## 1. Turn Mobile Mobile video on iPhone

If you own iPhone 6S and iOS 9 and above, you can immediately use the video screen recording feature when playing games. If the device does not have this feature, you can install the Omlet Arcade application. The application also supports live streaming game screen to Facebook. How to do in the article below.

1. How to live stream iPhone game screen to Facebook?

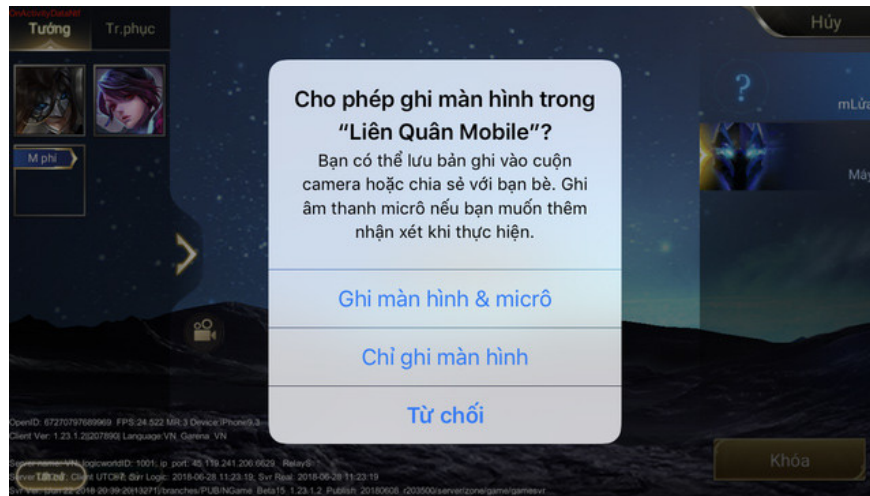

### Step 1:

Go to the application and then go to **Settings** to **Rotate the game** . Enable **Recording** and **Automatically record** for use.

## Step 2:

When you open the match screen, there will be a pop-up interface asking if the user has permission to record in Mobile Union. If you just want to record without sound, press Record only, if you want to record the whole sound, press Record screen & microphone.

## Step 3:

In the end, you just need to shoot the game screen video. To end the video click on **the red button** . The video will be saved in the device album.

## 2. Record Lien Quan game screen on Android

With Android and iPhone lines without existing recording functions, we can use the Omlet Arcade app. The way to do it on both iOS and Android versions is the same.

