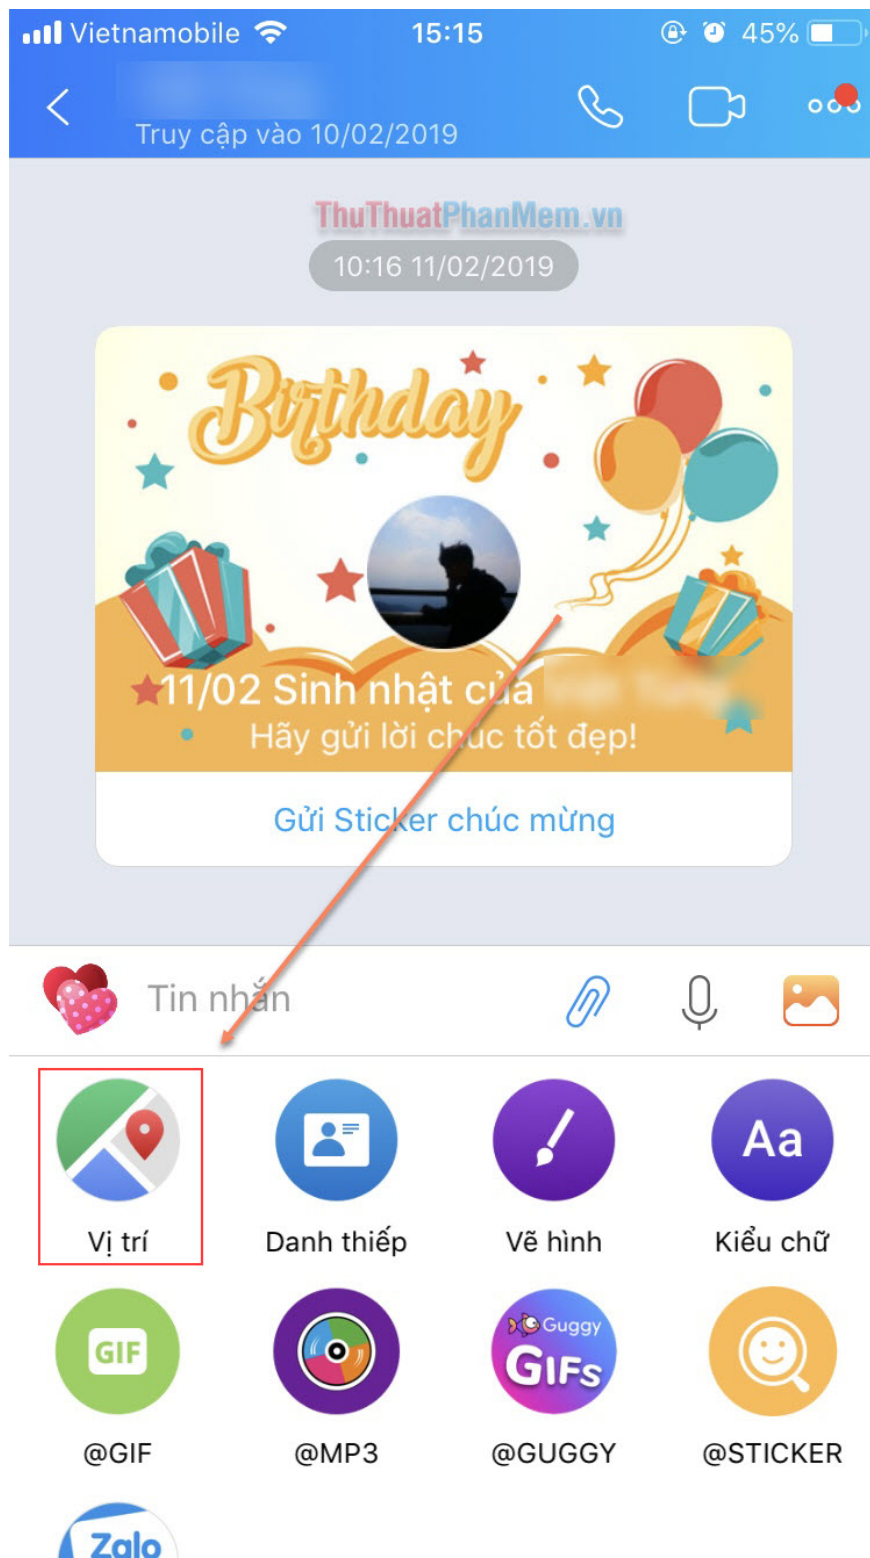

## 1. Share your current location on Zalo on iPhone

**Step 1:** You launch your Zalo and choose the person you want to share the location like how to send a normal message. Then, you should pay attention to the toolbar with the **Pin Clip** icon . Click here to continue.

