Step 3:

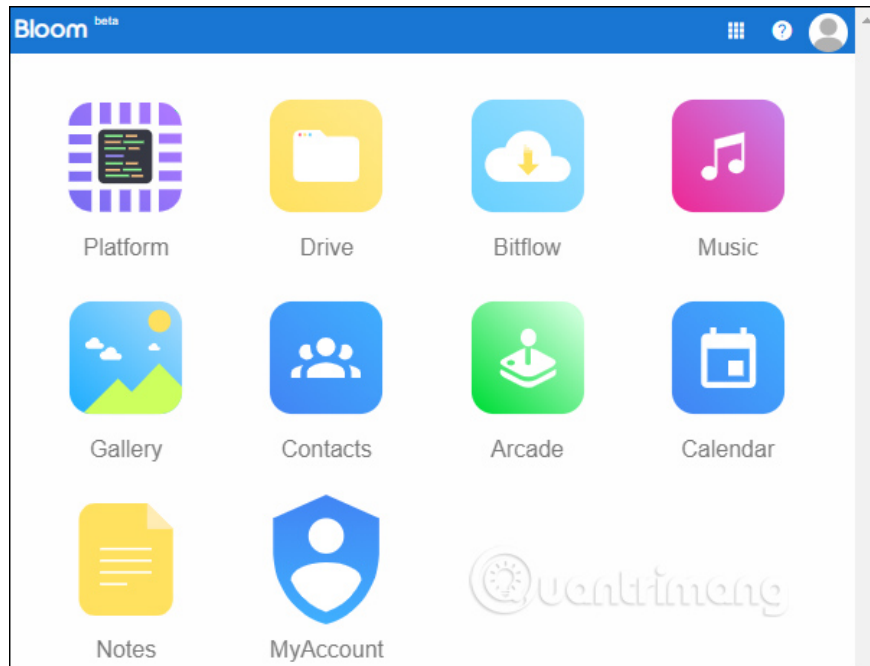

Next **enter the username** and click **Complete registration** to complete the registration.

A screenshot of a registration form. At the top, a blue header bar is visible. Below it, the text reads: "Your username is unique and cannot be changed. It must be composed of only alphanumeric characters". Below this text is a text input field with the placeholder "Your username" and an "@" symbol. Below the input field is a blue button labeled "Complete registration" with a red arrow pointing to it from the left. In the bottom right corner, there is a faint logo for "Quantimeng" featuring a gear icon.

Soon you will see the main interface of the service. Show the interface with all the tools that Bloom provides, including data storage.

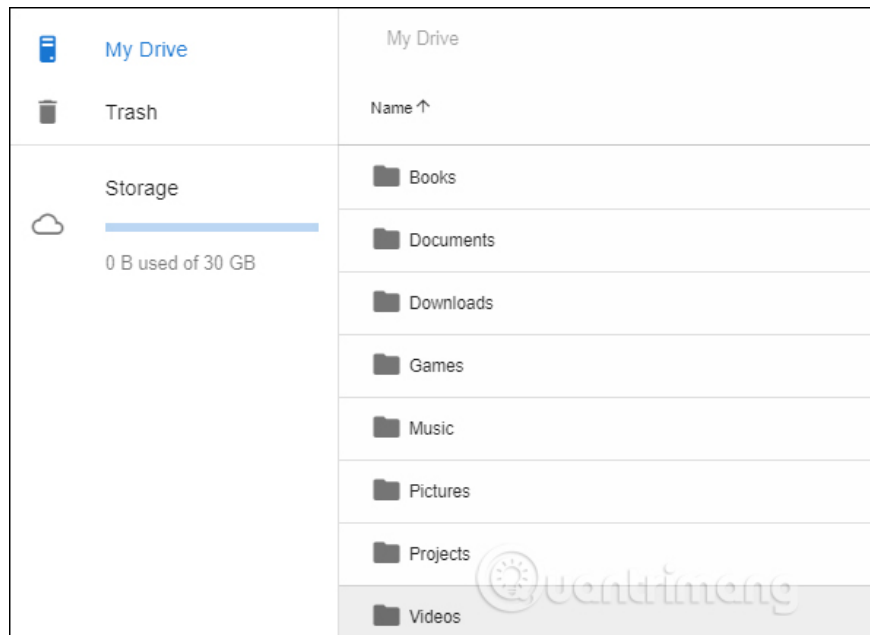

1. Platform: Store network and IP address information.
2. Drive: Store your personal data.
3. Bitflow: Download files directly and save them on Bloom.
4. Music: Store audio files.
5. Gallery: Store photo gallery.
6. Contacts: Store contacts.
7. Aracede: Play games on Bloom.
8. Calendar: View the date.
9. Notes: Create notes on Bloom.
10. MyAccount: Change personal account information.

