

# How to share the screen playing live stream on Facebook Live

Facebook Live has the ability to share the Share Screen screen right on the live streaming interface, without having to install additional software.

**The Facebook Live live stream service has updated the Share Screen option, sharing screens directly on Facebook Live, without users having to install additional support software.**

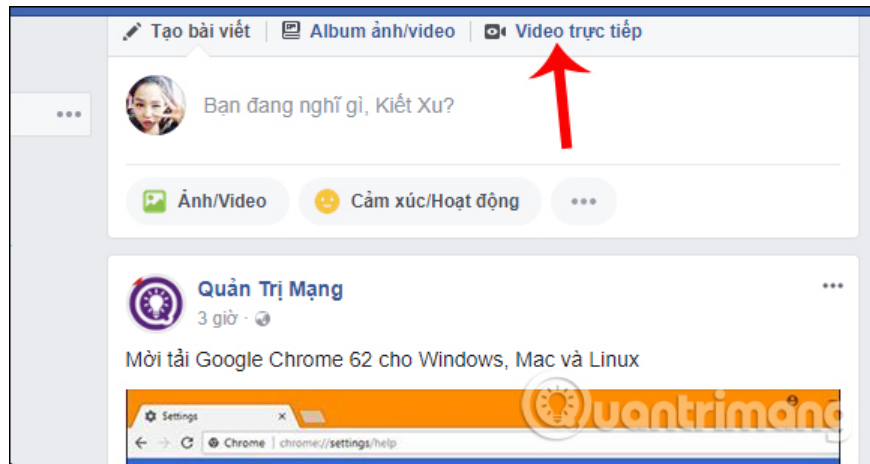

Normally, in the past, to share screens when streaming Facebook videos, we will need third-party software such as **Open Broadcaster** , **OBS Studio** , **XSplit Broadcaster** , . But now the screen sharing feature has been Built-in Facebook Live.

Accordingly, when accessing the Facebook Live service on Facebook and installing the required Facebook Screen Sharing utility, we can easily choose any screen on the computer to share, maybe the screen. The computer or tab is open specifically. However, this feature currently only applies web-based Facebook on Google Chrome browser. The following article will show you how to share the screen when live streaming on Facebook Live.

## How to use Share Screen feature on Facebook Live

### Step 1:

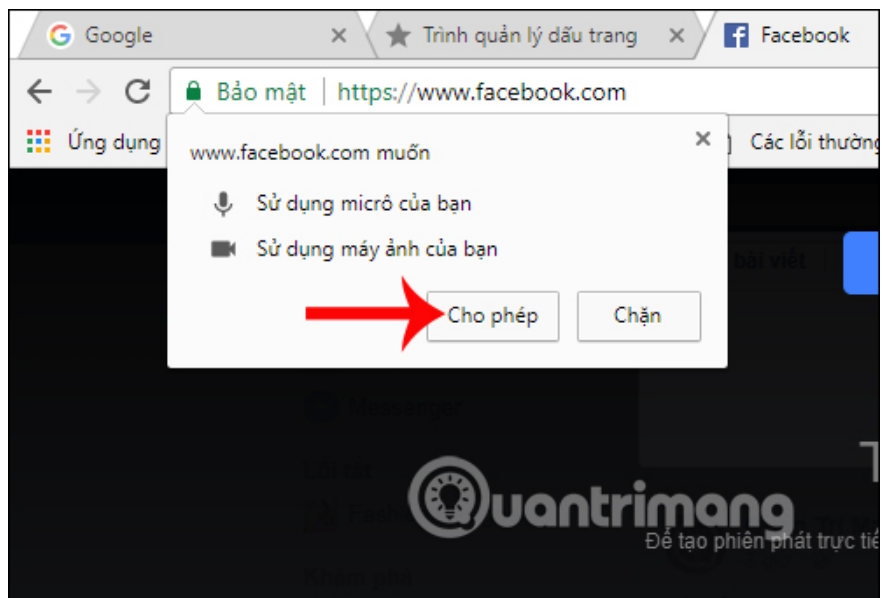

You access the personal Facebook account interface and then click on **the Live Video section** .

