1. How to use SORC'D Web Clipper on Chrome

Step 1:

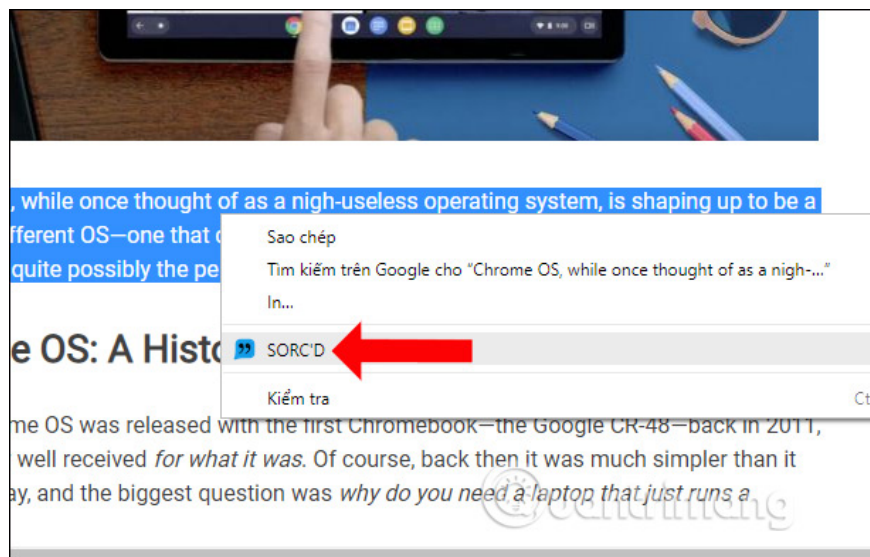

After successful registration, click on the link below to install the SORC'D Web Clipper utility for different browsers. The following article performs on Chrome, other browsers do the same.

1. Download SORC'D Web Clipper Chrome
2. Download SORC'D Web Clipper Firefox

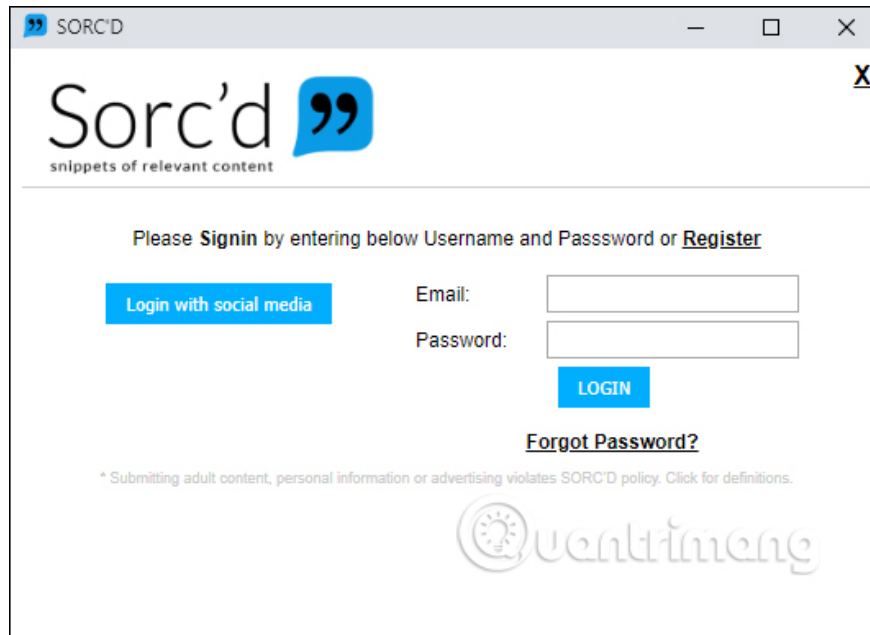

Step 2:

After the installation is complete, the website access utility wants to save the document content. Black out the text and **right-click and choose SORC'D** . Note you do not select more than 450 characters. With Vietnamese documents, when saved on the application, there will be font errors.

