

# How to show the toolbar in AutoCAD when it is lost

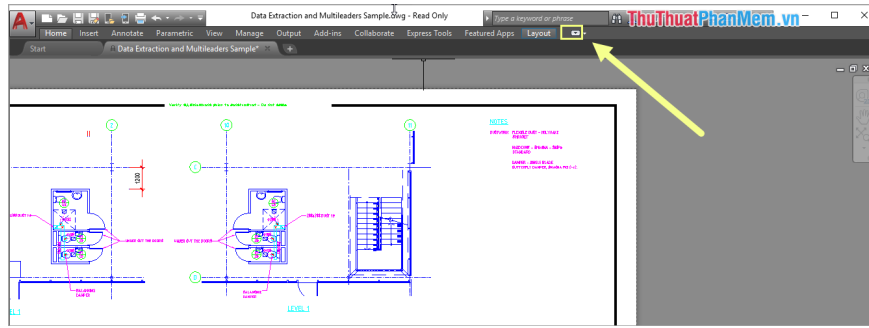

In the course of using AutoCAD sometimes you press the wrong button, making the toolbar disappear and unable to operate the functions on it. This is a problem that many people encounter, not just you, so do not worry because there is a solution.

In the course of using AutoCAD, sometimes you accidentally press the button that makes the toolbar disappear and can not manipulate the functions on it. This is a problem that many people encounter, not just you, so do not worry because there is a solution. In this article, the Software Tips will guide you how to show the toolbar in AutoCAD when it is lost.

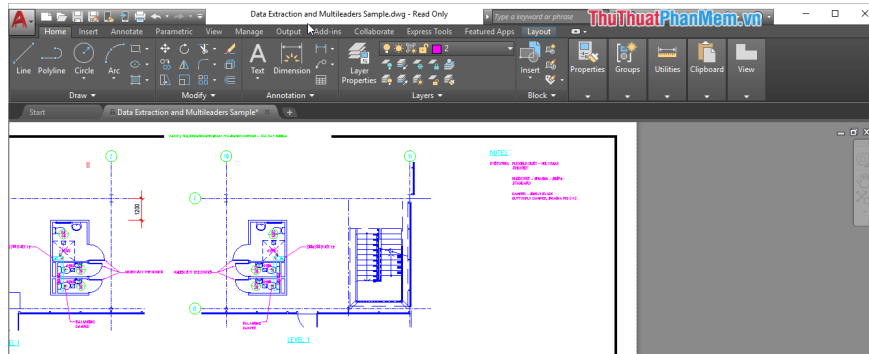

## 1. How to display the AutoCAD toolbar when it is hidden

In the course of work, many people have a habit of hiding toolbars to gain more area of ??display but sometimes forget that they hide them themselves. To reopen them, select **the down arrow icon** in the system options bar and it will reopen.

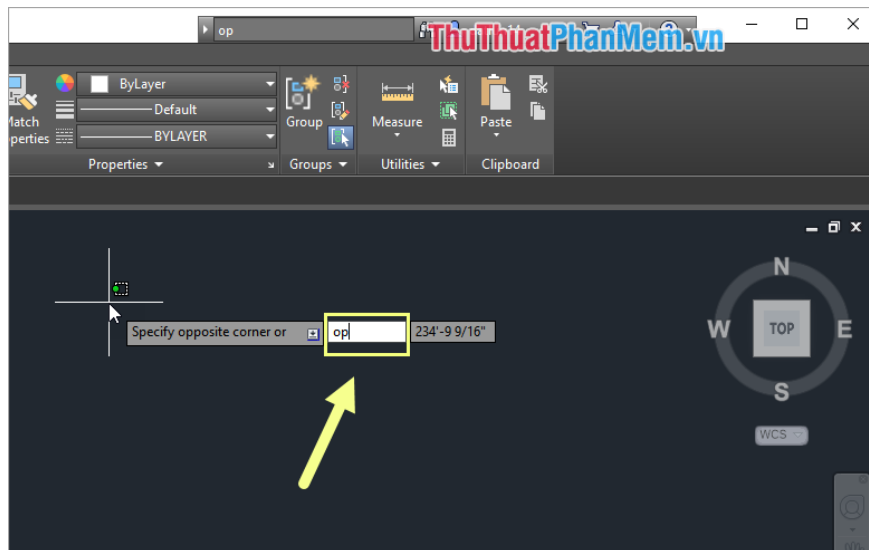

After clicking, the tools will display normally again just like when AutoCAD was installed.