**Step 2:** After clicking the **Clip** icon , you will open up a new tool panel. Now tap **Location** to start sharing location.

**Step 3:** For first-time devices, Zalo will require access to Locate. You click **Allow access** .

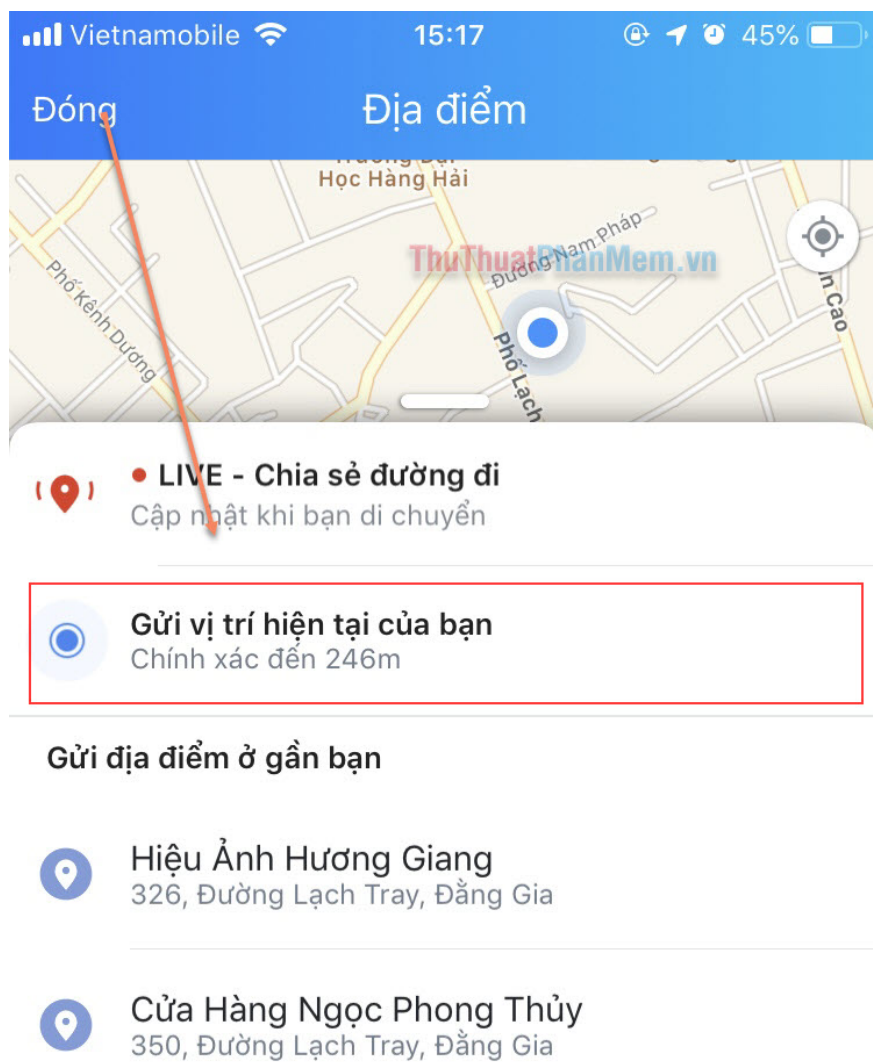

**Step 4:** At this time, Zalo will automatically open your settings. Click on **Location**.

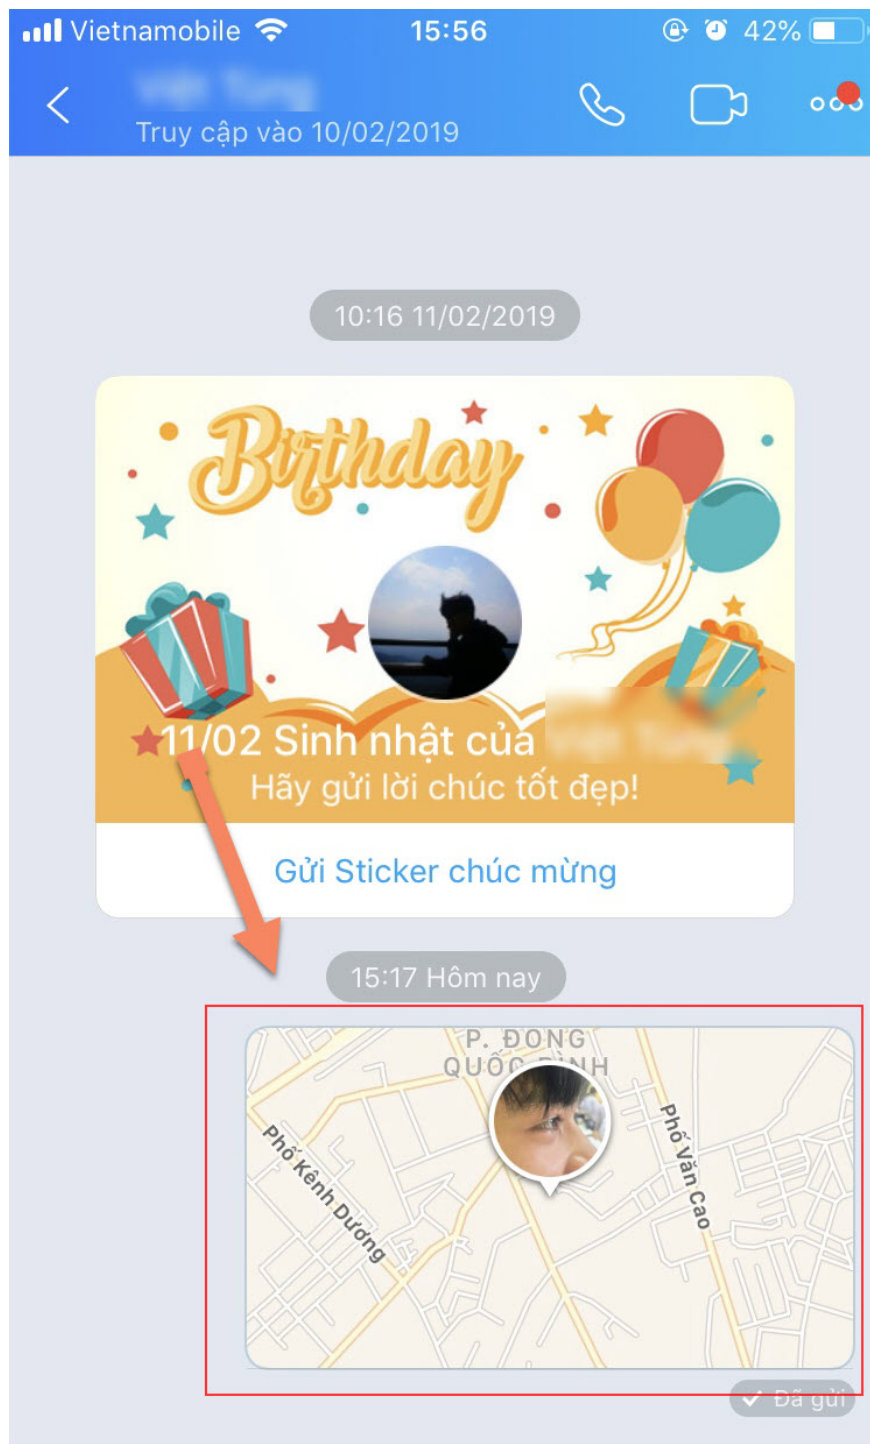

**Step 5:** At this time, select **When to use the application** or **Always** (use more battery).

**Step 6:** Then, you click **Submit your current location** is done. Accuracy depends on the map and location of the device.

**Step 7:** So you have successfully sent your position to friends and others.

## 2. Share your current location on Zalo on Android

**Step 1:** You start Zalo and enter the conversation with the person you need to share the message. Then, you click the **Clip** icon .

**Step 2:** Then, Zalo will open up a toolkit. Click on the location to start sharing your location.