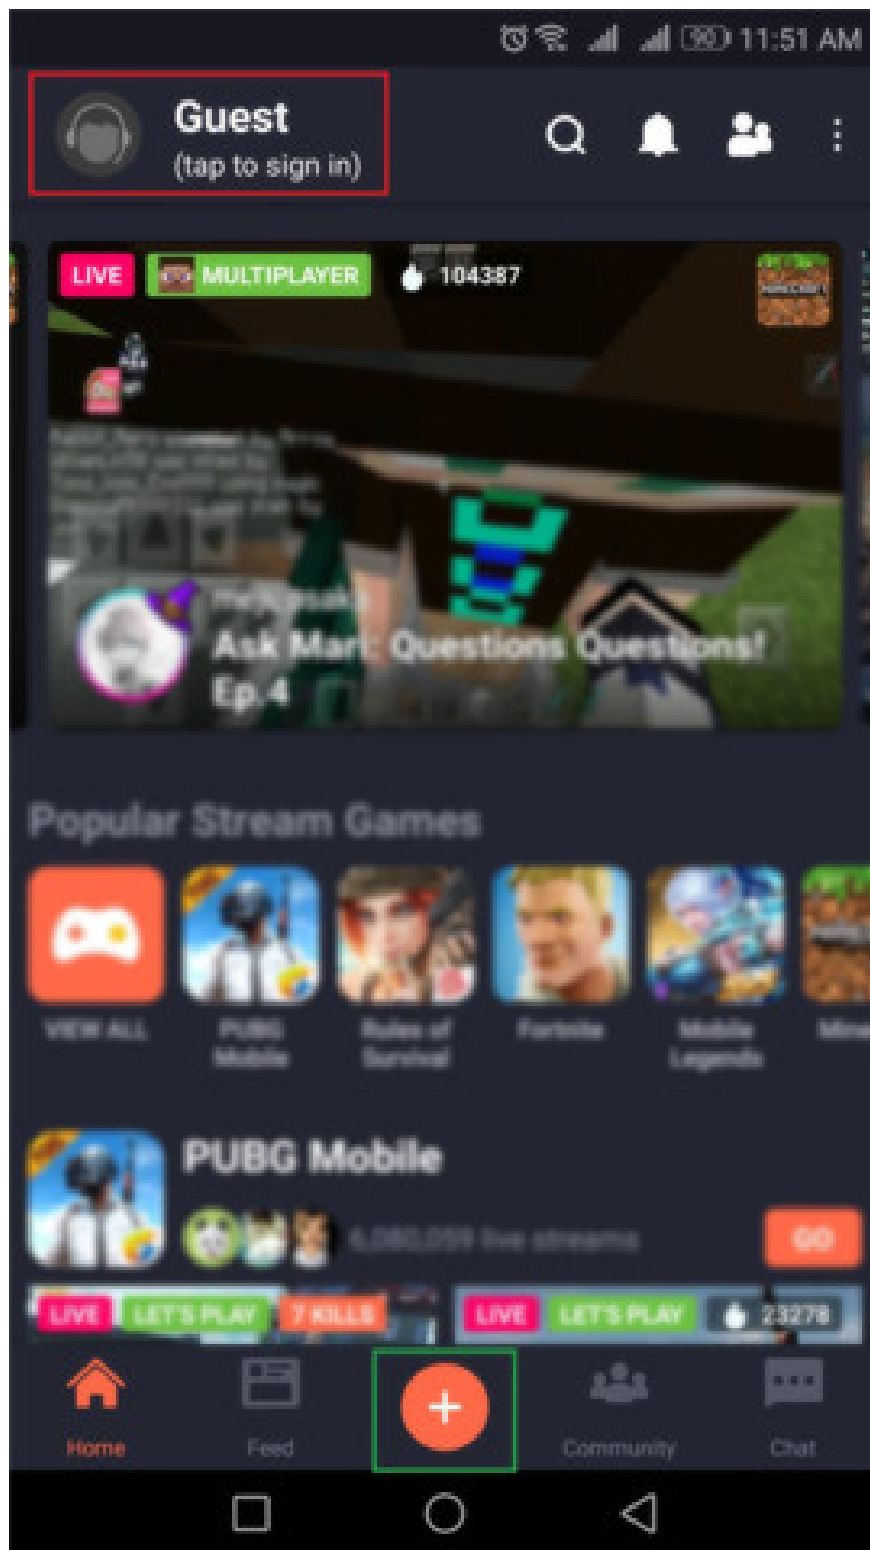

### Step 1:

Click on the link below to download the Omlet Arcade app for Android and iOS.