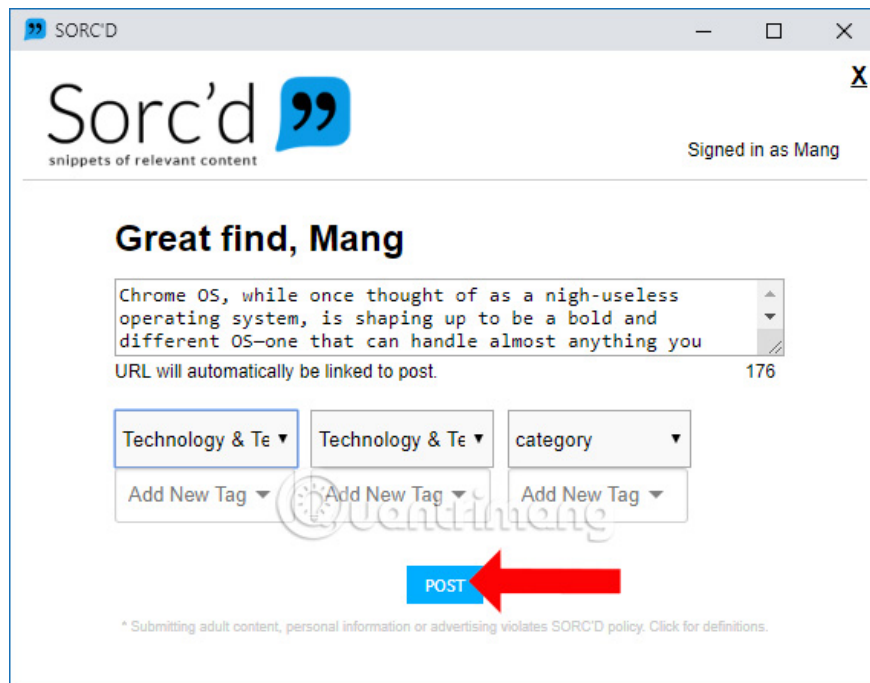

Step 3:

Now the utility will ask the user to enter the registered email address and account password.

Step 4:

Now the interface will display the selected text. We can edit the content if we want. At Category select the label for the document, up to 3 labels for the text to be easy to find. Finally **click Post** .

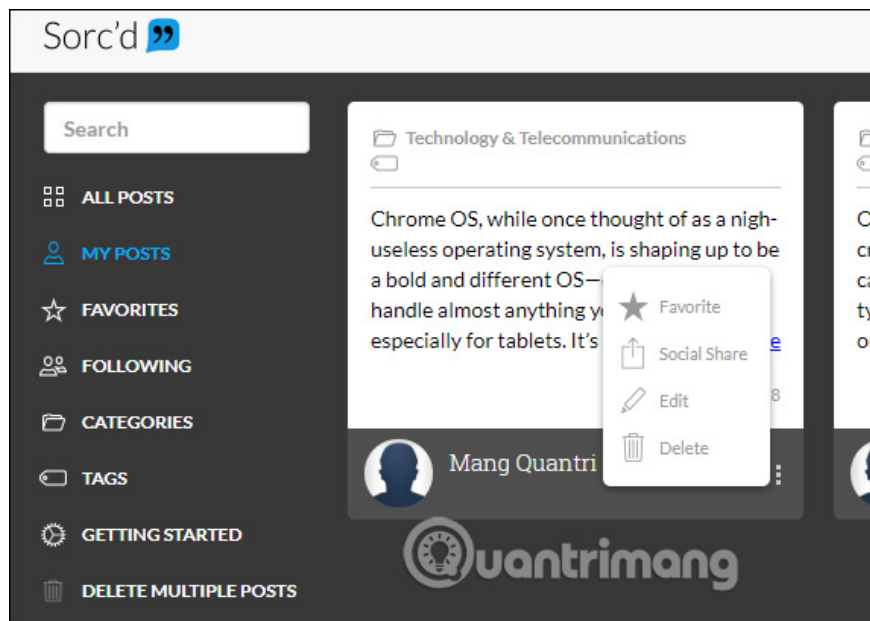

Step 5:

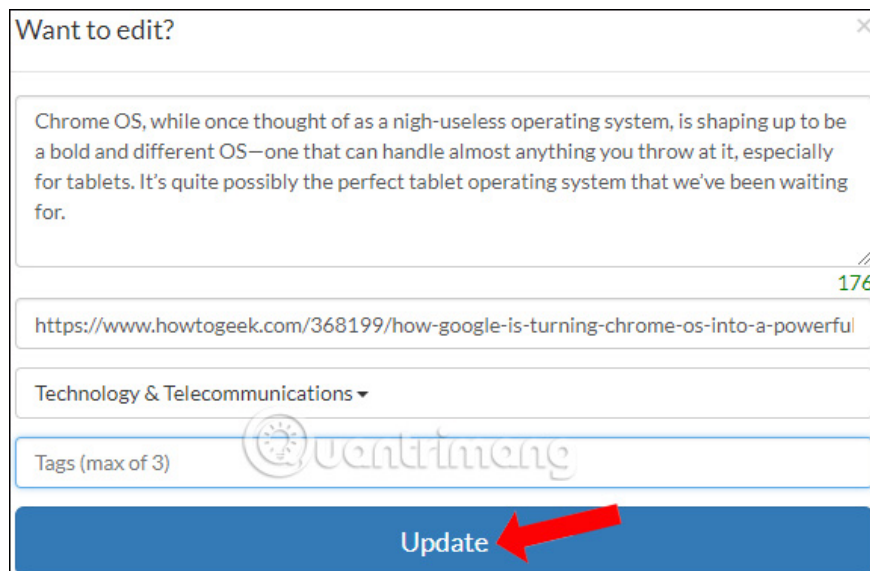

Users continue to save the content you want. Then visit the link below to go to the notes management page, access **the My Post section** .

1. <https://webapp.sorcd.com/>

Here you will see all the archived content. Clicking **the 3 dots icon** will have additional options including editing the content (Edit), marking favorites (Favorite), sharing (Social Share) or deleting posts (Delete).

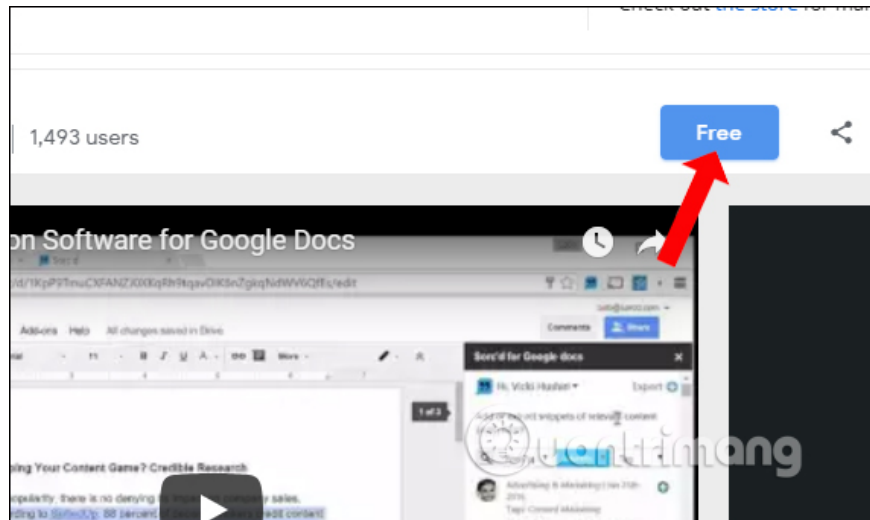

When you click on the content, it will be forwarded to the article link, or the website where you save the content.

Step 6:

In the main interface edit you can change the tag for the lesson, change the link if you want. Click **Update** if there is a change.

