

# How to speed up your internet using cFosSpeed ??to reduce lag while browsing and gaming.

Speed ??up your internet connection using cFosSpeed, boosting your computer's network speed. This will allow you to browse the web and stream music smoothly without interruptions, just like high ping can cause lag and delays in gaming. Refer to the instructions below from TipsMake to learn how to increase your network speed using cFosSpeed.

**When talking about internet speed-boosting** software , we can't help but mention **cFosSpeed** , one of the most effective tools for music lovers, web surfers, and gamers today.

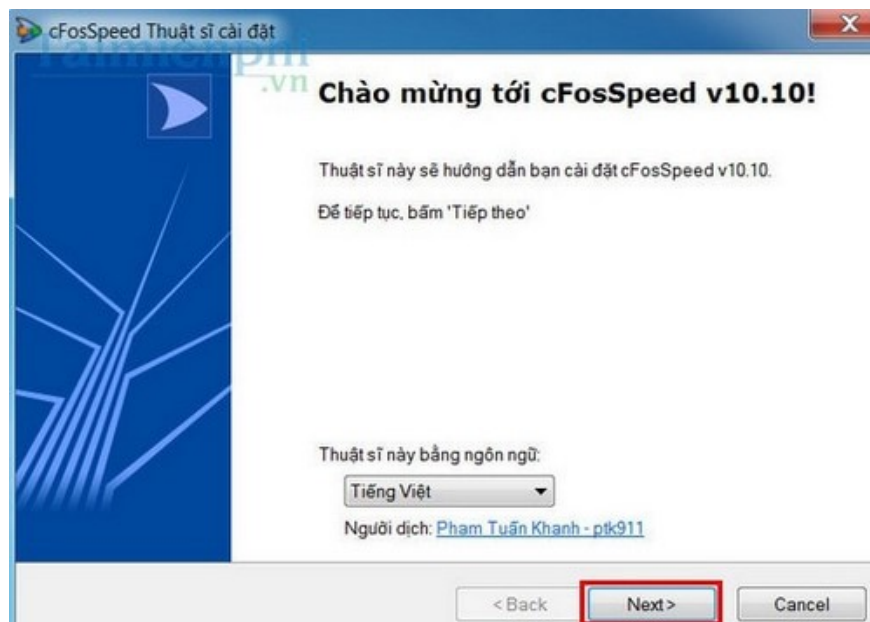

**Speed ??up your internet with cFosSpeed, browse the web faster, reduce ping and lag when playing games.**

cFosSpeed ??is equipped with Traffic Shaping technology, allowing you to control traffic, reduce bandwidth usage, and prioritize network speeds for specific tasks and programs. It's ideal for gamers who need to reduce ping, and if you're a gamer, don't forget to use GameBooster to optimize your gaming speed.