1. Download the Omlet Aracde iOS app
2. Download the Omlet Aracde Android app

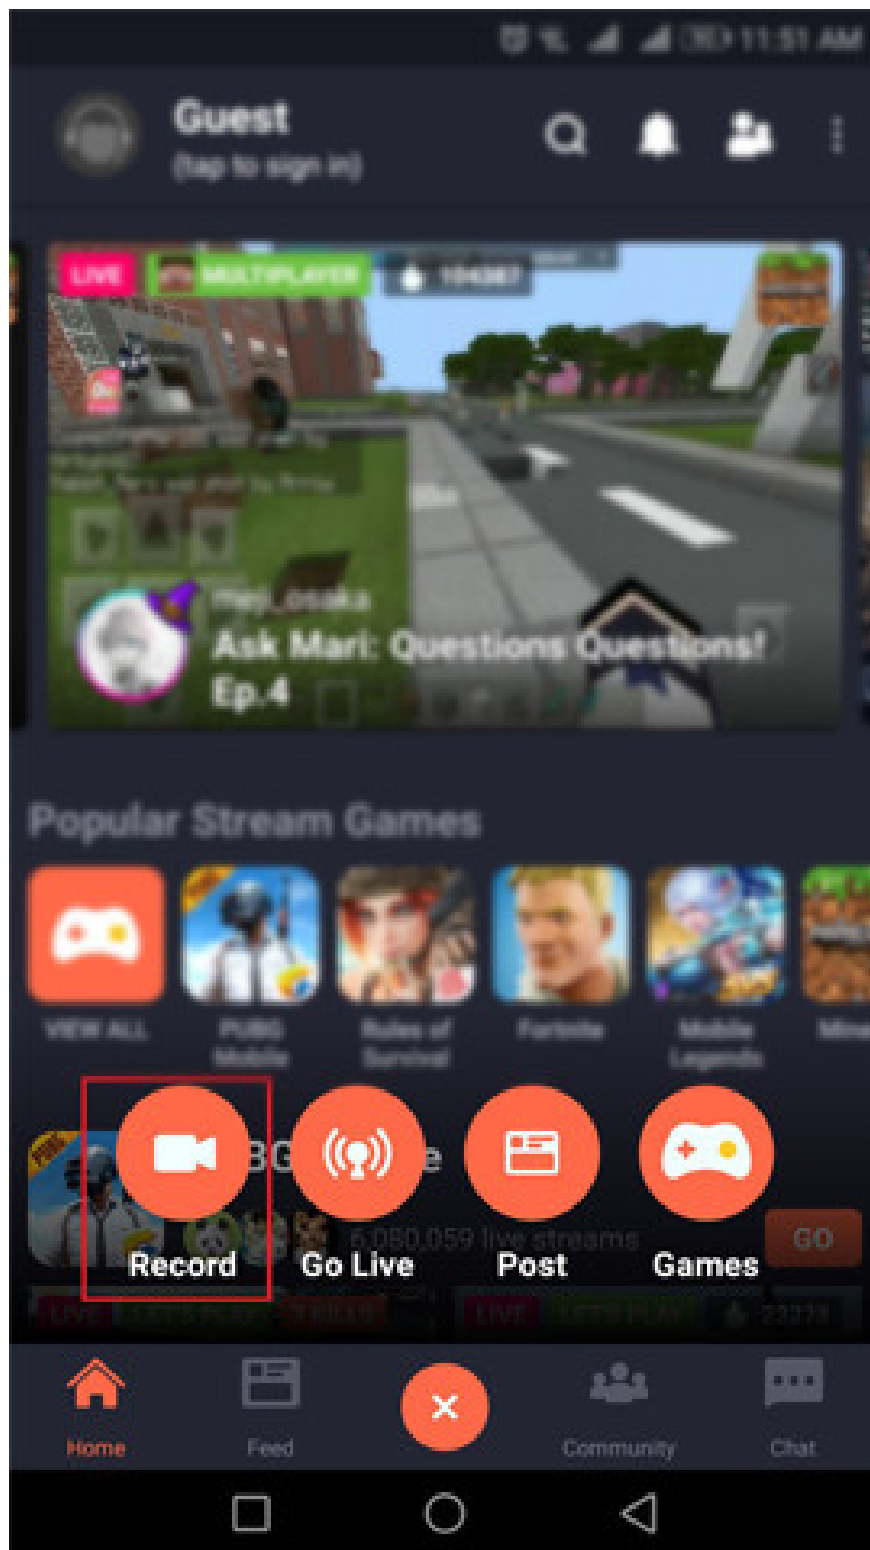

**Step 2:**

In the application interface, select on **the Guest section** to log in to the account on the application. If you do not have an account, you will be asked to create an account. Next click on **the circle icon** under the screen to record the video screen.