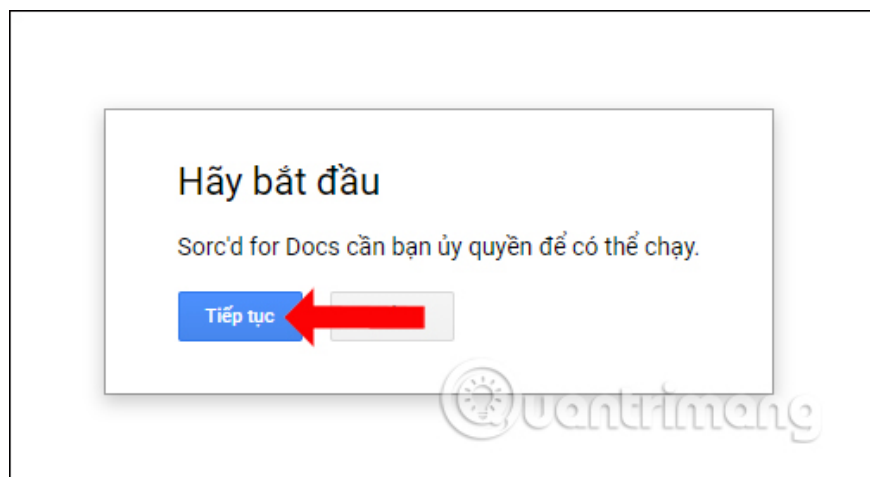

2. How to use SORC'D on Google Docs

We can access documents stored on SORC'D and add content to edit in Google Docs.

Step 1:

First, install the Google Docs extension according to the link below. Click **the Free button** to proceed to install the utility

1. Download Sorc'd for Docs utility

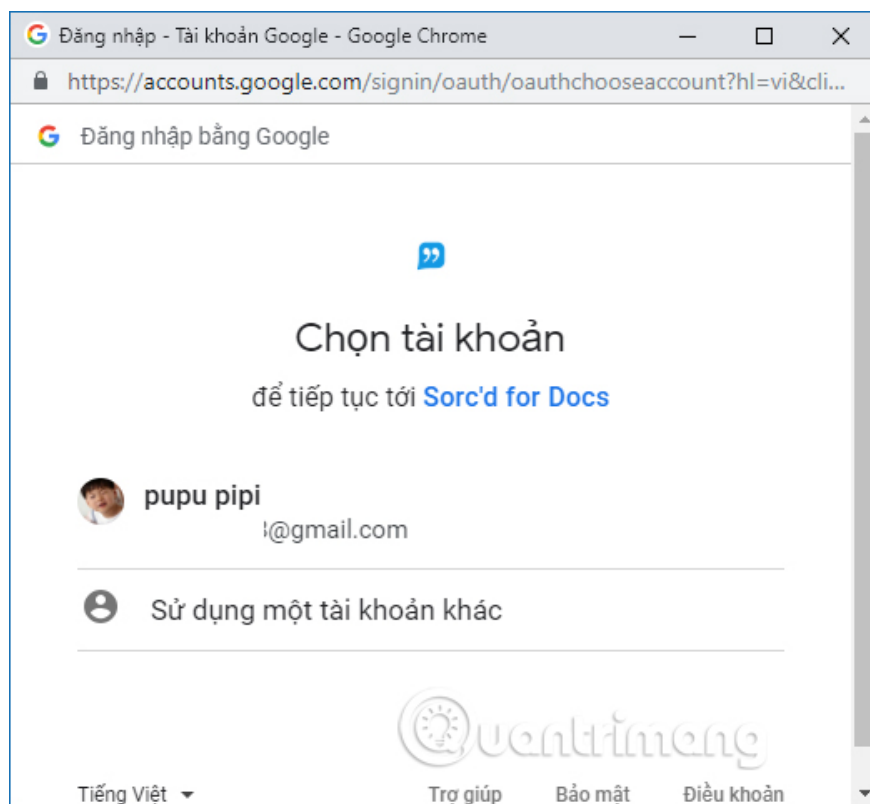

Step 2:

Now pop-up display with the request to agree to Sorc'd for Docs to access Google Docs, click **Continue** .