## Speed ??up your internet with cFosSpeed

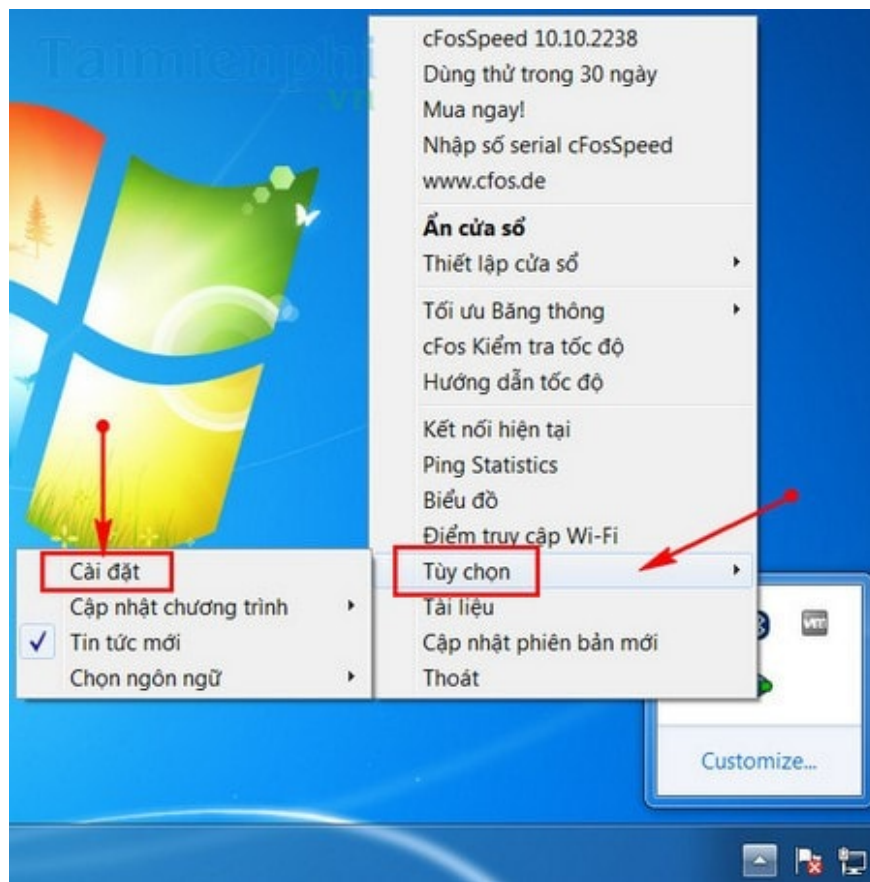

**Step 1: Download and install the cFosSpeed ??software.** The software supports Vietnamese, so it's best to switch to Vietnamese for easier use.