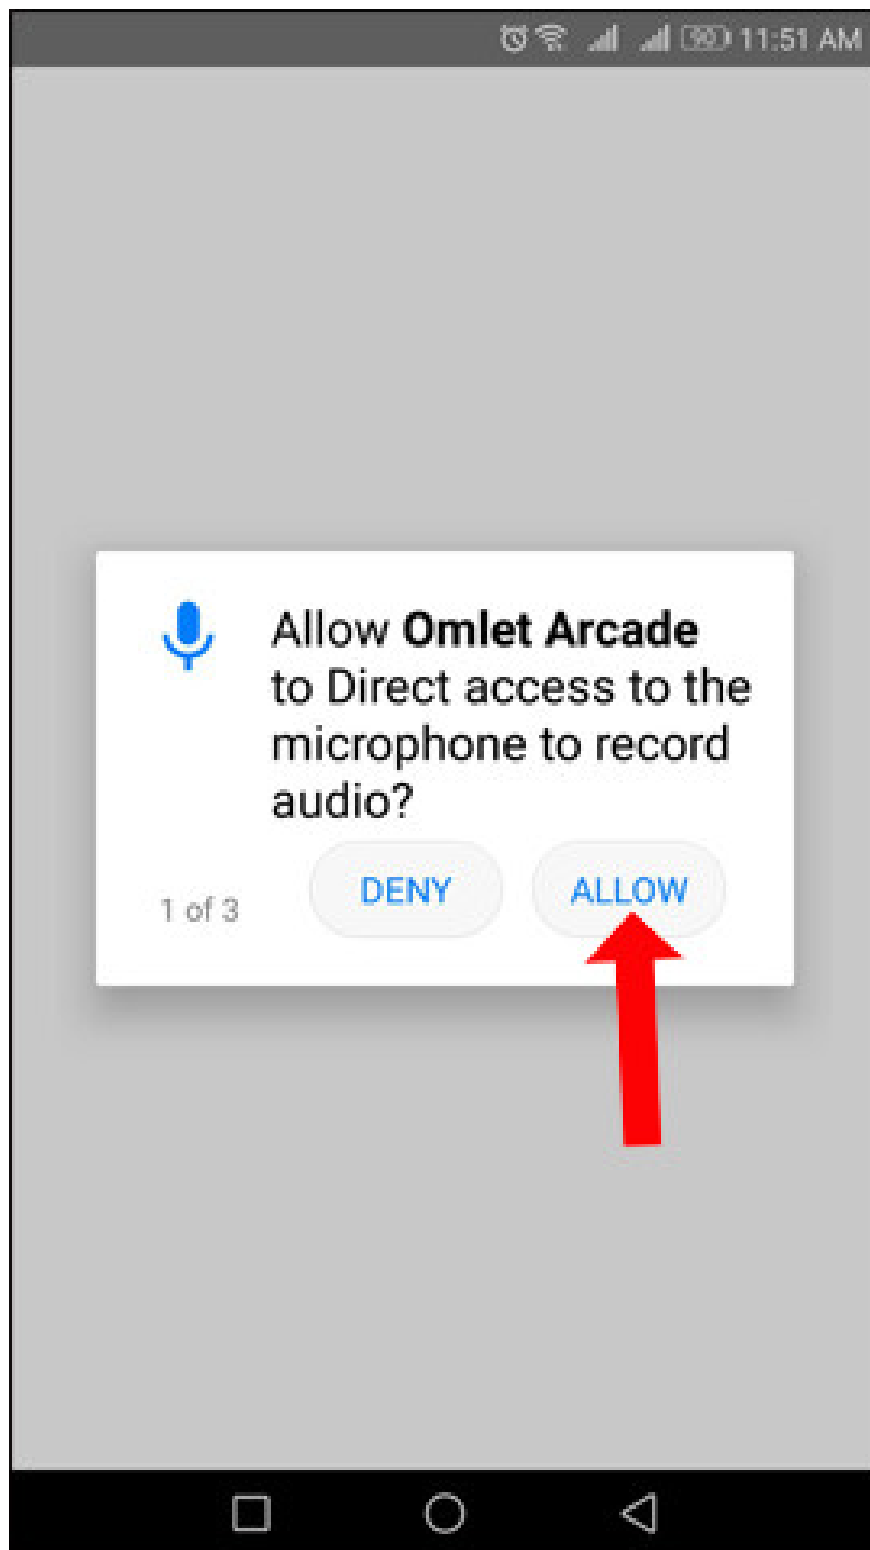

### Step 3:

After that, the user will see the interface with 4 options, press **the Record button** to record the game on the device.