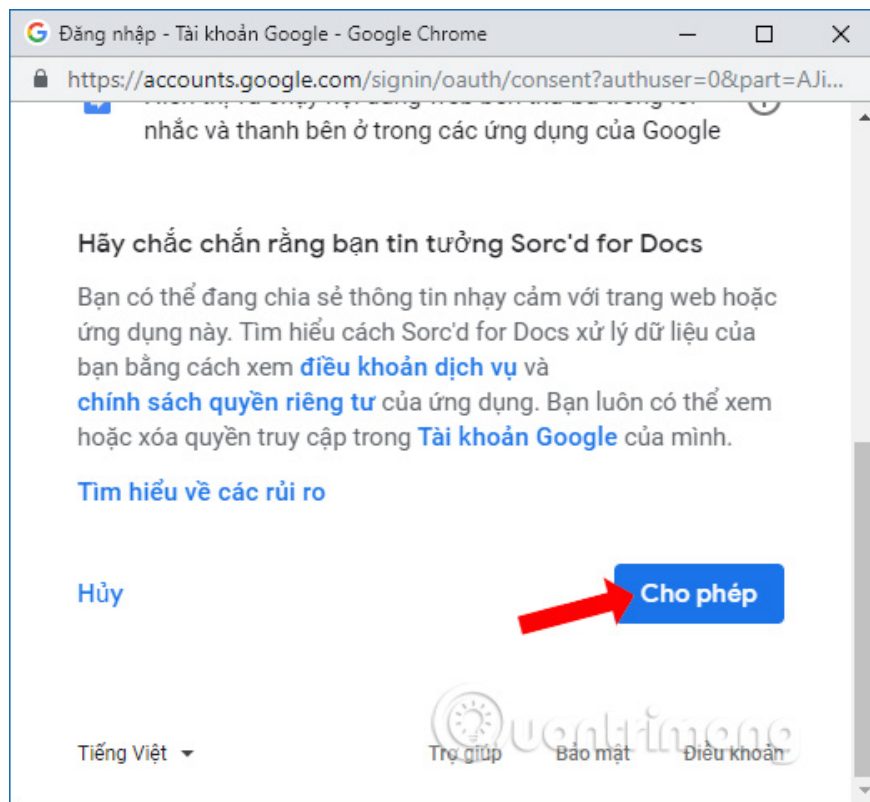

Select the account you want to use Sorcd for Docs.

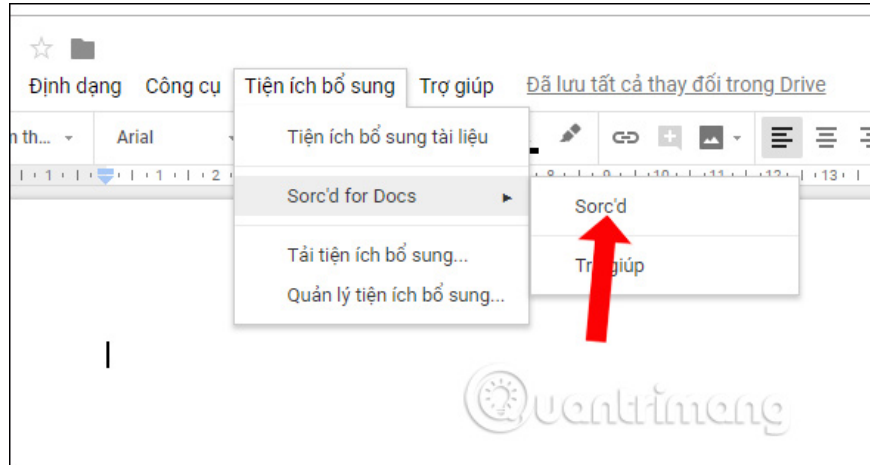

Step 3:

Users need to agree to access the account, click **Allow** .

