Instructions for storing data on the Ark File

Step 1:

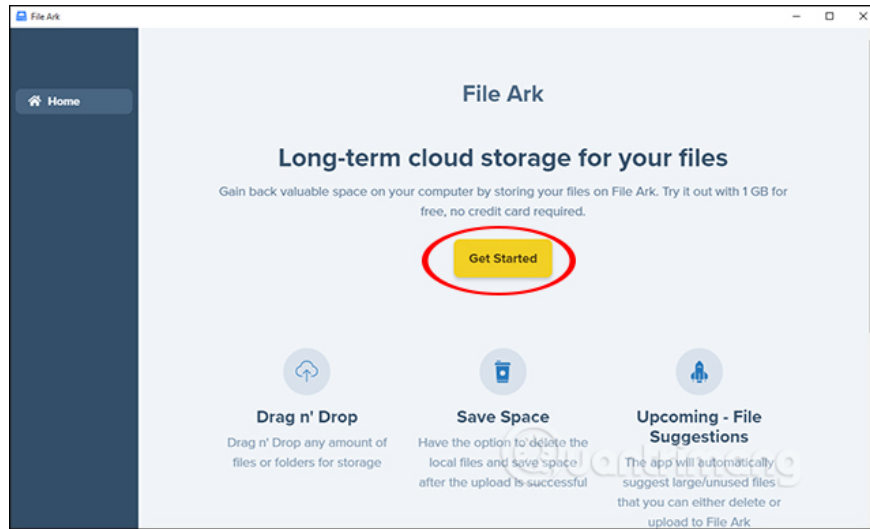

Users access the link below to download the Ark File for Windows or the Mac depending on the device being used.

1. <https://fileark.launchaco.com/>

Step 2:

After downloading the file, users click on the file to install. Ark file installed very quickly without many steps. At the interface of the tool click **Get Started** to register your account.

Step 3:

Enter your **email address** and **password** to create an account on the Ark File.

The image shows a 'Sign Up' form with a white background and a light blue border. At the top, the title 'Sign Up' is displayed in a bold blue font. Below the title, there are two input fields: 'Email Address' and 'Password'. The 'Email Address' field contains the placeholder text 'Email Address', and the 'Password' field contains a series of asterisks '*****'. A blue button with the text 'Sign Up' is positioned below the input fields. At the bottom of the form, there is a link that says 'Already have an account? Login'. A faint watermark logo for 'Quantimang' is visible at the bottom of the form area.

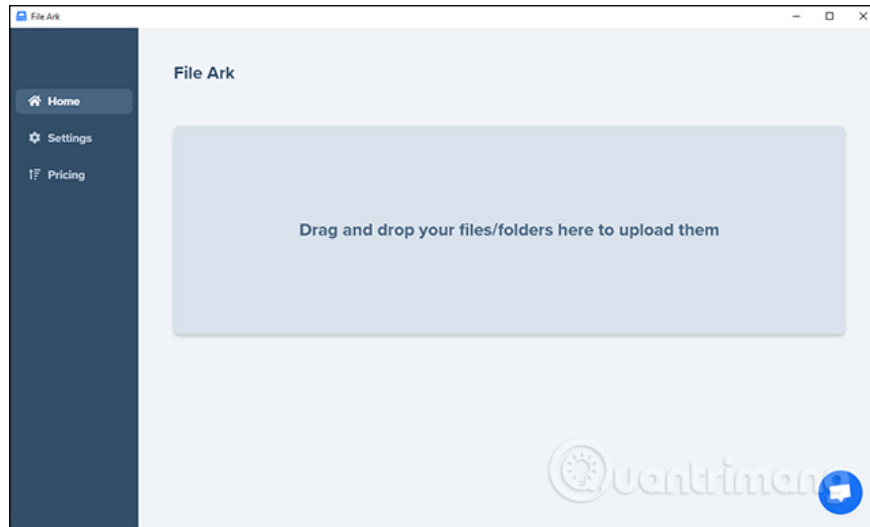

Next, the user needs to access **the email address to register for the account to confirm** . Click on the blue link to confirm your account.