### Step 2:

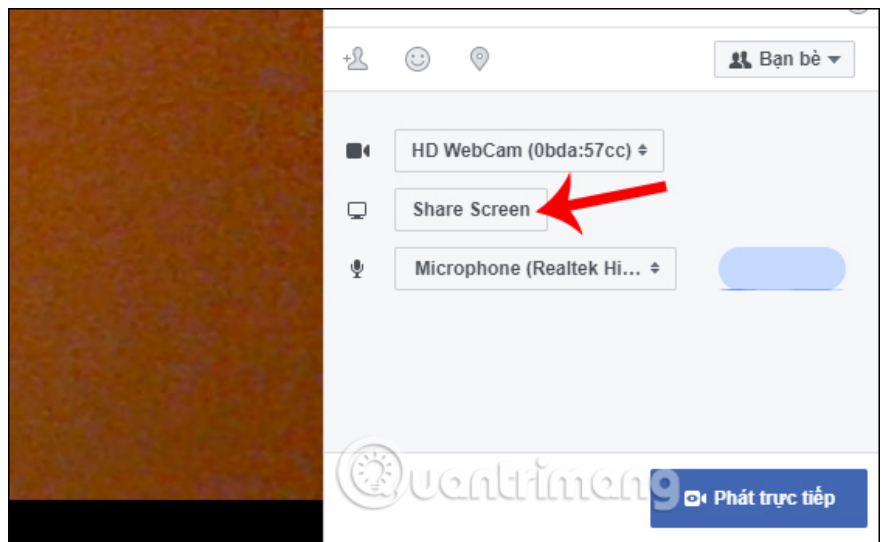

Next to the user who needs to allow **Facebook to use the microphone and camera** on the device, press **Allow** on the pop-up interface that appears on the Chrome browser.

**Note to users** if you use a microphone, when playing live stream on Facebook will proceed to collect sound from outside. If in a crowded place, a lot of noise, the video after streaming will have a hard sound, many noise. Turn off the sound or want to record the sound, then choose a closed room where there is no sound outside the impact.

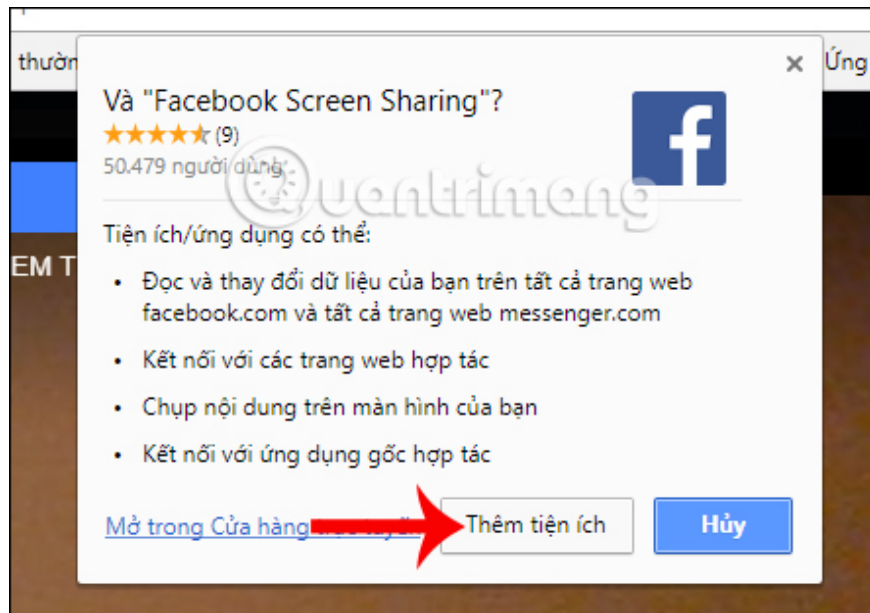

### Step 3:

In the live video streaming interface on Facebook Live, next to the interface on the right of the screen you will see there are 3 device options including webcam, screen, mico. We will **select the Share Screen option** .

### Step 4:

Next, Facebook Live will ask users to install the **Facebook Screen Sharing utility** on Chrome browser, click on **Add add** button.