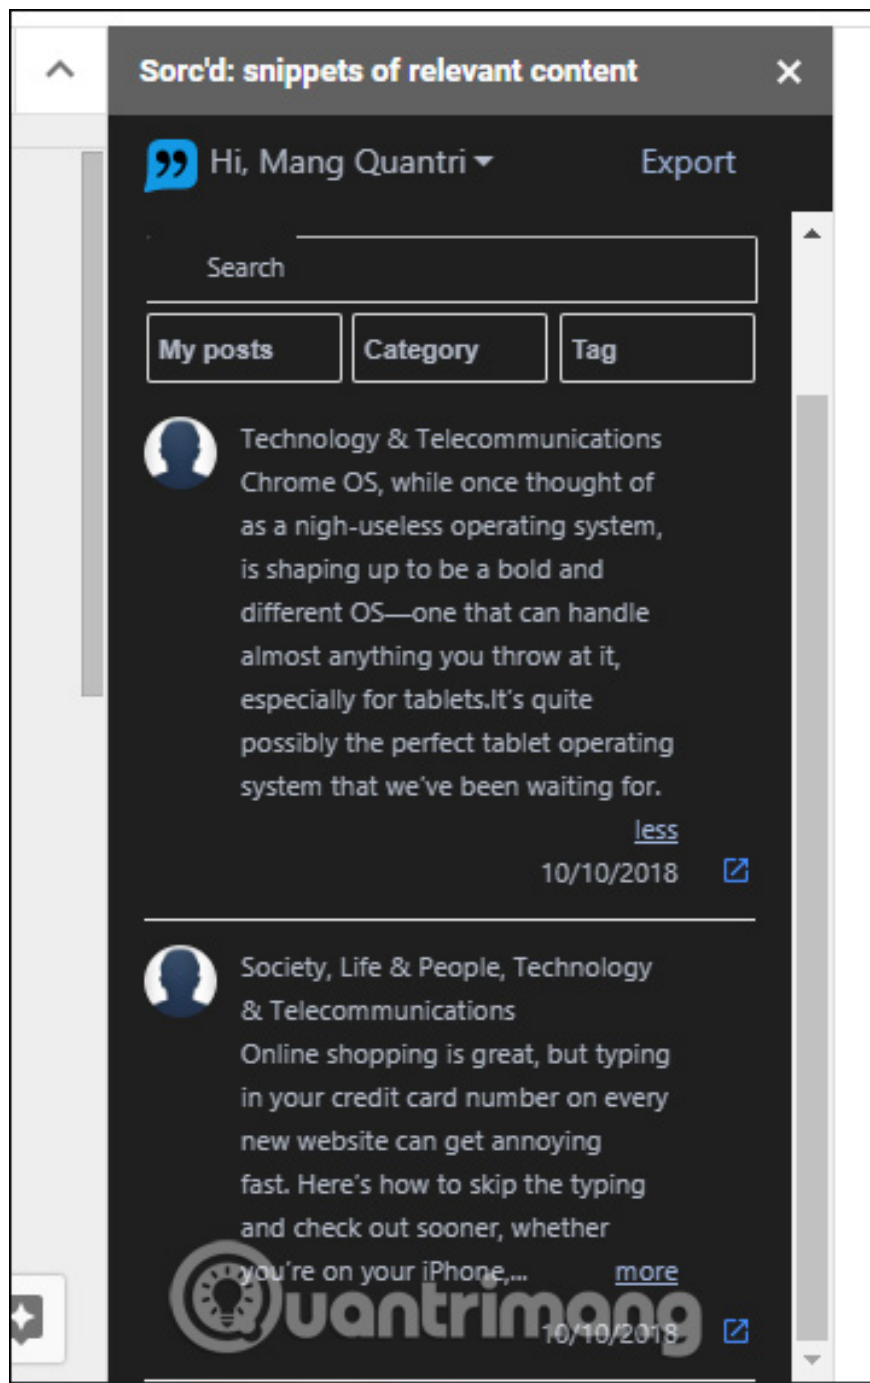

Immediately Google Docs has added Sorc'd for Docs. Click the **Add-ons** item and select **Sorc'd for Docs** , **Sorc'd** next **pick** .

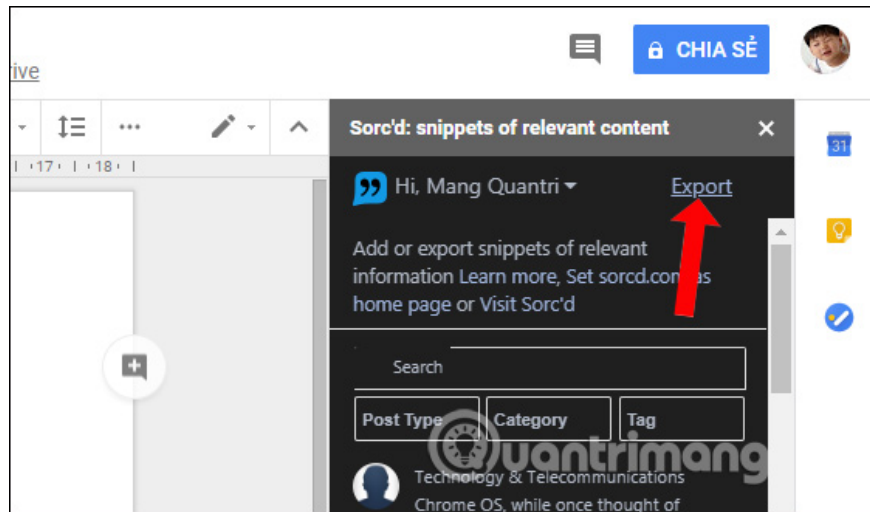

Step 4:

Sorc'd bar will appear on the left side of the interface. Find the content you want to use, then just paste the content on Google Docs.