To **store data**, click on **the Drive item** .

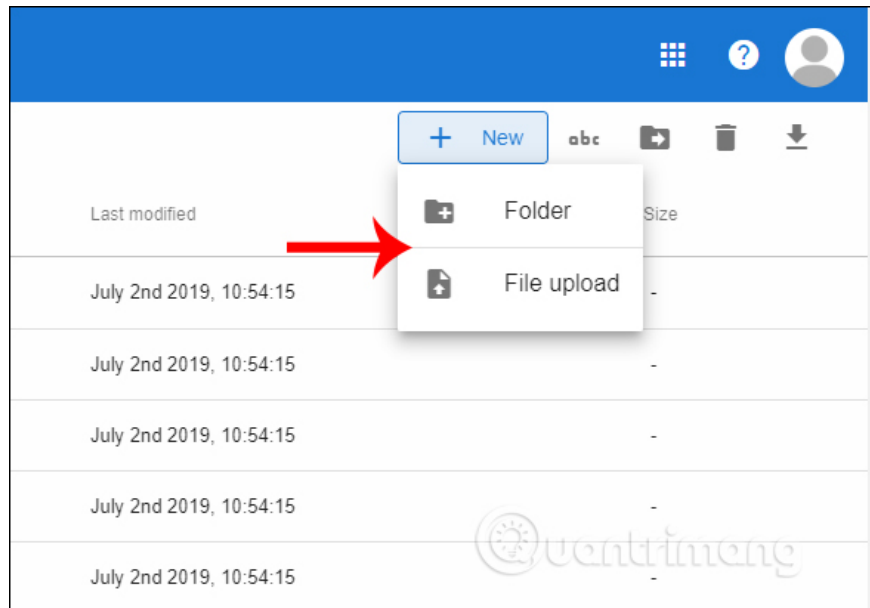

Step 4:

In the archive, Bloom has made many directories available for us to upload data by category, such as Books, Documents, Games, Music, Picture, .

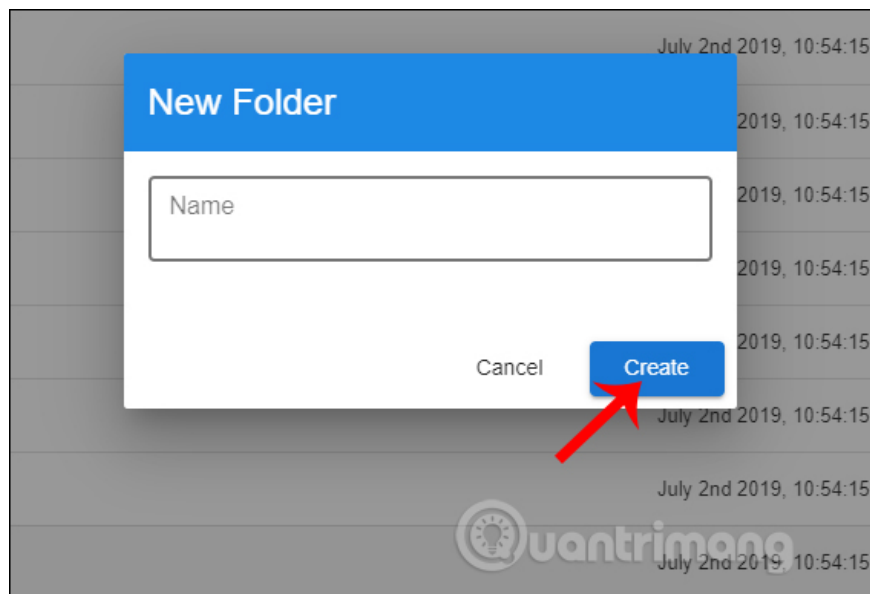

To upload new data, click on **the New icon** in the right corner of the interface. Then display two options for downloading files, Folder to create file download folder and File upload to download each file individually.