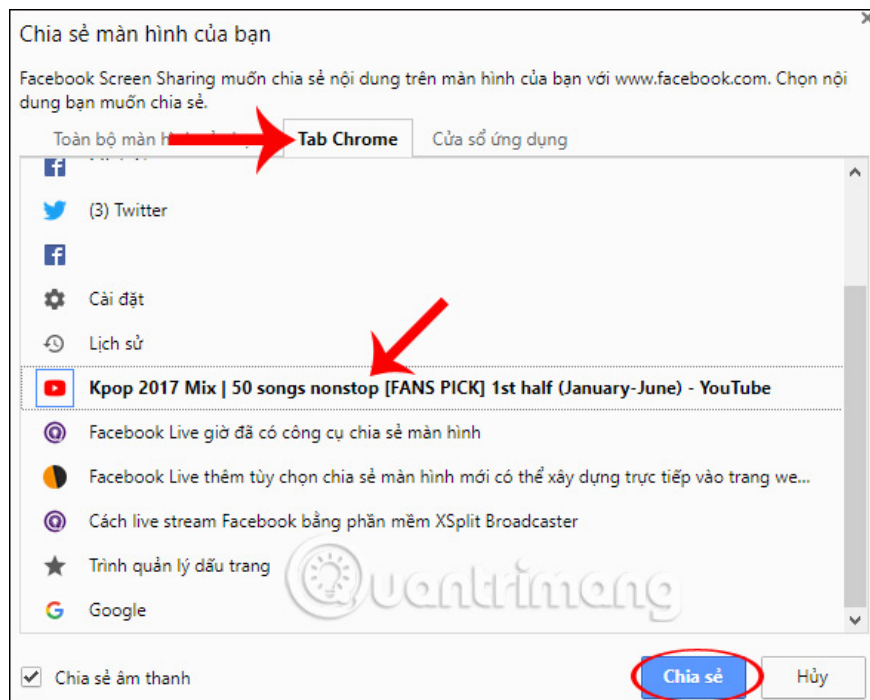

### Step 5:

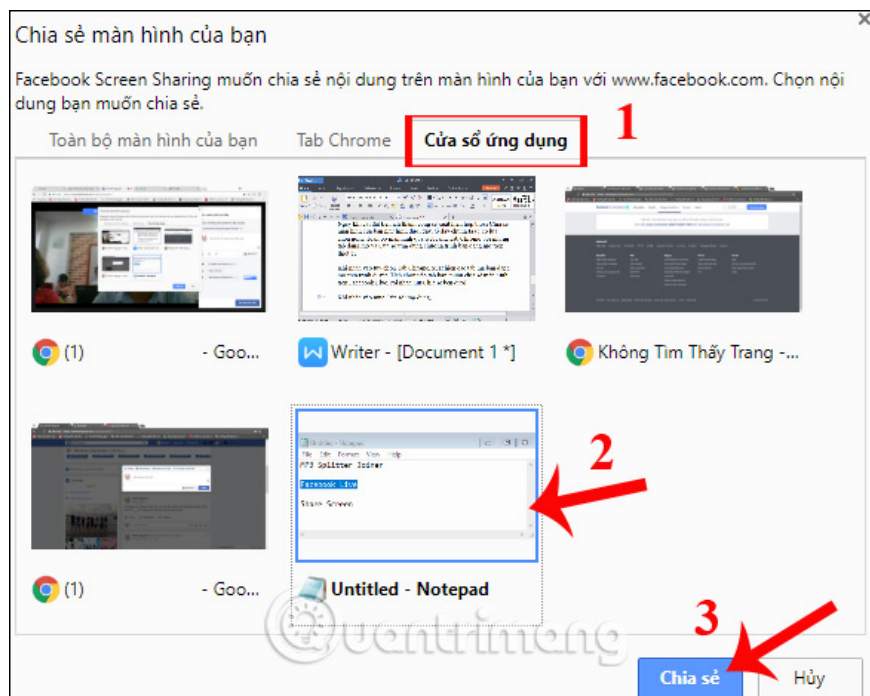

Once the utility is installed successfully, **the Share screen of your screen** will appear as shown below. Here we have the option: Full screen via webcam, Chrome Tab with open tabs and Application program window you are opening on the device.

When you click on the **Chrome Tab option** , appear the tabs you are opening in your browser. Select the **tab you want to share the screen** on Facebook Live, then click **the Share button** below.