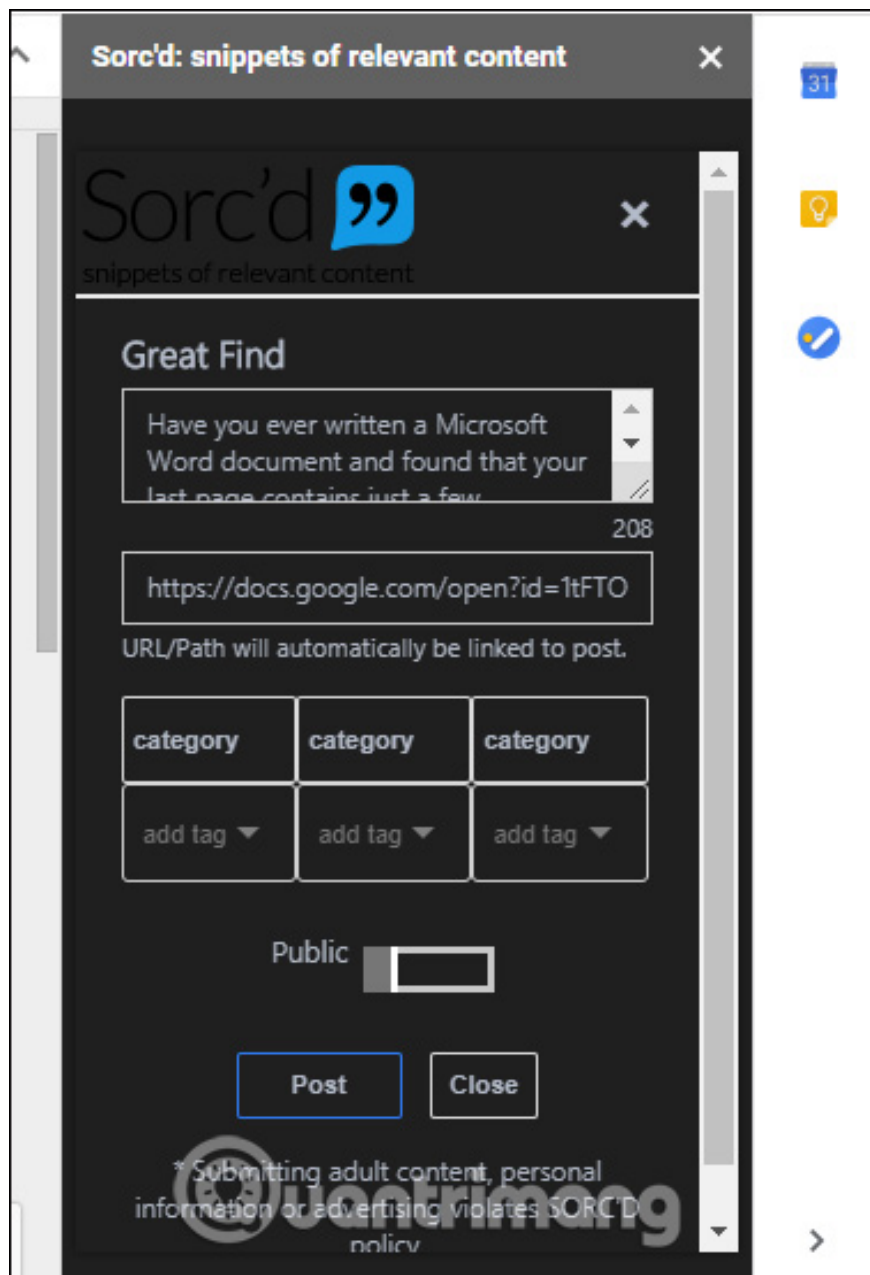

Step 5:

If you want to copy the content on Google Docs to Sorc'd, highlight the contents of the document and click **the Export button** .

Next, select the label and display mode for the document, then click **the Post button** below.

SORC'D Web Clipper brings the content management and storage on the browser, accessible at any time via SORC'D account. The service also works on Google Docs to extract content.