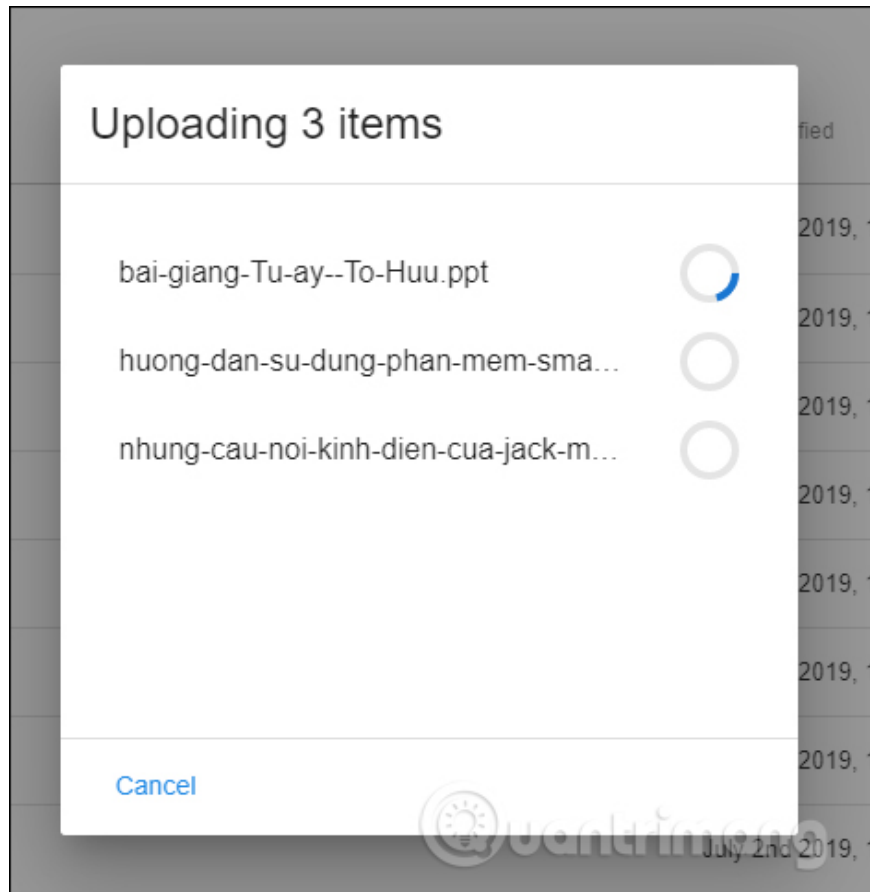

Step 5:

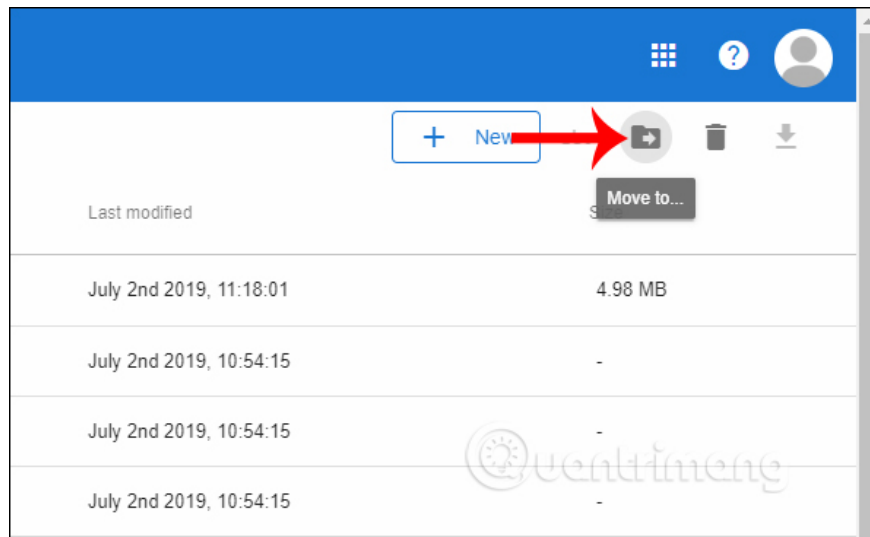

Displays the interface to **create a separate file storage folder** for each user.