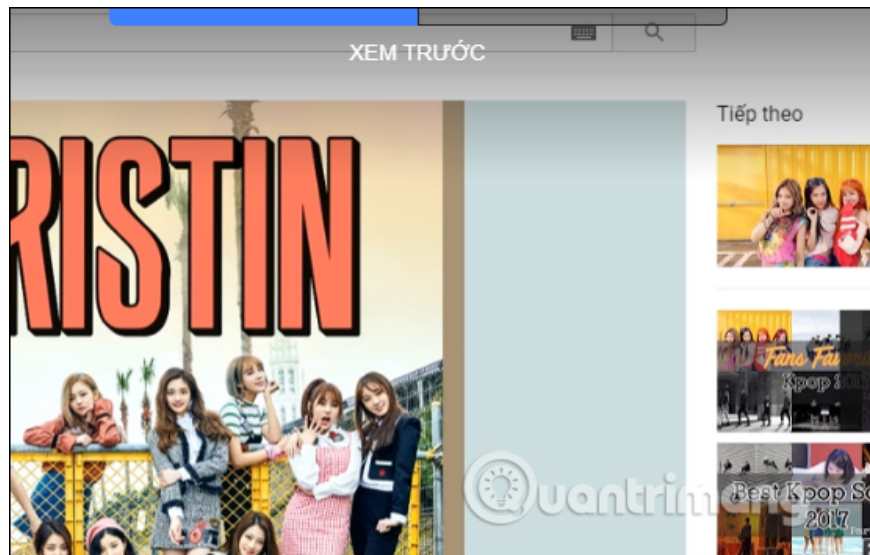

When you click on **the Application window** , all the software screens or programs that are open on the computer appear, so that users can choose to share. Click on **the application screen you want to share** and click **the Share button** below.

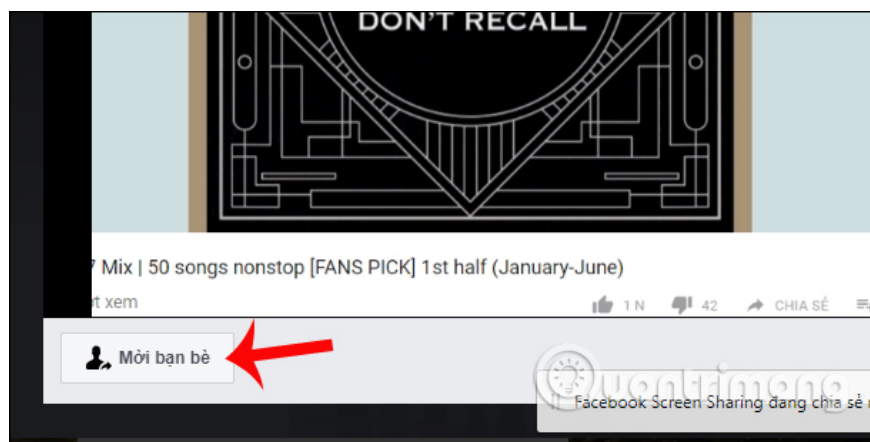

**Step 6:**

Immediately appear **sharing screen before** playing live stream on Facebook.

We can **invite friends to follow live video** on Facebook when we can tag the name. Press **the Invite friends button** below the preview screen interface.

