

How to show notifications on iPhone as text

Goodges tweaking will change the display style of the iPhone application notification to text.

On each iPhone application, when a new notification is displayed, the notification badges will be displayed. If the user wants to change the display type of that message on the iPhone application to text, Fineges can be installed. This tweak converts application notification numbers into text. Besides, users can also configure the display and color for application icon names with notifications. The following article will show you how to use Goodges tweak on iPhone.

1. How to customize notifications on iPhone
2. How to inform groups by application on iPhone, iPad
3. How to highlight important notifications on iPhone
4. How to turn off iPhone application notifications?

Instructions for changing the type of iPhone application notification

Step 1:

Users download free tweaks from source of NoisyFlake. Goodges 2 works with all jailbroken iOS 11 and 12 devices.

1. <https://apt.noisyflake.com/depictions/?id=com.noisyflake.goodges2>

Step 2:

After the installation is complete, tweak the user to Settings and then select Fineges to make changes. In this interface you will see a list of different custom items.

1. Enabled: Turn on or turn off tweaks.
2. Hide Badges: Hide notification badges.
3. Hide Icon Labels: Hide the application icon name.
4. Show Badges: Show notification badge.
5. Show Labels: Show the application icon name on the Dock.
6. Colorize Labels: Color for application name and color selection.
7. Use Icon Color: Use the color for the icon.
8. App Specific Texts: Configure notification text for special applications.
9. Show Number Only: Only displays numbers.
10. Capitalize First Letter: Capitalize the first letter.
11. Colorize Text: Add color to text.
12. Text Color: Select the font color.

13. Use Inversed Label Color: Use reverse color.
14. Use Icon Color: Use application color.
15. Enable Glowing: Glowing application icon.
16. Enable Shaking: Shake application icon.

Goodges

Version 2.1.0

Enabled

APP OPTIONS

Hide Badges

Hide Icon Labels

Important: If you have another tweak that hides all labels, you must disable this option in the other tweak!

DOCK OPTIONS

Show Badges

Show Labels

If both options are disabled, icons with a notification in the dock will be shifted up to make room for the label. If only Show Badges is enabled, Goodges are disabled in the dock.

LABEL OPTIONS

Colorize Labels

Label Color 
#FF006E

Use Icon Color

ColorBadges must be installed to use Icon Color.

TEXT OPTIONS

App Specific Texts >

Show Numbers Only

Capitalize First Letter

Colorize Text

Text Color 
#00FF23

Use Inversed Label Color

Use Icon Color

ColorBadges must be installed to use Icon Color.

ICON OPTIONS

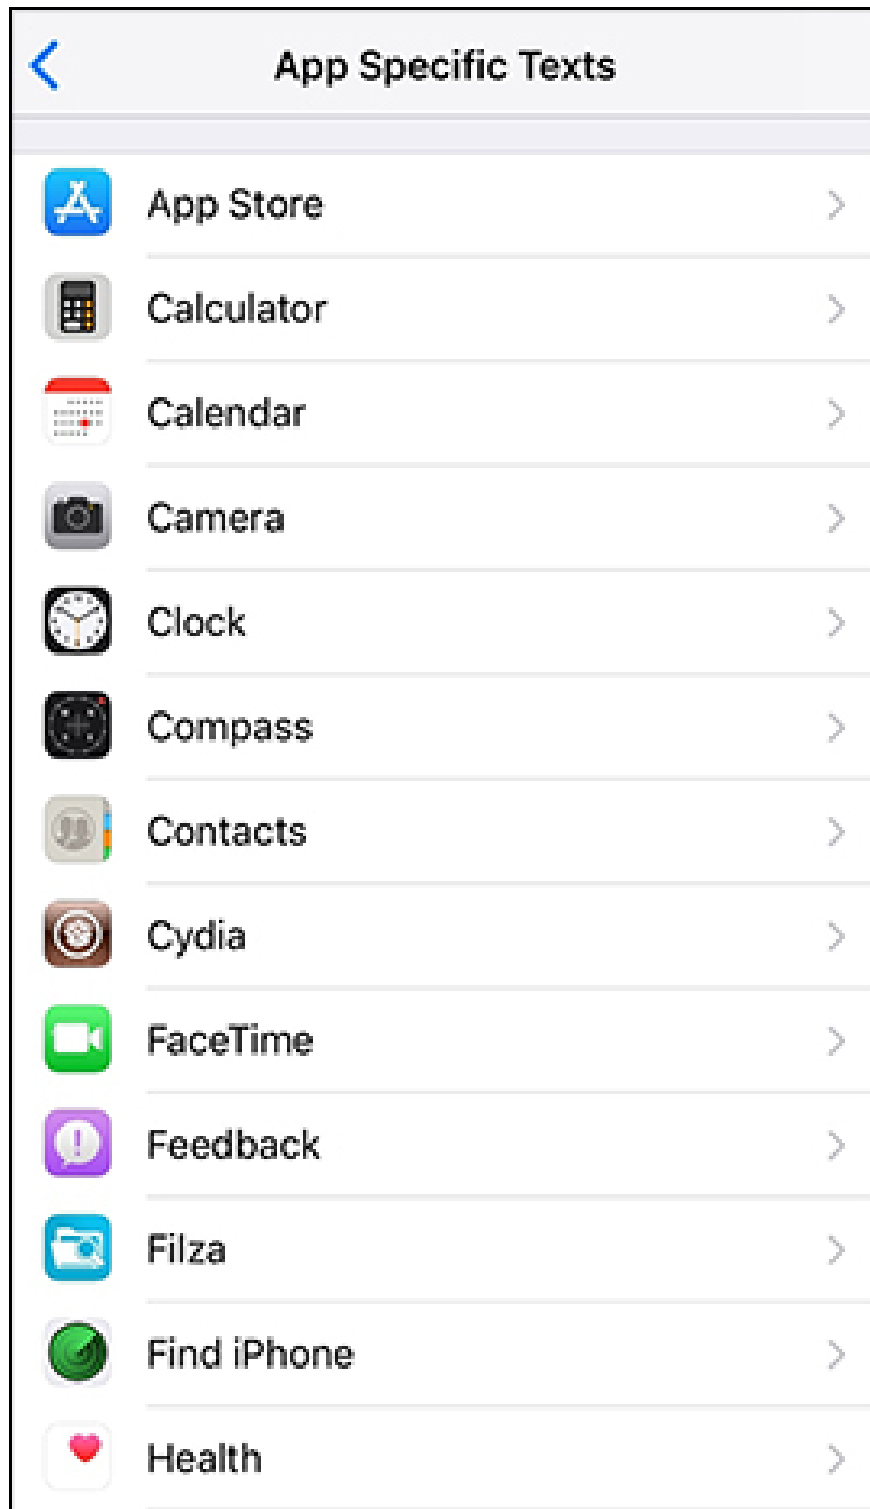

Enable Glowing

Enable Shaking

This will highlight the app icon when you have notifications.

Step 3:

In the list of special applications, users want to display text messages for any application, click on the application.

In each section of the application, we will have more content as shown below. After changing any content, press Respring to apply.

< App Specific Texts App Store Respring	< App Specific Texts Mail Respring	< App Specific Texts Messages Respring
ENABLE	ENABLE	ENABLE
Enabled <input checked="" type="checkbox"/>	Enabled <input checked="" type="checkbox"/>	Enabled <input checked="" type="checkbox"/>
SINGULAR FORM	SINGULAR FORM	SINGULAR FORM
update	email	message
PLURAL FORM	PLURAL FORM	PLURAL FORM
updates	emails	messages

The notification results on iPhone will be converted to text as shown below.