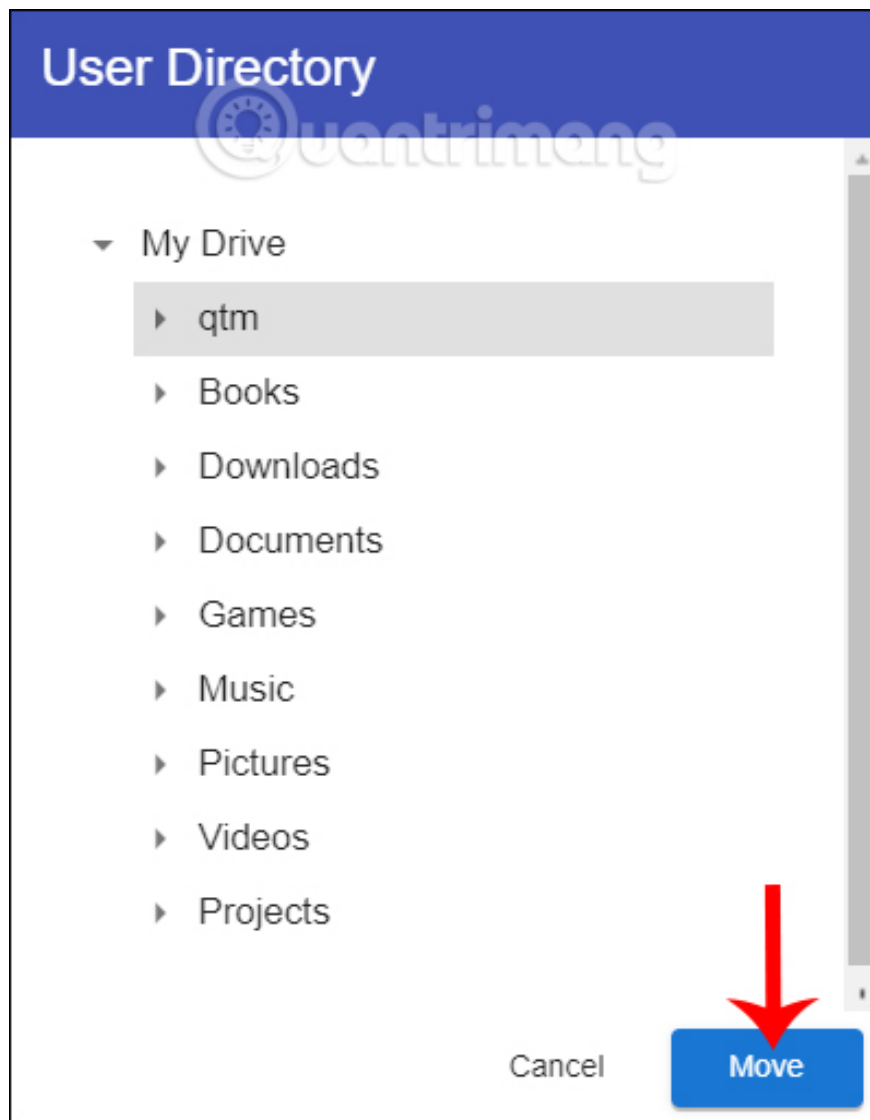

To download files separately, you just need to select the files you want to store on Bloom. The file download process takes place shortly thereafter.

In case the user wants to **transfer individual files to fixed folders** , click on the file, then click on **the Move icon** to move the file.

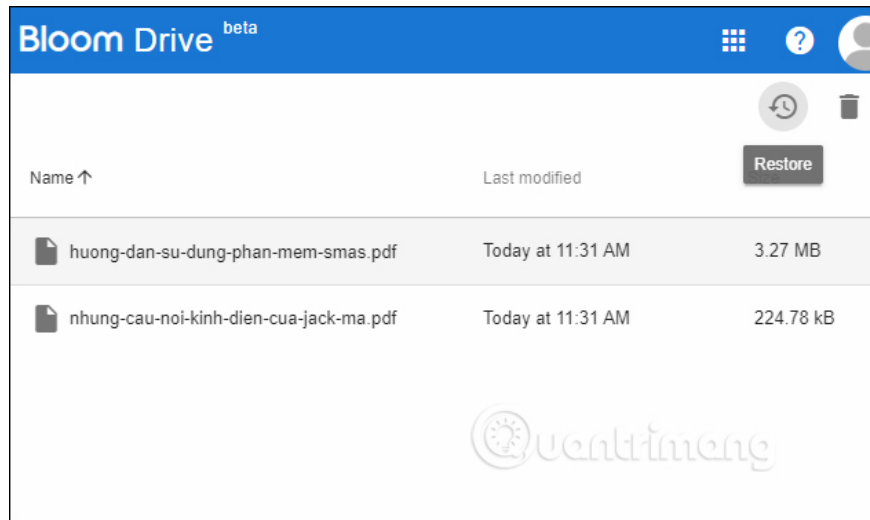

Display the folders for you to choose to move the file. Click the folder and select Move to move.