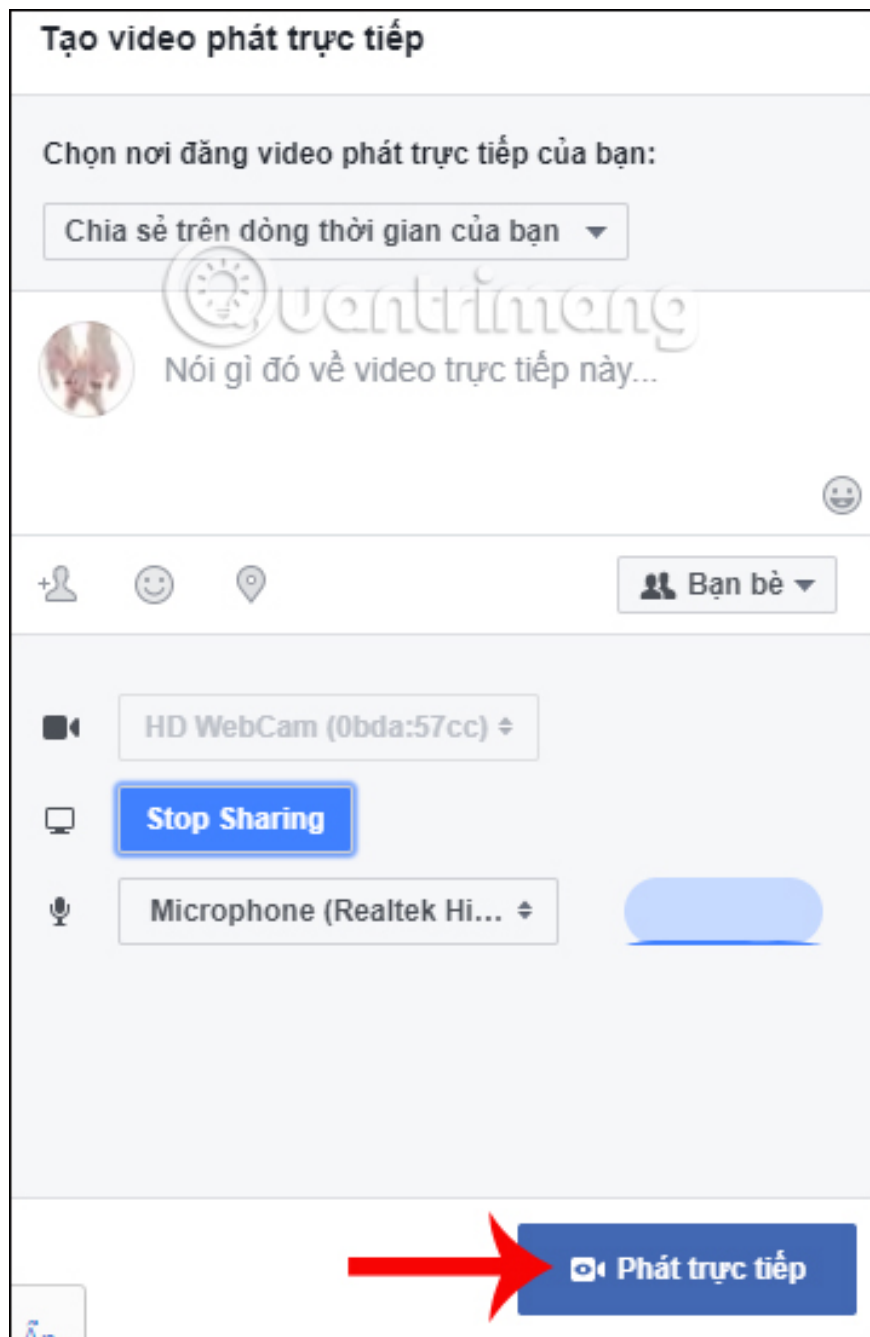

Enter your friend's account name in the Search bar, then click **the Invite button** next to the account name. Finally press **the Done button** to close this interface.

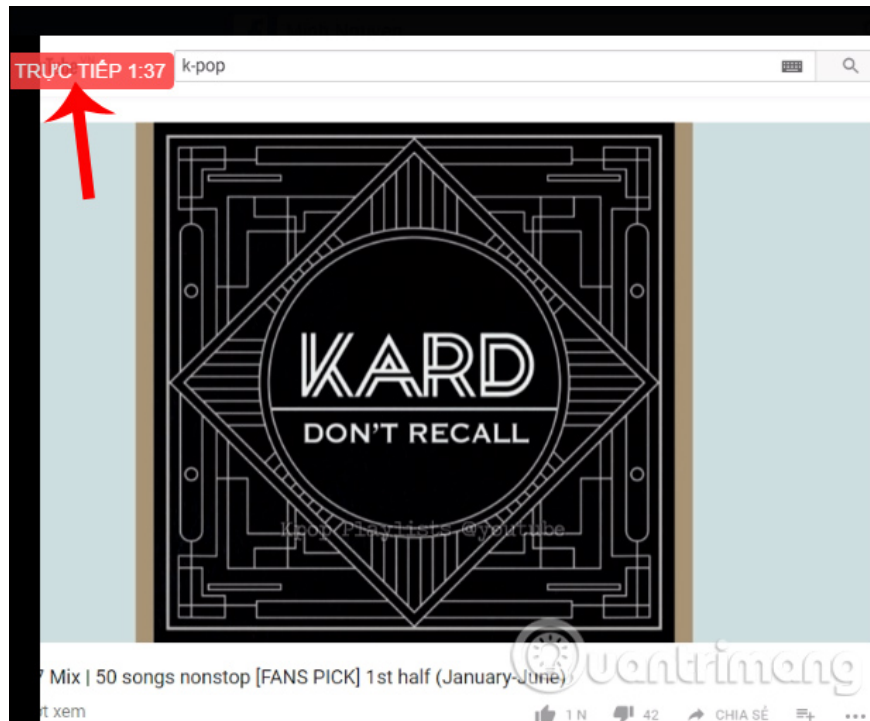

**Step 7:**

When you are satisfied with the live stream broadcast screen, press **the Direct play button** at the bottom right corner of the screen.