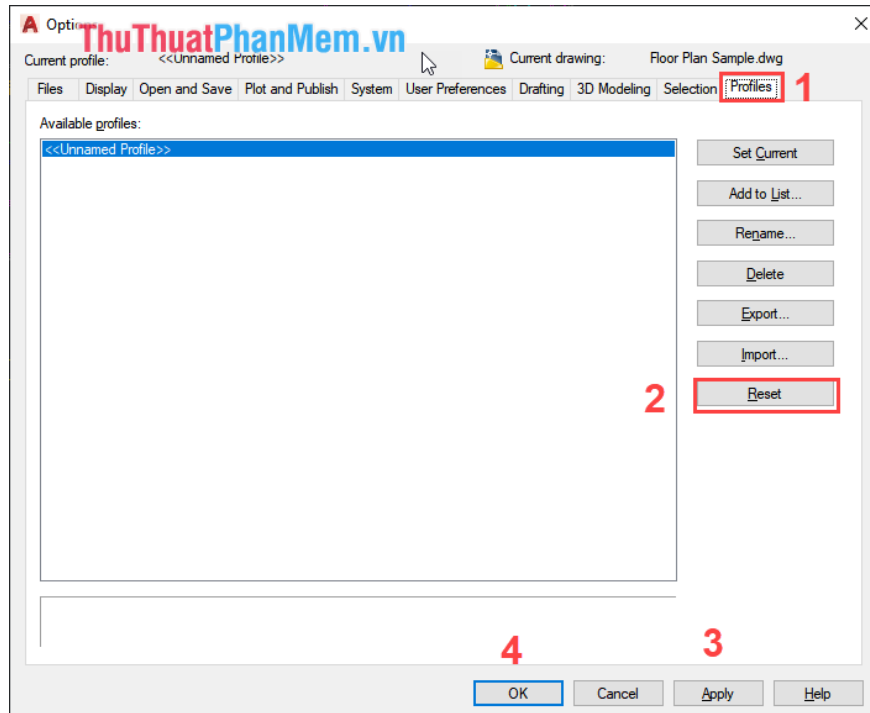

## 2. How to display the AutoCAD toolbar with how to reset the Menu Toolbar

If not the toolbars disappear because you hide, then you can reset your working interface in a very simple way.

**Step 1:** You click on a any location and enter the command **op** . Then you press **Enter** to open.

**Step 2:** The **Option** window will appear, select the **Profiles** tab and click **Reset** to restart the working interface. Finally, click **Apply** and **OK** to finish.

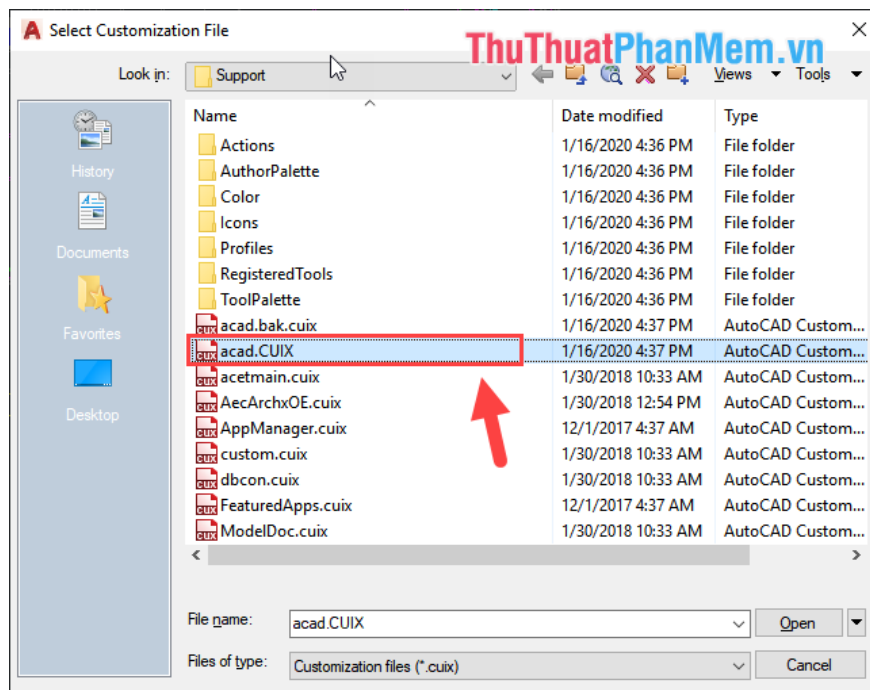

### 3. How to display AutoCAD toolbar with Backup file available

AutoCAD manufacturers understand the user well, they provide a file so that users can restore the original user interface just like when they first installed AutoCAD. Use this Backup file to reopen the toolbar.