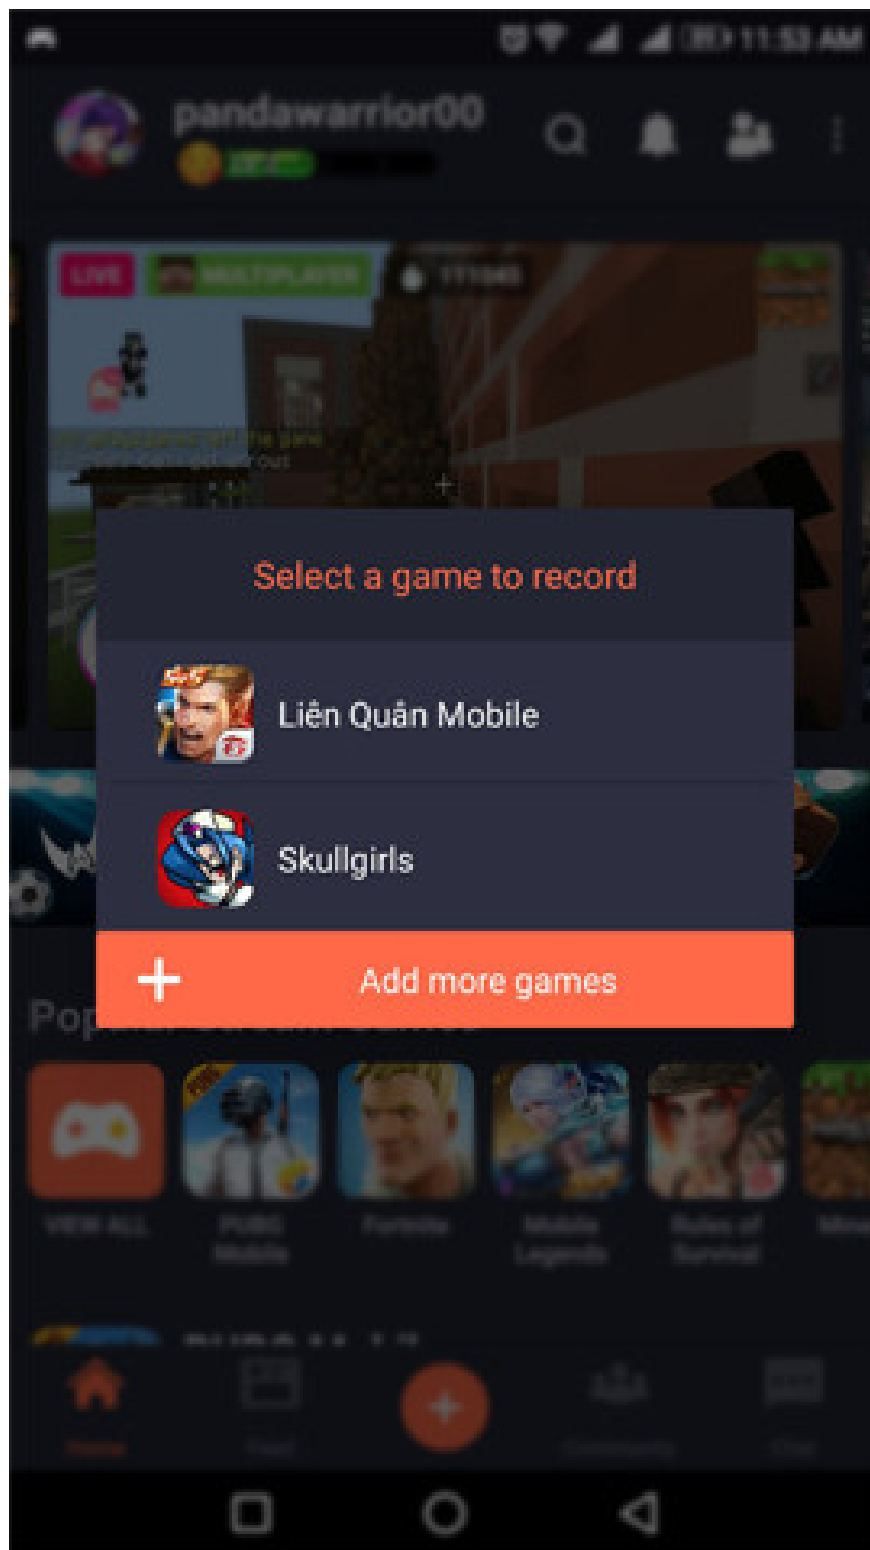

**Step 4:**

Next, users need to grant permission **to use the microphone** for the application, click **Allow** to agree.

