

How to split computer screen in Windows

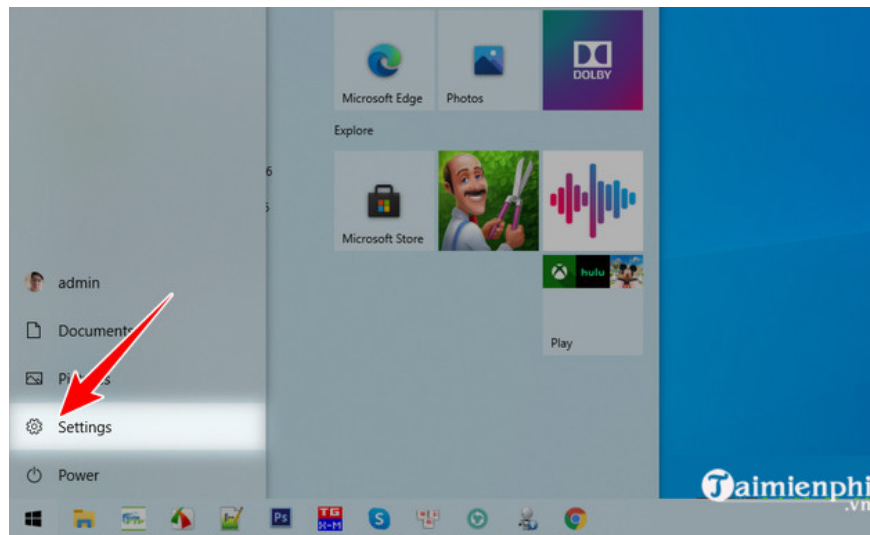

Want to open two windows at the same time on your computer screen to work faster? This article shows you how to split the screen in Windows, helping to optimize your workspace and save time.

Split screen lets you multitask without constantly switching tabs.

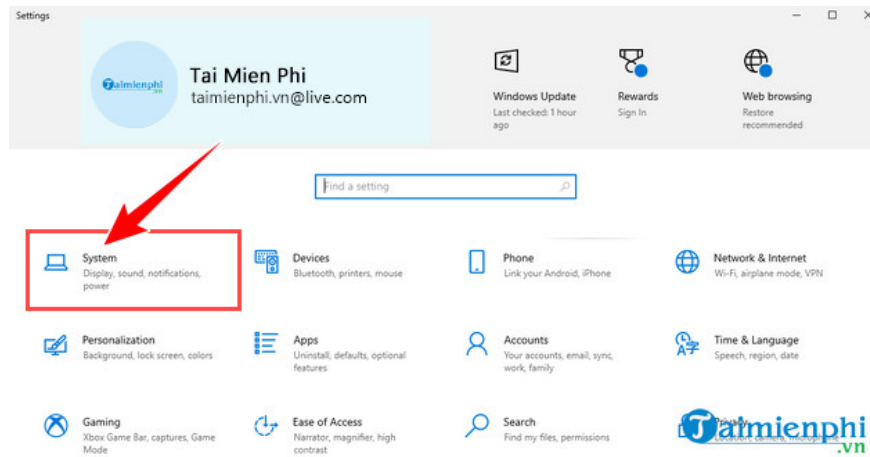

The fastest way to split your computer screen

First you need to enable split screen mode on your computer to be able to split the screen into 2, 3, 4 as desired.