The image shows a 'Verification' page with a white background and a light blue border. At the top, the title 'Verification' is displayed in a bold blue font. Below the title, there is a text instruction: 'Click on the link sent to your email to verify your account'. A blue button with the text 'Re-send Verification Link' is positioned below the instruction. At the bottom of the page, there is a text note: 'This page will automatically go away in a few seconds after you click on the verification link in your email.' A faint watermark logo for 'Quantimang' is visible at the bottom of the page area.

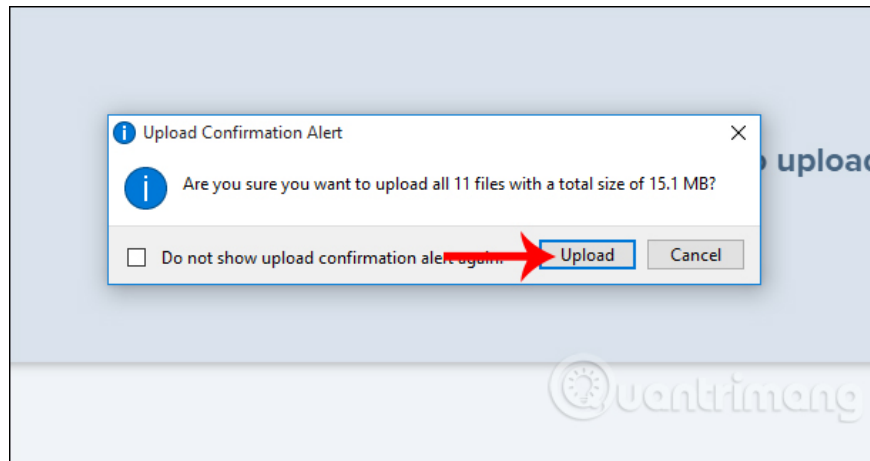

Step 4:

In the main interface of the software is divided into 3 different categories including Home, Settings and Pricing.

Step 5:

In the Home section, **drag and drop the data you** want to store into this interface. At this time, the confirmation window will appear (Upload Confirmation Alert), **click Upload** to confirm. If you don't want to see this message again when posting data, choose Do not show upload confirmation alert again.

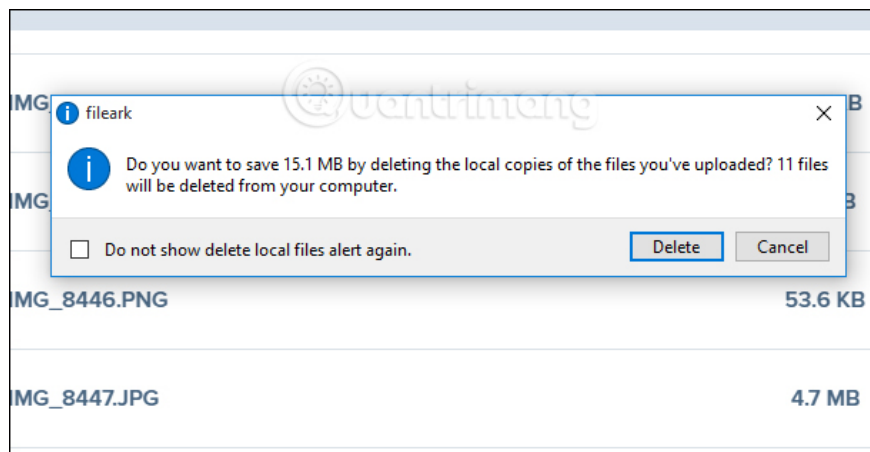

The process of uploading data to the Ark File memory will take place the following day and will be indicated by the upload% bar below.