**Step 1:** You click on a any location and enter the command **menu** . Then you press **Enter** to open.

**Step 2:** Then, you find the file **acad.CUIX** and select it. Finally, click **Open** to open this **Backup** file . At this point, AutoCAD will reload the entire default system interface as when you just installed the software. Time to re-load the entire system is very fast, only takes about 10 seconds and all your data will be intact, not lost.

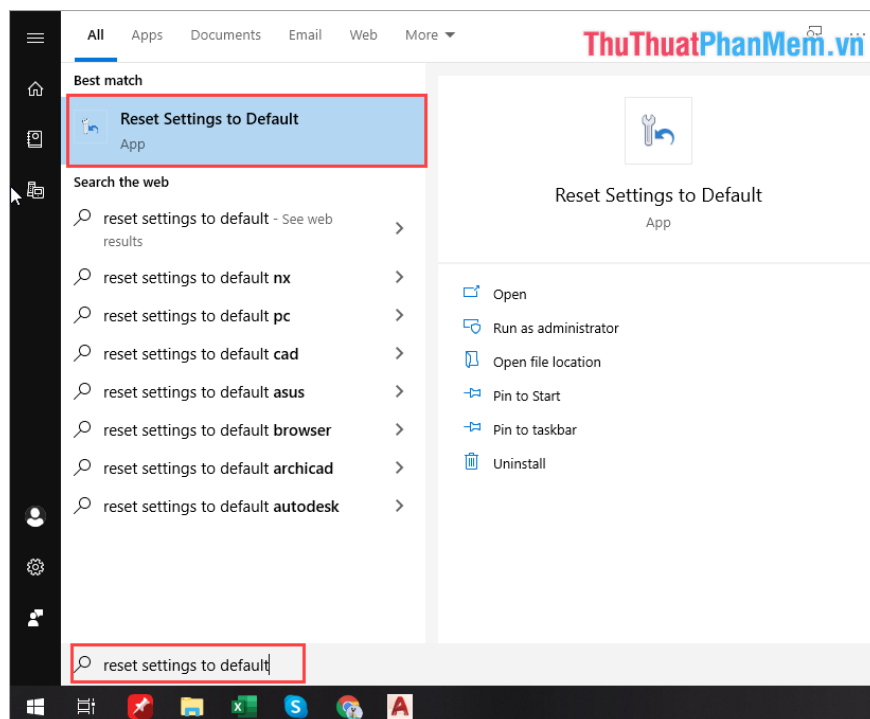

## 4. How to display the AutoCAD toolbar with its tools

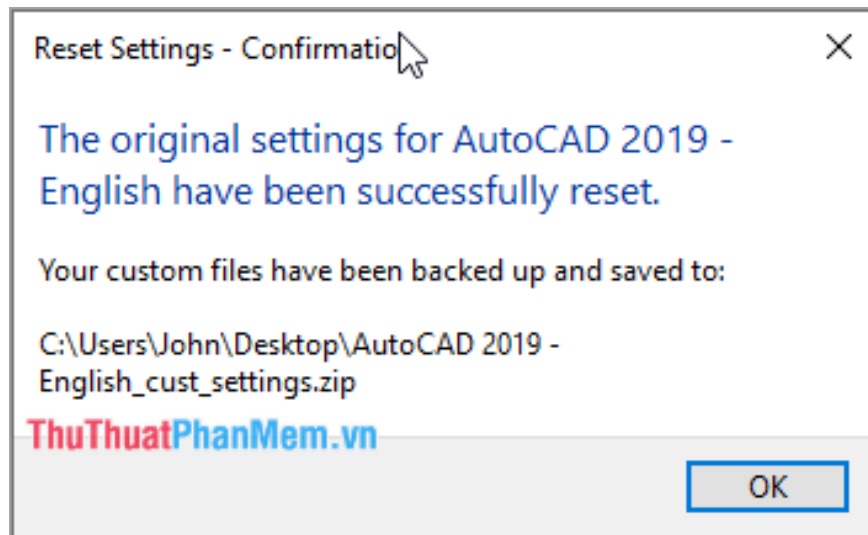

When we install AutoCAD, the company also cleverly installs additional software to support us in urgent cases. So let's use them to display the AutoCAD toolbar as quickly as possible.

*Note: Exit the AutoCAD application before working to avoid errors.*

**Step 1:** Open MenuStart and enter **Reset Settings to Default** and press **Enter** to open.

**Step 2:** After that, the system will automatically reset your AutoCAD as the original installation. Your toolbar will appear again.