Step 6:

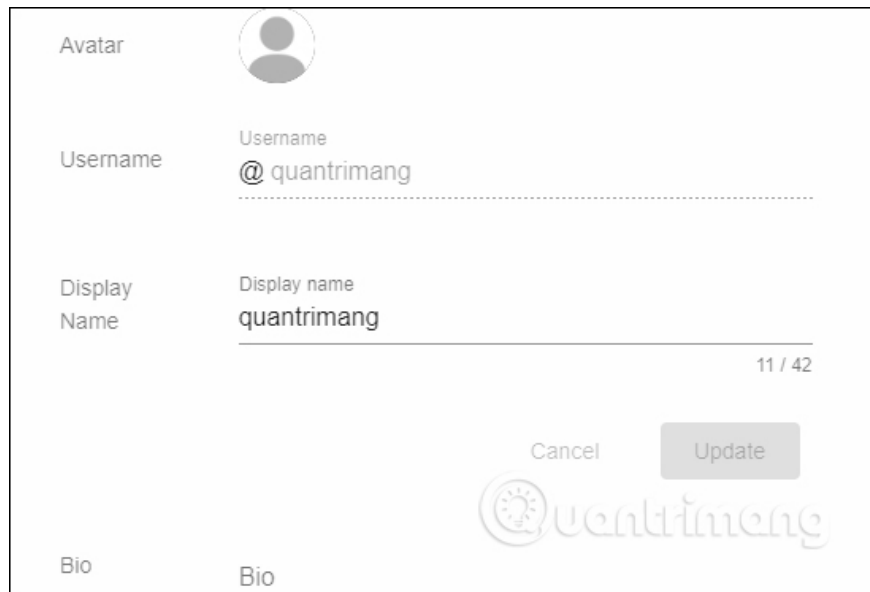

There are also many other options for data stored on Bloom. **The Trash section** will save the files that we delete from the archive, retrieve them, or permanently delete them when needed.

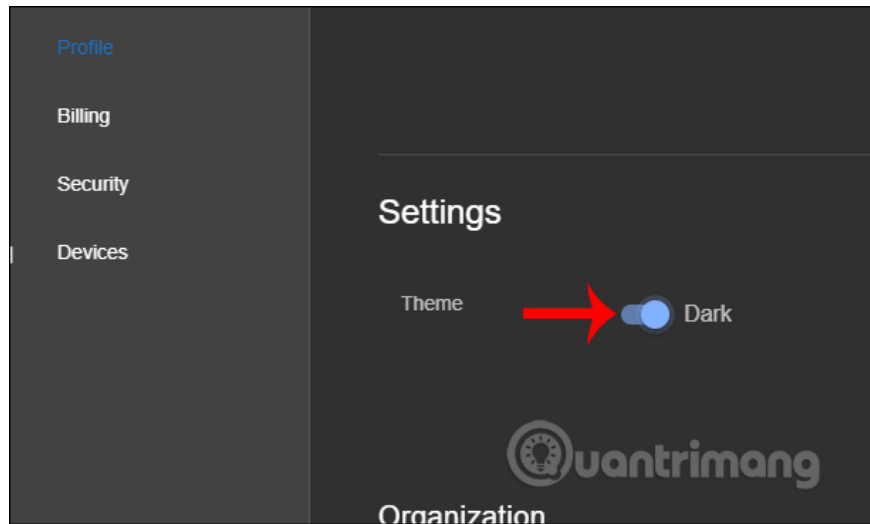

Step 7:

To **check personal information** on Bloom we click on **My Account** . At this interface the user changes the avatar. The Username section you are not allowed to change, just change the display name. You can also add information about yourself if you want.

When changing information, **click Update** to save.

Bloom supports us **using a black background** , by switching from Light to Dark mode.

With Bloom's other features, users only need to perform as required by the service. The steps to use are as simple as when you use the data storage feature on Bloom. Note to users, Bloom is currently still in the testing process, so there may be errors during use.

I wish you all success!