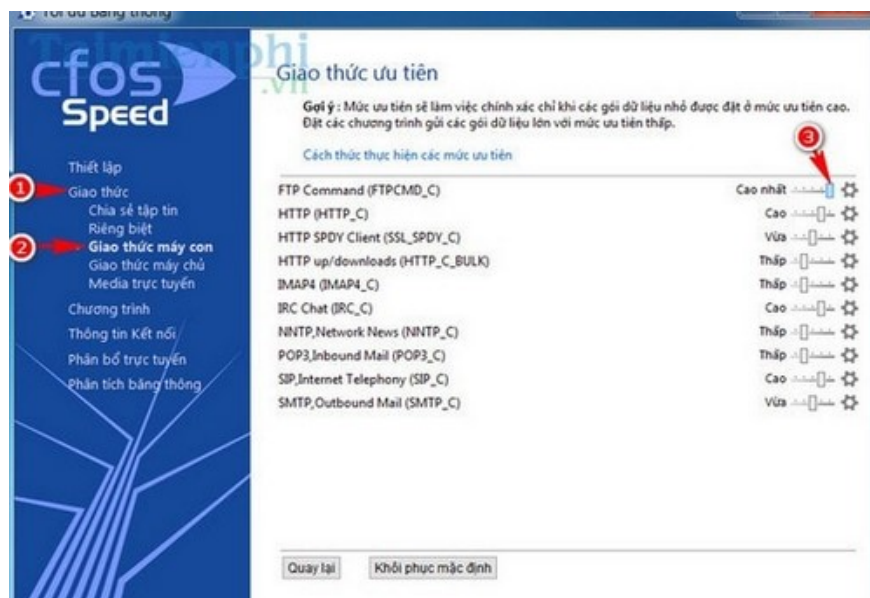

**Step 2:** Agree to the terms and conditions, then click **Next** until the program finishes running.

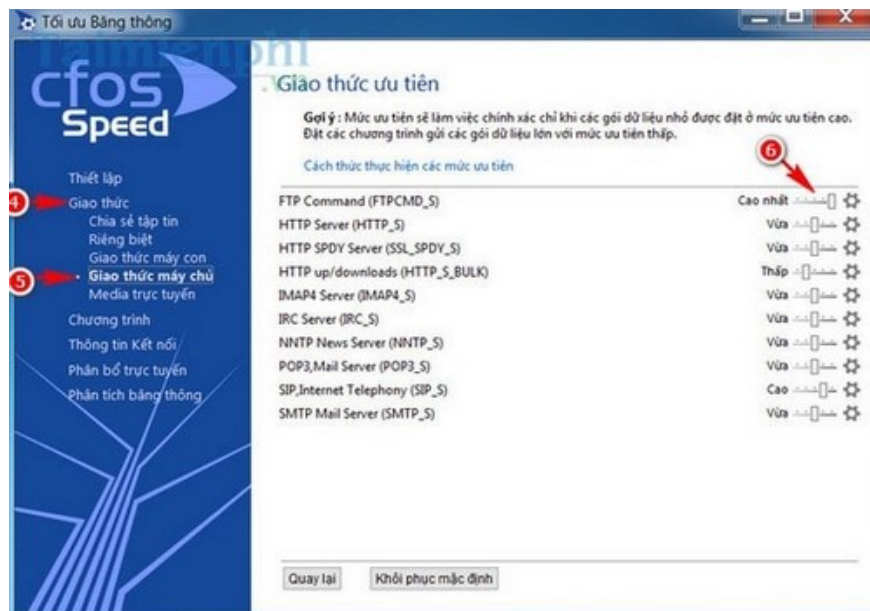

**Step 3:** Click on the cFosSpeed icon in the taskbar > Options > Settings .

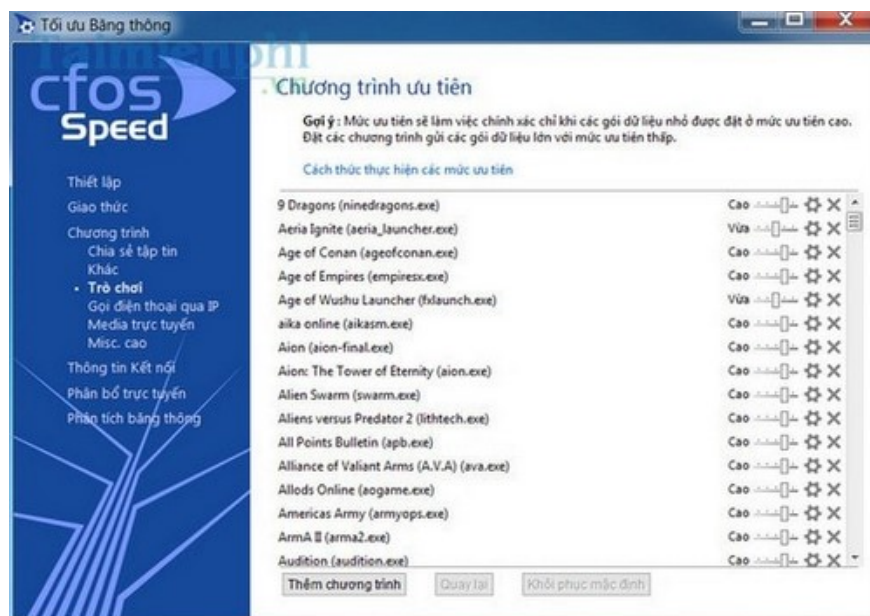

**Step 4:** In the **Client Protocols** section , select **FTP Command** and set it to the highest level.

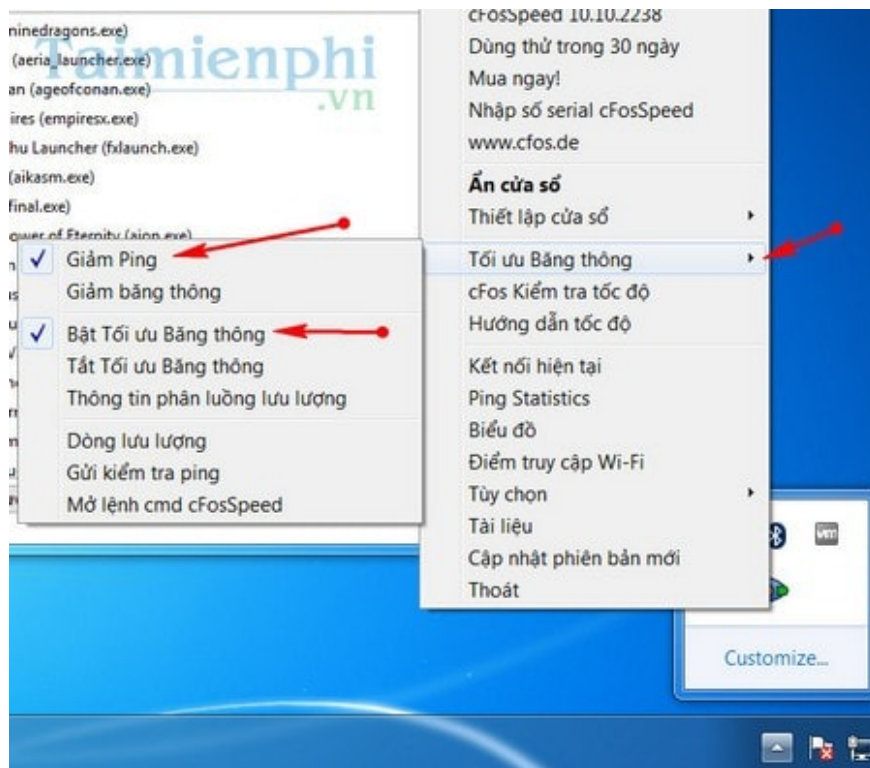

**Step 5:** In the **Server Protocols** section , select **FTP Command** and also set it to the highest level.

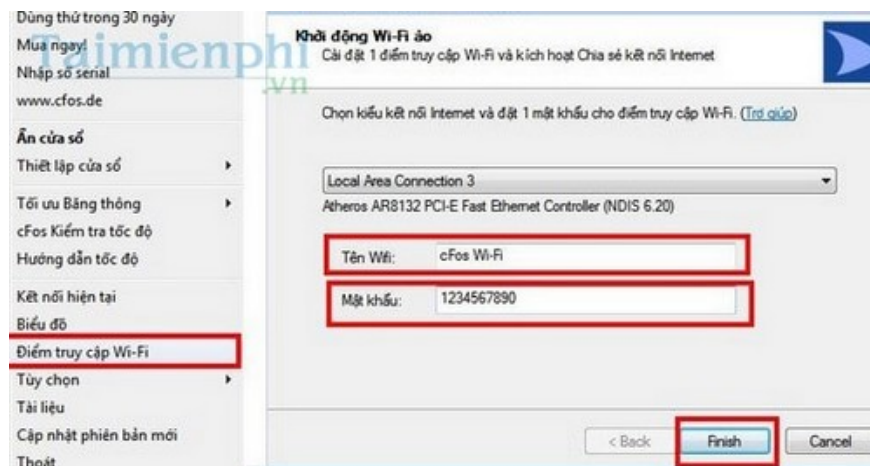

**Step 6:** This section is optional and depends on your needs. You can edit or delete programs on your computer. Additionally, if a program isn't in the list, you can **add it** and choose its priority level.

**Step 7:** Click the cFosSpeed icon again in the taskbar > **Bandwidth Optimization** > **Ping Monitoring** > **Enable Bandwidth Optimization** .

**Step 8:** Additionally, the program also supports Wi-Fi hotspot creation (applicable to laptops). You can go to the **Wi-Fi Access Point** section and create a Wi-Fi network.

So, TipsMake has finished guiding you on how to improve your network connection using cFosSpeed. Remember to always prioritize what you consider most necessary to use cFosSpeed ??most effectively. Additionally, readers should also refer to other methods for speeding up their computers for the best possible experience.

Boosting your internet connection with cFosSpeed ??is completely reliable, simple to use, yet very feature-rich, comparable to **Auslogic Internet Optimizer** or Cell Boost, which TipsMake has previously introduced to you.
