

How to speed up the launch of Desktop application on Windows 10

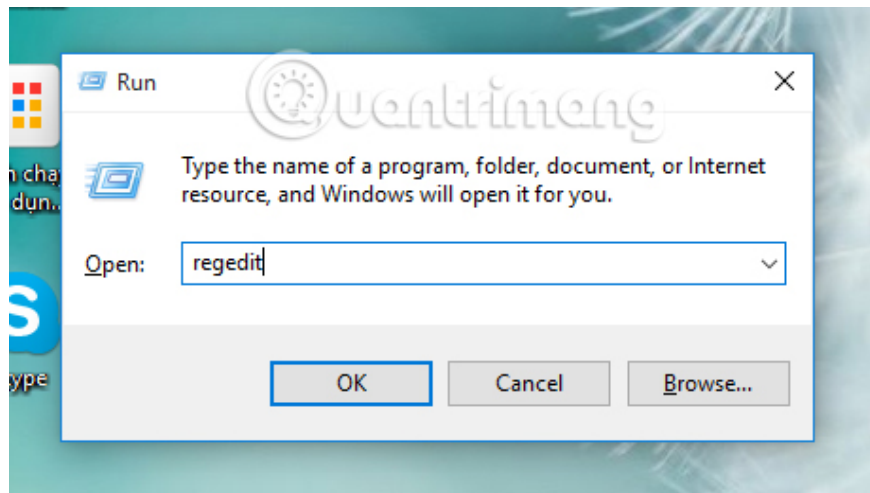

With just a few small settings on your computer, you can speed up the launch of Desktop applications on Windows 10, making your computer work faster, smoother than before.

When booting the system, you see the software in the Startup section suddenly starts slower than Windows. This will affect the operation of the computer, taking a lot of time waiting for the user. So in this article, Network Administrator will guide you to fix slow startup of the software by simply editing the Registry.

1. **5 ways to do this will help your Windows 10 "as fast as the wind"**
2. **How to open the virtual keyboard in Windows 10**
3. **Ways to turn off your computer on Windows 10**

Step 1:

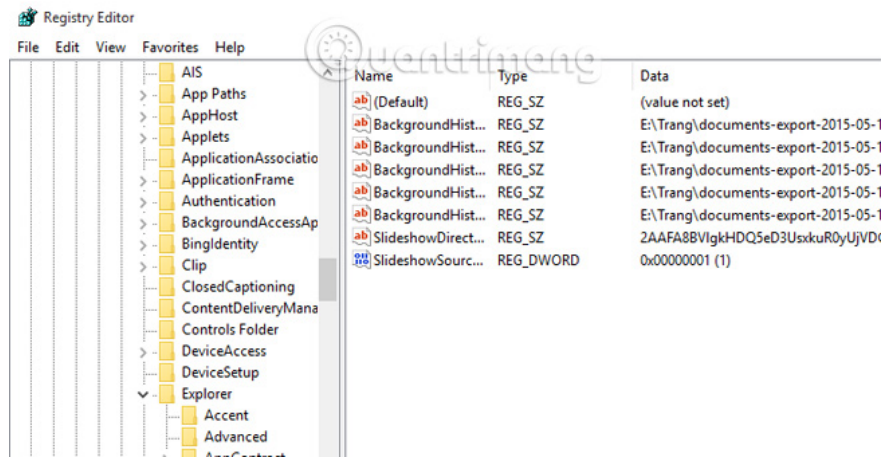

Press the **Windows + R** key combination to open the Run dialog box. Then enter the **Regedit** keyword and click **OK** to access.

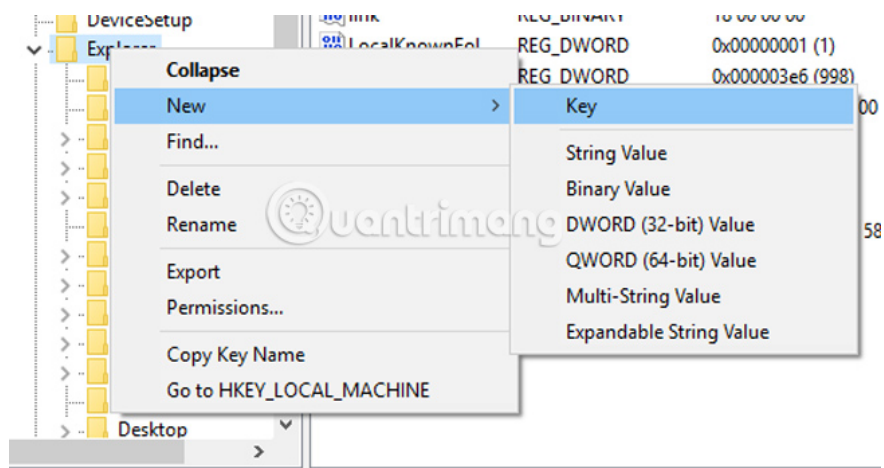

Step 2:

In the Registry Editor interface, we will access the directory according to the following path:

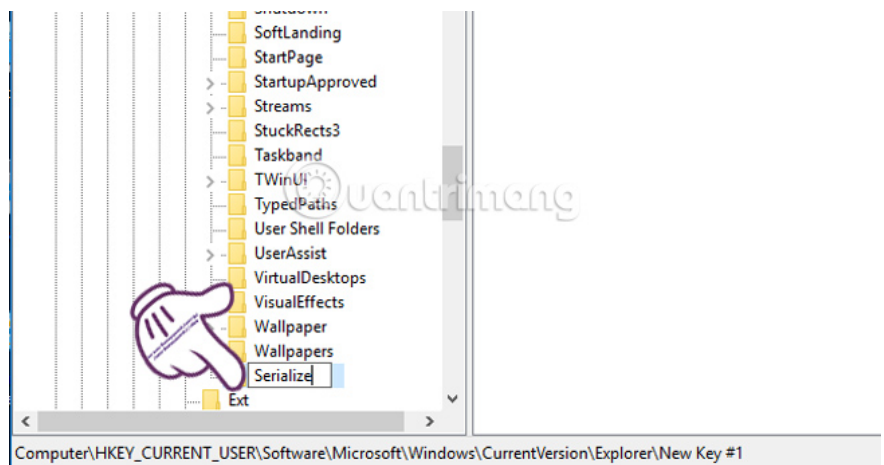

HKEY_CURRENT_USERSoftwareMicrosoftWindowsCurrentVersionExplorerSerialize

If your computer does not have a **Serialize** folder, right-click **Explorer** , select **New** and then select **Key** .

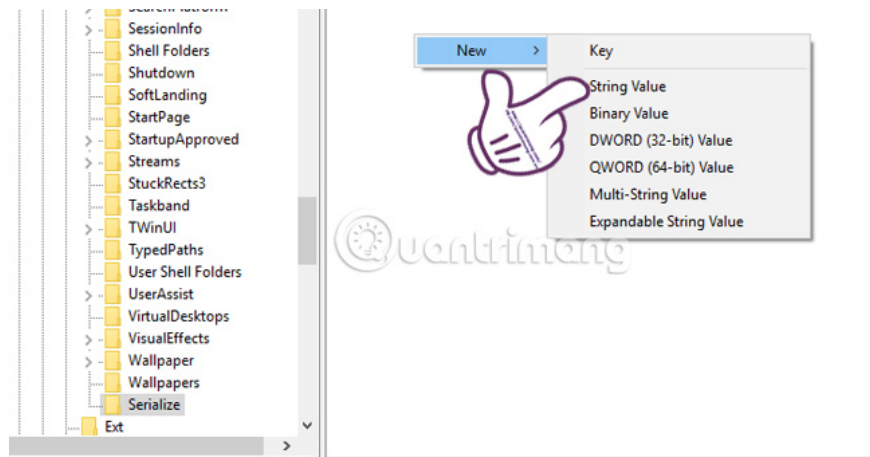

We will name the new folder **Serialize** .

Step 3:

Next, we create a new thread lock by right-clicking on the newly created Serialize folder, selecting **String Value**

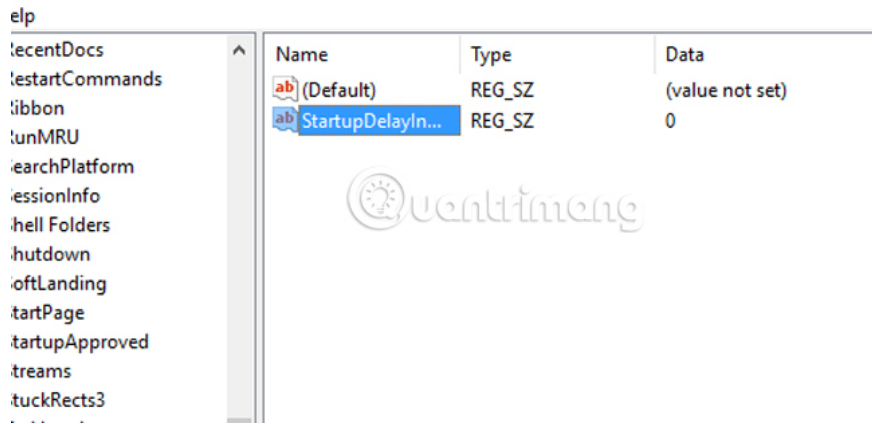

Step 4:

Here, you will name it **StartupDelayInMSec** and set the value to **0**.

The result will look like the image below.

Finally, you just need to reboot your computer and see if the applications are working faster.