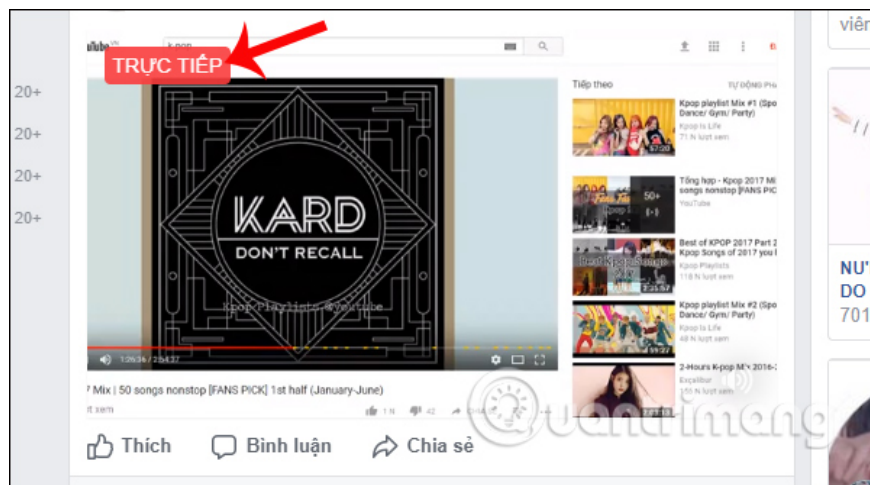

**Step 8:**

Then on the Facebook Live interface will be the Live broadcast screen as shown below.

Also on your personal Facebook account is also proceeding to share the screen directly on Facebook.

### Step 9:

A **pop-up** interface will appear on the screen with the option you want to **Hide** this message bar, or **Stop sharing the** screen playing live stream on Facebook. When you click Stop sharing means stop playing live video on Facebook.

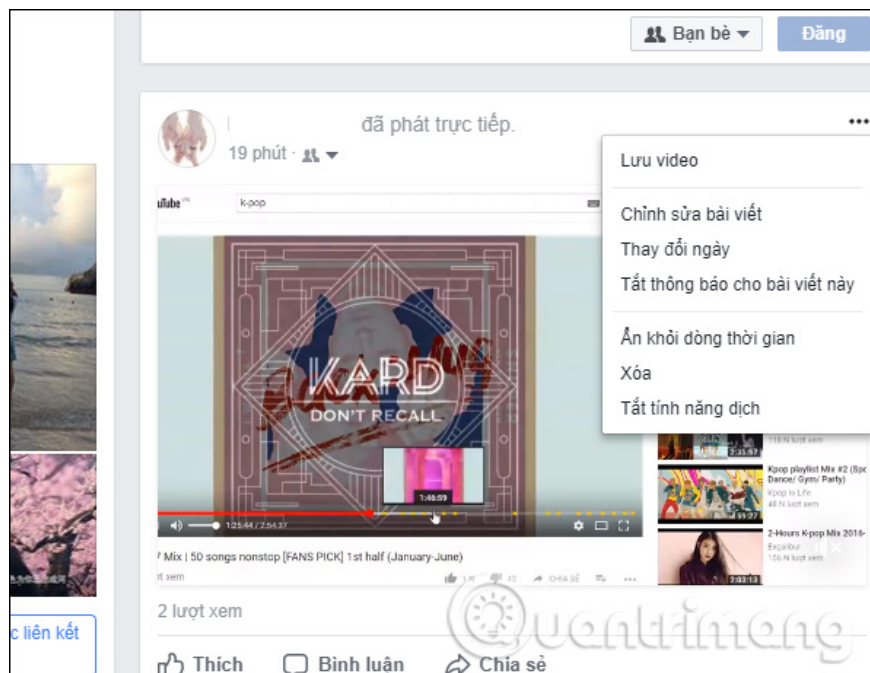

When the video playback stops on the screen, a message is displayed as shown below.

### Step 10:

You reload your personal Facebook page and will see live video appear.

Above is a detailed guide on how to share the live stream screen on Facebook. This is a built-in feature on Facebook Live that we do not need to install any other supporting software. Users will be able to choose the

computer screen, Chrome tab or application screen to play live on Facebook. Hope this Share Screen feature on Facebook Live will update on other browsers.

I wish you all success!