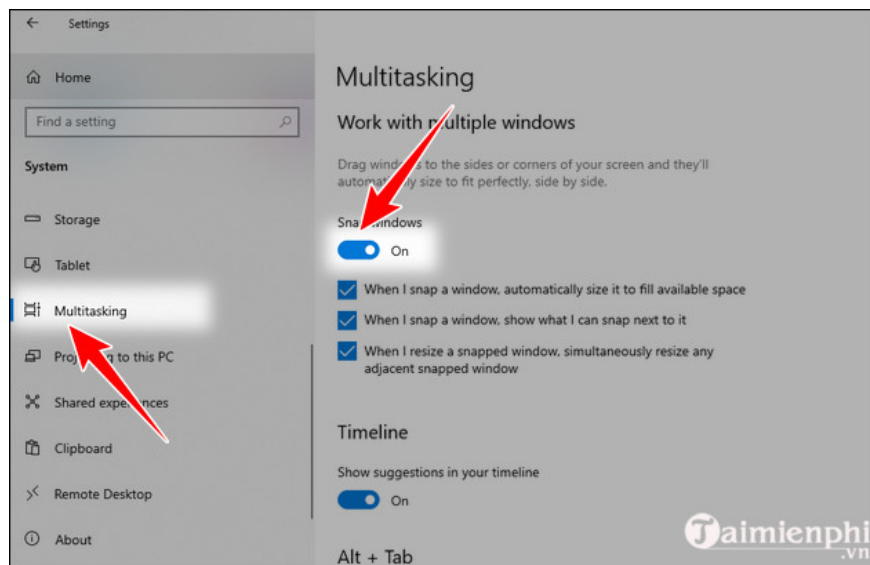

Step 1: Open **Settings** on your computer. You can click on **the Windows icon** in the lower left corner of the screen to open settings.

Step 2: Here select **System** to open the control panel

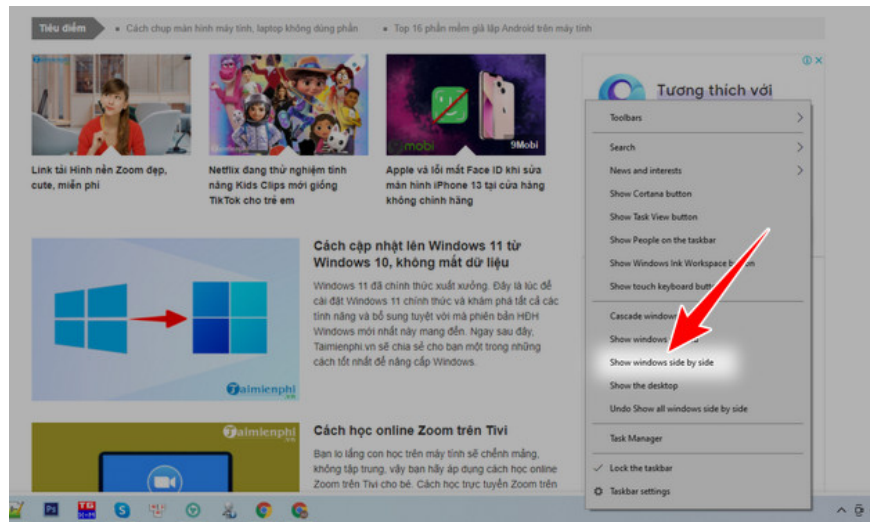

Step 3: Find and select **Multitasking** and enable **Snap Windows**

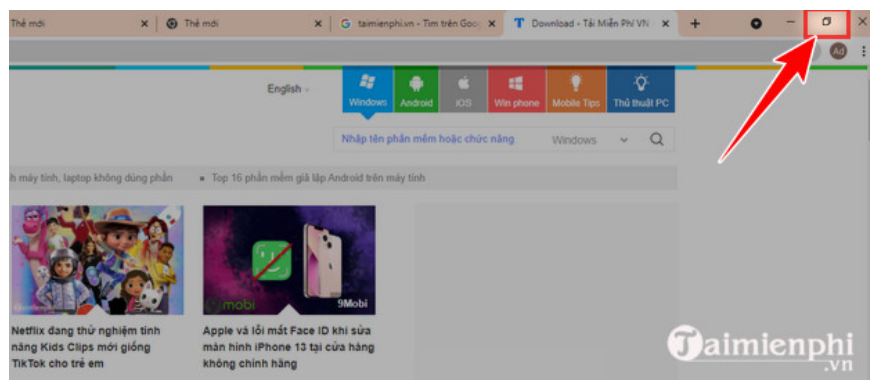

Method 1: Use the tool on the Taskbar

To split the screen on a Windows computer, right-click on the **Taskbar** and select **Show windows side by side** . The computer will automatically minimize and split all open windows on the screen.