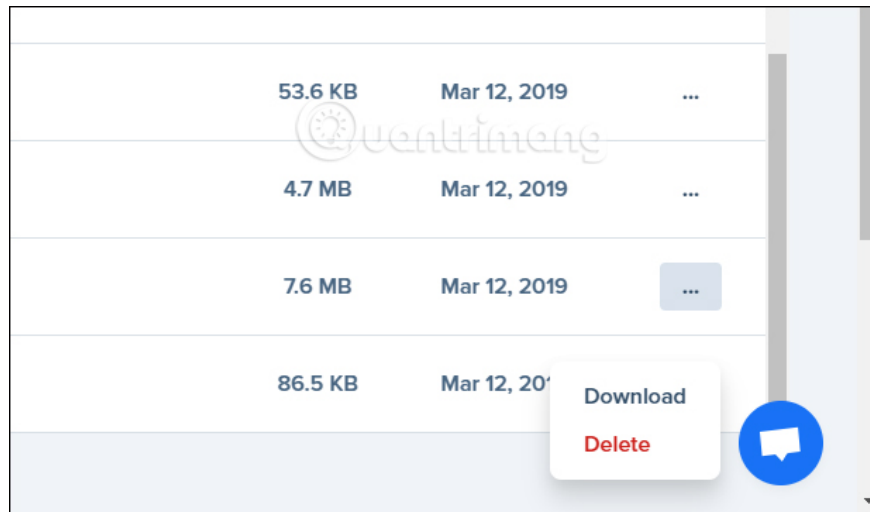

Step 6:

When the download process is completed, we receive a **notification whether we want to delete the original file** on the computer. Click Delete to agree to delete or Cancel. If you do not want to see this message every time you finish uploading, click on Do not show delete local files alert again.

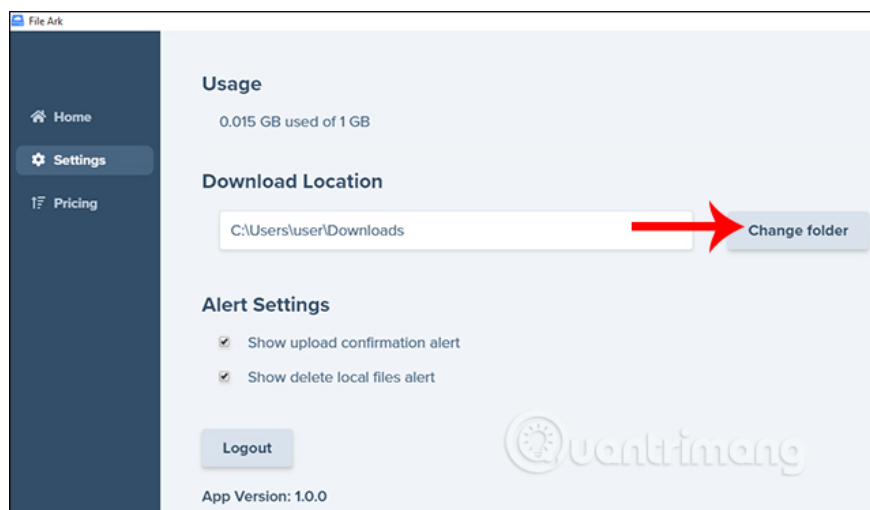

All uploaded files will be displayed as shown below. Files are sorted by size and upload date. In the External Actions column, clicking on **the 3 dots icon** will have the option to download (Download) and delete the file (Delete). When downloaded, the file is saved in the Downloads folder of the computer.

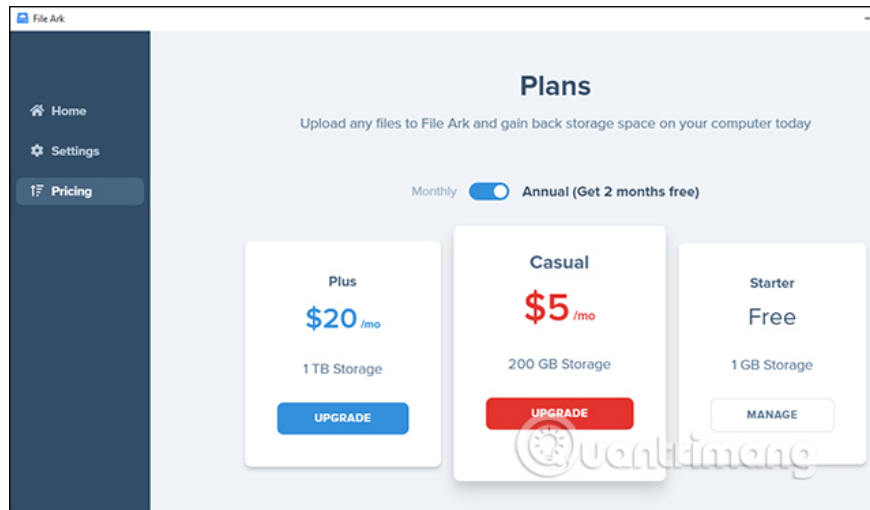

Step 7:

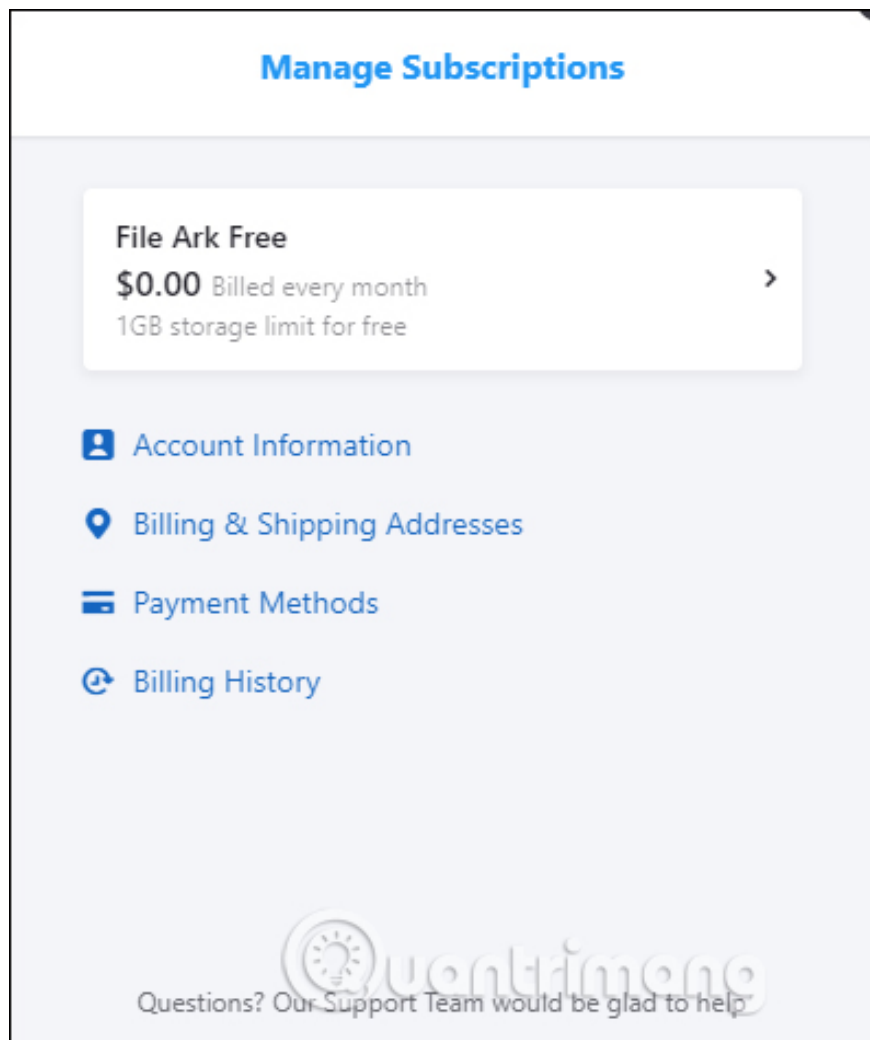

At **the Settings section**, users will see settings such as changing the location of the downloaded file (Download Location), toggling the confirmation message before and after uploading (Alert Settings), logging out (Log out). To change the archive, click the Change folder button.

For Pricing, there will be different account upgrade levels with additional storage levels if the user needs it.

With the Free account when clicking **the Manage button**, you will see some additional information about the account as well as the current storage status of the software.

File Ark is very simple to use and the storage interface, file management on the software also arranges objectively with 3 main items. After saving the file on the Ark File, we can delete the original file to increase the

storage capacity on the computer. If you want to reload, even in each file stored on File Ark, there is an option to download it to your computer.