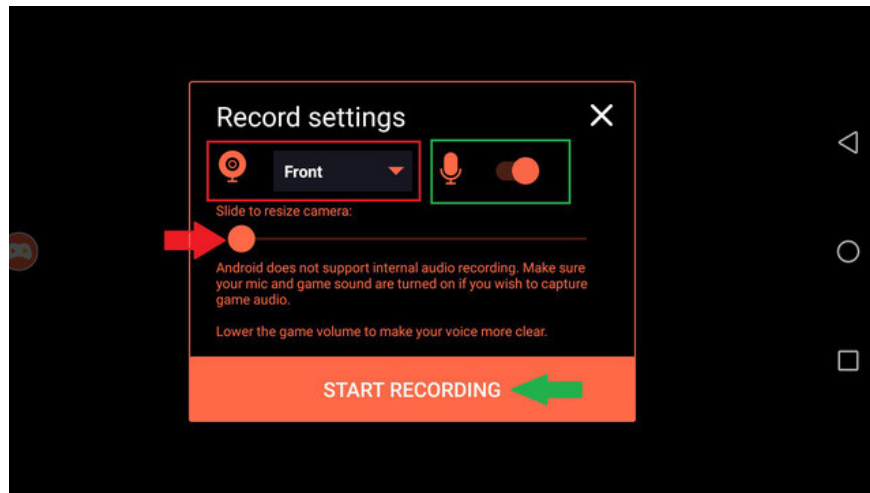

**Step 5:**

Click on **Lien Quan Mobile** when asked which video game screen to record. In case the user wants to select another game, click Add more games.

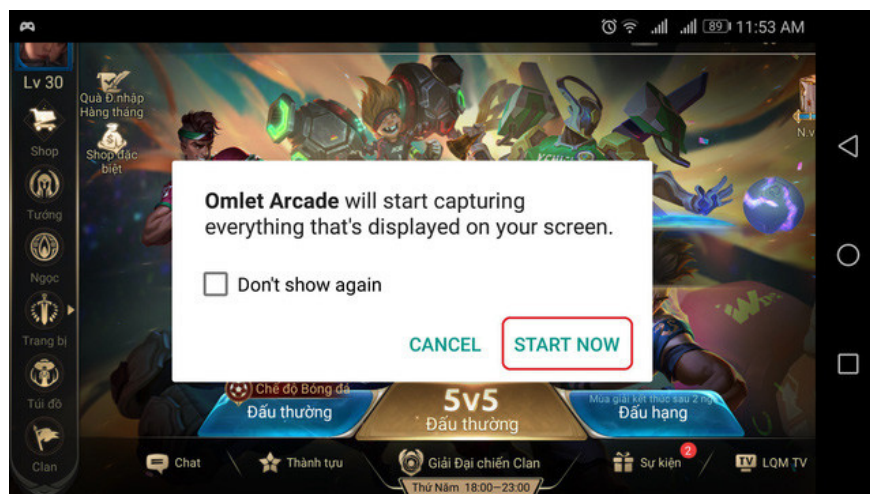

### Step 6:

The recording process will start right after playing the game. At that time, the screen interface will appear pop-up Record settings. The Font section will ask if you want to display the camera, use the front or rear camera. Microphone icon with option to use or not. The horizontal bar with the red circle button will select the camera frame when turned on. Click **Start Recording** to record.

### Step 7:

Finally click **Sart now** to record the game screen on the device.

If you don't want to record another video game, click **the Omlet Arcade icon** on the screen and select Stop Recording.

So we know how to record video screen of Mobile Game on Android and iPhone. If you use iPhone 6S, you can use the live recording feature available, or you can use the Omlet Arcade app to video game on the device.