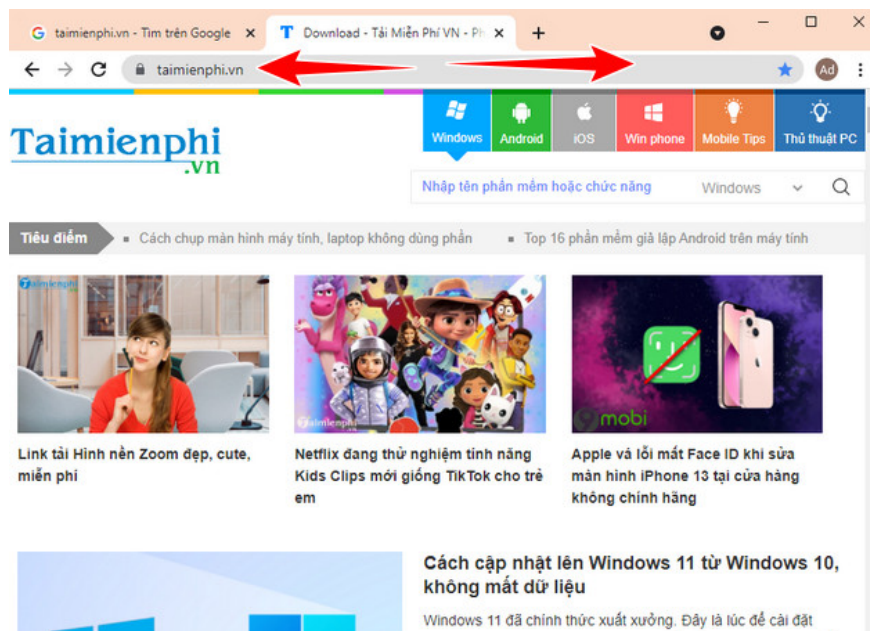

Method 2: Using the mouse

Step 1: In the window you want to split the screen, select **the minimize icon** (as shown in the picture) in the upper right corner.

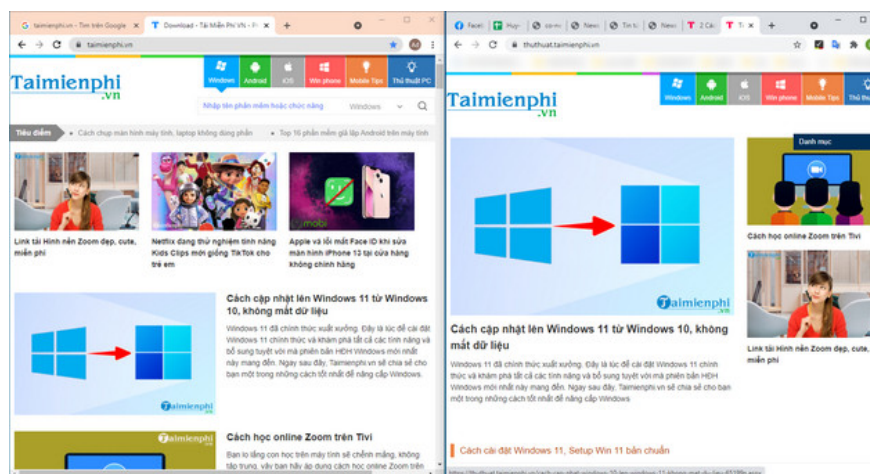

Step 2: Now hold the left mouse button and move your tab left, right, up or down as you like.

Method 3: Use shortcut keys

Use the mouse to click on the first window, then press the **Windows + ==>** (Right arrow key) key combination. Continue with the second window, press the **Windows + >** (Left arrow key) key combination and you will also get the desired result.

Splitting your computer screen allows you to multitask without constantly switching windows. You can also resize windows to optimize your workspace and display content more clearly.
